Congressional Record

PROCEEDINGS AND DEBATES OF THE SIXTY-EIGHTH CONGRESS SECOND SESSION

SENATE

MONDAY, December 1, 1924

The first Monday of December being the day prescribed by the Constitution of the United States for the annual meeting of Congress, the second session of the Sixty-eighth Congress commenced this day.

The Senate assembled in its Chamber at the Capitol.

The PRESIDENT pro tempore (ALBERT B. CUMMINS, a Senator from the State of Iowa) called the Senate to order at 12 o'clock noon.

The Chaplain, Rev. J. J. Muir, D. D., of the city of Washington, offered the following prayer:

Our Father and our God, we come together to-day to enter upon the duties of high responsibility. As we look back over the past month we recognize the sadness that has shadowed and the grief that has come and the loneliness experienced because of the presence of death in connection with this body. We pray for richest consolations upon those who mourn.

Grant unto each one in connection with his duty such a sense of its dignity, such a conception of its large outlook, that there may be given to each wisdom from above and guidance in every matter of administration. The Lord our God be with the President, recognizing in him the authority by which he is surrounded. Let Thy blessing be constantly upon our Nation, and may it be exalted in righteousness. We humbly ask in the name of Jesus Christ our Lord. Amen.

CALL OF THE ROLL

The PRESIDENT pro tempore. The Clerk will call the roll to ascertain if a quorum of the Senate is present.

The reading clerk (John C. Crockett) called the roll, and the following Senators answered to their names:

Adams	Fernald	La Follette	Shipstead
Ashurst	Fess	McCormick	Shortridge
Ball	Fletcher	McKellar	Simmons
Bayard	Frazier	McKinley	Smith
Borah	George	McLean	Smoot
Brookhart	Gerry	McNary	Spencer
Broussard	Glass	Mayfield	Stanfield
Bruce	Gooding	Moses	Stanley
Bursum	Greene	Neely	Sterling
Capper	Hale	Norris	Swanson
Caraway	Harrell	Oddie	Trammell
Copeland	Harris	Overman	Underwood
Couzens	Harrison	Owen	Wadsworth
Cummins	Hedlin	Pepper	Walsh, Mass.
Curtis	Howell	Philips	Walsh, Mont.
Dial	Johnson, Minn.	Pittman	Warren
Dill	Jones, N. Mex.	Ralston	Watson
Edge	Jones, Wash.	Reed, Pa.	Weller
Edwards	Kendrick	Robinson	Wheeler
Elkins	Keyes	Sheppard	Willis
Ernst	Ladd	Shields	

Mr. FESS. The Senator from Vermont [Mr. DALE] is detained from the Senate on account of illness. He is so ill, in fact, that he can not be removed to the hospital. He will be absent from the Senate Chamber for some days to come.

Mr. ROBINSON. I wish to announce that the Senator from Missouri [Mr. REED] is necessarily absent.

Mr. HARRISON. My colleague, the junior Senator from Mississippi [Mr. STEPHENS], is necessarily absent, on account of an accident.

Mr. GERRY. I desire to announce that the junior Senator from Utah [Mr. KING] and the junior Senator from Michigan [Mr. FERRIS] are necessarily absent.

Mr. BROUSSARD. I desire to announce that my colleague [Mr. RANDELL] is absent on account of illness.

The PRESIDENT pro tempore. Eighty-three Senators have answered to their names. There is a quorum present.

ADMINISTRATION OF OATH TO NEW SENATORS

Mr. CURTIS. Mr. President, I understand there are three Senators elected or appointed to fill vacancies, that the certificates of two are on file, and that a telegram has been received from the governor of the State of the other Senator elect announcing his election. I ask unanimous consent that the credentials may be presented and the oath of office administered to these Senators.

The PRESIDENT pro tempore. The Chair may suggest to the Senator from Kansas that he takes the liberty of laying before the Senate the certificate of the appointment of WILLIAM M. BUTLER to be a Senator from the State of Massachusetts, which the Clerk will read.

The reading clerk read as follows:

THE COMMONWEALTH OF MASSACHUSETTS.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that, pursuant to the power vested in me by the Constitution of the United States and the laws of the Commonwealth of Massachusetts, I, Channing H. Cox, the governor of said Commonwealth, do hereby appoint WILLIAM M. BUTLER a Senator from said Commonwealth to represent said Commonwealth in the Senate of the United States until the vacancy therein, caused by the death of HENRY CABOT LODGE, is filled by election as provided by law.

Witness: His excellency our governor, Channing H. Cox, and our seal hereto affixed at Boston this 13th day of November, in the year of our Lord 1924.

[SEAL.]

CHANNING H. COX, Governor.

By the Governor:

FREDERICK W. COOK,
Secretary of the Commonwealth.

The PRESIDENT pro tempore. The credentials will be placed on file. The Chair also lays before the Senate the certificate of election of JESSE H. METCALF, as a Senator from the State of Rhode Island, which will be read and placed on file.

The reading clerk read as follows:

STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS

STATE RETURNING BOARD.

Be it known that JESSE H. METCALF, of Providence, in the State of Rhode Island, qualified according to the Constitution of the United States for a Senator in the Congress thereof, was by the people of said State, having the qualifications requisite for electors of the most numerous branch of the legislature thereof, on the 4th day of November, A. D. 1924, in accordance with law, elected a Senator from said State in the Congress of the United States for the unexpired term of LEBARON BRADFORD COLT, deceased, expiring March 3, A. D. 1925.

In attestation whereof, we have hereunto set our hands and caused our seal to be affixed at Providence this 17th day of November, in the year of our Lord 1924, and of the Independence of the United States of America the one hundred and forty-ninth.

[SEAL.]

JOHN W. RAMSBOTTOM,

JOSEPH F. COLE,

EARLE B. ARNOLD,

CHARLES H. SPARKS,

BENJAMIN C. SEABURY,

State Returning Board.

The PRESIDENT pro tempore. The credentials will be placed on file. The Chair also feels it to be his duty to lay

before the Senate a telegram received from the Governor of the State of Colorado and other officials of that State, which will be read and placed on file.

The reading clerk read as follows:

[Western Union telegram]

DENVER, COLO., November 29, 1924.

The PRESIDENT OF THE SENATE,

Washington, D. C.

The State canvassing board convened to-day and canvassed the votes cast at the general election held November 4 for the office of United States Senator to fill vacancy in Colorado, and a certificate of election has this day been issued to RICE W. MEANS, he having received the highest number of votes cast for said office. The certificate is being mailed you to-day.

ARTHUR M. STRONG, *State Auditor*.
WILLIAM E. SWEET, *Governor*.
WAYNE C. WILLIAM, *Attorney General*.
CARL S. MILLIKEN, *Secretary of State*.
H. E. MULNIX, *State Treasurer*.

Mr. CURTIS. I ask unanimous consent that the three Senators may be sworn in.

Mr. ROBINSON. Pending the request of the Senator from Kansas, I understand that during late years, in cases where no question is presented respecting the returns affecting the election of a Senator, it has been the practice of the Senate that the Senator elect has been sworn in upon information that the certificate has been duly made out and mailed to the President of the Senate.

Mr. CURTIS. That has been the practice.

Mr. ROBINSON. My information is that no question has arisen respecting the election of the junior Senator from Colorado, and therefore I make no objection to the request of the Senator from Kansas.

The PRESIDENT pro tempore. The Senator from Kansas asks unanimous consent that the Senators whose certificates of appointment or election have been laid before the Senate be now sworn in. Is there objection? The Chair hears none, and these Senators will present themselves at the desk and take the oath of office.

Mr. BUTLER escorted by Mr. WALSH of Massachusetts, Mr. MEANS escorted by Mr. PHIPPS, and Mr. METCALF escorted by Mr. GERRY advanced to the Vice President's desk, and, the oath prescribed by law having been administered to them, they took their seats in the Senate.

LIST OF SENATORS BY STATES

Alabama.—Oscar W. Underwood and J. Thomas Heflin.
Arizona.—Henry F. Ashurst and Ralph H. Cameron.
Arkansas.—Joseph T. Robinson and Thaddeus H. Caraway.
California.—Hiram W. Johnson and Samuel M. Shortridge.
Colorado.—Lawrence C. Phipps and Rice W. Means.

Virginia.—Claude A. Swanson and Carter Glass.
Washington.—Wesley L. Jones and C. C. Dill.
West Virginia.—Davis Elkins and M. M. Neely.
Wisconsin.—Robert M. La Follette and Irvine L. Lenroot.
Wyoming.—Francis E. Warren and John B. Kendrick.

NOTIFICATION TO THE HOUSE

Mr. CURTIS submitted the following resolution (S. Res. 259), which was read, considered by unanimous consent, and agreed to:

Resolved, That the Secretary inform the House of Representatives that a quorum of the Senate is assembled and that the Senate is ready to proceed to business.

NOTIFICATION TO THE PRESIDENT

Mr. CURTIS submitted the following resolution (S. Res. 260), which was read, considered by unanimous consent, and agreed to:

Resolved, That a committee consisting of two Senators be appointed to join such committee as may be appointed by the House of Representatives to wait upon the President of the United States and inform him that a quorum of each House is assembled, and that the Congress is ready to receive any communication he may be pleased to make.

The PRESIDENT pro tempore appointed Mr. CURTIS and Mr. ROBINSON as the committee on the part of the Senate.

HOOR OF DAILY MEETING

Mr. CURTIS submitted the following resolution (S. Res. 261), which was read, considered by unanimous consent, and agreed to:

Resolved, That the hour of daily meeting of the Senate be 12 o'clock meridian until otherwise ordered.

DEATH OF SENATOR LEBARON B. COLT

Mr. GERRY. Mr. President, it is my sad duty to announce to the Senate the death of my late colleague Senator LEBARON B. COLT. This is not the proper time and occasion for a fitting testimonial to be offered to his memory. At a later date during this session I shall ask that a day be set aside upon which proper tributes may be paid to the life, character, and public services of Senator COLT. I now send to the desk a resolution, and ask unanimous consent for its immediate consideration.

The resolution (S. Res. 262) was read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with deep regret and profound sorrow the announcement of the death of the Hon. LEBARON B. COLT, late a Senator from the State of Rhode Island.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

DEATH OF SENATOR FRANK B. BRANDEGEE

Mr. McLEAN. Mr. President, I submit a resolution, relative to the death of my late colleague, Mr. BRANDEGEE. I ask to have the resolution read by the Secretary, and immediately considered.

The resolution (S. Res. 263) was read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with deep regret and profound sorrow the announcement of the death of the Hon. FRANK B. BRANDEGEE, late a Senator from the State of Connecticut.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

DEATH OF SENATOR HENRY CABOT LODGE

Mr. WALSH of Massachusetts. Mr. President, it is my sad duty formally to announce to the Senate that on Sunday, November 9 last, my late colleague, Hon. HENRY CABOT LODGE, died following a brief illness at the Charlesgate Hospital, in Cambridge, Mass.

For 37 years Senator LODGE represented Massachusetts without a break in the continuity of his service in the Congress of the United States. His career in the House of Representatives covered three terms, and he was a Member of this body for 31 years.

He was for years the foremost figure in the dominant political party of Massachusetts, and in recent years he was, if not indeed the foremost figure, one of the foremost figures in the Congress of the United States.

When death came he was the majority party leader in this Chamber, the senior Senator in years of continuous service, and one of the ablest and best known, nationally and internationally, of any Member of the United States Congress. Truly an exalted position has been made vacant by his death. The life of one of the great leaders and statesmen of our day in America has ended.

This, however, is not the occasion to undertake to review the career of this statesman and scholar. At the proper time I shall ask the Senate to set aside a day upon which proper tribute may be paid to his memory.

I now submit the resolution which I send to the desk, and ask unanimous consent for its immediate consideration.

The resolution (S. Res. 264) was read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with deep regret and profound sorrow the announcement of the death of the Hon. HENRY CABOT LODGE, late a Senator from the State of Massachusetts.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

ADJOURNMENT

Mr. WALSH of Massachusetts. Mr. President, as a further mark of respect to the memory of our three deceased colleagues, Senator LODGE, of Massachusetts, Senator BRANDEGEE, of Connecticut, and Senator COLT, of Rhode Island, I move that the Senate do now adjourn.

The motion was unanimously agreed to; and (at 12 o'clock and 21 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, December 2, 1924, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

MONDAY, December 1, 1924

This being the day fixed by the Constitution for the annual meeting of the Congress of the United States, the House of Representatives of the Sixty-eighth Congress met in its Hall at 12 o'clock noon for its second session and was called to order by the Speaker, Hon. FREDERICK H. GILLET, a Representative from the State of Massachusetts.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Almighty God, Thy mercy is from everlasting to everlasting and Thy goodness endureth from generation to generation. We wait upon Thee at the threshold of this Congress. We offer Thee the expressions of our grateful hearts for Thy providential care, for the fruitage of field and orchard, and for the peace and prosperity of our land. Bless and be gracious and merciful unto our President and his household; the Speaker, the Members, the officers, and the pages, and all who serve. O Lord, our Lord, these days, so momentous, do Thou make us strong by the sense of Thy strength, wise by the sense of Thy wisdom and good by the sense of Thy goodness. In the solution of all problems O let the inspiration of Thy truth never fail us. Suffer not our hearts to languish, nor our souls to fear, but undismayed may we always seek to do our whole duty to our country and to the institutions which were founded to perpetuate our national greatness. Come, Heavenly Father of us all, and manifest Thy favor in the form of enlightened understanding and thus shall great contentment, equal justice, and deeper righteousness bless every section and comfort every fireside. Day by day with sweet, obedient, and un murmuring toil may we do our whole duty.

We breathe to Thee, O God, "Thy will be done." There are those of us who have passed beyond the veil that hides mortality from immortality. Some dear ones are looking out upon the world to-day with saddened hearts and wondering eyes. Come, blessed Lord, unto them and give them great peace. Through Jesus Christ our Lord. Amen.

CALL OF THE ROLL

The SPEAKER. The Clerk will call the roll of Members by States.

The roll was called and the following Members answered to their names:

John McDuffie.
Lister Hill.
Henry B. Steagall.

The SPEAKER. Three hundred and seventy Members have answered to their names. A quorum is present. Members elect who desire to take the oath of office will come forward.

The following Members appeared before the bar of the House and took the oath of office prescribed by law:

U. S. GUYER, from the second district of Kansas.

STEPHEN W. GAMBRILL, from the fifth district of Maryland.

ROBERT LEACH, from the fifteenth district of Massachusetts.

THOMAS HALL, from the second district of North Dakota.

NOTIFICATION TO THE PRESIDENT

Mr. LONGWORTH. Mr. Speaker, I offer the following resolution.

The Clerk read as follows:

House Resolution 356

Resolved, That a committee of three Members be appointed on the part of the House to join the committee appointed by the Senate to wait upon the President and inform him that a quorum of the two Houses has assembled and that Congress is ready to receive any communication that he may be pleased to make.

The resolution was agreed to.

The SPEAKER appointed the following committee: Mr. LONGWORTH, Mr. GREEN, and Mr. GARRETT of Tennessee.

RESIGNATION OF A MEMBER

The SPEAKER laid before the House the following communication:

AUGUST 28, 1924.

The CLERK, HOUSE OF REPRESENTATIVES,

Washington, D. C.

DEAR SIR: Quite a long time ago I forwarded a formal resignation of my seat in Congress to Gov. R. A. Nestos, Bismarck, N. Dak., to take effect on September 2, 1924.

Yours, respectfully,

GEORGE M. YOUNG.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, one of its clerks, announced that the Senate had passed without amendment the bill of the following title:

H. R. 3537. An act for the relief of L. A. Scott.

The message also announced that the Senate had passed the following resolutions:

Senate Resolution 259

Resolved, That the Secretary inform the House of Representatives that a quorum of the Senate is assembled and that the Senate is ready to proceed to business.

Senate Resolution 260

Resolved, That a committee consisting of two Senators be appointed to join such committee as may be appointed by the House of Representatives to wait upon the President of the United States and inform him that a quorum of each House is assembled, and that the Congress is ready to receive any communication he may be pleased to make.

Senate Resolution 262

Resolved, That the Senate has heard with deep regret and profound sorrow the announcement of the death of the Hon. LEBARON B. COLT, late a Senator from the State of Rhode Island.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Senate Resolution 263

Resolved, That the Senate has heard with deep regret and profound sorrow the announcement of the death of the Hon. FRANK B. BRANDGEE, late a Senator from the State of Connecticut.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Senate Resolution 264

Resolved, That the Senate has heard with deep regret and profound sorrow the announcement of the death of the Hon. HENRY CABOT LODGE, late a Senator from the State of Massachusetts.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

NOTIFICATION TO THE SENATE

Mr. GREEN. Mr. Speaker, I offer the following resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

House Resolution 357

Resolved, That the Clerk of the House inform the Senate that a quorum of the House of Representatives has appeared and that the House is ready to proceed to business.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

HOUR OF DAILY MEETING

Mr. SNELL. Mr. Speaker, I offer the following resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

House Resolution 358

Resolved, That until otherwise ordered, the hour of daily meeting of the House of Representatives shall be 12 o'clock meridian.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

LEAVES OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. DREWRY, for two days, on account of sickness.

To Mr. OLIVER of Alabama, at the request of Mr. BOWLING, on account of illness.

To Mr. CORNING, for an indefinite period, on account of illness.

To Mr. COLTON, for five days, on account of important business.

To Mr. KAHN, indefinitely, on account of illness.

To Mr. MCCLINTIC, at the request of Mr. McKEOWN, on account of illness.

MEMORIAL SERVICES FOR THE LATE WOODROW WILSON, A FORMER PRESIDENT OF THE UNITED STATES

Mr. GARRETT of Tennessee. Mr. Speaker, I ask unanimous consent for the present consideration of the following House concurrent resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

House Concurrent Resolution 30

Resolved, by the House of Representatives (the Senate concurring), That Monday, the 15th day of December, 1924, be set aside as the day upon which there shall be held a joint session of the Senate

and the House of Representatives for appropriate exercises in commemoration of the life, character, and public service of the late Woodrow Wilson, former President of the United States.

That a joint committee, to consist of five Senators and seven Members of the House of Representatives, to be appointed by the President pro tempore of the Senate and the Speaker of the House of Representatives, respectively, shall be named, with full power to make all arrangements and publish a suitable program for the joint session of Congress herein authorized, and to issue the invitations hereinafter mentioned.

That invitations shall be extended to the President of the United States, the members of the Cabinet, the Chief Justice and Associate Justices of the Supreme Court of the United States, and such other invitations shall be issued as to the said committee shall seem best.

That all expenses incurred by the committee in the execution of the provisions of this resolution shall be paid, one-half from the contingent fund of the Senate and one-half from the contingent fund of the House of Representatives.

The SPEAKER. The question is on agreeing to the House concurrent resolution.

The concurrent resolution was agreed to.

THE LATE REPRESENTATIVE EDWARD C. LITTLE

Mr. ANTHONY. Mr. Speaker, it becomes my painful duty to announce the death of my late colleague, Mr. EDWARD C. LITTLE, on June 27 last. At a later date I shall ask that a day be set aside for appropriate memorial services upon his life, character, and public services. Meanwhile I offer the following resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

House Resolution 359

Resolved, That the House has heard with profound sorrow of the death of Hon. EDWARD CAMPBELL LITTLE, a Representative from the State of Kansas.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

THE LATE REPRESENTATIVE SYDNEY E. MUDD

Mr. ZIHLMAN. Mr. Speaker, it is with a profound sense of personal sorrow that I rise to announce the death of my late colleague, Hon. SYDNEY E. MUDD, of Maryland, who died October 11, of this year, in his thirty-ninth year. At a subsequent date I shall ask that a day be set aside for the pronouncement of eulogies upon his life, character, and public services. Meanwhile I offer the following resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

House Resolution 360

Resolved, That the House has heard with profound sorrow of the death of Hon. SYDNEY E. MUDD, late a Representative from the State of Maryland.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

THE LATE REPRESENTATIVE WILLIAM S. GREENE

Mr. WINSLOW. Mr. Speaker, during the recess of Congress the Hon. WILLIAM S. GREENE, a Member of the House from the State of Massachusetts, died. In due time I shall ask that a day be set aside for public memorial services in his honor by this body. Meanwhile I offer the following resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

House Resolution 361

Resolved, That the House has heard with profound sorrow of the death of Hon. WILLIAM STEDMAN GREENE, a Representative from the State of Massachusetts.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

THE LATE SENATOR LEBARON B. COLT

Mr. ALDRICH. Mr. Speaker, it is with a very deep sorrow that I announce the death of Hon. LEBARON B. COLT, late a Senator from the State of Rhode Island, on the 18th day of

August, 1924. I offer the following resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

House Resolution 362

Resolved, That the House has heard with profound sorrow of the death of the Hon. LeBaron Bradford Colt, late a Senator of the United States from the State of Rhode Island.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased Senator.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

THE LATE SENATOR FRANK B. BRANDEGEE

Mr. TILSON. Mr. Speaker, it is with a sense of deep sorrow that I announce to the House the death of the Hon. FRANK B. BRANDEGEE, late a Senator of the United States from the State of Connecticut, who died on the 13th of October, 1924. I offer the following resolution, which I send to the desk and ask to have read.

The Clerk read as follows:

House Resolution 363

Resolved, That the House has heard with profound sorrow of the death of the Hon. FRANK BRISWORTH BRANDEGEE, a Senator of the United States from the State of Connecticut.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased Senator.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

THE LATE SENATOR HENRY CABOT LODGE

Mr. TREADWAY. Mr. Speaker, it is with a sense of very great sorrow that I announce the death of the Hon. HENRY CABOT LODGE, late a Senator from the State of Massachusetts. I offer the following resolution, which I send to the desk.

The Clerk read as follows:

House Resolution 364

Resolved, That the House has heard with profound sorrow of the death of the Hon. HENRY CABOT LODGE, a Senator of the United States from the State of Massachusetts.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased Senator.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

ADJOURNMENT

Mr. LONGWORTH. Mr. Speaker, as a further mark of respect to the memory of the deceased Members of the House and Senate, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 12 o'clock and 55 minutes p. m.) the House adjourned until to-morrow, Tuesday, December 2, 1924, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

556. A letter from the Acting Secretary of Commerce, transmitting a complete set of General Rules and Regulations prescribed by the board of supervising inspectors, Steamboat-Inspection Service, at the meeting of January, 1924, which regulations have been approved by the Secretary of Commerce; to the Committee on the Merchant Marine and Fisheries.

557. A letter from the Secretary of War, transmitting annual report of the American National Red Cross; to the Committee on Military Affairs.

558. A letter from the secretary of the United States Civil Service Commission, transmitting a statement showing the typewriters, adding machines, and other similar labor-saving devices exchanged in part payment for new machines during the fiscal year 1924, as required by section 5 of the deficiency act approved March 4, 1915; to the Committee on Appropriations.

559. A letter from the Acting Secretary of War, transmitting report of The Adjutant General of the Army relative to the financial and other affairs of the United States Disciplinary Barracks at Fort Leavenworth, Kans., the Pacific branch thereof situated on Alcatraz Island, Calif., and the Atlantic branch on Governors Island, N. Y., together with reports from the commandants of the barracks and its branches, all for the

fiscal year ended June 30, 1924; to the Committee on Military Affairs.

560. A letter from the Acting Secretary of Commerce, transmitting part 2 of the Annual Report of the Commissioner of Lighthouses for the fiscal year ended June 30, 1924, containing a list of purchases made by private contract or in the open market, with the reasons for such method of purchases, during the fiscal year 1924, of materials and supplies for the use of the Lighthouse Service; to the Committee on Interstate and Foreign Commerce.

561. A letter from the Acting Secretary of Commerce, transmitting a detailed statement concerning the publications issued by the Department of Commerce during the fiscal year 1924; to the Committee on Printing.

562. A letter from the Acting Secretary of Labor, transmitting statement of travel performed by officers and employees of the Department of Labor during the fiscal year ended June 30, 1924, in conformity with section 4 of the act approved May 22, 1908 (Stat. 224); to the Committee on Appropriations.

563. A letter from the chairman of the United States Shipping Board, transmitting statement of travel performed by officers and employees of the United States Shipping Board during the fiscal year ended June 30, 1924; to the Committee on Appropriations.

564. A letter from the Clerk of the House of Representatives, transmitting list of reports to be made to Congress by public officers during the Sixty-eighth Congress (H. Doc. No. 462); to the Committee on Accounts and ordered to be printed, with papers.

565. A letter from the Clerk of the House of Representatives, transmitting annual report, giving names of statutory and contingent-fund employees of the House and their respective compensations, including clerks to Members; the expenditures from the contingent fund and from certain specific appropriations; the amounts drawn from the Treasury; the stationery accounts; and unexpended balances for the year ended June 30, 1924 (H. Doc. No. 399); to the Committee on Accounts and ordered to be printed, with papers.

566. A letter from the Secretary of the Smithsonian Institution, transmitting a report of Government publications issued during the fiscal year ended June 30, 1924, showing the aggregate number of publications, the cost of paper and printing, the cost of preparation of each publication, and the number of each which was distributed during the fiscal year; to the Committee on Printing.

567. A letter from the Secretary of the Smithsonian Institution, transmitting information regarding purchases of typewriters in which exchanges were made in part payment by the Government branches under the direction of the Institution during the fiscal year ended June 30, 1924; to the Committee on Appropriations.

568. A letter from the Secretary of the Smithsonian Institution, transmitting statement showing in detail what officers and employees of the branches of the Government service under the direction of the Smithsonian Institution have traveled on official business from Washington to points outside of the District of Columbia during the fiscal year ended June 30, 1924; to the Committee on Appropriations.

569. A letter from the Director of the United States Botanic Garden, transmitting certain information required by section 4, act of May 22, 1908, relative to travel from Washington, D. C., in connection with official business of the office of the United States Botanic Garden during the fiscal year 1924; to the Committee on the Library.

570. A letter from the Secretary of War, transmitting a comprehensive plan for necessary permanent construction at military posts, including Camp Lewis, in the State of Washington, based on using funds received from the sale of surplus War Department real estate, and for the sale of such property now owned by the War Department that is no longer needed for military purposes; to the Committee on Military Affairs.

571. A letter from the chairman of the Interstate Commerce Commission, transmitting copies of the final valuations of properties of 20 carriers subject to the provisions of section 192 of the Interstate commerce act; to the Committee on Interstate and Foreign Commerce.

572. A letter from the chairman of the Interstate Commerce Commission, transmitting statement showing the make, model, and serial number of each machine exchanged during the fiscal year 1924, the period of its use, the allowance therefor, and the article, make, and model thereof, and price, including exchange value paid for each article procured through such exchange, in compliance with the provisions of section 5 of the act approved March 4, 1915; to the Committee on Appropriations.

573. A letter from the chairman of the Interstate Commerce Commission, transmitting a statement showing in detail the travel expense of all officials and employees (other than special agents, inspectors, or employees who in the discharge of their regular duties are required to constantly travel) who have traveled on official business from Washington to points outside the District of Columbia during the fiscal year ended June 30, 1924; to the Committee on Appropriations.

574. A letter from the chairman of the Interstate Commerce Commission, transmitting statement showing the employment under appropriation for the valuation of carriers for the fiscal year ended June 30, 1924, the names of all persons employed, alphabetically arranged, the State from which each was appointed, the rate of compensation paid to each, together with a full itemized statement showing how the moneys appropriated for the fiscal years 1913, 1914, 1915, 1916, 1917, 1918, 1919, 1920, 1921, 1922, 1923, and 1924 have been expended; to the Committee on Appropriations.

575. A letter from the Secretary of the Navy, transmitting a statement showing in detail what officers and employees of the Navy Department traveled on official business from Washington to points outside of the District of Columbia during the fiscal year ended June 30, 1924, with destination or destinations of such travel, business, or work on which same was made, and the amount of reimbursement for travelling expenses in each case; to the Committee on Appropriations.

576. A letter from the acting president of the Board of Commissioners of the District of Columbia, transmitting a report of the official operations of the government of the District of Columbia for the fiscal year ended June 30, 1924; to the Committee on the District of Columbia.

577. A letter from the Acting Postmaster General, transmitting report of a special contract between the Post Office Department and the Denver & Salt Lake Railroad for carrying the mails on its road on route No. 114773 between Denver and Craig, Colo.; to the Committee on Expenditures in the Post Office Department.

578. A letter from the chairman of Federal Trade Commission, transmitting report of the Federal Trade Commission on cooperation in foreign countries; to the Committee on Interstate and Foreign Commerce.

579. A letter from the Secretary of the Navy, transmitting statements showing exchanges made during the fiscal year ended June 30, 1924, of typewriters, adding machines, and other similar labor-saving devices by the Navy Department and Naval Establishments, including the United States Marine Corps; to the Committee on Appropriations.

580. A letter from the chairman of the United States Shipping Board, transmitting the Eighth Annual Report of the United States Shipping Board, covering the period June 30, 1923, to and including June 30, 1924; to the Committee on the Merchant Marine and Fisheries.

581. A letter from the Secretary of the Federal Trade Commission, transmitting a statement showing the number of typewriters, adding machines, and other similar labor-saving devices exchanged by the Federal Trade Commission during the fiscal year ended June 30, 1924; to the Committee on Appropriations.

582. A letter from the Secretary of War, transmitting report of the expenditure of \$128,742.80 out of the sum of \$150,000 included in the Army appropriation act for the fiscal year 1924 for the encouragement of the breeding of riding horses suitable for military service; to the Committee on Appropriations.

583. A letter from the Secretary of War, transmitting report covering the number and cost of publications issued and distributed by the Panama Canal during the fiscal year ended June 30, 1924; to the Committee on Printing.

584. A letter from the Secretary of War, transmitting a letter from The Adjutant General of the Army submitting report of documents received and distributed during the fiscal year ended June 30, 1924; to the Committee on Printing.

585. A letter from the Acting Secretary of War, transmitting report covering the disposal of surplus property in the possession of the War Department within the United States during the period from November 15, 1923, to November 15, 1924, inclusive; to the Committee on Expenditures in the War Department.

586. A letter from the Secretary of the Interior, transmitting report covering all operations, including receipts and disbursements, required by a provision of the war minerals relief act; to the Committee on Mines and Mining.

587. A letter from the Architect of the Capitol, transmitting annual report of the Architect of the Capitol for the fiscal year ended June 30, 1924 (H. Doc. No. 463); to the Committee on Public Buildings and Grounds and ordered to be printed.

588. A letter from the Comptroller of the Currency, transmitting annual report of the Comptroller of the Currency, covering activities of the Currency Bureau for the year ended October 31, 1924; to the Committee on Banking and Currency.

589. A letter from the Postmaster General, transmitting annual report of operations of the Postal Savings System for the fiscal year ended June 30, 1924, of the Post Office Department (H. Doc. No. 464); to the Committee on the Post Office and Post Roads and ordered to be printed.

590. A letter from the Secretary of the Treasury, transmitting a report in detail giving the number of the various publications issued by the Treasury Department during the fiscal year ended June 30, 1924; to the Committee on Printing.

591. A letter from the Acting Postmaster General, transmitting statement showing the post offices where clerical assistance at a higher rate than \$1,200 a year was authorized, payable from the appropriation for "Unusual conditions," for the fiscal year 1924; to the Committee on Appropriations.

592. A letter from the Secretary of War, transmitting a draft of proposed legislation to authorize the removal of the gates and gateposts at the head of West Executive Avenue, in the District of Columbia; to the Committee on Public Buildings and Grounds.

593. A letter from the Acting Secretary of Labor, transmitting report of expenditures from the appropriation contingent expenses, Department of Labor, for the fiscal years 1922, 1923, 1924, and 1925; to the Committee on Expenditures in the Department of Labor.

594. A letter from the Secretary of the United States Civil Service Commission, transmitting a statement showing in detail what officers or employees of the commission have traveled on official business from Washington to points outside of the District of Columbia during the fiscal year ended June 30, 1924, the destination of such travel, the business on account of which the travel was performed, and the total expense charged the United States in each case; to the Committee on Appropriations.

595. A letter from the Librarian of the Library of Congress, transmitting a statement showing in detail what officers or employees of the Library of Congress have traveled on official business from Washington to points outside of the District of Columbia during the fiscal year 1924, giving in each case the full title of the official, the destination or destinations of such travel, the business or work on account of which the same was made, and the total expenses to the United States charged in each case; to the Committee on Appropriations.

596. A letter from the Librarian of the Library of Congress, transmitting a report giving the aggregate number of publications issued by the Library of Congress proper during the fiscal year 1923-24, the cost of paper used, the cost of printing, the cost of preparation, and the number distributed; to the Committee on Printing.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. YATES: Committee on the Judiciary. H. R. 6491. A bill to provide for the appointment of an additional judge of the District Court of the United States for the Western District of New York; without amendment (Rept. No. 1031). Referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. JOHNSON of Washington: A bill (H. R. 9803) to amend the immigration act of 1917, and for other purposes; to the Committee on Immigration and Naturalization.

By Mr. CRISP: A bill (H. R. 9804) to amend an act entitled "An act to create a commission authorized under certain conditions to refund or convert obligations of foreign governments held by the United States of America, and for other purposes," approved February 9, 1922, as amended February 28, 1923; to the Committee on Ways and Means.

By Mr. CHINDBLOM: A bill (H. R. 9805) to amend section 257 of the revenue act of 1924; to the Committee on Ways and Means.

By Mr. FAIRCHILD: A bill (H. R. 9806) to repeal subdivision (b) of section 257 of the revenue act of 1924; to the Committee on Ways and Means.

By Mr. FULLER: A bill (H. R. 9807) relating to pensions of the Civil War, and granting pensions and increase of pensions in certain cases; to the Committee on Invalid Pensions.

By Mr. GIFFORD: A bill (H. R. 9808) to remit the duty on a carillon of bells imported for St. Stephens Church, Cohasset, Mass.; to the Committee on Ways and Means.

By Mr. GRIEST: A bill (H. R. 9809) to amend section 409, Revised Statutes of the United States, relating to fines, penalties, forfeitures, and liabilities in the Postal Service; to the Committee on the Post Office and Post Roads.

By Mr. HAWES: A bill (H. R. 9810) to repeal an act entitled "An act to define, regulate, and punish trading with the enemy, and for other purposes," approved October 6, 1917, as amended; to the Committee on Interstate and Foreign Commerce.

By Mr. HOWARD of Oklahoma: A bill (H. R. 9811) to amend section 101 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911; to the Committee on the Judiciary.

By Mr. KINDRED: A bill (H. R. 9812) to declare Lincoln's birthday a legal holiday; to the Committee on the District of Columbia.

By Mr. KNUTSON: A bill (H. R. 9813) to amend an act entitled "An act to provide revenue, to regulate commerce with foreign countries, to encourage the industries of the United States, and for other purposes," approved September 21, 1922; to the Committee on Ways and Means.

By Mr. O'CONNELL of New York: A bill (H. R. 9814) granting annual and sick leave to postal employees; to the Committee on the Post Office and Post Roads.

By Mr. PERLMAN: A bill (H. R. 9815) to amend the immigration act of 1924; to the Committee on Immigration and Naturalization.

By Mr. RAKER: A bill (H. R. 9816) to amend the act of June 29, 1906 (34 Stat. L. pt. 1, p. 596), as amended in sections 16, 17, and 19 by the act of Congress approved March 4, 1909 (35 Stat. L. pt. 1, p. 839); by the act of Congress approved March 4, 1913 (37 Stat. L. pt. 1, p. 736), creating the Department of Labor; by the act of Congress approved May 9, 1918 (Pub. No. 144, 65th Cong., 2d sess.); and by the act of Congress approved September 22, 1922 (U. S. Stats. pt. 1, ch. 411, p. 1021, 67th Cong., 2d sess.); to the Committee on Immigration and Naturalization.

By Mr. WATKINS: A bill (H. R. 9817) to provide for the deportation of certain undesirable aliens, and for other purposes; to the Committee on Immigration and Naturalization.

By Mr. WATSON: A bill (H. R. 9818) to amend section 257 of the revenue act of 1924; to the Committee on Ways and Means.

By Mr. WEFALD: A bill (H. R. 9819) providing for a per capita payment of \$100 to each enrolled member of the Chippewa Tribe of Minnesota from the funds standing to their credit in the Treasury of the United States; to the Committee on Indian Affairs.

By Mr. WILSON of Louisiana: A bill (H. R. 9820) granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a bridge across the Bayou Bartholomew at or near each of the following-named points in Morehouse Parish, La.: Vester Ferry, War Ferry, and Zachery Ferry; to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 9821) granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a bridge across the Ouachita River at or near Monroe, La.; to the Committee on Interstate and Foreign Commerce.

By Mr. GIFFORD: A bill (H. R. 9822) to authorize the Secretary of the Treasury to sell the old post-office building in the city of New Bedford, Mass.; to the Committee on Public Buildings and Grounds.

By Mr. LAMPERT: A bill (H. R. 9823) providing for the extension of the post office and public building at Manitowoc, Wis.; to the Committee on Public Buildings and Grounds.

By Mr. SANDERS of Texas: A bill (H. R. 9824) for the erection of a public building at Winnsboro, Wood County, Tex.; to the Committee on Public Buildings and Grounds.

By Mr. QUIN: A bill (H. R. 9825) granting the consent of Congress to the Great Southern Lumber Co., a corporation of the State of Pennsylvania, doing business in the State of Mississippi, to construct a railroad bridge across Pearl River at approximately 1½ miles north of Georgetown, Miss.; to the Committee on Interstate and Foreign Commerce.

By Mr. ALDRICH: A bill (H. R. 9826) providing for the purchase of a site and the erection of a public building at Cranston, R. I.; to the Committee on Public Buildings and Grounds.

By Mr. FULLER: A bill (H. R. 9827) granting the consent of Congress to the county of Winnebago, the town of Rockford, and the city of Rockford, in the said county, in the

State of Illinois, to construct, maintain, and operate a bridge and approaches thereto across Rock River; to the Committee on Interstate and Foreign Commerce.

By Mr. WATSON: A bill (H. R. 9828) for the purchase of a site and the erection of a public building at Ardmore, Pa.; to the Committee on Public Buildings and Grounds.

By Mr. PERLMAN: Joint resolution (H. J. Res. 296) providing for the admission of certain aliens as nonquota immigrants; to the Committee on Immigration and Naturalization.

By Mr. JOHNSON of Washington: Joint resolution (H. J. Res. 297) directing the Public Printer to furnish, upon application, to each Senator elect, each Representative elect, and each Delegate elect a copy of each issue of the CONGRESSIONAL RECORD and indexes; to the Committee on Printing.

By Mr. WRIGHT: Joint resolution (H. J. Res. 298) authorizing the appointment of a commission to consider proposals for and to negotiate for the lease and sale of Muscle Shoals, etc.; to the Committee on Military Affairs.

By Mr. LA GUARDIA: Resolution (H. Res. 365) requesting the Secretary of the Treasury to furnish to the House certain information regarding Robert J. Owens, a prohibition agent; to the Committee on the Judiciary.

By Mr. WOODRUFF: Resolution (H. Res. 366) requesting the President of the United States to direct the different agencies of the Government to refrain from directly or indirectly engaging the responsibility of the Government of the United States to supervise the fulfillment of financial arrangements between citizens of the United States and sovereign foreign governments or political subdivisions thereof, and for other purposes; to the Committee on Foreign Affairs.

By Mr. PATTERSON: Resolution (H. Res. 367) to pay \$600 to John T. Kelly for extra services rendered during the Sixty-eighth Congress; to the Committee on Accounts.

By Mr. MacGREGOR (by request): Resolution (H. Res. 368) to propose a substitute for the League of Nations and the Permanent Court; to the Committee on Foreign Affairs.

By the SPEAKER (by request): Memorial of the Legislature of the State of Maryland recommending to the Congress of the United States that appropriate action be taken to make the Star-Spangled Banner the national anthem of the United States; to the Committee on the Judiciary.

Also (by request), memorial of the Legislature of the State of Maryland requesting the repeal of all laws which authorize appropriations to the several States in the form of Federal aid on the condition that the States make similar appropriations and to abolish all offices, boards, and bureaus created to administer or supervise such appropriations; to the Committee on the Judiciary.

Also (by request), memorial of the Legislature of the State of Maryland relating to Federal legislation for regulating and controlling the sale of farm and vegetable seeds; to the Committee on Interstate and Foreign Commerce.

Also (by request), memorial of the Legislature of the State of Maryland requesting Congress to modify the immigration laws; to the Committee on Immigration and Naturalization.

Also (by request), memorial of the Legislature of the Territory of Alaska urging the passage of a law granting all persons who served in the United States Army during the World War 160 acres of land in Alaska; to the Committee on the Public Lands.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALDRICH: A bill (H. R. 9829) granting a pension to Mary J. Randall; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9830) granting a pension to Edward P. Coan; to the Committee on Pensions.

By Mr. AYRES: A bill (H. R. 9831) granting an increase of pension to Anna E. Crawford; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9832) granting a pension to Carrie A. Carringer; to the Committee on Pensions.

Also, a bill (H. R. 9833) granting an increase of pension to Mary J. Hedinger; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9834) granting an increase of pension to Mary N. Moody; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9835) granting an increase of pension to Marian Breeze; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9836) granting an increase of pension to Helen M. Farley; to the Committee on Invalid Pensions.

By Mr. BACHARACH: A bill (H. R. 9837) to provide for an examination and survey of Cold Spring Inlet for the purpose of

determining the cause of the erosion of the beach; to the Committee on Rivers and Harbors.

By Mr. BECK: A bill (H. R. 9838) granting an increase of pension to Millard A. Hammond; to the Committee on Pensions.

Also, a bill (H. R. 9839) granting a pension to Inez L. Hoxsie; to the Committee on Invalid Pensions.

Also, a bill (H. R. 9840) granting a pension to Inez L. Hoxsie; to the Committee on Invalid Pensions.

By Mr. BRIGGS: A bill (H. R. 9841) to authorize a survey of Texas City Channel, Tex., and for other purposes; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 9842) to authorize a survey of Galveston Channel, Tex., and for other purposes; to the Committee on Rivers and Harbors.

By Mr. BURDICK: A bill (H. R. 9843) granting an increase of pension to Margaret C. Cooper; to the Committee on Pensions.

Also, a bill (H. R. 9844) granting an increase of pension to Josephine M. Hayes; to the Committee on Pensions.

Also, a bill (H. R. 9845) granting a pension to Harriet G. Albro; to the Committee on Invalid Pensions.

By Mr. BUTLER: A bill (H. R. 9846) for the relief of Francis Kelly; to the Committee on Naval Affairs.

3050. Also, petition of the Flatbush Chamber of Commerce, Brooklyn, N. Y., favoring the repeal of section 257(b) of the revenue act of 1924; to the Committee on Ways and Means.

SENATE

TUESDAY, December 2, 1924

The Chaplain, Rev. J. J. Muir, D. D., offered the following prayer:

Our Father, through the many years Thou hast proven Thyself to be a father. Thou hast borne with us under many distressing circumstances and Thou art always ready to hear the cry of the humble and contrite heart. Grant that this moment it may be not lip service but the yearning of souls after Thee for Thy guidance, for Thy strength, for every inspiration that will help in the performance of known duty. Hear us and be with us constantly till life's work is done. Through Christ our Lord we ask it. Amen.

WOODBIDGE N. FERRIS, a Senator from the State of Michigan, appeared in his seat to-day.

The reading clerk proceeded to read the Journal of yesterday's proceedings when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed a resolution (H. Res. 357) informing the Senate that a quorum of the House of Representatives had appeared and that the House was ready to proceed to business.

The message also announced that the House had passed a resolution (H. Res. 356) providing for the appointment of three Members on the part of the House to join a similar committee appointed by the Senate to wait upon the President and inform him that a quorum of the two Houses had assembled and that Congress was ready to receive any communication that he may be pleased to make.

The message further announced that the House had passed a concurrent resolution (H. Con. Res. 30) providing for a joint session of the two Houses for the purpose of holding appropriate exercises in commemoration of the life, character, and public service of the late Woodrow Wilson, former President of the United States, in which it requested the concurrence of the Senate.

The message also announced that the House had passed a bill (H. R. 9138) to authorize the discontinuance of the seven-year regauge of distilled spirits in bonded warehouses, and for other purposes, in which it requested the concurrence of the Senate.

The message further communicated to the Senate the intelligence of the death of Hon. EDWARD CAMPBELL LITTLE, late a Representative from the State of Kansas, and transmitted the resolutions of the House thereon.

The message also communicated to the Senate the intelligence of the death of Hon. SYDNEY E. MUDD, late a Representative from the State of Maryland, and transmitted the resolutions of the House thereon.

The message further communicated to the Senate the intelligence of the death of Hon. WILLIAM STEDMAN GREENE, late a Representative from the State of Massachusetts, and transmitted the resolutions of the House thereon.

The message also communicated to the Senate the resolutions of the House unanimously adopted as a tribute to the memory of the Hon. LEBARON BRADFORD COLT, late a Senator from the State of Rhode Island.

The message further communicated to the Senate the resolutions of the House unanimously adopted as a tribute to the memory of the Hon. FRANK BOSWORTH BRANDEGEE, late a Senator from the State of Connecticut.

The message also communicated to the Senate the resolutions of the House unanimously adopted as a tribute to the memory of the Hon. HENRY CABOT LODGE, late a Senator from the State of Massachusetts.

NOTIFICATION TO THE PRESIDENT

Mr. CURTIS and Mr. ROBINSON appeared, and Mr. CURTIS said: Mr. President, your committee which was appointed to join a similar committee from the House to advise the President that a quorum of the two Houses was present and ready to receive any communication he desired to make have performed that duty. The President advised the joint committee that he will communicate in writing to the two Houses to-day the Budget message and to-morrow will submit in writing his regular message.

CREDENTIALS

The PRESIDENT pro tempore laid before the Senate a certificate of the Governor of Iowa certifying to the election of SMITH W. BROOKHART as a United States Senator for the term beginning March 4, 1925, which was read and ordered to be filed, as follows:

CERTIFICATE OF ELECTION

STATE OF IOWA,
EXECUTIVE DEPARTMENT.

To SMITH W. BROOKHART, *Greeting:*

It is hereby certified that at an election holden on the 4th day of November, A. D. 1924, you were elected to the office of United States Senator of said State, for the term of six years from and after the 4th day of March, A. D. 1925.

Given at the seat of government this 24th day of November, A. D. 1924.

N. E. KENDALL,
Governor of the State of Iowa.

Countersigned:
[SEAL.]

W. C. RAMSAY,
Secretary of State.

Mr. UNDERWOOD. Mr. President, I present the certificate of election of my colleague, Senator HEFLIN, for the six-year term commencing the 4th of March, and ask that it be filed with the Secretary.

The certificate was read and ordered to be filed, as follows:

CERTIFICATE OF ELECTION

THE STATE OF ALABAMA,
DEPARTMENT OF STATE.

I, S. H. BLAN, secretary of state, in accordance with the provisions of section 516 of the Code of Alabama, do hereby certify that, as shown by the returns of election on file in this office, Hon. J. THOMAS HEFLIN was elected to United States Senate from the State of Alabama at the general election held in this State on Tuesday, the 4th day of November, 1924.

Witness my hand this 25th day of November, 1924.

[SEAL.]

S. H. BLAN,
Secretary of State.

BOARD OF REGENTS, SMITHSONIAN INSTITUTION

The PRESIDENT pro tempore. The Chair announces that in accordance with the provisions of section 5581 of the Revised Statutes, he has appointed REED SMOOT, a Senator from the State of Utah, a member of the Board of Regents of the Smithsonian Institution to fill the vacancy caused by the death of the late Senator LODGE.

COMMISSION FOR THE EXTENSION AND COMPLETION OF THE CAPITOL BUILDING

The PRESIDENT pro tempore laid before the Senate a letter from Elihu Root resigning his membership in the Commission for the Extension and Completion of the Capitol Building, constituted under the provisions of the act approved April 28, 1904, etc., which was referred to the Committee on Public Buildings and Grounds.

REPORT OF THE SURGEON GENERAL, PUBLIC HEALTH SERVICE

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Treasury, transmitting, pursuant to law, the report of the Surgeon General of the Public Health Service for the fiscal year 1924, which was referred to the Committee on Finance.

REPORT OF THE COMPTROLLER OF THE CURRENCY

The PRESIDENT pro tempore laid before the Senate a communication from the Comptroller of the Currency, transmitting, pursuant to law, the annual report of the Comptroller of the Currency, covering activities of the Currency Bureau for the year ended October 31, 1924, which was referred to the Committee on Banking and Currency.

WAR DEPARTMENT REPORTS

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of War, transmitting, pursuant to law, a report showing expenditures from the appropriation for the encouragement of breeding of riding horses for the fiscal year 1924, which was referred to the Committee on Military Affairs.

He also laid before the Senate a communication from the Secretary of War, transmitting, pursuant to law, a report relative to a comprehensive housing program containing a series of charts showing the new construction required at military posts in the United States, Hawaii, and Panama, together with classified lists of surplus military reservations, etc., which was referred to the Committee on Military Affairs and ordered to be printed.

CONTRACTS WITH RAILROADS FOR CARRYING THE MAILS

The PRESIDENT pro tempore laid before the Senate a communication from the Acting Postmaster General, transmitting, pursuant to law, a report relative to the fixing of rates of compensation to be paid to railroad companies for the transportation of the mails and special contracts therefor, which was referred to the Committee on Post Offices and Post Roads.

ADMINISTRATION OF WAR MINERALS RELIEF ACT

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Interior, transmitting, in compliance with law, a report covering all operations, including receipts and disbursements, arising out of the so-called war minerals relief act, which was referred to the Committee on Mines and Mining.

DEPRESSION IN THE DOMESTIC LEATHER INDUSTRY

The PRESIDENT pro tempore laid before the Senate a communication from the Acting Secretary of Commerce concerning Senate Resolution 250, directing the Secretary of Commerce to furnish the Senate with data relative to depression in the domestic leather industry and the competition from foreign calf upper leathers, stating that all information which can

be obtained, both at home and abroad, will be collected and furnished the Senate as expeditiously as possible, and so forth, which was ordered to lie on the table.

RULES AND REGULATIONS, STEAMBOAT INSPECTION SERVICE

The PRESIDENT pro tempore laid before the Senate a communication from the Acting Secretary of Commerce, transmitting, in compliance with law, a complete set of general rules and regulations prescribed by the Board of Supervising Inspectors, Steamboat Inspection Service, and approved by the Secretary of Commerce, which were referred to the Committee on Commerce, as follows:

- (1) General rules and regulations, ocean and coastwise, edition of April 4, 1924.
- (2) General rules and regulations, Great Lakes, edition of April 4, 1924.
- (3) General rules and regulations, bays, sounds, and lakes other than the Great Lakes, edition of April 4, 1924.
- (4) General rules and regulations, rivers, edition of April 4, 1924.

REPORT ON HOUSE-FURNISHINGS INDUSTRIES

The PRESIDENT pro tempore laid before the Senate a communication from the chairman of the Federal Trade Commission, transmitting, pursuant to law, a report of the commission on the house-furnishings industries, dealing especially with kitchen utensils and domestic appliances, submitted in further response to Senate Resolution 127, Sixty-seventh Congress, second session, dated January 4, 1922, which was referred to the Committee on Manufactures.

PUBLICATIONS OF THE FEDERAL TRADE COMMISSION

The PRESIDENT pro tempore laid before the Senate a communication from the secretary of the Federal Trade Commission, transmitting, pursuant to law, a statement indicating the cost of distribution of the 14 publications issued by the Federal Trade Commission during the fiscal year 1924, which was referred to the Committee on Printing.

REPORTS OF THE INTERSTATE COMMERCE COMMISSION

The PRESIDENT pro tempore laid before the Senate a communication from the chairman of the Interstate Commerce Commission, transmitting, pursuant to law, a statement showing in detail the travel expenses of all officials and employees (other than special agents, inspectors, or employees who in the discharge of their regular duties are required to constantly travel) who have traveled on official business from Washington to points outside the District of Columbia during the fiscal year ended June 30, 1924, which was referred to the Committee on Appropriations.

He also laid before the Senate a communication from the chairman of the Interstate Commerce Commission, transmitting, pursuant to law, a statement showing employment under the appropriation for the valuation of carriers for the fiscal year ended June 30, 1924, the names of all persons employed, alphabetically arranged, the State from which each was appointed, the rate of compensation paid to each, together with a full itemized statement showing how the moneys appropriated for the fiscal years 1913, 1914, 1915, 1916, 1917, 1918, 1919, 1920, 1921, 1922, 1923, and 1924 have been expended, which was referred to the Committee on Interstate Commerce.

He also laid before the Senate a communication from the chairman of the Interstate Commerce Commission, transmitting, pursuant to law, a statement showing the make, model, and serial number of each office machine exchanged during the fiscal year 1924, the period of its use, the allowance therefor, and the article, make, and model thereof and price, including exchange value paid for each article procured through such exchange, which was referred to the Committee on Appropriations.

He also laid before the Senate a communication from the chairman of the Interstate Commerce Commission, transmitting, pursuant to law, copies of the following final valuations of properties of certain carriers:

Valuation Docket No. 151, Florida East Coast Railway Co. and Atlantic & East Coast Terminal Co.

Valuation Docket No. 4, the Kansas City Southern Railway Co. et al.

Valuation Docket No. 2, Texas Midland Railroad.

Valuation Docket No. 127, Ann Arbor Railroad Co. and Menominee & St. Paul Railway Co.

Valuation Docket No. 232, Danville & Western Railway Co.

Valuation Docket No. 191, Southern Railway Co. in Mississippi.

Valuation Docket No. 16, Bowdon Railway Co.

Valuation Docket No. 77, Wood River Branch Railroad Co.

Valuation Docket No. 183, the Rhode Island Co. and the Narragansett Pier Railroad Co.

Valuation Docket No. 188, Durham & South Carolina Railroad Co.

Valuation Docket No. 300, Knoxville, Sevierville & Eastern Railway.

Valuation Docket No. 94, Hoosac Tunnel & Wilmington Railroad Co.

Valuation Docket No. 131, Union Freight Railroad Co.

Valuation Docket No. 169, Paris & Mt. Pleasant Railroad Co.

Valuation Docket No. 63, Gainesville Midland Railway.

Valuation Docket No. 289, the Cumberland Railroad Co.

Valuation Docket No. 280, Nevada Copper Belt Railroad Co.

Valuation Docket No. 24, the New Mexico Midland Railway Co.

Valuation Docket No. 93, Gulf Terminal Co.

Valuation Docket No. 219, Raritan River Railroad Co.

REPORT ON ADMINISTRATION OF ADJUSTED COMPENSATION ACT

The PRESIDENT pro tempore laid before the Senate a communication from the Director of the United States Veterans' Bureau, transmitting, pursuant to law, a report of the administration of the adjusted compensation act by the United States Veterans' Bureau to date, which was referred to the Committee on Finance.

REPORT OF UNITED STATES TARIFF COMMISSION

The PRESIDENT pro tempore laid before the Senate a communication from the chairman of the United States Tariff Commission, transmitting, pursuant to law, the Eighth Annual Report of the United States Tariff Commission, which was referred to the Committee on Finance.

REPORT OF THE COMMISSIONERS OF THE DISTRICT OF COLUMBIA

The PRESIDENT pro tempore laid before the Senate a communication from the acting president of the Board of Commissioners of the District of Columbia, transmitting, pursuant to law, a report of the official operations of that government for the fiscal year ended June 30, 1924, which was referred to the Committee on the District of Columbia.

REPORTS OF UNITED STATES SHIPPING BOARD

The PRESIDENT pro tempore laid before the Senate a communication from the chairman of the United States Shipping Board, transmitting, pursuant to law, the Eighth Annual Report of the United States Shipping Board covering the period June 30, 1923, to and including June 30, 1924, which was referred to the Committee on Commerce.

He also laid before the Senate a communication from the vice chairman of the United States Shipping Board transmitting, pursuant to law, a statement of travel performed by the officers and employees of the United States Shipping Board during the fiscal year 1924, which was referred to the Committee on Appropriations.

TYPEWRITERS, ETC., CIVIL SERVICE COMMISSION

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the United States Civil Service Commission, transmitting, pursuant to law, a statement showing typewriters, adding machines, and other similar labor-saving devices exchanged in part payment for new machines during the fiscal year 1924, and so forth, which was referred to the Committee on Appropriations.

REPORT OF THE ARCHITECT OF THE CAPITOL

The PRESIDENT pro tempore laid before the Senate a communication from the Architect of the Capitol, transmitting, pursuant to law, the annual report of the office of the Architect of the Capitol for the fiscal year ended June 30, 1924, which was referred to the Committee on Public Buildings and Grounds.

IMPROVEMENT OF THE SENATE CHAMBER

The PRESIDENT pro tempore laid before the Senate a communication from the Architect of the Capitol, transmitting, in compliance with Senate Resolution 231, agreed to June 7, 1924, a report relative to the improving of the living conditions of the Senate Chamber and including a plan to place the Senate Chamber in direct contact with the outer walls of the building, and so forth, which was referred to the Committee on Rules and ordered to be printed with the illustrations.

UNITED STATES BOTANIC GARDEN—TRAVEL EXPENSES

The PRESIDENT pro tempore laid before the Senate a report of the Director of the United States Botanic Garden, transmitting, pursuant to law, a statement relative to travel

performed from Washington, D. C., in connection with official business of his office during the fiscal year 1924, which was referred to the Committee on Appropriations.

LIBRARY OF CONGRESS REPORTS

The PRESIDENT pro tempore laid before the Senate a communication from the Librarian of Congress, transmitting, pursuant to law, a report giving the aggregate number of publications issued by the Library of Congress proper during the fiscal year 1923-24, the cost of paper used, the cost of printing, the cost of preparation, and the number distributed, which was referred to the Committee on the Library.

He also laid before the Senate a communication from the Librarian of Congress, transmitting, pursuant to law, a statement showing in detail the travel performed by officers and employees of the Library of Congress on official business to points outside of the District of Columbia during the fiscal year 1924, and so forth, which was referred to the Committee on Appropriations.

DISMISSAL OF CAUSES BY THE COURT OF CLAIMS

The PRESIDENT pro tempore laid before the Senate a communication from the assistant clerk of the Court of Claims, informing the Senate that the cause of Hyland C. Kirk et al., assignees of Addison C. Fletcher, versus the United States, congressional No. 15369, was dismissed by the court for nonprosecution on May 19, 1924, on motion of the defendant, which was referred to the Committee on Claims.

He also laid before the Senate a communication from the assistant clerk of the Court of Claims, informing the Senate that the cause of Alfred A. Thresher versus the United States, congressional No. 17297, was dismissed by the court on May 5, 1924, for nonprosecution on motion of the defendant, which was referred to the Committee on Claims.

ACTS OF THE PORTO RICAN LEGISLATURE

The PRESIDENT pro tempore laid before the Senate certified transcripts of acts and resolutions of the special session of the Tenth Legislature of Porto Rico, 1924, which were referred to the Committee on Territories and Insular Possessions.

REPORT ON COOPERATION IN FOREIGN COUNTRIES

The PRESIDENT pro tempore laid before the Senate a communication from the chairman of the Federal Trade Commission, submitting, pursuant to the provisions of section 6 of the Federal Trade Commission act, a report on cooperation in foreign countries.

Mr. NORRIS. Mr. President, a parliamentary inquiry. I would like to inquire whether the report will be printed; and if so, how many copies of it will be printed?

The PRESIDENT pro tempore. The Chair has not ordered it printed. There ought to be some action on the part of the Senate if such reports are to be printed, because they are very voluminous.

Mr. NORRIS. Before disposition is made of that particular report I would like to ask some action of the Senate. I have no desire to do it at this moment unless it is agreeable to the Senate, but I do not want the report taken off the President's desk until I can make some request with reference to it. It is a very important report connected definitely with agricultural problems and the only use of it will come from a perusal of it. It ought to be printed. I think there will be a great demand for copies of it. I have not yet myself been able to secure a copy of it so that I can examine it. I have only read the description of it contained in the letter of transmittal, a copy of which I have on my desk.

The PRESIDENT pro tempore. How many copies does the Senator propose to have printed?

Mr. SMOOT. Mr. President, may I suggest to the Senator from Nebraska that he let it go to the committee, and then the committee will ask that an appropriate number of copies be printed. I do not know what it will cost. Under the law the Senate can only order the printing of a certain number of copies without a concurrent resolution. If there is no objection, and I presume there will be none, I suggest that that course be followed.

Mr. NORRIS. I do not think there will be objection, but it occurred to me that possibly a concurrent resolution would be the proper solution of the question. I ask now that the communication of the Federal Trade Commission on the subject mentioned, together with the letter of transmittal, be referred to the Committee on Agriculture and Forestry.

The PRESIDENT pro tempore. Is there objection?

Mr. FLETCHER. I think that under the rule the committee itself has authority to print a certain number of copies.

Mr. SMOOT. A thousand copies can be printed under the law.

Mr. FLETCHER. The committee can do that without any further action by the Congress, and then if it is desired to have more copies printed it will require the passage of a concurrent resolution.

Mr. NORRIS. Of course, before we can definitely settle the question as to the number of copies that shall be printed we will have to examine the report itself. I do not want to have a lot of reports printed unless that is the proper course; but from my reading of the outline of this report it is one that will be greatly in demand from all parts of the country. My idea is that probably we ought to have concurrent action of the House and Senate before we finally determine on the number to be printed.

Mr. SMOOT. May I suggest to the Senator that they be printed under authority of a concurrent resolution and not by committee order? If we have a committee print, it has no number, while if we have it printed by authority of a concurrent resolution it will have a number. We do not want to have two documents. It seems to me the proper way to dispose of it will be by a concurrent resolution.

Mr. NORRIS. If the Senate will agree to the request I have submitted, the Committee on Agriculture and Forestry at the very first opportunity will look into it and ascertain what their judgment is and report back to the Senate.

The PRESIDENT pro tempore. The Chair does not understand that any objection has been made. Without objection, the report will be referred to the Committee on Agriculture and Forestry.

TRIBUTE TO THE LATE SENATOR LODGE

The PRESIDENT pro tempore laid before the Senate resolutions adopted by the Board of Aldermen of the City of Chelsea, Mass., in honor of the memory of the life, character, and public service of HENRY CABOT LODGE, late a Senator from the State of Massachusetts, which were ordered to lie on the table.

TRIBUTE TO THE LATE SENATOR BRANDEGEE

The PRESIDENT pro tempore laid before the Senate a resolution adopted by the Court of Common Council of the City of Hartford, Conn., in honor of the memory of the life, character, and public service of FRANK B. BRANDEGEE, late a Senator from the State of Connecticut, which was ordered to lie on the table.

PETITIONS AND MEMORIALS

The PRESIDENT pro tempore laid before the Senate the following concurrent resolution of the Legislature of Arkansas, which was referred to the Committee on Education and Labor:

STATE OF ARKANSAS, GOVERNOR'S OFFICE,
Little Rock, June 30, 1924.

Senator ALBERT B. CUMMINS,

Washington, D. C.

DEAR SIR: I take pleasure in inclosing you herewith certified copy of house concurrent resolution No. 1, ratifying a proposed amendment to the Constitution of the United States of America, which shall give the Congress the power to limit, regulate, and prohibit the labor of persons under 18 years of age.

Respectfully,

THOMAS C. McRAE, Governor.

STATE OF ARKANSAS,
DEPARTMENT OF STATE.

To all to whom these presents shall come, greeting:

I, Ira C. Hopper, secretary of state of the State of Arkansas, do hereby certify that the following and hereto attached instrument of writing is a true and perfect copy of house concurrent resolution No. 1, ratification of the proposed amendment to the Constitution of the United States of America, approved June 28, 1924, the original of which was filed for record in this office on the — day of —, 192—.

In testimony whereof I have hereunto set my hand and affixed my official seal. Done at office in the city of Little Rock, this 30th day of June, 1924.

[SEAL.]

IRA C. HOPPER,
Secretary of State.

By B. T. HOFF, Deputy.

House concurrent resolution 1, amendment to the Constitution of the United States of America

Whereas both Houses of the Sixty-eighth Congress of the United States of America, by a constitutional majority of two-thirds thereof, made the following proposition to amend the Constitution of the United States of America in the following words, to wit:

"Joint resolution

"Proposing an amendment to the Constitution of the United States of America in Congress assembled (two-thirds of each House concur-

ring therein). That the following article is proposed as an amendment to the Constitution of the United States, which, when ratified by the legislatures of three-fourths of the several States, shall be valid to all intents and purposes as a part of the Constitution:

"ARTICLE —

"SECTION 1. The Congress shall have power to limit, regulate, and prohibit the labor of persons under 18 years of age.

"SEC. 2. The power of the several States is unimpaired by this article, except that the operation of State laws shall be suspended to the extent necessary to give effect to legislation enacted by the Congress."

Therefore be it resolved by the General Assembly of the State of Arkansas:

SECTION 1. That the said proposed amendment to the Constitution of the United States of America be, and the same is hereby, ratified by the General Assembly of Arkansas.

SEC. 2. That certified copies of this preamble and joint resolution be forwarded by the governor of this State to the Secretary of State at Washington, D. C., to the Presiding Officer of the United States Senate, and to the Speaker of the House of Representatives of the United States.

Approved: June 28, 1924.

THOMAS C. McRAE,
Governor of the State of Arkansas.
IRA C. HOPPER,
Secretary of the State of Arkansas.
R. K. MASON,
President of the Senate.
HOWARD REED,
Speaker of the House.

The PRESIDENT pro tempore also laid before the Senate the following resolution of the Legislature of Georgia, which was referred to the Committee on Interstate Commerce:

Whereas the Southern States have been passing through a period of great financial depression; and

Whereas on account of freight rates the growers of peaches, watermelons, and other crops have been unable to profitably ship their produce; and

Whereas under the discriminating rates now in force, produce may be shipped into Georgia from great distances at a lower rate than the same articles can be shipped from point to point within the State; and

Whereas the State public-service commission is powerless to regulate interstate rates and provide any relief; and

Whereas the prosperity of the entire State is largely dependent on a downward revision of freight rates and surcharges to a figure more nearly in line with the normal rates prior to the World War: Therefore be it

Resolved by the House of Representatives and the Senate of the State of Georgia, That we do most earnestly request of the Interstate Commerce Commission that they take immediate action to remedy these conditions; be it further

Resolved, That a copy of these resolutions be sent by the clerks of the house and senate to the President of the United States, to the presiding officers of the House and Senate of the United States, and to each Member of the House and Senate of the United States from Georgia.

The PRESIDENT pro tempore also laid before the Senate the following resolution of the Legislature of Georgia, which was referred to the Committee on Public Lands and Surveys:

Whereas our National Congress has taken, or is likely to take, steps to create, locate, and open a national park in the Southern Appalachian Mountains: Therefore be it

Resolved by the house (the senate concurring), That we urge our Congressmen and Senators to use their best efforts in having such park created, located, and laid out in the Southern Appalachian Mountains, where the States of Georgia, the Carolinas, and Tennessee join;

Resolved further, That we commend and approve the efforts of the Southern Appalachian Park Association and kindred organizations for their efforts in the promotion and creation of additional parks by our National Government in the Southern Appalachian Mountains to the end that there may be mobilization of out-of-doors recreation and nature conservation for the promotion of the health, happiness, and prosperity of the people.

Resolved further, That a copy of this resolution be furnished to the President of the United States, Secretary of Interior, to the clerks, respectively, of the United States Senate and United States House of Representatives, and also to the United States Senators and Congressmen of Georgia, North and South Carolina, and Tennessee.

The PRESIDENT pro tempore also laid before the Senate the following joint resolution of the Legislature of Maryland, which was referred to the Committee on the Library:

THE STATE OF MARYLAND,
OFFICE OF THE SECRETARY OF STATE.

I, E. Brooke Lee, secretary of state of the State of Maryland, under and by virtue of the authority vested in me by section 59 of article 35 of the Annotated Code of Maryland, do hereby certify that the attached is a true and correct copy of Joint Resolution No. 4 of the acts of the General Assembly of Maryland at the regular session of January, 1924, as the same is taken from and compared with the original joint resolution.

In testimony whereof I have hereunto set my hand and have caused to be affixed the official seal of the secretary of state, at Annapolis, Md., this 14th day of April, in the year 1924.

[SEAL.]

E. BROOKE LEE,
Secretary of State.

Joint resolution recommending to the Congress of the United States that appropriate action be taken to make the Star-Spangled Banner the national anthem of the United States

Whereas the Star-Spangled Banner is universally recognized by tradition and by custom as the national anthem of the United States; and

Whereas the American Legion, representing the thought not only of the men who served in the World War but also of the many other patriotic organizations and of the great majority of American citizens at large, has gone on record as being in favor of making the Star-Spangled Banner the national anthem by an official act of Congress: Therefore be it

Resolved by the General Assembly of Maryland, That the Congress of the United States be requested to take appropriate action to make the Star-Spangled Banner officially and legally the national anthem of the United States; and be it further

Resolved, That the secretary of state of Maryland be, and he is hereby, requested to transmit, under the great seal of this State, a copy of the foregoing resolution to the President of the United States Senate, the Speaker of the House of Representatives, and to each of the Representatives from Maryland in both Houses of Congress.

Approved, April 9, 1924.

[THE GREAT SEAL OF MARYLAND.]

ALBERT C. RITCHIE, *Governor.*
FRANCIS P. CURTIS,
Speaker of the House of Delegates.
DAVID G. MCINTOSH, Jr.,
President of the Senate.

The PRESIDENT pro tempore also laid before the Senate the following joint resolution of the Legislature of Maryland, which was referred to the Committee on Appropriations:

THE STATE OF MARYLAND,
OFFICE OF THE SECRETARY OF STATE.

I, E. Brooke Lee, secretary of state of the State of Maryland, under and by virtue of the authority vested in me by section 59 of article 35 of the Annotated Code of Maryland, do hereby certify that the attached is a true and correct copy of Joint Resolution No. 20, of the acts of the General Assembly of Maryland, at the regular session of January, 1924, as the same is taken from and compared with the original joint resolution.

In testimony whereof I have hereunto set my hand and have caused to be affixed the official seal of the secretary of state, at Annapolis, Md., this 12th day of April, in the year 1924.

[SEAL.]

E. BROOKE LEE,
Secretary of State.

Joint resolution and memorial of the General Assembly of Maryland to the Senate and House of Representatives of the United States in Congress assembled requesting the repeal of all laws which authorize appropriations to the several States in the form of Federal aid on the condition that the States make similar appropriations, and to abolish all offices, boards, and bureaus created to administer or supervise such appropriations

Whereas the enactment of laws of Congress authorizing appropriations to the several States on condition that similar appropriations be made by the States compels each State to undertake work which it may not wish to undertake or lose its share of the Federal appropriation, in which case it would be compelled to contribute in taxes to the work in other States, of which its people disapprove and from which they derive no benefit; and

Whereas such Federal appropriations are becoming burdensome, amounting to millions of dollars each year, with similar amounts from the States; and

Whereas in practically every case the work thus undertaken properly belongs to the several States and should be done by them without interference or control from a centralized government; and

Whereas it is time to cease centralizing power and authority in the National Government in matters which are primarily of local concern and which can generally be best done under local authority and supervision; and

Whereas there is a demand on the part of the people of Maryland for a return to the fundamental principles of our Government, namely, the performance of State duties and functions by the several States: Therefore be it

Resolved by the General Assembly of Maryland, That the Senate and House of Representatives of the United States in Congress assembled be, and they are hereby, requested and urged to repeal all laws which authorize appropriations to the several States in the form of Federal aid on condition that similar appropriations are made by the respective States; and be it further

Resolved, That all offices, boards, and bureaus created to administer or supervise such appropriations be abolished; and be it further

Resolved, That the Representatives from the State of Maryland in the Senate and House of Representatives of the United States be, and they are hereby, requested to urge and support the repeal of the above-mentioned laws; and be it further

Resolved, That the secretary of the State of Maryland be, and he is hereby, requested to transmit under the great seal of this State a copy of the foregoing resolution and memorial to the President of the United States Senate and the Speaker of the House of Representatives of the United States and to each of the Representatives from Maryland in the Senate and House of Representatives of the United States.

Approved, April 9, 1924.

[THE GREAT SEAL OF MARYLAND.]

ALBERT C. RITCHIE, *Governor*.

DAVID G. MCINTOSH, Jr.,

President of the Senate.

FRANCIS P. CURTIS,

Speaker of the House of Delegates.

The PRESIDENT pro tempore also laid before the Senate the following joint resolution of the Legislature of Maryland, which was referred to the Committee on Agriculture and Forestry:

EXECUTIVE DEPARTMENT,
Silver Spring, Md., June 14, 1924.

Hon. ALBERT B. CUMMINS,

Acting Chairman of the Senate,

Senate Office Building, Washington, D. C.

DEAR MR. CHAIRMAN: Inclosed are copies of the resolutions which I am directed by the 1924 session of the General Assembly of Maryland to mail to you.

Very truly yours,

E. BROOKE LEE.

THE STATE OF MARYLAND,
OFFICE OF THE SECRETARY OF STATE.

I, E. Brooke Lee, secretary of state of the State of Maryland, under and by virtue of the authority vested in me by section 59 of article 35 of the Annotated Code of Maryland, do hereby certify that the attached is a true and correct copy of Joint Resolution No. 12 of the acts of the General Assembly of Maryland at the regular session of January, 1924, as the same is taken from and compared with the original joint resolution.

In testimony whereof I have hereunto set my hand and have caused to be affixed the official seal of the secretary of state at Annapolis, Md., this 12th day of April, in the year 1924.

[SEAL.]

E. BROOKE LEE,
Secretary of State.

Joint resolution relating to Federal legislation for regulating and controlling the sale of farm and garden seeds

Whereas the farmers and the vegetable growers of the United States annually suffer great losses because of decreased yields due to the purchase and use of seeds of inferior quality and of unsuitable origin which are sold in interstate commerce; and

Whereas the efforts of the individual States to provide adequate protection to farmers and vegetable growers are defeated by the said interstate commerce in farm and vegetable seeds of inferior quality and of unsuitable origin; Therefore be it

Resolved by the General Assembly of Maryland, That the Congress of the United States be, and it is hereby, requested and urged to enact legislation regulating and controlling the interstate sale of farm seeds in conformity with the uniform State seed law as approved by the Association of Official Seed Analysts of North America, and of garden seeds under such rules and regulations as will provide adequate protection to vegetable growers; and be it further

Resolved, That a copy of this resolution be transmitted by the secretary of state of Maryland to the Speaker of the United States House of Representatives and to the President of the United States Senate.

Approved, April 9, 1924.

[THE GREAT SEAL OF MARYLAND.]

ALBERT C. RITCHIE, *Governor*.

FRANCIS P. CURTIS,

Speaker of the House of Delegates.

DAVID G. MCINTOSH, Jr.,

President of the Senate.

The PRESIDENT pro tempore laid before the Senate the following joint resolution of the Legislature of Maryland, which was referred to the Committee on Immigration:

THE STATE OF MARYLAND,
OFFICE OF THE SECRETARY OF STATE.

I, E. Brooke Lee, secretary of state of the State of Maryland, under and by virtue of the authority vested in me by section 59 of article 35 of the Annotated Code of Maryland, do hereby certify that the attached is a true and correct copy of Joint Resolution No. 22 of the acts of the General Assembly of Maryland, at the regular session of January, 1924, as the same is taken from and compared with the original joint resolution.

In testimony whereof I have hereunto set my hand and have caused to be affixed the official seal of the secretary of state, at Annapolis, Md., this 12th day of April, in the year 1924.

[SEAL.]

E. BROOKE LEE,

Secretary of State.

Joint resolution requesting Congress to modify the immigration laws

Whereas emergencies arise in regard to the employment of labor on farms; and

Whereas the present immigration laws make it very difficult to secure immigrants who are experienced in agricultural labor: Therefore be it

Resolved by the General Assembly of Maryland, That the Congress of the United States be, and it is hereby, requested and urged to amend the immigration laws by exempting experienced agricultural workers from the contract-labor provisions of the law so as to permit the bringing in of experienced agricultural laborers in case of emergencies in the farm-labor situation, such emergency or emergencies to be determined by the United States Secretary of Labor, any workers who are brought in under the above-mentioned conditions to be in addition to the quota allowed for such country or countries and to be allowed to come in such number or numbers as said Secretary of Labor shall designate; and be it further

Resolved, That the Representatives from the State of Maryland in the Senate and House of Representatives of the United States be, and they are hereby, requested to cooperate to the fullest extent in having the immigration laws amended as above suggested; and be it further

Resolved, That the secretary of the State of Maryland be, and he is hereby, requested to transmit under the great seal of the State a copy of this resolution to the Secretary of the Department of Labor, the President of the United States Senate, the Speaker of the House of Representatives, and to each of the Representatives from Maryland in the Senate and House of Representatives of the United States.

Approved, April 9, 1924.

[THE GREAT SEAL OF MARYLAND.]

ALBERT C. RITCHIE, *Governor*.

DAVID G. MCINTOSH, Jr.,

President of the Senate.

FRANCIS P. CURTIS,

Speaker of the House of Delegates.

The PRESIDENT pro tempore also laid before the Senate resolutions of Andrew Mather Post No. 14, Grand Army of the Republic, Department of West Virginia, of Parkersburg, W. Va.; of Wild Post No. 25, Department of Pennsylvania, Grand Army of the Republic, of Chester, Pa., and of Riverside Post No. 118, Grand Army of the Republic, Department of California and Nevada, of Riverside, Calif., praying for the repeal of the law authorizing the coinage of 50-cent pieces in commemoration of the work on Stone Mountain, Ga., which were referred to the Committee on Finance.

He also laid before the Senate a resolution adopted by the Bradford Baptist Association, at Canton, Pa., protesting against the enactment of legislation prohibiting Japanese immigration into the United States, which was referred to the Committee on Immigration.

He also laid before the Senate a petition of the Society of Friends of New York, favoring the United States Government calling an international economic conference, which was referred to the Committee on Foreign Relations.

Mr. FLETCHER. I present a letter and some resolutions adopted by the Unitarian Laymen's League. I ask that the letter and resolutions be printed in the RECORD and referred to the Committee on Foreign Relations.

There being no objection, the letter and resolutions were referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

UNITARIAN LAYMEN'S LEAGUE,
EXECUTIVE OFFICES,
Boston, Mass., November 25, 1924.

HON. DUNCAN U. FLETCHER,
United States Senate, Capitol,
Washington, D. C.

DEAR SENATOR FLETCHER: I am directed, by vote of the council of the Unitarian Laymen's League, to transmit with its approval to the Senate the inclosed resolution adopted at the annual convention of chapter officers of the league at their meeting in Niagara Falls, Ontario, Canada, on September 13 last.

We feel justified in hoping that the foreign policy of the United States may exemplify the inspired statesmanship referred to in the resolution.

Cordially yours,

GEORGE G. DAVIS,
Vice President.

Resolution adopted September 13, 1924, by the annual convention of chapter officers of the Unitarian Laymen's League at Niagara Falls, Ontario, Canada

Whereas war inevitably causes unspeakable horrors, incalculable suffering, and irreparable waste, dulls the moral perceptions, and breeds the ugliest passions; and

Whereas history records that international disputes of the most acute nature can be arbitrated to the ultimate satisfaction and benefit of all concerned, as is witnessed by the fact that Great Britain and the United States have preserved, unbroken, more than 100 years of peace, and have mutually shown their confidence and trust by maintaining between Canada and the United States, unfortified by land and water, the longest international boundary line in the world; and

Whereas the aim of every church should be the creation of such a passionate concern for truth and justice, for love, honor, and mutual helpfulness, for every divine attribute, that men shall no longer resort to or tolerate injustice or aggression; be it

Resolved, That we pledge ourselves to unremitting effort on the part of our churches to function in creating a sentiment that shall make war impossible; and be it further

Resolved, That we request the council of our league to express to the Premier and Parliament of the Dominion of Canada and to the President and Senate of the United States our profound conviction—

First. That resort to arms is never justifiable save as a last desperate measure to restrain and control gross injustice; and

Second. That by patient negotiation and inspired statesmanship some international agency can and must be created for the peaceful adjudication of all international disputes.

Mr. ROBINSON presented letters in the nature of petitions of sundry citizens of Pine Bluff, Ark., praying for the passage of Senate bill 1898, granting increased compensation to postal employees, which were referred to the Committee on Post Offices and Post Roads.

Mr. SHEPPARD presented a petition of sundry citizens in the State of Texas praying for the relief of Indians in Polk County, Tex., which was referred to the Committee on Indian Affairs.

Mr. McKELLAR presented a petition of the Waverly Place Methodist Church, of Nashville, Tenn., praying for the entrance of the United States into the World Court, which was referred to the Committee on Foreign Relations.

He also presented memorials, numerously signed, of sundry citizens of Memphis, Ooltewah, and vicinity, all in the State of Tennessee, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. McNARY presented a memorial of sundry citizens of Waltherville and vicinity, in the State of Oregon, remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. ASHURST presented a memorial of sundry citizens of Globe, Ariz., remonstrating against the passage of legislation providing for compulsory Sunday observance in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. CAPPER presented a telegram in the nature of a petition from the Joint Postal Committee of Greater Kansas City, Mo., praying for the passage of legislation granting increased compensation to postal employees, which was referred to the Committee on Post Offices and Post Roads.

He also presented a resolution of the Topeka Industrial Council, of Topeka, Kans., favoring the passage of legislation granting increased compensation to postal employees, which was referred to the Committee on Post Offices and Post Roads.

Mr. LADD presented resolutions adopted by the house of delegates of the North Dakota State Medical Association at Bismarck, N. Dak., protesting against the passage of the so-called Cramton bill governing the use of alcoholic liquors for medicinal purposes by physicians, and also favoring a reduction of the war tax on narcotics, which were referred to the Committee on Finance.

He also presented a resolution of the Postal Club, of Mandan, N. Dak., favoring the passage of Senate bill 1898, granting increased compensation to postal employees, which was referred to the Committee on Post Offices and Post Roads.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMOOT:

A bill (S. 3493) to amend the act entitled "An act to create a commission authorized under certain conditions to refund or convert obligations of foreign governments held by the United States of America, and for other purposes," approved February 9, 1922, as amended February 28, 1923; to the Committee on Finance.

A bill (S. 3494) to amend an act entitled "An act to establish the Utah National Park in the State of Utah"; to the Committee on Public Lands and Surveys.

A bill (S. 3495) authorizing the Secretary of Commerce to acquire, by condemnation or otherwise, a certain tract of land in the District of Columbia for the enlargement of the present site of the Bureau of Standards; to the Committee on Public Buildings and Grounds.

By Mr. BALL:

A bill (S. 3496) to authorize the removal of the gates and gate posts at the head of West Executive Avenue in the District of Columbia; to the Committee on the District of Columbia.

By Mr. McNARY:

A bill (S. 3497) to provide for the acquisition of a site and the erection thereon of a Federal building at Marshfield, Oreg.; to the Committee on Public Buildings and Grounds.

A bill (S. 3498) granting a pension to Nicholas Bler;

A bill (S. 3499) granting a pension to Esther Ann Hill Morgan; and

A bill (S. 3500) granting a pension to William J. Hirschberg; to the Committee on Pensions.

By Mr. ODDIE:

A bill (S. 3501) to confer jurisdiction upon the Court of Claims to render judgment in the matter of the claim of Addison B. McKinley, of Reno, Nev.; to the Committee on the Judiciary.

A bill (S. 3502) to authorize the acquisition of a site and the erection of a Federal building at Sparks, Nev.; to the Committee on Public Buildings and Grounds.

By Mr. SHORTRIDGE:

A bill (S. 3503) for the relief of Emma Zembsch; to the Committee on Claims.

By Mr. KEYES:

A bill (S. 3504) granting an increase of pension to Mary E. Tonery; to the Committee on Pensions.

By Mr. WARREN:

A bill (S. 3505) for the relief of Canadian Car & Foundry Co. (Ltd.); to the Committee on Finance.

A bill (S. 3506) granting a pension to Mary Ann Raper (with accompanying papers); to the Committee on Pensions.

By Mr. ASHURST:

A bill (S. 3508) for the relief of John B. Evans (with accompanying papers); to the Committee on Naval Affairs.

By Mr. DIAL:

A bill (S. 3509) to change the time for the holding of terms of court in the eastern district of South Carolina; to the Committee on the Judiciary.

By Mr. DILL:

A bill (S. 3510) for the relief of James Doherty; to the Committee on Claims.

By Mr. CAPPER:

A bill (S. 3512) granting an increase of pension to Laura E. Franklin (with accompanying papers); and

A bill (S. 3513) granting an increase of pension to George E. Ryan (with accompanying papers); to the Committee on Pensions.

A bill (S. 3514) authorizing the Court of Claims of the United States to hear and determine the claim of H. C. Ericsson; to the Committee on Claims.

By Mr. SHIELDS:

A bill (S. 3515) granting an increase of pension to Robert L. Chick; to the Committee on Pensions.

A bill (S. 3516) for the relief of James Craig; to the Committee on Military Affairs.

By Mr. LADD:

A bill (S. 3517) for preventing the manufacture, sale, or transportation of imitated or misbranded articles of commerce, and regulating the traffic therein, and for other purposes; to the Committee on Interstate Commerce.

By Mr. MOSES:

A bill (S. 3518) granting an increase of pension to Elise Pinard (with accompanying papers);

A bill (S. 3519) granting an increase of pension to Nettie Lamprey (with accompanying papers);

A bill (S. 3520) granting an increase of pension to Myra McDonald (with accompanying papers);

A bill (S. 3521) granting an increase of pension to Ann Milnes (with accompanying papers);

A bill (S. 3522) granting an increase of pension to Marion E. Laird (with accompanying papers); and

A bill (S. 3523) granting an increase of pension to Mary E. Foss (with accompanying papers); to the Committee on Pensions.

By Mr. McLEAN:

A bill (S. 3524) granting a pension to Ellen M. Kilbourn (with accompanying papers); and

A bill (S. 3525) granting a pension to Elizabeth Hitchcock (with accompanying papers); to the Committee on Pensions.

By Mr. McKINLEY (by request):

A bill (S. 3526) granting pensions and increase of pensions to certain Indian war veterans and widows, to certain Spanish war soldiers and their widows, and for other purposes; to the Committee on Pensions.

By Mr. McKINLEY:

A bill (S. 3527) for the relief of Mary B. Jenks; to the Committee on Claims.

By Mr. SPENCER:

A bill (S. 3528) granting an increase of pension to Christopher S. Alvord; to the Committee on Pensions.

By Mr. ELKINS:

A bill (S. 3529) granting an increase of pension to Valentine Horst; to the Committee on Pensions.

By Mr. PITTMAN:

A joint resolution (S. J. Res. 147) limiting grazing charges on forest reserves; to the Committee on Agriculture and Forestry.

By Mr. DIAL:

A joint resolution (S. J. Res. 148) to repeal a joint resolution proposing an amendment to the Constitution in respect to child labor; to the Committee on the Judiciary.

By Mr. CAPPER:

A joint resolution (S. J. Res. 149) authorizing the Secretary of War to loan cots, bedding, and camp equipment, not including tentage, for the use of the Modern Woodmen of America Foresters at their national quadrennial encampment to be held at Milwaukee, Wis., in June, 1925; to the Committee on Military Affairs.

By Mr. McKINLEY:

A joint resolution (S. J. Res. 150) authorizing the Secretary of War to loan cots, bedding, and camp equipment, not including tentage, for the use of the Modern Woodmen of America Foresters at their national quadrennial encampment to be held at Milwaukee, Wis., in June, 1925; to the Committee on Military Affairs.

MUSCLE SHOALS

Mr. UNDERWOOD. Mr. President, I introduce a bill in reference to the disposition of the Muscle Shoals property. I ask that the bill may be printed in the usual form, and also as a substitute for the pending Muscle Shoals bill, being House bill No. 518; in other words, I ask to have the bill printed in both forms.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The bill (S. 3507) to provide for the national defense; for the production and manufacture of fixed nitrogen, commercial fertilizer, and other useful products, and for other purposes, was read twice by its title and referred to the Committee on Agriculture and Forestry.

Mr. UNDERWOOD. Mr. President, under the order of the Senate, to-morrow has been fixed for the consideration of House bill 518, relating to the disposition of the Muscle Shoals property. During the summer the Senator from North Dakota [Mr. Ladd], who is the only chemist in the Senate, wrote two very interesting and learned articles in regard to this property. I ask unanimous consent that those articles may be printed in the CONGRESSIONAL RECORD, in eight-point type, for the information of the Senate, so that they may be before the Senate when the matter comes up for consideration to-morrow.

The PRESIDENT pro tempore. Is there objection?

Mr. MOSES. Is the request to print in the RECORD the articles referred to by the Senator from Alabama in eight-point type?

Mr. UNDERWOOD. Yes. Is not that the usual course?

Mr. MOSES. That may not be done without changing the law.

Mr. UNDERWOOD. I mean to request that the articles be printed in the usual RECORD type, whatever that may be. I understand now it is six-point type.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The articles referred to are as follows:

[From the Saturday Evening Post of November 22, 1924]

WHY I AM FOR HENRY FORD'S OFFER FOR MUSCLE SHOALS

(By EDWIN F. LADD, United States Senator from North Dakota)

Only in the past 25 years have governments and scientists paid any real attention to the rapidly increasing dependence of the whole world upon the nitrogen of the air for the preservation and increase of soil fertility. It was in 1898 that Sir William Crookes, in his presidential address before the British Association for the Advancement of Science, called world-wide attention to this subject and predicted starvation for millions unless the nitrogen problem could be speedily solved, declaring that "all civilized nations stand in deadly peril of not having enough to eat." It is well known that without nitrogen we can not grow food crops or cotton for clothing, and without nitrogen no nation can carry on modern warfare.

But "there's a divinity that shapes our ends, rough-hew them how we will," and it has been divinely arranged that the nitrogen in the air over every square mile of the earth's surface amounts to 20,000,000 tons; the gaseous nitrogen of the air, however, is extraordinarily inert and chemically rebellious.

The nitrogen problem is: How can this air nitrogen be economically converted into a solid or liquid product so that it can be used? This is a problem in industrial chemistry and national economics.

With respect to the purely legal questions arising in the solution of the Government's nitrogen problem, considered in connection with Henry Ford's offer for Muscle Shoals, I must be guided by the infallible authority of the lawyers of the Senate, reserving some layman views of my own as to the Federal water power act and its application to the proposal of Henry Ford.

As to the questions of chemistry involved in the solution of the Government's Muscle Shoals problem, however, I have some decided opinions of my own, based upon the history of air-nitrogen developments and upon my own study and experience as a chemist; and with this viewpoint I approach the Government's problems at Muscle Shoals and present my views to the readers of the Saturday Evening Post.

In a series of two articles the Hon. GEORGE W. NORRIS, United States Senator from Nebraska and chairman of the Senate Committee on Agriculture and Forestry, has presented to readers of the Saturday Evening Post his views as to why Henry Ford's offer for Muscle Shoals should not be accepted by the Senate. In general, Senator NORRIS and myself have been in accord on legislative matters. We have much in common. We are both identified with the progressive element in the Senate which is earnestly endeavoring to advance the interests of the people through constructive legislation in which party politics is made secondary to the general welfare. Both of us come from a region in which the fertilizer question, though of growing importance, is as yet one of the very least of the farmers' troubles. It can not fairly be said that either of us has adopted his views in order to secure a selfish benefit in his home State.

Though a progressive in Government policies, I am a conservative in commercial chemistry; and with respect to the Ford offer I have to say to that group of Senators with whom I am usually in accord what President Coolidge once said to the senators in the Massachusetts Legislature, "Be as radical as science and as reactionary as the multiplication table."

I regard the Government as exceptionally fortunate in having received an offer from Henry Ford when no one else would make a pro-

posal, and consider it very unfortunate that Chairman NORRIS has made unjust attacks on the Ford offer which have not been of a character calculated to lead to a calm, logical, and fair decision. The amount of useful power which Mr. Ford would get has been greatly exaggerated, while the power necessary for the manufacture of fertilizer under any fair interpretation of the terms of Mr. Ford's offer has been grossly underestimated. The extent of Mr. Ford's obligations, the amount of money which Mr. Ford or his company could make out of the transaction, the value of the property which Mr. Ford would receive, the title under which he would receive it, the significance of the lease period, the effect of the Federal water power act, the degree of public regulation of the business, the insurance of the dams against destruction—in all these and in many other particulars reckless statements of half truth or less than half truth have been made, grotesquely distorting the picture; misstatements which have been systematically broadcast throughout the country.

In view of these circumstances I am not surprised that Mr. Ford, after three years of unnecessary delay and unjust criticism, has seen fit to withdraw his offer. While I deeply regret that he has done so and gravely fear that the Government will never again secure an equal proposal, I am confident that the Senate will not overlook the fact that Mr. Ford has stated that he is still open to a counter proposition from the Government. There is a special significance in this statement, because when the Secretary of War sold the Gorgas steam-power plant which was a part of the property included in Mr. Ford's bid, he thereby made it impossible for Congress to accept the Ford proposal in accordance with its terms. Any legislation for its acceptance therefore necessarily must be in the nature of a counter proposal, and that is exactly what the McKenzie bill is—a counter proposition.

In spite of Mr. Ford's reported withdrawal I therefore cherish the hope that the benefits of the Ford offer at Muscle Shoals will not be lost.

For many years it has been proposed to improve the navigation of the Tennessee River at Muscle Shoals in northwestern Alabama by means of two large navigation-power dams and one very small dam for navigation only. Of these, only one, the Wilson Dam, is being built.

ESSENTIAL FACTS

At Muscle Shoals the Government has built two nitrate plants. Nitrate plant No. 1, with a capacity of only 30 tons of nitrogen in the form of ammonia a day, was an unsuccessful experimental plant costing \$13,000,000. Nitrate plant No. 2, which cost \$67,000,000, is the largest nitrate plant in the world employing the cyanamide process. Its capacity is 40,000 tons of pure nitrogen a year. This is equivalent to about 250,000 tons of Chilean nitrate, or about 70 per cent of the entire amount imported from Chile annually for use by American agriculture. Unfortunately there is ample evidence that this plant will have to be radically changed to produce the improved concentrated fertilizers that are admittedly possible, while the cost of such changes and additions, from estimates given by the Hon. MARTIN B. MADDEN, chairman of the House Committee on Appropriations, will be at least \$25,000,000.

Senator NORRIS claims that these expenditures would cost Mr. Ford nothing, as he could repay himself by selling houses and lots to employees. Making the liberal estimate of \$2,000,000 as the value of the 571 houses—of which 263 are negro cabins with walls of tar paper—there would remain \$23,000,000 to be realized from the sale of lots. This is absurd for two reasons: First, the nitrate plant property can not be made to produce such a vast number of salable lots; and second, Mr. Ford is not going to Muscle Shoals to engage in the real-estate business.

The first question to be settled in disposing of this property is the policy to be pursued. The Government's investment at Muscle Shoals is the money of all the people. The project should be so disposed of as to bring the greatest good to the greatest number. In determining how to secure this result, there are two questions to be answered:

First, shall power production and distribution or fertilizer manufacture be paramount?

To decide upon a policy intelligently we must first have the facts, and when all debate and controversy have been swept aside there still remain four great outstanding facts that are generally admitted:

First, in spite of the fact that our domestic production of nitrogen in the form of by-product sulphate of ammonia has increased from 183,000 tons in 1914 to 591,000 tons in 1923, our dependence upon Chile for nitrate has increased from 564,000 tons in the fiscal year 1914 to nearly double that amount, or 962,000 tons, during the fiscal year ending June 30, 1924. Moreover, this increase in domestic production of by-product nitrogen, instead of being accompanied by a decrease in price, has resulted in an increase from \$2.69 a hundred pounds in 1914 to an average of \$3.14 a hundred pounds in 1923.

Second, Germany, prior to the war, was importing about 600,000 tons of Chilean nitrate annually, while to-day she is independent of Chile through the operation of her war-built air-nitrogen plants.

FERTILIZER COSTS

Third, authorities are agreed that combined nitrogen in the form of ammonia, which costs the farmer from 20 to 25 cents a pound when purchased in the form of mixed fertilizers, can be manufactured at Muscle Shoals for 5 to 6 cents a pound by several well-known processes.

Fourth, for eight years there has been an increasing volume of expert testimony to the effect that the nitrogen and phosphoric-acid industry properly established at Muscle Shoals can reduce the cost of fertilizers delivered to the farmers by one-half.

Nitrogen is an essential element in practically every kind of explosive, and in addition is the most expensive fertilizer ingredient that the farmer must buy. The Muscle Shoals development was made for the definite and clearly expressed purpose of procuring nitrogen for explosives in time of war and for fertilizers in time of peace, and the location was selected for two reasons: First, because it afforded the large amount of electrical power which now, as then, is an absolute necessity not only for the rather obsolete cyanamide process but for any known feasible process of producing a concentrated combination of nitrogen and phosphoric acid, the two chief fertilizer elements; second, because it is close to the great Tennessee phosphate fields and can be economically supplied with raw materials for fertilizer production.

It was made clear during the extended hearings before our committee that if we would divorce the nitrogen industry from reliance upon water power we immediately must turn to coal; but the country knows only too well how a coal strike can paralyze transportation and industry. Shall we deprive our future fertilizer industry of water power and make agriculture itself dependent upon the good grace and tolerance of the coal operators and their miners?

The domestic price of by-product nitrogen fertilizer is fixed by our domestic monopoly—mostly coal operators—in accordance with the price of Chilean nitrate, and the latter is fixed by a world-wide monopoly called the Chilean Nitrate Producers' Association. Our farmers fare no better at the hands of the by-product coke monopoly than they do at the hands of the Chilean nitrate monopoly. It seems to me that if we want to get cheaper fertilizer for American farmers we must find some other road than by permitting the fertilizer industry to be exploited by coal and coke operators, who have already declined to sell American farmers cheaper fertilizers, regardless of any technical advantage in doing so.

My position as to the use of the Muscle Shoals power in the manufacture of fertilizers squares exactly with that of Dr. E. H. Hooker, president of the Manufacturing Chemists' Association and of the Hooker Electrochemical Co., who is one of the leaders in the application of electric power to chemistry in the United States. Doctor Hooker told our committee that if the full opportunities for fertilizer manufacture are to be realized at Muscle Shoals, then the amount of power that would be necessary to meet the growing demand for fertilizer "will probably increase rather than decrease, although it will be less per unit."

This is exactly what is planned in the Ford offer, which is the only proposal in which there is no limit placed upon the amount of power to be used in fertilizer manufacture. It is confidently expected that the amount of power per ton of fertilizer will decrease, but that the total power to be used in fertilizer manufacture will constantly increase. From the very outset, however, Mr. Ford's minimum fertilizer obligations would require the entire supply of dependable Muscle Shoals power and would compel him to improve some of the secondary or irregular power to carry them out.

The proposal of Senator NORRIS that we divorce the power from the fertilizer and limit the amount of power to be used in the manufacture of fertilizer to not more than 25,000 horsepower of primary or dependable power and 75,000 horsepower of secondary or irregular power and engage in a cooperative business relation with the Alabama Power Co. and its associates in order to distribute the larger portion of the power, although a satisfactory arrangement to the associated power interests and to the fertilizer group will never have my support. Public utilities have had absolute domination of our water powers in this country for a generation, but never yet have they accomplished anything of importance to the farmer, although they themselves say in the report of the committee on public policy, National Electric Light Association, at their convention in June, 1922:

"No nation such as ours is stronger than its agriculture. . . . Any movement, therefore, to build up the city at the expense of the farming community is shortsighted."

OPPOSITION TO THE PLAN

Yet that association circulated pamphlets violently attacking the Ford plan as a means of reducing the farmer's expenses and increasing his crop yields and declaring that Dam No. 3, an important part of the project, should not be built at all.

When I review in the hearings the record of the power companies which were asked to bid on Muscle Shoals, I feel that the Government would get the worst of it in any business deal it might make with them. Mr. Duke, who controls the Southern Power Co., operating in North and South Carolina, and which company Mr. Yates testified would be a part of the superpower system—Mr. Duke, replying to the invitation sent to him by General Beach, condemned both the operation of the nitrate plant and the completion of the water power, and specifically pointed out to General Beach that the power could not go to the Carolinas.

Three of the associated power companies which made an offer for Muscle Shoals, following the publication of the Ford proposal, had already replied to General Beach's invitation in 1921, declaring that neither the Government nor private enterprise could afford to complete the water-power development at the Wilson Dam. Among the group of power companies which have opposed the farmers in their efforts to gain the acceptance of Mr. Ford's offer, the ringleader is the Alabama Power Co., a company whose contract with the Government was sharply criticized by the Attorney General, who stated:

"When its intricate provisions are closely scrutinized and their full significance realized, it becomes at once apparent that the company lost no opportunity of turning to its own advantage every possible change of circumstances."

These are the companies which proposed to use Muscle Shoals as a convenient auxiliary to their own private power development. I want no such partners or near-partners in any superpower policy at Muscle Shoals.

If the Ford offer is rejected, I am for Government operation; and if this policy is adopted, I am in favor of buying out the Alabama Power Co., just as the Ontario Hydroelectric Power Commission bought out the Ontario Power Co., the Toronto Power Co., and others, in its program of Government operation in Canada. I do not believe that our great Government should play second fiddle to any group of power companies in any plan of power distribution.

Senators may vote down the Ford offer, but when they do they should realize that the Ford proposal is the only one in which the responsibility of operating Nitrate Plant No. 2 to full capacity is guaranteed and the operation carried on at private and not at public expense. Mr. Ford's obligations are not limited to nitrogen alone, but include other commercial fertilizers, of which they are only two—phosphoric acid and potash. The capacity of Nitrate Plant No. 2 means sufficient nitrogen for 2,000,000 tons of 2-8-2 commercial fertilizer—worth about \$60,000,000—annually, while the total consumption of commercial fertilizers in the United States in 1921 was 5,183,523 tons; so it is very evident that the minimum fertilizer production proposed by Mr. Ford is by no means the insignificant portion of the total American consumption which the opposition would lead the country to believe.

The very fight which these interests are making to prevent the acceptance of the Ford offer belies their statement that the production would be so small as to have little or no effect on the price of fertilizers in general. Their able spokesman and bond expert, Francis E. Frothingham, of Coffin & Burr, Boston bond brokers, frankly acknowledges the corn when, not denying the possibilities for cheaper and better fertilizers at Muscle Shoals, he urges in the Boston Transcript that the power should be awarded to the Alabama Power Co., and complains that "As to the fertilizer end of this problem, it has been given an undue importance and has had a disturbing influence on the entire discussion." With the unanswerable facts in favor of the farmers at Muscle Shoals, and against the contentions of the power interests, it is no wonder that Mr. Frothingham feels pinched by the disturbing influence.

Since nitrogen and phosphoric acid constitute more than 75 per cent of the farmers' fertilizer purchases, it is to be expected that the large-scale production of these plant foods in this favorable location should have a radical effect upon the cost of fertilizers. When such a national leader in electrochemistry as Dr. E. H. Hooker, whose industries have recently contracted for \$15,000,000 worth of Niagara Falls electric power, declares that half-price fertilizer is feasible and that the operation of a single plant at Muscle Shoals will save the farmers \$30,000,000 a year in their fertilizer bill, then it behooves those who dispute it to come forward with their proof.

The repeated assurance of the feasibility of this important reduction in the cost of fertilizers, together with the well-known fact that German farmers are procuring their fertilizers at half price, has been a source of much dissatisfaction among American farmers, who are still dependent upon Chile and the by-product coke ovens for their nitrate fertilizer. Realizing its world-wide monopoly in nitrates, the Chilean Government for years has taken advantage of its monopoly through an export duty to meet a great part of the government's expense. An export tax of \$12.53 on every long ton of Chilean nitrate was levied in 1879, and since that time, whenever the farmer buys Chilean nitrate—which sells at our ports for about \$50 a ton—he pays a tax of about 20 per cent to support the Chilean Government. Since the beginning of importations this country's nitrate bill has reached approximately \$1,000,000,000 up to July 1, 1924, and American con-

sumers up to that date have paid Chile an export tax of more than \$212,000,000 for the mere privilege of buying nitrates from that country.

POSSIBLE SAVINGS

The comparative economic benefits of the Muscle Shoals power, when utilized in fertilizer manufacture as against public-utilities service through a superpower system, are evident when it is recognized that the farmers' expenditures for fertilizers in the 11 Southern States from Virginia to Arkansas, as shown in the following table and upon the map, were \$207,000,000 in 1920, while the expenditures for electric lighting and power purchased from all public utilities as recently as 1922 in the same States amounted to only \$109,000,000.

A saving of 50 per cent of the farmers' fertilizer bill in these 11 States would be a greater economic benefit to the people of that region than would result if every purchaser of public-utility light and power in those States were supplied at 10 cents on the dollar. Such a reduction would be absurd and manifestly impossible, while it is generally conceded that the cost of fertilizers can be reduced one-half at Muscle Shoals.

Annual expenditures for light and power furnished by public utilities compared with annual expenditures for fertilizers in the South-eastern States

[From reports of U. S. Census Bureau]

State	Expenditures for light and power purchased from all public utilities, 1922	Expenditures for fertilizer, 1920
Virginia.....	\$13,940,025	\$17,277,705
North Carolina.....	15,876,891	48,796,604
South Carolina.....	8,982,735	52,546,795
Georgia.....	14,674,362	46,196,434
Florida.....	7,143,546	10,316,929
Alabama.....	10,259,689	14,066,108

It is also true that the farmers constitute by far the majority of the population in these States, for census returns show that more than 75 per cent of the population is classed as rural, so that the welfare of 17,000,000 out of a total of 22,000,000 of people depends directly, from year to year, upon their use of commercial fertilizers.

To say, as Senator Norris does, that we must have a public-utility development at Muscle Shoals and that "any other development, especially at public expense, is an injury and a fraud to the people of the country, and particularly to the people of the Southern States," was voted untrue by the southern Representatives in the House, who voted for the acceptance of the Ford proposal with but one dissenting vote.

There can be no question that in the Southeastern States a super-fertilizer policy rather than a superpower policy not only secures the greatest good but it secures that good directly for the greatest number, while indirectly there is not a State in the Union but will share in its economic benefits.

Those who are in favor of a superpower policy at Muscle Shoals and against a superfertilizer policy owe it to the farmers to show that their plan will do as much for the people by reducing the cost of power as the Ford plan will accomplish for the farmers by reducing the cost of fertilizer.

Let us have the giant power or superpower program by all means; it is a natural and inevitable improvement. Neither Mr. Ford nor any other reasonable man would refuse to interconnect the Muscle Shoals plants with a general system, since such interconnection would be of great and undoubted value to all concerned; but if we would serve our posterity wisely, we should assure ourselves that this water power, with its unique advantages in the production of fertilizer, shall be employed primarily for that purpose. This is the thought conveyed in the message of President Coolidge to Congress when he said, "The amount of money received for the property is not a primary or major consideration."

QUESTIONS OF POLICY

Such power distribution as can be accomplished without detriment to fertilizer production may confidently be expected under the Ford offer, and when Senator Norris makes the unqualified assertion that Nashville, Memphis, Knoxville, Chattanooga, Birmingham, and other southern cities will not get a kilowatt of Muscle Shoals power if the Ford offer is accepted he is making a statement which will not stand investigation. Mr. Ford expressly informed the public on October 11, 1923, that "If I get Muscle Shoals we shall run power lines 200 miles in every direction from Muscle Shoals."

It is true that power distribution is not a requirement of his offer, but this is in the interest of the greatest possible production of fertilizer. Neither Henry Ford nor anyone else can agree to manufacture nitrogen and other commercial fertilizers according to demand and at the same time agree to distribute his power supply to meet the public-utility demand in the Southeastern States.

Every bidder recognized this fact, and all except Henry Ford limited the power which they proposed to use in fertilizer production. This is one important reason why I am for the Ford offer.

The second question of policy is whether we shall have Government ownership and operation or private ownership and operation at Muscle Shoals.

There are many things which this powerful Government of ours can do more effectively than any private citizen or corporation. In the case of Muscle Shoals, however, as I view it, the policy of Government operation is in greatest danger from its own best friends. Neither a nation nor an individual can rush into commercial chemistry without risking heavy losses. In such a venture one of the very first questions which any private executive would ask is, What will it cost? Neither Senator NORRIS nor any other advocate of Government operation at Muscle Shoals has suggested an estimate of the investment that would be required, nor of what the returns would be if the Government undertakes this enterprise.

But these same people demand from Mr. Ford very specific guaranties, and because Mr. Ford did name definite terms, he, also, as a prudent business man, protected himself by limiting the payments during the preliminary period of six years at Dam No. 2 and three years at Dam No. 3, during which time he and his associates could not use any considerable amount of power. During this period they would be working out ways and means for utilizing this large amount of power primarily for cheaper fertilizers with useful by-products wherever possible. Nevertheless, Senator NORRIS and others denounce Mr. Ford's offer as not constituting a sufficient return to the Government, although Senator NORRIS in his bill is unwilling to hazard any estimate whatever of any future return. The important fact is that no other bidder has offered a return equal to Mr. Ford's, together with a definite obligation to manufacture fertilizer to the full capacity of nitrate plant No. 2 as a minimum, except at the expense of the Government.

At Muscle Shoals only 241,000 horsepower of a total of 850,000 horsepower will be available continuously throughout the year, and when the remainder, or secondary power, is available at all it will be so unreliable and irregular that no reasonable man would build large industries dependent upon it for their operation.

COSTS UNDETERMINED

This large secondary power is a problem which, under the Norris plan, will lead the United States into large appropriations, either for the construction of great storage dams to stabilize the flow of the Tennessee River and hold back the flood waters so that they can be utilized during the low-water periods, or, as an alternative, for the construction of enormous steam-power plants, which would have to be operated for the greater part of the year. Probably both will be required. How much such a program would cost the United States the Chief of Engineers has declined to say.

"Just what will prove to be practicable no man at the present can state," said General Taylor to our committee; "nobody has got the data. We have more than anybody else and we don't know. Nobody does."

This statement of the Chief of Engineers confirms my opinion that the facts which we should have for a businesslike consideration of the Norris bill have never been determined.

On the other hand, the Ford offer eliminates all such uncertainties, for, following the preliminary construction period, the Government gets full 4 per cent on its entire investment to complete the Wilson Dam, fully equipped, and on the entire cost of building Dam No. 3, with complete equipment, no matter what these costs may be. As for the \$17,000,000 of war funds expended on the Wilson Dam before the Ford offer was made and on which no return is proposed, it fairly represents the unavoidable waste brought about by war and other unfavorable conditions; but this is included in the amount returned to the Government by the Ford sinking fund during the lease period, as has been shown by Secretary Weeks in his testimony before the Military Committee of the House.

GOVERNMENT OPERATION

I am for Government operation of our water powers, but I urge that we begin our policy under conditions that promise success—namely, at a large power site where most of the power is reliable and constant all the year round. One such favorable site is Priests Rapids on the great Columbia River in the State of Washington—a river which will richly repay a Government expenditure of \$500,000 or more for a complete survey of its navigation and power possibilities. A still better power site, perhaps, is at Croil Island, near the Long Sault Rapids in the St. Lawrence River, where the continuous power on the American and Canadian sides is nearly 1,000,000 horsepower.

That site is controlled by three powerful financial interests—the Du Ponts, the Aluminum Co. of America, and the General Electric Co.

In spite of the monopolistic character of these three great interests, I would be willing to grant them a 100-year lease to develop this 1,000,000 horsepower site on the St. Lawrence if they will include in their offer the fertilizer provisions of the Ford proposal. I do not believe, however, that these interests would make such an offer—they never have at Muscle Shoals. Meanwhile I suggest that our engineer representatives on the St. Lawrence Commission study the Government-operation plan of the Ontario Hydroelectric Power Commission with a view to recommending a similar plan for the Government operation of the great water-power site at the Long Sault on the St. Lawrence for the benefit of eastern farmers, and at Priests Rapids on the Columbia for the benefit of farmers of the West.

I may be pardoned a bit of a diversion perhaps in connection with the Columbia River. In my studies of the power possibilities of our streams I could find no data that appear at all conclusive as to the water power that can be developed on this mighty international stream. Few of our people realize that the Columbia drains an area twice as great as all the Middle Atlantic and New England States combined, and its tributaries extend through Washington and Idaho into Montana and Nevada.

On the other hand, I find that such an insignificant and unknown stream as the Catawba River in South Carolina has developments totalling nearly 500,000 horsepower, and an unknown tributary of the Coosa River, Ala., called the Tallapoosa River, has furnished sites for six large storage dams, where the engineers had reported but one.

The Columbia and its tributaries can develop more water power within our borders than the St. Lawrence; but the public does not appreciate the Columbia River, because its power possibilities have never been surveyed, and I repeat my statement that this Government can well afford to spend \$500,000 for such a survey.

Returning to Muscle Shoals, the difficulties which make it dangerous for Government operation are not merely the difficulties of power development. The air-nitrogen fertilizer industry exists in large commercial form only in Germany, while in the United States there is no such developed industry and there are no precedents to follow. One of the most competent electrochemical engineers in the United States well expressed the situation before our committee when he said, "This art is changing so fast that you can hardly follow it."

WHY INVITE FAILURE?

In this new industry any plant, however well designed, admittedly may become obsolete even before its construction is completed, as our large Muscle Shoals plant already has become. How, then, can any reasonable man insist upon taking the taxpayers' money by the scores of millions of dollars and sinking it in great fertilizer plants under such conditions when, with the Ford offer accepted, private capital agrees to research these improved processes, carry the research work through to a commercial scale, and to adopt such processes as prove their worth, insuring that the nitrate plant will be kept up to date for 100 years with no expense whatever to the Government?

I doubt if anyone can imagine that we would have had the present remarkable perfection of the modern automobile if the first horseless carriage had been turned over to the Department of Agriculture to develop; yet the problems of the automotive industry are simple indeed when compared with the problem of preparing and delivering to the farmer an adequate supply of plant foods at prices that will enable them to be applied profitably in sufficient quantity to our great field crops. To put such a problem of large-scale development and production into the hands of a Government bureau is, in my judgment, to invite a disastrous failure, which can and undoubtedly will be held up as a horrible example by those who oppose Government ownership and operation as a policy.

It is a most significant fact that many of the interests that opposed the operation of Muscle Shoals by the Government in 1920, and that have been fighting the Ford proposal, offer no objection to the Government operation bill of Senator NORRIS; but the amazing thing is that the Senator can not see that the power companies and their Wall Street allies who favor his bill and who have offered no proposal of their own in the Senate do so because the Senator's bill is a means of defeating the Ford proposal and provides a wide-open gateway to the power that these interests long have coveted, but which they could not get directly by offers of their own.

[From the Saturday Evening Post of November 20, 1924]

To secure the greatest good for the greatest number at Muscle Shoals we must certainly conclude in the light of the facts stated—first, that fertilizer production should be the chief objective and power distribution a secondary consideration; and, second, that the provisions of the Ford offer are much preferable to the risks of Government operation of such an undeveloped and hazardous enterprise.

Certain of the engineering societies have proposed that a fact-finding commission of their members be created to assemble and limit to Congress the facts about Muscle Shoals; but at this stage of development of the art of air-nitrogen fixation no fact-finding commission, whether of civil engineers, chemical engineers, or other scientific men

of any qualifications, could determine what the cost of fertilizer manufacture is to be at Muscle Shoals. A number of new processes, untried as yet on a commercial scale, await development, any one of which, placed in strong hands able to command the necessary technical talent and able to spend the necessary money, gives great promise of lower costs, with production of aluminum and its alloys, for example, as by-products. What we need is not an investigation by engineers but the test of these processes on a commercial scale.

THE FARMER'S FAITH

Senator NORRIS and those who agree with him say that the farmer has been deceived, and that his confidence in Henry Ford's ability to solve the fertilizer problem at Muscle Shoals is a mere blind faith, but I can not agree with them.

If anyone would know the reason for the farmer's faith in Mr. Ford, let him study the table herewith, which shows the price record of the Ford touring car and the average daily wages paid in the Ford factories for the past 16 years, from statistics furnished by the Ford Motor Co.

16-year record of the Ford Motor Co.—1908-1923

Year	Price of Model "T" touring car		Average daily wages paid	
	Amount	Per cent reduction from 1908	Amount	Per cent increase over 1908
1908	\$950		\$2.25	
1909	780	18	2.14	5
1910	690	27	2.40	7
1911	660	31	2.28	1
1912	550	42	2.25	0
1913	490	48	2.43	8
1914	440	54	4.41	96
1915	360	62	4.40	95
1916	360	62	4.41	96
1917	450	53	4.95	117
1918	525	45	5.31	136
1919	575	39	6.11	171
1920	440	54	6.72	198
1921	415	56	6.91	207
1922	348	63	6.65	195
1923	285	69	6.62	194

*Decrease.

The farmer knows that this price reduction from \$950 in 1908 to \$285 in 1923 was not forced upon Mr. Ford by any of his competitors. He knows that the reductions have been made voluntarily, while at the same time Mr. Ford has been paying the highest wages paid anywhere in the automobile industry.

Any man who can master the science of mass production as Mr. Ford has mastered it, and reduce the price of his product 69 per cent while increasing the average daily wages of his men by 194 per cent, is serving the common people of this country as few men have served them. The people are not slow in recognizing such a friend, and the enthusiasm for Mr. Ford, instead of being based on blind faith, is a testimonial to his magnificent achievement. The man who says the farmers are fooled is fooled about the farmers. It is no more possible to legislate confidence in the power and fertilizer interests into the minds of American farmers than it is possible to legislate their confidence in Henry Ford and his company out of their minds.

The farmers will regard it as an insult to their intelligence to be told that they should have faith in the ability of the Department of Agriculture to reduce the price of fertilizer at Muscle Shoals as Henry Ford has reduced the price of his car. When will the Department of Agriculture have a selling organization equal to Mr. Ford's 10,000 successful agencies?

In view of the violent misrepresentations which have been broadcast over the country regarding Mr. Ford's offer, it is not surprising that he has seen fit to withdraw it, but whether he takes any further interest in the subject or not, it can not be denied that in bringing the true possibilities of Muscle Shoals to the attention of the country he has performed a public service for which due credit will be given him.

It has been declared that the acceptance of the Ford offer would be a raid on the Public Treasury, an attack on conservation, a subsidy of \$14,000,000,000, and an unregulated gift of \$50,000 horsepower. If all this were true, and if those who support the Ford offer were the simple-minded dupes or the vicious self-seeking politicians which they have been pictured, then this would be a serious indictment of the Members of the House of Representatives who passed the Ford offer without amendment by almost a 2-to-1 majority. Such absurd exaggerations hurt no one but those who use them. They will not stand because they are not based upon facts.

PUBLISHED FIGURES QUESTIONED

As an example of the lack of careful investigation on the part of Senator NORRIS in stating his facts, let us consider the following statement of his which has been widely published:

"There is personal property which under his [Ford's] bid would be conveyed to him, amounting in value, in round numbers, to \$2,000,000. Most of this personal property has a definite fixed market value. There are all kinds and quantities of building materials, all stored in sheds and kept in perfect condition. This building material was bought by the Government and stored on the property because it was thought at the time it might be necessary to use it in extending the towns owned and built by the Government, and in the construction of other shops and works. For instance, there is more than 6,000,000 feet of lumber, millions of common and fancy brick, immense quantities of slate shingles and hollow building tile. There are more than 10,000 wooden doors and 3,000 screen doors"—

In order to determine the accuracy of this statement, I wrote to Gen. C. C. Williams, Chief of Ordnance, and received a reply stating that property valued at \$1,998,236.31, consisting principally of lumber, construction equipment, fittings, housing equipment, and the like, had been transferred to the Wilson Dam. Further inquiry develops the fact that it was used for temporary accommodations for the workmen, and for other temporary construction purposes. The office of the Chief of Ordnance also stated that "in addition to that transferred to the Wilson Dam, very appreciable quantities of certain materials have been used on plant maintenance during the last five years. A recent estimate, covering surplus property at plant No. 2, and including ammonium nitrate, construction equipment, railroad equipment, tools, electrical equipment, building material, and miscellaneous other equipment, but not including reserves which may be required for plant maintenance in the near future, has been prepared by the plant organization. The estimated sale value of this property is \$506,175.70. * * * In general the most valuable property has been used at the dam, leaving items of more uncertain value."

Instead of finding \$2,000,000 worth of building material which has been placed in sheds and well taken care of, and for which there is a ready market, as the Senator declares, Mr. Ford, on the acceptance of his offer, would find that the serviceable portion of this material has been used for temporary construction purposes at the Wilson Dam and that on completion of the job its value will be practically nil. Moreover, under his offer, it would become leased Government property not subject to sale.

This is a fair example of the lack of accuracy which appears throughout the reports of Senator NORRIS, which he has issued on behalf of a majority of our committee. Such inaccuracies do not inspire a great deal of confidence in the majority's report.

Many well-intended editorials inspired by these inaccuracies have denounced Mr. Ford's offer and have referred in glowing terms to the superiority of the offers of the power companies and others, but in spite of this widespread and expensive publicity, neither the House nor the Senate committees would report any of them. I have stated the reason. My space is limited, but I will state it again:

No other bidder combined a return equal to that of Mr. Ford's with a definite obligation to manufacture fertilizer to the full capacity of nitrate plant No. 2, except at the expense of the Government.

WAS JUDGE GARY ASLEEP?

There are, perhaps, half a dozen objections to the Ford offer which the opposing interests have heralded through the press from one end of the country to the other. First, there is the claim that Mr. Ford would receive "the greatest gift ever bestowed on mortal man since salvation was made free to the human race," as Senator NORRIS extravagantly puts it. The Senator has been supported in this view by similar statements of the fertilizer interests and the power interests, which have consistently opposed the development of Muscle Shoals from the very outset. The record of these interests does not support the statements made either by them or by the Senator from Nebraska.

VALUES OVERESTIMATED

If it were true that the Muscle Shoals properties possessed an earning power so great as to enable Mr. Ford or his estate under his offer to accumulate \$14,500,000,000 in 100 years by virtue of their possession, and enable his corporation to dominate all the business of the entire world, as Senator NORRIS declares, then any schoolboy would know that when the Federal Government decided to dispose of these properties there would have been a veritable stampede to secure such marvelous earning capacity. Who could imagine the United States Steel Corporation, for example, overlooking a chance to accumulate \$14,500,000,000? But did it undertake to secure this wonderful bonanza? It did not. When, in 1919, the Government, through its nitrogen director, Mr. A. G. Glasgow, attempted to secure

an offer for this property, his proposal was coldly received and the fertilizer and allied interests all declared that they were not interested.

The testimony shows that Mr. Glasgow went personally to the president of each of the large fertilizer companies and offered him the nitrate plants free of any rental whatever until they should earn 9 per cent on whatever investment was necessary for their operation, thereafter dividing profits evenly with the Government; but, with one accord these interests declined to make an offer, in spite of the fact that then, as to-day, the dam was under construction, with attractive prospects for water power for economical operation. An appeal was made also by the nitrogen director to the by-product coke operators—leading firms of which are controlled by the Mellon interests, which also control the Aluminum Co. of America—with the same result. The Muscle Shoals properties went begging and no one would have them. The situation was repeated in 1921, when General Beach asked the power companies for bids.

Falling to interest private capital, Mr. Glasgow proposed a Government corporation to be financed by the sale of surplus war materials, which should undertake the operation of this property. The Wadsworth-Kahn bill, which carried these provisions, was vigorously opposed in both the House and Senate by the same interests which had declined to bid; and though it passed the Senate, after having been destructively amended, the bill died in the House Committee on Military Affairs. It is these same interests which have been looking to the Senate to defeat the will of the people and reject the Ford proposal.

VALUES OVERESTIMATED

The truth of the whole matter is that these properties have no such value as Senator NORRIS suggests, but that their value would be utterly insignificant compared with the losses that would be incurred by anyone who undertook to operate nitrate plant No. 2 in the production of fertilizer as it now stands, and as it will continue to stand until scores of millions have been expended to establish the electrochemical fertilizer industry successfully at Muscle Shoals. Realizing this, the Union Carbide Co. and the Hooker-Atterbury-White people offered to operate the nitrate plant only on the condition that the Government paid all the expense. The Alabama Power Co. did not offer to operate the plant at all, but merely to keep it in idleness, while its offer to produce 50,000 tons of nitrogen for fertilizers annually was a conditional one. Its unconditional offer was limited to 5,000 tons annually.

The claim is not true that Mr. Ford receives a warranty deed in fee simple to this nitrate-plant property, however questionable its value, for the provisions of his offer must be written into his deeds and become covenants running with the land. The sale is conditional, and if Mr. Ford or his company at any time violates its provisions, the Government can cancel his deeds by court procedure and take its property back, and neither Mr. Ford nor his company can give a clear title to the property for 100 years.

As for the \$700,000 worth of platinum which Senator NORRIS suggests that Mr. Ford might sell, this platinum is made up into special catalysts that are an absolutely necessary part of the military equipment of nitrate plant No. 2, and Mr. Ford could not sell these catalysts without violating his agreement to maintain the nitrate plant ready for war service by the Government on five days' notice.

But, say the opposition, even if the nitrate plants are not so valuable, there is this great water power. Yes, I reply, but all the reliable power—all the 241,000 horsepower available all the year round with the help of the steam-power plants—must be used in order to carry out Mr. Ford's minimum fertilizer obligations, and in these operations his profit is limited to 8 per cent on the fair actual annual cost of production, with a board of farmers to tell him what is fair and to fix the price and control the distribution of his product. As for the irregular and unreliable power, sooner or later this largely will be needed for fertilizer manufacture to meet the demand. At present it has little or no value and will have none until millions are spent in making it dependable and valuable.

It should be remembered in discussing what Mr. Ford should or should not have offered, that he was asked merely to state what arrangements he would be willing to make to assure the Government a reasonable return on its investment if the United States should complete the unfinished dam and power plant. There was no suggestion that this nitrate enterprise, the peace-time purpose of which was the production of fertilizers and not the distribution of electrical power, should be required to come under the terms of the Federal water power act. The legality and enforceability of many of the provisions of that act were in dispute at that time, and still remain so, the States of New York and New Jersey having brought suit in the Supreme Court to test its validity and to defend their States' rights; and two national party platforms call for its amendment. It is a law designed to apply to projects in which water-power development and distribution are the purposes of the enterprise, and the act can hardly be affected whatever the outcome at Muscle Shoals.

There was no suggestion that offers to lease the dam must be limited in their lease period to 50 years. On the contrary, the only offer for Muscle Shoals which has ever been recommended to Congress by the United States engineers was made by the Alabama Power Co. in 1913 for a lease period of 100 years, and offered a return of only 3 per cent on the Government's investment. One way to defeat the Ford offer was to provide that Mr. Ford should come under the Federal water power act, and this was attempted in the House of Representatives; but a large majority, recognizing that the House had no authority to change Mr. Ford's offer without his consent, voted down the proposed amendments.

If the benefits of the regulation to be had under the water power act are really what is claimed for them, then they should be applied to all developments affecting the navigable capacity of our streams; such, for example, as that of the Aluminum Co. of America on the Little Tennessee River; but I have yet to find a single particular in which the public would be benefited by bringing the Aluminum Co. under the water power act, for the only difference in the situation would be that the annual operating expenses of the Aluminum Co. would be increased by 25 cents for each installed horsepower of its development. If there is no public benefit to be gained by bringing the Aluminum Co. of America under the water power act on the Little Tennessee River, then why should Henry Ford be required to come under the water power act in the production of fertilizers and aluminum at Muscle Shoals?

STATE CONTROL

As for the lease period, I agree with Secretary Weeks that this is not a vital question, for its length is absolutely immaterial if the interests of the public are protected. Neither Mr. Ford nor anyone else can distribute power to the public in any Southern State without his plant automatically becoming a public utility, subject to the rules and regulations of the State public-utility commission in the State in which he does business. If anyone has any doubt about this, or sees the need for further regulation, let him remember that aside from navigation the control of the use of the water of a navigable stream for beneficial purposes is not in the Federal Government but in the State; and if it should be found that any further regulation of Mr. Ford and his company becomes desirable, a simple remedy is immediately available, for the Governor of Alabama can call the legislature of the State together and pass whatever laws are necessary in the public interest.

The statement of Senator NORRIS that Mr. Ford's bid actually "provides that the Ford corporation shall have the electricity developed at Muscle Shoals without regulation by either Federal or State authority" is entirely incorrect and unjust to Mr. Ford. No such provision is made anywhere in the Ford offer, and if it were it would be entirely void and unenforceable. The powers of Congress and of the State legislatures and of the courts can not be set aside by contract. As to the legality of Mr. Ford's guaranties and pledges, this is a purely legal question in which I, like other laymen, must be guided by legal opinion; but I find nothing in the record to warrant the apprehension of our chairman; on the contrary, I find that the Judge Advocate General testified that these guaranties were satisfactory.

The Senator claims that Mr. Ford has asked the Government to insure him against the destruction of the dams; but the proposal says merely that (as in the case of all other navigation dams) the responsibility for maintenance expense is left to the Government, and it is a well-known principle of law that any contract becomes void by the destruction of its subject matter. As for the cost of this maintenance, Mr. Ford pays \$55,000 annually for this purpose and the Chief of Engineers has testified that this is sufficient. I am willing to trust the judgment of our Chief of Engineers.

Both nitrates and dyes are necessary for national defense; the same organic chemicals which become our dyes can be converted to poisonous gases for chemical warfare, or, when combined with nitrogen, become explosives. The crude materials for the dye industry are obtained from the by-products which are recovered in the manufacture of coke in by-product ovens.

When war was declared the American manufacturers, who as a whole were about 90 per cent dependent upon German synthetic colors, found that their supply was cut off in the face of an unprecedented demand for their own products in which the dyes were needed. As a result the price of dyes skyrocketed to a level as much as 2,100 per cent above normal. The demand far exceeded the supply, regardless of price, and it was under these conditions, with the opportunity for enormous profits, that the American dye plants were built.

THE DYE INTERESTS

In the Senate hearings on dyes in 1919 it was shown that the National Aniline & Chemical Co., owned by some of the largest interests which are fighting the Ford offer, was capitalized in 1917 with \$25,000,000 preferred and \$25,000,000 common stock and that 18 months later that company had been able to set aside for plant depreciation, obsolescence, Federal taxes, and so on, a sum equal to their entire common stock, or about \$25,000,000.

Having thus had an extraordinary opportunity to pay for their new plants out of war-time profits, the dye industry, led by the General Chemical Co. and the Du Ponts, came to Washington and declared that the high tariff of 30 per cent ad valorem plus 5 cents a pound which had been placed on foreign dyes by Congress in 1916 was not sufficient. In declaring to the Senate Committee on Finance what the dye industry wanted, Mr. Irénée Du Pont, president of E. I. Du Pont de Nemours & Co., stated:

"What do we want? I say an embargo, with a permit to bring in these things we do not make for a 10-year period. I say we want, second, a tariff in addition to the embargo. The embargo may miscarry; put as high a duty as you can get behind the embargo wall. I want further, then, and at the risk of seeming to get a monopoly, to urge that you should provide that the Sherman law does not apply to the dye industry if it is thought necessary in the opinion of some Government official."

So the dye industry, whose unregulated profits had been absolutely protected by the President's war-time embargo on dyes of 1917, secured a continuation of the embargo in 1921 which continued until 1922, when the tariff was increased to 60 per cent ad valorem and 7 cents a pound; and to-day only a few specialty dyes are imported, while the average cost a pound of the dyes used in this country is about three times their pre-war cost.

On one hand we have this dye industry, owned by the powerful eastern financial interests, with its war-built plants long since paid for out of war-time profits, securing this remarkable aid at the expense of the American people in the name of national defense; on the other hand, we have the Ford offer to establish a nitrogen industry for the production of the nitrogen that is absolutely necessary for every pound of our military explosives, and of the greatest benefit to agriculture as well. One readily receives an absolute embargo against competition from abroad at the hands of Congress, free from any limitation whatever on its profits; the other, asking no tariff protection and with a voluntary limitation of profit to 8 per cent on the fair actual annual cost of production, and with a board of farmers to fix the price and to say what is fair, is denounced as a subsidy and denied a decision for more than three years.

Why the difference? It is this: In the case of the dye industry Congress has heard and promptly responded to the voice of big business, while in the case of the Ford offer Congress has failed to answer to the appeals of the farmers for a decision.

I have nothing whatever against the American dye industry—I recognize its great value as a military asset; but I protest against the discrimination which says that these favors to the dye industry are justifiable and the acceptance of Henry Ford's offer is unjustifiable.

Though the power and fertilizer interests which are fighting the Ford offer are willing to deal with Government bureaus or special officials, they have shown no inclination to deal directly with the representatives of the people in Congress or to deal with the consumers themselves. Consistent with this attitude, their spokesmen have recommended that all offers be rejected and the entire matter be referred to a commission as a means of defeating a vote on the Ford offer in Congress. In this connection they have pointed to the President's message in which he suggested a small joint committee of Congress to deal with the Muscle Shoals question. This is a very different proposal from the commission plan. It does not recommend that jurisdiction of the Muscle Shoals question shall be taken out of the hands of Congress. A commission with power to act would relieve Congress from its responsibility to the farmers, however, and if it chose to recommend the distribution of the power and to leave the farmers at the mercy of the Chilean Nitrate Producers' Association, the way would be open for it to do so.

Armies and not arbitration have settled the fate of nations for centuries, but civilization has come to realize that neither armies nor arbitration can assure national safety in these days of deadly scientific achievement.

A high naval authority recently said, "The poison-gas clause of the limitation of armament treaty is merely an internationally expressed hope that may be expected possibly to prolong the régime of peace. . . . The discovery of a new gas may mean the routing of an army, the annihilation of a navy, or the loss of a war."

I am very much opposed to war, but I realize that under these conditions our country well may observe a day dedicated to the national defense. The voluntary mobilization of 17,000,000 men and women is inspiring and impressive, but it is a pitiable mockery of preparedness if our patriotism is not backed up by industries prepared to furnish the necessities of present-day warfare on short notice.

PEACE-TIME NECESSITIES

Men may be mobilized quickly, but no general order will produce great tonnages of nitrates for explosives nor of light metals and other materials for efficient aviation equipment nor of deadly toxic gases for chemical warfare, unless we have in this country large, well-established industries making peace-time products which can supply these war needs

when called upon—strong industries, able to carry on the intensive research which we must have if we are to continue in reasonable security.

We may agree to the limitation of armament, but we can not limit the production of peace-time necessities; and when these necessities can be turned quickly to present-day military purposes they become an unbridled menace in the hands of a foreign enemy. Nitrogen, for instance, has its peace-time use in fertilizers, chemicals, and refrigeration. Aluminum and other light metals are needed for motor cars, household utensils, commercial airplanes, welding, and electrical uses, while chemicals for war gases are used in dyes, textiles, paper, and a multitude of other manufactures. No limit can be placed upon the peace-time production of nitrogen, light metals, and gases, and no nation need feel secure which ignores or neglects them.

Applying this to Muscle Shoals, the possibilities of the future are nothing short of bewildering.

First, there is the opportunity to combine nitrogen fixation for fertilizer purposes with the production of light metals, such as aluminum, by a number of processes. For example, report No. 100 of the United States Fixed Nitrogen Research Laboratory describes a modification of the so-called aluminum-nitride process whereby an electric furnace product called ferro-aluminum is employed, and cites references showing that the production of ferro-aluminum is nothing new, for it has been known to electrometallurgists since 1885.

Estimates of the cost of production are given showing that with conditions to be had at Muscle Shoals the entire cost of nitrogen for fertilizer purposes can be charged against the aluminum, and even then the cost of the purified raw material from which aluminum is made can be reduced 40 per cent.

When our Government nitrogen laboratory, which since 1919 has made a specialty of the study of improved processes, admits that the raw materials for aluminum can be reduced 40 per cent in cost and at the same time the nitrogen, which is the most expensive element in commercial fertilizers, can be supplied free of charge for fertilizer manufacture, it must be admitted that the prospects for the production of fertilizers at Muscle Shoals and their sale to farmers at about half of the present prices is a reasonable expectation. Since the production of aluminum is an important factor in reducing the cost of fertilizers at Muscle Shoals, I would be disposed to give preference to any satisfactory offer which provides for its production in connection with fertilizer manufacture; not only at Muscle Shoals but at the magnificent power site at Croll Island in the St. Lawrence River and at Priest Rapids in the Columbia River, to which I referred in my previous article. Geologists are predicting the early exhaustion of the best of our copper deposits and the cheapening of aluminum well may become an important factor in maintaining the leading position of the United States among the industrial nations of the world.

CHEMICAL POSSIBILITIES

Nitrate plant No. 2 is the greatest calcium carbide plant in the world, and the products of calcium carbide alone rival those of coal tar in their possibilities of variety and usefulness. One great branch consists of the derivatives of carbide after it has been combined with nitrogen, forming the well-known fertilizer compound, calcium cyanamide. The United States Fixed Nitrogen Research Laboratory reports that it has studied a few of the many compounds which can be made from cyanamide, such as urea, the most concentrated form of exclusively nitrogen fertilizer known, dicyandiamide, melamine, guanidine, urethane. Among others which have received less attention might be mentioned carbamic acid, amidodicyanic acid, carboxyguanidine, biguanide, ammeline, bluret, allophanic acid, cyanaminoformic acid, iminodicarboxylic acid, and others. As Dr. F. G. Cottrell, director of the Government's nitrogen laboratory, states in his annual report, "Some of the large number of cyanamide derivatives have already found distinct uses in the manufacture of military explosives, in medicine, and in the arts. This class of compounds forms the natural starting point for a whole new field in chemistry much as certain coal-tar compounds lay at the base of the present dyestuff industry."

Another series of products of calcium carbide are the derivatives of acetylene, the gas which is formed when calcium carbide is treated with water. Acetylene is most generally used for illumination, and in connection with oxygen produces in a special torch a very hot flame useful for cutting and welding steel and other metals. Combined with water, acetylene forms acetaldehyde, which, when oxidized, becomes acetic acid, which was used in a large way during the war for the preparation of materials for smokeless powder and dope for airplane wings. Acetic acid, however, when heated in the presence of a catalyst is converted to acetone, a valuable solvent especially useful in the making of smokeless powder, celluloid, chloroform, iodoform, sulphonal and many other organic compounds. Acetone is the base used to produce bromoacetone, which was used by the Germans as a tear gas. Its uses in organic synthesis defy enumeration. To mention one in-

teresting example, when acetone is reduced by nascent hydrogen generated by the action of an amalgam of sodium on water, a dihydroxyalcohol is formed, called pinacol.

This was made by the Germans in large quantities during the war and converted by heat and pressure into dimethylbutadiene, which, when merely stored in a sealed vessel, maintained at a temperature of about 60° centigrade for about two months, was converted by a process called polymerization into synthetic India rubber.

Cheap power and cheap salt at Muscle Shoals naturally lead to another varied field of valuable products. First, there is cheap metallic sodium by a number of available processes. The making of sodium has been suggested in recent scientific literature as a feasible means for the chemical storage of electrical power. Cheap metallic sodium opens the door to another series of electrochemical processes for producing combined nitrogen for fertilizers along with many useful by-products, particularly aluminum and magnesium. I would not venture an estimate of what it will cost to bring these new processes to successful production on a commercial scale, and no advocate of Government operation at Muscle Shoals has suggested any approximate estimate. The amount, however, certainly will be large, and under the Norris bill it will come out of the Federal Treasury. I much prefer to let Henry Ford undertake this job at his expense.

Other applications of salt, in connection with fertilizer production, yield chlorine, the well-known war gas; or, combined with sulphur, produce sulphur monochloride, useful in vulcanizing rubber, and which, when combined with ethylene, produces the mustard gas which nearly won the war for the Germans. Another combination of chlorine is chloride of lime, useful as a bleaching powder and disinfectant, from which are obtained chloroform and phosgene, another war gas with a peace-time usefulness in dye manufacture. Another branch of the electrochemical salt tree produces sodium cyanide, a useful disinfectant and of great value in extracting gold and silver from their ores, and in the manufacture of insecticides and fungicides for spraying fruit trees, and in the production of a deadly war gas called cyanogen chloride. Caustic soda is another product from which there are obtainable various soap compounds and drugs valuable in medicine, while as a by-product is produced the hydrogen gas that is essential in the manufacture of nitrogen fertilizers by several of the most modern processes.

RISKS AND HAZARDS

It has always been thought difficult to cause clay and salt to react upon each other directly at high temperatures because of the volatility of the salt. It now appears that this difficulty has been overcome, and patents have been issued for processes which indicate that this reaction promises to be made commercial. This may mean substantially cheaper metallic aluminum, for it indicates that the problem of large-scale production of anhydrous aluminum chloride at low cost may soon be solved. This is very significant aside from chemical warfare, for the Bureau of Mines reports that the use of 16 pounds of this chloride per barrel of oil increases the yield of gasoline from the present average conversion of 30 per cent of the crude oil to a conversion of 60 to 85 per cent, so that the production of gasoline from a given amount of crude oil can be more than doubled without material changes in the present refining plants. This chloride also has a multitude of other uses in the manufacture of many dyes, perfumes, drugs, and pharmaceuticals, and is employed on a large scale in carrying out the Friedel-Crafts organic reactions.

Has Henry Ford offered to double the production of gasoline from crude oil, or to carry out any other particular one of these interesting chemical possibilities at Muscle Shoals? No, of course not; but it is along just such a road of by-product production that success in the large-scale manufacture of cheaper and better fertilizers will be found, and his offer of commercial research will surely and inevitably lead him along just such roads as I have described, for Mr. Ford proposes:

"To determine by research whether by means of electric furnace methods and industrial chemistry there may be produced on a commercial scale fertilizer compounds of higher grade and at lower prices than farmers and other users of commercial fertilizers have in the past been able to obtain, and to determine whether in a broad way the application of electricity and industrial chemistry may accomplish for the agricultural industry of the country what they have economically accomplished for other industries; and if so found and determined, to reasonably employ such improved methods."

Those who desire to see the policy of Government ownership and operation succeed in this country will do well to let this complex and uncharted field of industrial chemistry, with its inevitable succession of mistakes, loss and great expense, severely alone. That is one of the compelling reasons why I am for the offer of Henry Ford.

As a chemist, I have every confidence that at Muscle Shoals processes can be made commercial for producing nitrogen for the preservation and increase of the fertility of our farm lands, with aluminum as a by-product to give us light metal alloys for aircraft. Thus we will free ourselves from our dependence upon a foreign country for nitrates.

Again I say, I am opposed to all wars; but I have just read a translation of an article lately published in Japan insisting that a Japanese-American war is unavoidable and the sooner it comes the better it will be for Japan, and stating that after America has developed its air forces, Japan, struggle as it may, can do nothing. I refuse to believe that we ever will have any war with Japan; yet I can understand what Mr. Ford meant in his recent public statement that Muscle Shoals might prevent war.

FOREIGN EYES ON CONGRESS

At 2 p. m. on December 3, 1924, the Norris and McKenzie bills come up for consideration in the United States Senate. If the Norris bill is passed, then it will probably fail in the House. If both bills are voted down, no legislation for disposing of Muscle Shoals can be expected at the short session. Without legislation, the 260,000 horsepower which will be ready for service at the Wilson Dam in June, 1925, will stand idle till Congress passes legislation for disposing of the Muscle Shoals power in 1926.

In conclusion no better confirmation of the position which I have taken regarding the Ford offer could be found than that contained in a recent dispatch from Santiago, Chile, published in the Wall Street Journal, as follows:

"Henry Ford's withdrawal of his offer to take over the Muscle Shoals project has resulted in a considerable boom in the Chilean nitrate industry," and a United Press dispatch goes on to say that "Chile has followed the whole Muscle Shoals controversy with the keenest interest and considered Ford the greatest menace to the future of the national nitrate industry. Withdrawal of his proposal was little short of a boon to this country. Nitrate shares in London—the principal market for Chilean nitrate stocks—rose from two to three points last week as soon as news of withdrawal of the Ford offer was received."

Other offers for Muscle Shoals were submitted to committees of Congress and Senator Norris has declared to the readers of the Saturday Evening Post that any and all of them were better than the proposal of Mr. Ford. The facts are, however, that neither the announcement of any of these offers nor their rejection by the committees produced the slightest flurry in the Chilean nitrate industry, either in London or Chile. The nitrate industry, however, quickly recognized that the Ford offer meant that something effective would be accomplished in freeing the farmers of this country from the domination of these monopolists, and their industry made no secret of its satisfaction and relief when the Ford proposal was withdrawn.

In view of these undeniable facts I can only express my regret and chagrin that the United States Congress, by delay and inaction, should have lost this great opportunity to secure a boon for American agriculture. It is my earnest hope that it will be possible to secure another proposal that will be the equal of the Ford offer, but I fear that the Government will never receive another like it.

The President claims that common sense is the country's greatest asset; if so it appears that the time has come for the President to join with Congress in applying some of this asset to the Muscle Shoals situation.

CONSTRUCTION OF PUBLIC BUILDINGS

Mr. FLETCHER. Mr. President, I introduce a bill making appropriations for the construction of certain public buildings. It is a very short bill and I ask that it may be printed in full in the Record of to-day's proceedings.

The bill (S. 3511) making appropriations for the construction of certain public buildings was read twice by its title, referred to the Committee on Appropriations, and ordered to be printed in the Record, as follows:

Be it enacted, etc., That the following sums be, and the same are hereby, appropriated for the objects hereinafter expressed, namely:

(a) For increase in the limit of cost of construction of those certain public buildings, heretofore authorized by Congress to be constructed and for which appropriations were made, referred to in Senate Document No. 28, Sixty-eighth Congress, first session, \$15,130,780, or so much thereof as may be necessary.

(b) For the construction of public buildings on those certain sites, heretofore acquired, for the construction of which buildings no appropriations were made, referred to in Senate Document No. 28, Sixty-eighth Congress, first session, \$23,557,500, or so much thereof as may be necessary.

Mr. FLETCHER. In connection with the bill just introduced by me I request to have incorporated in the Record excerpts from the annual reports of the Postmaster General for the fiscal years ending June 30, 1922, pages 2, 3, 4, and 5, June 30, 1923, page 19, and June 30, 1924, page 13 (as indicated), having particular reference to the desirability of Government ownership of post-office quarters; also Senate Document No. 28 of this Congress, together with a letter dated May 17, 1924, from the Secretary of the Treasury to the chairman of the

Committee on Appropriations, United States Senate, referring to a similar bill introduced by me on March 20 last, which was referred to the Committee on Appropriations, all of which I send to the desk.

The document was, of course, printed for the information of Members of Congress and the public, but I understand that the demand for it is large and the supply exhausted.

The PRESIDENT pro tempore. In the absence of objection, the request of the Senator from Florida will be agreed to.

The matter referred to is as follows:

[Senate Document No. 28, Sixty-eighth Congress, first session]

ERECTION OF PUBLIC BUILDINGS

Letter from the Secretary of the Treasury, transmitting, in response to Senate Resolution 94, information relative to sites acquired and appropriations necessary for the erection of certain public buildings

TREASURY DEPARTMENT,
Washington, January 24, 1924.

THE PRESIDENT OF THE SENATE.

SIR: In response to Senate Resolution 94, directing the Secretary of the Treasury to furnish certain data in reference to public buildings, I have the honor to submit the following:

The information desired, together with certain additional data not specifically called for by the resolution, but without which the statement in regard to the status of authorized buildings and sites would not be complete, is set forth in Exhibit A, as follows:

(a) Name of each city or town (by States) where authorizations have been made for acquisition of a site, construction of a building on site already owned, or for site and building.

(b) Date site was acquired; or, if not acquired, its present status.

(c) Consideration paid for each site.

(d) Amount authorized for site, site and building, or for building only.

(e) Balance available for building.

(f) Estimated cost of building on site authorized.

(g) Amount of increase required where existing authorization is insufficient.

There is also submitted Exhibit B, which includes the names of certain projects, mentioned in Exhibit A, where drawings have been prepared, or are contemplated, for buildings of a very simple type that may possibly be provided within the existing limit of cost by the adoption of much cheaper methods of construction than has been the practice heretofore of this department; or by furnishing space to satisfy present needs only, without room for future expansion; or by not including accommodations for Government activities that may be located in the places named but where the legislation is for a post office only.

Respectfully,

A. W. MELLON,
Secretary of the Treasury.

EXHIBIT A

Names of cities where sites only or sites and buildings have been authorized, limit of cost of each project, amount authorized in each case, cost of land where sites have been acquired, date of acquisition by Government, balance available, estimated cost of project, and increase in limit required

EXHIBIT B

LIST OF BUILDINGS INCLUDED IN EXHIBIT A WHERE DRAWINGS HAVE BEEN PREPARED OR ARE CONTEMPLATED

California: Bakersfield, Red Bluff, and San Luis Obispo.
 Georgia: Douglas and West Point.
 Idaho: Sandpoint.
 Illinois: Geneseo, Jerseyville, and Mount Carmel.
 Indiana: Bluffton, Clinton, and North Vernon.
 Kentucky: Shelbyville.
 Louisiana: Thibodaux.
 Maryland: Salisbury.
 Massachusetts: Leominster.
 Michigan: Cheboygan and Midland.
 Mississippi: Water Valley.
 Missouri: Fayette and Liberty.
 Nevada: Fallon.
 New Jersey: Vineland.
 New Mexico: East Las Vegas.
 New York: Cohoes, Saranac Lake, Walden, and Waterloo.

Ohio: Kenton, Steubenville, and Washington Court House.
 Pennsylvania: Dubois, Franklin, Lewistown, Pittston, and State College.

Tennessee: Franklin.

Texas: Gilmer, Mount Pleasant, and Pittsburg.

Vermont: St. Johnsbury.

Wisconsin: Mineral Point.

Wyoming: Buffalo and Cody.

TREASURY DEPARTMENT,
 Washington, May 17, 1924.

THE CHAIRMAN COMMITTEE ON APPROPRIATIONS,
 United States Senate.

SIR: Reference is made to your recent request for a report on Senate bill 2882, for increase in the limit of cost of certain public buildings heretofore authorized and for which appropriations were made, referred to in Senate Document No. 28, in total amount \$15,130,780; and for construction of public buildings, on sites heretofore acquired, for which buildings no appropriations were made, referred to in said document, in amount \$23,557,500.

Detailed information in regard to the projects in the two sections of the bill was transmitted to Congress in letter of January 24, 1924 (printed as Senate Document No. 28), a copy of which is attached to this report and made a part thereof.

It has been found possible to award contracts for buildings at certain of the places of the type and construction described in the last paragraph of the said letter and furnishing the minimum accommodations possible under the legislation. This reduces the total amount required under section (a) of the bill to \$14,860,780.

The passage of this bill would permit the construction of those buildings authorized and limits of cost fixed under act of March 4, 1913, which, on account of the increased cost of labor and materials, can not now be erected within such limits. The completion of these projects and the erection of Federal buildings in many places where sites only have been authorized would be a substantial help in relieving the congestion in the Postal Service.

In connection with the foregoing you are advised that the department is informed that the appropriations contemplated by this bill are in conflict with the financial program of the President.

Respectfully,

A. W. MELLON,
 Secretary of the Treasury.

[From Annual Report of the Postmaster General for the fiscal year ending June 30, 1924]

The Postal Service is growing steadily and its requirements are difficult to meet without constant recourse to enlarged quarters, which are secured on a rental basis at an expense much greater than that which would result from Government construction and ownership. A vast sum is paid annually for these rentals. The reasons in favor of some plan of Government ownership of post-office buildings for postal use where an economy would be realized is set forth in detail in my letter to the Joint Commission on Postal Service, which reads as follows:

OFFICE OF THE POSTMASTER GENERAL,
 Washington, D. C., August 21, 1922.

JOINT COMMISSION ON POSTAL SERVICE,
 Washington, D. C.

MY DEAR SIR: There are at present 5,846 post offices in leased quarters and 1,119 post offices in buildings owned by the Government. The aggregate annual rental paid for the occupancy of these 5,846 leased quarters is \$9,262,515.47, but this aggregate does not include the amount paid for quarters not under lease, which when added to \$9,262,515.47 makes a present total annual rental bill of \$11,660,056, not including garages, to be paid by the Government from appropriation made to the Post Office Department. There are at present 5 Government-owned buildings actually under construction and 11 under contract for construction in which post offices will find quarters.

The earnings of the Post Office Department have doubled in the last 10 years. This ever-increasing postal business demands and must have space in which it may be efficiently and economically carried on. During the last holiday season several cities handled heavy parcel-post business on the sidewalks under protection of guards but without protection against the weather. This increased volume of postal business has forced the use of basements and subbasements and has brought about a congestion in workrooms in some of our larger cities. This condition, caused by inadequate and unsuited quarters, is detrimental to the comfort and physical well-being of many postal workers, is subversive to efficiency of service, and from any viewpoint is wholly undesirable. Renewal leases entered into from March 4, 1921, to August 5, 1922, show an increase in space of 71 per cent over the space in the expired leases, but in this calculation the space of additional post offices established at various places since the expiration of the aforesaid leases because of the necessities of the service is not included. If this new and additional space be included, then there is an in-

crease of 153 per cent over the expired leases. The per cent of increase in the rental of these renewed leases over the expired leases is 147, but this does not include the rental for the new and additional post offices, which when added make an increase of 342 per cent over the rental of these expired leases.

In addition to the amount of \$11,660,056 annually paid for the rental of post-office quarters there are 76 garages throughout the country under lease, for which the amount of \$588,921 is annually paid for rental. This sum of \$588,921 when added to \$11,660,056 brings the total amount of rental paid by the Government for buildings leased for postal uses up to \$12,248,977. Confronted with this annual expenditure of \$12,248,977 for rental of real estate for postal uses, which will annually steadily increase, two questions at once arise for answer with reference to first-class post offices, the larger second-class post offices, and the larger classified stations and their branches. First, viewed solely from the financial side, is the present plan of leasing in keeping with the best business methods and practices? Second, aside from the financial point of view, is the present plan giving the best postal service results?

My answer to the first question is in the negative. I am decidedly of the opinion, and I believe that your business experience and observation will support my view, that annually a great saving in money will result if a policy of Government ownership were adopted. I do not advocate Government ownership of all offices, stations, and garages, for manifestly at times and on occasions it is better business to lease than own. But I do advocate and urge Government ownership in those cases where an economy would be realized and where good business judgment demands ownership rather than tenancy. Of course, at times efficiency of service will suggest leasing rather than ownership even when a considerable money saving could be effected by ownership, but these cases are exceptional, and good judgment can always be depended upon to leave such cases to the leasing plan.

Many reasons can be given in support of the Government ownership plan, among which are the following:

1. The Government can borrow money on practically a 4 per cent basis to build post offices, whereas when it leases it pays a rental sufficient to permit the lessor to borrow money at 7 per cent, and in some cases as much as 10 per cent. In other words, by this lease policy the Government is indirectly paying 7 per cent and 10 per cent interest on money when it is able to borrow at 4 per cent.

2. When the Government owns a post-office building it is free from taxation, whereas when it leases an office it is indirectly paying taxes at the rate of about 2 per cent on the investment and many times at a very much higher rate. When a building required for postal uses represents an investment of a large amount of money it is readily seen that the taxes alone which the Government must pay to the lessor in the form of rent is a very considerable sum.

3. Another way of stating in a combined form the two preceding propositions is that the ordinary lessor usually obtains about 10 per cent gross on his investment, whereas if the Government owned the property, building it with 4 per cent money, it would be costing the Government about one-half as much as it is obliged to pay in the form of a lease for the use of a building.

4. If the Government adopted the policy of owning its post-office buildings, it would be in a position to take property by right of eminent domain, whereas it can not take a leasehold interest by such right.

5. In our negotiations for leases with prospective lessors we are confronted with the fact that we can not build, and therefore we must pay what they ask. If we could say to bidders, "Unless you bring your rental down to a certain reasonable figure the Government will put up a building of its own," we would then have a powerful weapon of negotiation where we now have none. But that is only possible when the Government has adopted a policy of ownership and provided funds to carry out such a policy.

6. Leased buildings are constantly being outgrown, confronting the department with the necessity of either adding additional space or seeking an entirely new location. With a lease policy and without the right of condemnation the additional adjacent space is often held at unconscionable figures, and we are often compelled to pay far more than we know to be reasonable on account of the situation.

7. When a Government post office or postal building is erected by a lessor, in a very large percentage of cases it enhances the value of all property in the vicinity, so that it becomes necessary to renew such lease at much higher figures, whereas if the Government owned the building it would receive the benefit of the enhancement of values which it has created.

8. The lessor who builds a post office or postal station for the Government on a contract for lease for 10 or 20 years is obliged to figure on absorbing either the whole or a large percentage of the original cost of the building, and this he does. He is obliged to do this because he knows he may be compelled at the end of the lease to reconvey it into other uses. The result of such a lease policy is that the Government not only pays about 10 per cent on the original investment but it pays in addition thereto a certain per cent of all the

original investment distributed over a term of years, so that at the end of the lease the Government has nothing, but is obliged to start over again, still at the mercy of lessors, with no efficient weapon to compel fair prices.

My answer to the second of the above questions is also in the negative. It frequently is impossible to lease buildings having satisfactory working conditions, such as natural light and ventilation. In erecting Government-owned buildings ideal working conditions would be provided, thereby insuring the health and comfort of employees, which should always be given first consideration. Then, too, such buildings would be erected in accordance with plans and specifications either made or approved by the Post Office Department based upon its experience with a view to efficiency of service as well as to cost of service.

The Joint Commission on Postal Service expressed the opinion in its report to the Senate and House of Representatives that the site immediately west of the present general post-office building at New York City, commonly called the Pennsylvania Railroad site, was a desirable site for a building to relieve the present congested condition of the general post office at New York City. The department began negotiations to lease for a period of 20 years a building to be erected on this site, but no agreement has been made. Of the offers submitted to the department the aggregate rental for 20 years ranged from \$19,245,695 to \$24,900,000. If the Government would purchase this site and erect the building and become the owner instead of lessee, at the end of 20 years the aggregate expenditure would be considerably less than the lowest offer, and in addition the Government would own the property. What is said of the advantage of ownership as against tenancy of this New York City site can with equal force be said of other sites. Where the business and circumstances justify Government ownership it seems unbusinesslike for the Government to deny to itself and forego all the advantages, financial and otherwise, of ownership and become lessee with a money loss and with all the other many attendant disadvantages of tenancy.

It is not my present purpose to suggest or advocate any particular way for the execution of this general plan of Government ownership of buildings for postal use. My present purpose is to call attention to the necessity for the adoption of this general plan of Government ownership of buildings within the limitation of good business judgment, as hereinabove pointed out, as against the leasing system. I regard the present plan of leasing as unbusinesslike, and in view of this present practice I hope the Congress may enact the necessary legislation to effect the change herein suggested and advocated.

I earnestly solicit your support and cooperation.

Sincerely yours,

HUBERT WORK,
Postmaster General.

[From Annual Report of the Postmaster General for the fiscal year ending June 30, 1923]

GOVERNMENT OWNERSHIP

Attention again is invited to the unbusinesslike method of securing quarters for post offices and postal stations under the leasing system. In many cases the Government is paying in annual rent from 10 to 17 per cent of the value of the premises occupied. On August 21, 1922, a letter was addressed by the then Postmaster General to the Joint Commission on Postal Service setting forth very fully the department's views with reference to Government ownership of post-office buildings. This letter was published in full in the last annual report, and the conclusions contained therein have been considered by me and receive my full approval.

[From Annual Report of the Postmaster General for the fiscal year ending June 30, 1924]

GOVERNMENT OWNERSHIP

I desire again to invite attention to the unbusinesslike method of securing quarters for post offices and postal stations under the leasing system. In many cases the Government is paying in annual rent a large per cent of the value of the premises occupied. In 1922 the then Postmaster General addressed a letter to the Joint Commission on Postal Service setting forth fully the department's views with reference to Government ownership of post-office buildings. In the last report mention was made of my full approval of those recommendations.

FUNERAL EXPENSES OF THE LATE SENATOR COLT

Mr. GERRY submitted the following resolution (S. Res. 265), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate be hereby authorized and directed to pay from the contingent fund of the Senate the actual and necessary expenses incurred by the committee appointed by the Presi-

dent pro tempore in arranging for and attending the funeral of the Hon. LEIBRON B. COLT, late a Senator from the State of Rhode Island, upon vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

LEILA A. GRIFFIN

Mr. SMITH submitted the following resolution (S. Res. 266), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate is hereby authorized and directed to pay from the contingent fund of the Senate to Leila A. Griffin, daughter of Richard S. Anderson, late a messenger of the Senate, a sum equal to one year's compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

FUNERAL EXPENSES OF THE LATE SENATOR BRANDEGEE

Mr. McLEAN submitted the following resolution (S. Res. 267), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate is hereby authorized and directed to pay from the contingent fund of the Senate the actual and necessary expenses incurred by the committee appointed by the President pro tempore in arranging for and attending the funeral of the Hon. FRANK B. BRANDEGEE, late a Senator from the State of Connecticut, upon vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

FUNERAL EXPENSES OF THE LATE SENATOR LODGE

Mr. WALSH of Massachusetts submitted the following resolution (S. Res. 268), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate is hereby authorized and directed to pay from the contingent fund of the Senate the actual and necessary expenses incurred by the committee appointed by the President pro tempore in arranging for and attending the funeral of the Hon. HENRY CABOT LODGE, late a Senator from the State of Massachusetts, upon vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

HANDLING OF MAIL MATTER

Mr. STERLING submitted a resolution (S. Res. 269), which was read, considered by unanimous consent, and agreed to, as follows:

Whereas there was included in the appropriation bill for the Post Office Department for the fiscal year ending June 30, 1924, an item of \$500,000 for the purpose of completing the work of determining the cost to the department of handling the various classes of mail matter; and

Whereas it is understood that said report has been completed: Therefore be it

Resolved, That the Postmaster General be respectfully requested to submit said report to the Senate of the United States.

FINANCIAL ARRANGEMENTS WITH FOREIGN GOVERNMENTS

Mr. LADD submitted the following concurrent resolution (S. Con. Res. 22), which was referred to the Committee on Foreign Relations:

Resolved by the Senate (the House of Representatives concurring), That the President be, and he is hereby, requested to direct the Departments of State, Treasury, and Commerce, the Federal Reserve Board, and all other agencies of the Government which are or may be concerned thereunder, to refrain henceforth, without specific prior authorization of the Congress, from—

(1) Directly or indirectly engaging the responsibility of the Government of the United States, or otherwise on its behalf, to supervise the fulfillment of financial arrangements between citizens of the United States and sovereign foreign Governments or political subdivisions thereof, whether or not recognized de jure or de facto by the United States Government; or

(2) In any manner whatsoever giving official recognition to any arrangement which may commit the Government of the United States to any form of military intervention in order to compel the observance of alleged obligations of sovereign or subordinate authority, or of any corporations or individuals, or to deal with any such arrangement except to secure the settlement of claims of the United States or of United States citizens through the ordinary channels of law provided therefor in the respective foreign jurisdictions, or through duly authorized and accepted arbitration agencies.

HOUSE BILL REFERRED

The bill (H. R. 9138) to authorize the discontinuance of the seven-year regauge of distilled spirits in bonded warehouses, and for other purposes, was read twice by its title and referred to the Committee on Finance.

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the Speaker of the House had signed enrolled bills and a joint resolution of the following titles, and they were thereupon signed by the President pro tempore:

S. 2265. An act to provide for a rearrangement of the public-alley facilities in square 616 in the District of Columbia, and for other purposes;

S. 3397. An act to remit the duty on a carillon of bells to be imported for the Church of Our Lady of the Rosary, Providence, R. I.;

H. R. 6426. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors;

H. R. 9561. An act making additional appropriations for the fiscal year ending June 30, 1925, to enable the heads of the several departments and independent establishments to adjust the rates of compensation of civilian employees in certain of the field services; and

S. J. Res. 85. Joint resolution authorizing an appropriation for the participation of the United States in the preparation and completion of plans for the comprehensive observance of that greatest of all historic events, the bicentennial of the birth-day of George Washington.

DEFICIENCY APPROPRIATIONS—CONFERENCE REPORT

The PRESIDENT pro tempore. Morning business is closed. Mr. WARREN. Mr. President, we have just received a message from the House of Representatives having to do with the completion of some of the unfinished business of the last session. There is another matter of importance which did not reach the stage which was reached by the bills which have just been sent to the desk from the House of Representatives and which merely lack the signatures of the two Presiding Officers. I refer to a bill that was in conference at the last session and lacked the finishing touches of consideration. It is very important that that bill should be acted upon at the earliest moment. It is the second deficiency appropriation bill and proposes to appropriate about \$175,000,000 or \$180,000,000. It affects every department of the Government and almost every known interest of the Government, because it is a clean-up for the year of amounts necessary to close accounts, to pay employees, and to settle other pending obligations. It is important because many of the beneficiaries are suffering for the want of the money which the bill proposes to provide. It is important because the Budget Bureau should know what has been provided for these expenses of the last year, so that they may arrange the budget for the next year accordingly. The departments should know what disposition is to be made of the measure.

Therefore I propose to call up the conference report at this time. All that will be required will be, first, a motion to reconsider; second, a motion to adopt the report of the conferees; and third, a recession on the part of the Senate from the only two remaining items that were in disagreement. So I now ask unanimous consent to reconsider the action by which the conference report on the second deficiency appropriation bill was recommitted to the committee of conference.

Mr. PITTMAN. Mr. President, I wish to join in the request of the Senator from Wyoming. During the last session an order was made under a unanimous-consent request submitted by me at that time. I wish to say that there has been an entirely satisfactory adjustment, so far as I am personally concerned, with regard to the matters that caused my protest. I regretted very much at that time to make the protest. I agree with the Senator from Wyoming that it is very important to consider this matter immediately.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Wyoming? The Chair hears none, and it is so ordered.

Mr. WARREN. Now I move the adoption of the conference report on House bill 9559.

The PRESIDENT pro tempore. The report will be read.

The report was read, as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 32, 35, and 36.

That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment as follows: At the end of the matter inserted by said amendment insert the following: "Provided, That no part of the sums herein appropriated shall be used for the commencement of construction work on any reclamation project which has not been recommended by the Commissioner of Reclamation and the Secretary of the Interior and approved by the President as to its agricultural and engineering feasibility and the reasonableness of its estimated construction cost"; and the Senate agree to the same.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "\$375,000"; and the Senate agree to the same.

Amendment numbered 31: That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "\$315,000"; and the Senate agree to the same.

Amendment numbered 33: That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "\$375,000"; and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 29, 34, 58, and 59.

F. E. WARREN,
CHARLES CURTIS,
W. L. JONES,
LEE S. OVERMAN,
WM. J. HARRIS,

Managers on the part of the Senate.

MARTIN B. MADDEN,
D. R. ANTHONY, JR.,
Managers on the part of the House.

Mr. ASHURST. Mr. President, will the Senator yield to me at this juncture?

The PRESIDENT pro tempore. Allow the Chair to state his understanding of the present parliamentary situation. The Chair understands that the conference report is now before the Senate for consideration.

Mr. WARREN. It is, and I therefore move the adoption of the report.

The PRESIDENT pro tempore. The question is on the motion of the Senator from Wyoming, that the Senate agree to the conference report.

Mr. ASHURST. Mr. President, I shall vote for the motion, and I hope it may prevail. Those who deigned to pay any attention to what I said just before the session of Congress closed on June 7 last will remember that I suffered a grievous disappointment because two certain amendments adopted by the Senate on June 5 were eliminated by the conferees. I believe the Senate conferees used every effort at their command to hold these amendments. In the heat and sensation of the hour of adjournment I may not have done the conferees the full justice to which they were entitled; but I am profoundly convinced that they used every honorable effort to hold these two Senate amendments.

I have faith in the justice of the United States Senate. I believe that at the eligible and appropriate time the Senate will readopt and insist upon the two amendments that were thrown out of the bill by the conferees. I refer to the one presented by my colleague and to the other presented by myself. Believing in the justice of the Senate, and relying upon the inherent strength of these amendments, I vote for this conference report, and ask unanimous consent that a comparatively few paragraphs from the report of the committee of special advisers on reclamation, namely, the fact finding commission, urging these amendments be included in the Record at this point.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

ARIZONA-CALIFORNIA-YUMA PROJECT

Notwithstanding it has been held under existing law that all moneys received and to be received under a certain contract, dated October 23,

1918, between the United States and the Imperial Irrigation district should be paid into the reclamation fund, we recommend appropriate legislation directing that such moneys be credited to the Arizona-California-Yuma project, including the Mesa division, upon an equitable basis.

We understand the term "equitable basis" to mean taking into consideration the differences in soil, topography, and location of each farm unit on a project, with a special reference to the influence of these and all other essential factors upon the ability of each such unit to produce crops of value as compared with other farm units upon the same project.

This committee finds that this project was authorized to provide water for the irrigation of certain lands on both sides of the Colorado River in the vicinity of the town of Yuma, Ariz.

CONTRACT LANDS

The land in California is in an Indian reservation. The lands in Arizona were destined to be irrigated partly by gravity and partly by a pumping plant. The lands now included under water-right contracts embrace the following:

	Acres
Indian reservation lands in California disposed of to white settlers	6,100
Reservation lands in California remaining with the Indians	8,100
Valley lands in Arizona	48,800
Mesa lands in Arizona	6,000

(There are mesa lands having a total area of about 34,000 acres susceptible of irrigation by works yet to be completed.)

COST OF WATER RIGHTS

The project cost of water rights in California has been fixed by notice at \$55 to \$66 per acre. The project cost of water rights in Arizona, in the Yuma Valley, has been fixed by public notice at \$75 per acre. The project cost of water rights on mesa lands in Arizona is estimated at \$200 an acre.

EXPENDITURES NOT INCLUDED IN THE FIXING OF PROJECT COSTS AND WHICH ARE NOT NOW REPRESENTED BY ANY ASSETS WHICH CAN BE CHARGED TO SETTLERS

The original plans for this project provided for a main canal starting from the Laguna Dam to divert water from the Colorado River, which was to extend down to the Yuma area on the east side of the river, crossing in its course the Gila River. After \$580,936 had been spent it was found that this route was not feasible, and it was abandoned. There are no assets to balance this expenditure, and it has not been included in fixing the cost of water rights.

In order to protect the farms on both sides of the river from flooding and erosion, it became necessary to build a levee and in some places to riprap the banks. The building of this flood-protection system had developed until the costs stand at present as follows:

Indian reservation levee	\$867,287.12
Yuma Valley levee	1,374,122.93
Gila Valley levee	405,363.97
Yuma city levee	112,060.20
Imperial Valley irrigation district	156,512.29
Total	2,715,952.51

The cost of this levee system has not been included in the estimates on which the different project costs of water were fixed. It is an expenditure which settlers could not afford to pay and which has not been charged against them. It needs to be disposed of definitely, and the committee makes a recommendation with regard to it.

In fixing the project costs that settlers were required to pay, the entire expenditure on the Laguna Dam was included (about \$2,225,000). Subsequently a right to use this dam has been sold to the Imperial Irrigation district in California for \$1,600,000. The question has arisen as to whether this sum when paid shall be placed in the general reclamation fund or credited on water-right contracts of settlers under the Arizona-California-Yuma project.

With regard to these different matters the committee recommends:

(1) That the \$580,936 expended on the Arizona main canal, which was subsequently abandoned, be deducted from the general reclamation fund as money lost beyond recovery.

(2) That the levee system be regarded as a public work of the United States, similar in character to other protection works built under the rivers and harbors act along navigable streams, because the United States holds that the Colorado River is a navigable stream, and in pursuance of that holding the Government has built protection works at Yuma and a levee on the California side of the stream in Mexico, known as the Oockerson Levee, at an expenditure of \$1,000,000. These have been treated as improvements under the rivers and harbors act, no charge for repayment having been made against anyone.

The committee recommends, therefore, that legislation be secured under which the expenditure for the construction, operation, and maintenance of these levees by the reclamation fund shall be treated as an expenditure of the General Government, similar to expenditures

^a Reimbursed.

under the rivers and harbors act, and that the reclamation fund be reimbursed by an appropriation equal to the amount of this expenditure.

The committee recommends that expenses incurred in the maintenance and operation of the levee system to be provided for under some cooperative agreement between the States of California and Arizona and the War Department similar to other cooperative agreements for the maintenance of levees on the Mississippi and other rivers, and that no part of this cost be included in the operation and maintenance expenses of this project.

We further recommend:

1. All excess holdings of lands in farm units should be disposed of to bona fide settlers.
2. Disposition of all unpaid charges in accordance with Resolution No. 24.
3. Adoption of the new plan of repayment in accordance with Resolution No. 23.

YUMA AUXILIARY PROJECT (MESA DIVISION OF THE YUMA PROJECT)

This division was constructed under the provisions of an act of Congress approved January 25, 1917, known as "An act to provide for an auxiliary reclamation project in conjunction with the Yuma project in Arizona (39 Stat. 868)." The drastic provisions of this act are impossible of fulfillment, and only a few of the settlers have been able to meet their contracts. They, too, will soon fail, as the charge for water will bankrupt them.

The committee recommends:

That an early study be made by the Bureau of Reclamation of this division with a view of making recommendations to Congress for financial relief, or the disposal of the division, if adequate relief is not feasible.

Mr. ASHURST. The fact finding commission was appointed by Secretary Work. All the members thereof, including the chairman, were and are well known throughout the country as experts upon irrigation matters, and this commission unanimously concurred in the justice and necessity of the two amendments to which I have referred.

The PRESIDENT pro tempore. The question is upon agreeing to the conference report.

The report was agreed to.

Mr. WARREN. Mr. President, in the report as first made, there were five items in disagreement. Three of them were agreed to on the floor of the House after the last report was made, so that there are but two items in disagreement now, amendments numbered 29 and 34. One of those items refers to an appropriation for Spanish Springs, Nev.; the other to the position and salary of the Director of Reclamation. So, Mr. President, to cover those two items, I move that the Senate recede from its amendments numbered 29 and 34.

Mr. PITTMAN. Mr. President, one of these items is the one that caused discussion at the last session. I am entirely satisfied now that every member of the Committee on Appropriations of the Senate recognizes the justice of that item. The Department of the Interior has again recommended the item; the Budget has again provided for it; and I feel every assurance that it will be a part of the forthcoming Interior Department appropriation bill, which will be here in a few days, as I understand. Therefore I again gladly join with the chairman of the committee in supporting his motion.

The PRESIDENT pro tempore. The Senator from Wyoming moves that the Senate recede from its amendments numbered 29 and 34 to House bill 9559.

The motion was agreed to.

Mr. WARREN. Mr. President, that carries the bill to passage. I ask that the enrollment may immediately follow and that the enrollment committee may hasten the presentation of the bill to the Presiding Officers of both Houses, so that it may reach the President at an early date.

The PRESIDENT pro tempore. Is there objection to the request? The Chair hears none, and it is so ordered.

MEMORIAL SERVICES FOR THE LATE WOODROW WILSON

Mr. ROBINSON. Mr. President, the concurrent resolution which passed the House of Representatives yesterday relating to memorial services for the late former President Wilson is on the President's table. I ask that it be laid before the Senate.

The PRESIDENT pro tempore. The Senator from Arkansas asks unanimous consent for the immediate consideration of House Concurrent Resolution 30, which the Secretary will read.

The reading clerk read the concurrent resolution, as follows:

Resolved by the House of Representatives (the Senate concurring), That Monday, the 15th day of December, 1924, be set aside as the day upon which there shall be held a joint session of the Senate and the House of Representatives for appropriate exercises in commemoration of the life, character, and public service of the late Woodrow Wilson, former President of the United States.

That a joint committee, to consist of five Senators and seven Members of the House of Representatives, to be appointed by the President pro tempore of the Senate and the Speaker of the House of Representatives, respectively, shall be named, with full power to make all arrangements and publish a suitable program for the joint session of Congress herein authorized, and to issue the invitations hereinafter mentioned.

That invitations shall be extended to the President of the United States, the members of the Cabinet, the Chief Justice and Associate Justices of the Supreme Court of the United States, and such other invitations shall be issued as to the said committee shall seem best.

That all expenses incurred by the committee in the execution of the provisions of this resolution shall be paid, one-half from the contingent fund of the Senate and one-half from the contingent fund of the House of Representatives.

The PRESIDENT pro tempore. Is there objection to the immediate consideration of the concurrent resolution? The Chair hears none. The question is upon agreeing to the concurrent resolution.

The concurrent resolution was unanimously agreed to.

THE BUDGET

The PRESIDENT pro tempore. The Chair lays before the Senate the Budget message of the President of the United States, which will be read.

The reading clerk read the message, as follows:

To the Congress of the United States:

I transmit herewith the Budget of the United States for the fiscal year ending June 30, 1925. The receipts and expenditures shown in detail in the Budget are summarized in the following statement:

Summary			
	Estimated, 1925	Estimated, 1925	Actual, 1924
Total receipts.....	\$3,641,295,092	\$3,601,968,297	\$4,102,044,701.65
Total expenditures (including reduction of the public debt required by law to be made from ordinary receipts).....	3,267,551,378	3,534,083,808	3,506,677,715.41
Excess of receipts.....	373,743,714	67,884,489	595,366,986.24

In transmitting to Congress December 3, 1923, the Budget for the fiscal year ending June 30, 1925, I recommended that taxes be reduced. This recommendation was warranted by the statement of our finances as presented to Congress in that Budget. It was there estimated that under the tax laws then in force the surplus of receipts over expenditures would be \$329,639,624 for the fiscal year 1924 and \$395,681,634 for the fiscal year 1925. Taxes have been reduced. The benefits to the people of this reduction went back to the commencement of the calendar year January 1, 1923. The confidence of the Chief Executive and of the Congress that our revenues could be safely reduced has been fully justified. The fiscal year which ended June 30, 1924, was closed with a surplus of receipts over expenditures of \$505,396,000. This was \$175,727,000 in excess of the estimate made on December 3, 1923. Increase of \$117,367,000 in receipts and decrease of \$58,360,000 in expenditures produced this unexpected additional surplus of \$175,727,000.

We have now completed five months of the current fiscal year, which ends June 30, 1925. This affords an index of the probable reduction in our revenues under the current tax law. It also affords an index of the limits within which our expenditures can be kept under the continuing policy of economy. A revision of the estimate of receipts and expenditures for the fiscal year ending June 30, 1925, indicates to-day that the receipts will be \$3,601,968,297 and the expenditures \$3,534,083,808. This forecasts a surplus of receipts over expenditures for the current fiscal year of \$67,884,489. This estimate is most significant. On the one hand, we anticipate receiving this year \$400,000,000 less revenue than we had last year, due principally to the reduction in taxes. On the other hand, we must provide \$114,000,000 for the extraordinary increase in expenditures made necessary by the World War adjusted compensation act. Yet we are confident that the year will be closed with a surplus of more than \$67,000,000. Our aim should be not only to conserve this prospective surplus but to add to it.

For the fiscal year 1925 it is estimated that the ordinary receipts will be \$3,641,295,092 and the expenditures \$3,267,551,378. This indicates a surplus of \$373,743,714. In addition to these receipts and expenditures it is estimated that the postal receipts will be \$647,410,000 and the expenditures chargeable

thereto \$637,376,005. This forecasts a surplus in postal revenue of \$10,033,905, which amount is included in the estimated general surplus of \$373,743,714.

We come now to the estimates of appropriations contained in this Budget. The Chief Executive is pledged to economy in the requests he makes upon Congress for funds for the executive branch of the Government. This pledge is kept in these estimates of appropriations. They call for a total of \$3,092,143,841.48, exclusive of the Postal Service. A fair comparison of the estimates of appropriations for 1926 with the appropria-

tions actually made for 1925 should include the supplemental estimates for 1925 which were presented to Congress for consideration in the second deficiency bill, fiscal year 1924, and the bill to adjust compensation of employees in certain of the field services. These two bills failed of enactment before the adjournment of Congress June 7, 1924. In the following table a comparison is made of the estimates of appropriations for 1926 with the appropriations actually made for 1925 and the supplemental estimates submitted for that year which are awaiting final legislative consideration:

Estimates of appropriations for 1926 compared with appropriations for 1925, plus supplemental estimates for 1925 which are awaiting final legislative consideration

	Estimates of appropriations, 1926	Appropriations, 1925	Supplemental estimates submitted for 1925	Total for 1925
Legislative establishment.....	\$15,094,545.80	\$14,229,816.00	\$50,000.00	\$14,279,816.00
Executive Office.....	439,960.00	397,847.50	43,520.00	441,367.50

Reduction in principal of the public debt:				
Sinking fund.....	323,175,000.00	310,000,000.00	-----	310,000,000.00
Purchase of Liberty bonds from foreign repayments.....	-----	208,000.00	-----	208,000.00
Redemption of bonds and notes from estate taxes.....	-----	100,000.00	-----	100,000.00
Redemption of securities from Federal reserve bank and Federal intermediate credit bank franchise tax receipts.....	850,000.00	1,152,200.00	-----	1,152,200.00
Redemption of bonds, etc., received as repayments of principal and as interest payments on obligations of foreign governments.....	160,641,130.00	160,345,601.00	-----	160,345,601.00
Principal of the public debt.....	484,766,130.00	471,806,401.00	-----	471,806,401.00
Interest on the public debt.....	830,000,000.00	865,000,000.00	-----	865,000,000.00
Total payable from the Treasury.....	3,092,143,841.48	2,973,009,189.94	202,091,393.01	3,175,100,582.95
Post Office Department and Postal Service, payable from postal revenues.....	637,376,005.00	613,645,195.25	-----	613,645,195.25
Total including Post Office Department and Postal Service.....	3,729,519,846.48	3,586,654,385.19	202,091,393.01	3,788,745,778.20

For the national defense the estimates amount to \$549,000,000, which is \$29,000,000 less than the amount available this current fiscal year. These figures do not include non-military items of the War and Navy Departments. This reduction is made in accordance with my belief that we can have adequate national defense with a more modest outlay of the taxpayers' money. Further study may point the way to additional reduction without weakening our national defense, but rather perfecting it. This Nation is at peace with the world. We no longer have international competition in naval construction of major units. We are concerned primarily with maintaining adequate preparedness. We should have adequate preparedness in 1926 within the limits of the amount recommended.

Aside from the important factor of training personnel, our national defense is largely an industrial problem. To-day the outstanding weakness in the industrial situation, as it affects national defense, is the inadequacy of facilities to supply air-service needs. The airplane industry in this country at the present time is dependent almost entirely upon Government business. To strengthen this industry is to strengthen our national defense. For the Air Service of the Army and Navy, and the Air Mail Service, the estimates, including contract authorizations, amount to \$38,945,000. This contemplates an expenditure with the industries of \$18,287,000 for the procurement of airplanes, engines, and accessories. The remaining \$20,658,000 is for maintenance, operation, experimentation, and research. The amount of \$38,945,000, however, does not include all that will be available for this service in 1926. Amounts contributing to the Air Service carried in other estimates, and usable war supplies, will make a total availability conservatively estimated at \$65,000,000.

The amount requested for national defense includes \$50,118,000 for the Army and Navy Reserves, National Guard,

citizen's military training camps, and other civilian training activities.

There is also included in the national-defense estimates \$7,444,000 for increase of the Navy. This will provide for continuing work on the fleet submarines under construction and for beginning work on two of the four remaining fleet submarines authorized in the 1916 program. With regard to the Navy estimates, legislation is now pending which provides for additional vessels, including gunboats for use on the Yangtze River. Further estimates for increase in the Navy are dependent upon the enactment of this legislation. It will also be necessary to request of Congress legislation increasing the authorized cost of the two airplane carriers now under construction. If this be granted, it will require funds for the next fiscal year not provided in the estimates contained in this Budget.

For rivers and harbors \$56,237,600 is recommended. In this is included \$40,000,000 for maintenance and improvement of existing river and harbor works, \$10,500,000 for flood control on the Mississippi and Sacramento Rivers, and \$5,437,600 for the operation and maintenance of canals and the removal of wrecks and other obstructions. Of the \$40,000,000 for maintenance and improvement of rivers and harbors, \$21,973,915 is for new work and \$17,241,575 is for maintenance. This will make possible material progress on the most important projects approved by Congress.

It is estimated that \$6,541,590 will be needed to complete Dam No. 2 at Muscle Shoals. Of this amount \$3,501,200 will be required this year. This will be covered by a supplemental estimate for 1925. The balance, \$3,040,390, is provided for in these estimates.

There is included in these estimates \$50,000,000 to be set aside in the adjusted service certificate fund established under the World War adjusted compensation act of May 19, 1924,

This is for the second payment to the fund to be made January 1, 1926. For the first payment, due January 1, 1925, \$100,000,000 is included in the deficiency bill now under consideration by Congress. The applications from veterans so far have been below the estimated number which the records indicate as entitled to the benefits of the act. If the two appropriations recommended be made, it is estimated there will be a sufficient amount in the fund on January 1, 1926, to meet the demands of the act. Should the number of applications increase beyond what present experience indicates as probable, there will be ample time to submit a supplemental estimate for the additional amount necessary before that date.

The estimates for salaries of civilian employees in the District of Columbia are in accordance with the provisions of the classification act approved March 4, 1923. For the field services the estimates for salaries are based on rates comparable with those for departmental employees in the District of Columbia.

For Federal aid to States the estimates provide in excess of \$100,000,000. These subsidies are prescribed by law. I am convinced that the broadening of this field of activity is detrimental both to Federal and State Governments. Efficiency of Federal operations is impaired as their scope is unduly enlarged. Efficiency of State governments is impaired as they relinquish and turn over to the Federal Government responsibilities which are rightfully theirs. I am opposed to any expansion of these subsidies. My conviction is they can be curtailed with benefit to both the Federal and State Governments.

For reclamation purposes I am recommending \$9,777,257 for 1926. It is highly desirable that the Congress, as a basis for this and other future reclamation expenditures, enact the legislation embodying new reclamation policies proposed in H. R. 9611, Sixty-eighth Congress, first session.

The gross public debt was reduced \$1,098,894,375 during the fiscal year ended June 30, 1924, and stood at \$21,250,812,989 on the latter date. This reduction was accomplished through (1) the application of the sinking fund and other public debt retirements required to be made from ordinary receipts, aggregating \$457,999,750; (2) a reduction in the general fund balance of \$135,527,639; and (3) the use of the entire surplus of \$505,366,986. The annual interest charges on the debt represented by this reduction are equivalent to over \$45,000,000.

The total reduction in the debt since the high point of \$26,594,000,000 on August 31, 1919, amounted to \$5,343,000,000 at the close of the last fiscal year. This total reduction has effected a saving in interest amounting to approximately \$25,000,000 annually, a saving which equals nearly one-third of the total annual pre-war expenditures of the Government.

The fixed-debt charges are included in the regular Budget of the Government under a definite plan worked out soon after the close of the war for the gradual retirement of the public debt and must be met before the Budget can balance. The most important of these fixed-debt charges is the cumulative sinking fund provided in the Victory Liberty loan act. Retirements through this fund during the past fiscal year were about \$290,000,000. The next items in size among the fixed-debt charges are the retirements of securities received from foreign governments under debt settlements and the purchases and retirements of securities from foreign repayments. These continuing reductions of the public debt have a very material effect in maintaining high prices for Liberty bonds. They permit the issuance of new Government securities for temporary and for refunding purposes at low interest rates, with consequent further economy in Government expenditures. Interest paid in the fiscal year 1924 amounted to \$940,000,000. It is estimated that this item will be \$865,000,000 in 1925 and \$830,000,000 in 1926. This saving of \$110,000,000 in two years is the result of the reduction in the amount of the debt and decrease in the average rate of interest paid. The sinking fund is a part of the contract between the United States and the holder of the United States obligation, and therefore can not in good faith be changed. The continual steady effect of these debt-reducing factors is to cut down the largest single item of Government expenditure and permit further reductions in the burden of taxation.

In my message transmitting the Budget for the fiscal year 1925 I recommended the enactment of legislation which would authorize a reasonable progressive building program to meet the needs of the executive departments and establishments of the Government in the District of Columbia. The situation is yearly becoming more acute even with full utilization of all Government-owned buildings, including the temporary buildings erected during the period of the late emergency. We are now spending something more than \$670,000 per year for rental of buildings or parts of buildings in the District of Columbia.

The present crowded condition is detrimental to efficiency. The fire hazard in the temporary buildings is great. An expenditure of \$5,000,000 annually for a period of years would enable the present situation to be gradually relieved. A larger yearly expenditure would shorten the period during which full relief could be attained. During the last session of Congress a bill was introduced authorizing a yearly appropriation of not exceeding \$10,000,000 for a progressive building program in the District of Columbia. This bill has my indorsement. I earnestly recommend its enactment by Congress.

I have recently appointed a commission to investigate agricultural conditions. The purpose of this was to determine what action, through legislation or otherwise, should be taken to place agriculture on a basis of economic equality with other industries. The findings and recommendations of the commission are for the use of the Congress. I mention this commission here for the reason that I will shortly submit to the Congress an estimate of appropriation to meet the expenses of the commission.

We are now in the fourth year of our campaign for reduction in the cost of government. Our aim is to reduce the burden of taxes. In this we have been successful. For those things which we are now required to do we are fast reducing our expenditures to a minimum consistent with efficient service. We have before us an estimated surplus of \$67,000,000 for the current fiscal year and \$373,000,000 for the next fiscal year. Shall we embark upon new projects involving expenditures which will prevent the accumulation of these expected surpluses, or shall we continue the campaign for economy? I am for economy. If we continue the campaign for economy, we will pave the way for further reduction in taxes. This reduction can not be effected immediately. Before it is undertaken we should know more definitely by actual operation what our revenues will be under our present tax law. But the knowledge of our revenue under the existing law will avail us nothing if we embark upon any new large expenditure program.

CALVIN COOLIDGE.

THE WHITE HOUSE,

December 1, 1924.

The PRESIDENT pro tempore. In the absence of a motion, the Chair will refer the message and accompanying papers to the Committee on Appropriations.

OREGON-CALIFORNIA RAILROAD GRANT LANDS

Mr. McNARY. Mr. President, at the last session of Congress I introduced the bill (S. 2751) to authorize the addition to national forests of lands revested in United States by the act of June 9, 1916, or reconveyed to the United States under act of February 26, 1919, and the bill (S. 2752), of similar title, which were referred to the Committee on Public Lands and Surveys. I ask unanimous consent that that committee be discharged from the further consideration of those bills.

Mr. HARRISON. May I ask the Senator what the bills involve?

Mr. McNARY. They are bills involving the expansion of the national forests to include what are known as the Oregon-California railroad grant lands in the State of Oregon.

Mr. ROBINSON. What is the Senator's request?

Mr. McNARY. That the committee be discharged from the further consideration of these two bills.

Mr. ROBINSON. Does the Senator mean to ask to have some other action taken respecting the bills?

Mr. McNARY. After further consideration, I entertain some doubt of the propriety of the bills in their present form, and I merely desire to have the committee discharged from the further consideration of the bills. If that request is granted, I shall move that they be indefinitely postponed.

Mr. ROBINSON. Very well. I have no objection.

The PRESIDENT pro tempore. The Senator from Oregon asks unanimous consent that the Committee on Public Lands and Surveys be discharged from the further consideration of the bills to which he has referred. Is there objection? The Chair hears none, and it is so ordered.

Mr. McNARY. I now move that the bills be indefinitely postponed.

The motion was agreed to.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened, and (at 1 o'clock p. m.) the Senate adjourned until to-morrow, Wednesday, December 3, 1924, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate December 2, 1923
[Appointments during the last recess of the Senate]

SECRETARY OF AGRICULTURE

Howard M. Gore, of West Virginia, to be Secretary of Agriculture.

ASSISTANT SECRETARIES OF STATE

Wilbur John Carr, of New York.
John Van A. MacMurray, of New Jersey.

ASSISTANT ATTORNEY GENERAL

William J. Donovan, of New York, to be Assistant Attorney General, vice Earl J. Davis, resigned.

AMBASSADORS EXTRAORDINARY AND PLENIPOTENTIARY

James Rockwell Sheffield, of New York, to be ambassador extraordinary and plenipotentiary of the United States of America to Mexico.

Edgar A. Bancroft, of Illinois, to be ambassador extraordinary and plenipotentiary of the United States of America to Japan.

FOREIGN SERVICE OFFICERS

CLASS I

Maxwell Blake, of Missouri.

CLASS II

Homer M. Byington, of Connecticut.
William Coffin, of Kentucky.
Edwin S. Cunningham, of Tennessee.
Charles B. Curtis, of New York.
Claude I. Dawson, of South Carolina.
William Dawson, of Minnesota.
William H. Gale, of Virginia.
Clarence E. Gauss, of Connecticut.
Edwin N. Gunsaulus, of Ohio.
Nelson T. Johnson, of Oklahoma.
Leo J. Keena, of Michigan.
Tracy Lay, of Alabama.
Marion Letcher, of Georgia.
Alexander R. Magruder, of Maryland.
De Witt C. Poole, of Illinois.
Ralph J. Totten, of Tennessee.
Roger Culver Tredwell, of Indiana.
Craig W. Wadsworth, of New York.
Alexander W. Weddell, of Virginia.

CLASS III

Norman Armour, of New Jersey.
Ray Atherton, of Illinois.
James G. Bailey, of Kentucky.
Thomas D. Bowman, of Missouri.
John K. Caldwell, of Kentucky.
Clarence Carrigan, of California.
George E. Chamberlin, of New York.
Carl F. Delchman, of Missouri.
Frederic R. Dolbeare, of New York.
Louis G. Dreyfus, jr., of California.
Allen W. Dulles, of New York.
Frederick T. F. Dumont, of Pennsylvania.
Robert Frazer, jr., of Pennsylvania.
Arthur C. Frost, of Massachusetts.

Wesley Frost, of Kentucky.
John A. Gamon, of Illinois.
Arthur Garrels, of Missouri.
Arminius T. Haeberle, of Missouri.
Matthew E. Hanna, of Connecticut.
Ernest L. Harris, of Illinois.
Lewis W. Haskell, of South Carolina.
Charles M. Hathaway, jr., of Pennsylvania.
P. Stewart Heintzleman, of Pennsylvania.
Philip Holland, of Tennessee.
W. Stanley Hollis, of Massachusetts.
Augustus E. Ingram, of California.
Theodore Jaekel, of New York.
Douglas Jenkins, of South Carolina.
Hallett Johnson, of New Jersey.
John E. Kehl, of Ohio.
Alexander C. Kirk, of Illinois.
Ezra M. Lawton, of Ohio.
Sampel T. Lee, of Michigan.
Will L. Lowrie, of Illinois.
Ferdinand L. Mayer, of Indiana.
George S. Messersmith, of Delaware.
Raneford S. Miller, of New York.
Stokeley W. Morgan, of Arkansas.
Edwin L. Neville, of Ohio.
Edward J. Norton, of Tennessee.
John Ball Osborne, of Pennsylvania.
Ely E. Palmer, of Rhode Island.
Willis R. Peck, of California.
Mahlon Fay Perkins, of California.
G. Howland Shaw, of Massachusetts.
Alban G. Snyder, of West Virginia.
Addison E. Southard, of Kentucky.
Henry P. Starrett, of Florida.
Louis A. Sussorff, jr., of New York.
Francis White, of Maryland.
John Campbell White, of Maryland.
Charles S. Winans, of Michigan.

CLASS IV

William W. Andrews, of Ohio.
F. Lamont Belin, of Pennsylvania.
Philander L. Cable, of Illinois.
Hamilton C. Claiborne, of Virginia.
Felix Cole, of the District of Columbia.
E. Haldeman Dennison, of Ohio.
Hernando De Soto, of California.
Leon Dominian, of New York.
George K. Donald, of Alabama.
James Clement Dunn, of New York.
Cornelius Van H. Engert, of California.
Cornelius Ferris, of Colorado.
Fred D. Fisher, of Oregon.
Otis A. Glazebrook, of New Jersey.
Herbert S. Gould, of California.
George A. Gordon, of New York.
Elbridge Gerry Greene, of Massachusetts.
Oliver B. Harriman, of West Virginia.
Clarence B. Hewes, of Louisiana.
Calvin M. Hitch, of Georgia.
Myron A. Hofer, of Ohio.
Ross E. Holaday, of Ohio.
Samuel W. Honaker, of Texas.
Williamson S. Howell, jr., of Texas.
J. Klahr Huddle, of Ohio.
John F. Jewell, of Illinois.
Stewart Johnson, of Illinois.
Paul Knabenshue, of Ohio.
Arthur Bliss Lane, of New York.
Irving N. Linnell, of Massachusetts.
J. Theodore Marriner, of Maine.
John F. Martin, of Florida.
Lester Maynard, of California.
Jay Pierrepont Moffat, of New York.
Maxwell K. Moorhead, of Pennsylvania.
Dana G. Munro, of New Jersey.
R. Henry Norweb, of Ohio.
Gordon Paddock, of New York.
Robert M. Scotten, of Michigan.
Richard B. Southgate, of Massachusetts.
Benjamin Thaw, jr., of Pennsylvania.
Walter C. Thurston, of Arizona.
John C. Wiley, of Indiana.
North Winship, of Georgia.
L. Lanier Winslow, of New York.
John Q. Wood, of Hawaii.

CLASS V

Copley Amory, Jr., of New Hampshire.
 Frank D. Arnold, of Pennsylvania.
 Henry H. Balch, of Alabama.
 Joseph W. Ballantine, of Massachusetts.
 Thomas H. Bevan, of Maryland.
 Pierre de L. Boal, of Pennsylvania.
 George A. Bucklin, of Oklahoma.
 Ralph C. Busser, of Pennsylvania.
 Charles H. Cameron, of New York.
 Harry Campbell, of Kansas.
 Frederick C. Chabot, of Texas.
 Harold D. Clum, of New York.
 John K. Davis, of Ohio.
 Leslie A. Davis, of New York.
 Hasell H. Dick, of South Carolina.
 Alfred W. Donegan, of Alabama.
 Eugene H. Dooman, of New York.
 W. Roderick Dorsey, of Maryland.
 Edward A. Dow, of Nebraska.
 Coert Du Bois, of California.
 John W. Dye, of Minnesota.
 Carol H. Foster, of Maryland.
 Claude E. Guyant, of Illinois.
 George C. Hanson, of Connecticut.
 Joseph E. Haven, of Illinois.
 Oscar S. Helzer, of Iowa.
 Frank Anderson Henry, of Delaware.
 Charles L. Hoover, of Missouri.
 George N. Ifft, of Idaho.
 Ernest L. Ives, of Virginia.
 Jesse B. Jackson, of Ohio.
 William L. Jenkins, of Pennsylvania.
 Herschel V. Johnson, of North Carolina.
 Paul R. Josselyn, of Iowa.
 Wilbur Keblinger, of Virginia.
 Graham H. Kemper, of Kentucky.
 Frank C. Lee, of Colorado.
 Walter A. Leonard, of Illinois.
 Stuart K. Lupton, of Tennessee.
 David B. Macgowan, of Tennessee.
 O. Gaylord Marsh, of Washington.
 Keith Merrill, of Minnesota.
 Leland B. Morris, of Pennsylvania.
 Wallace S. Murray, of Ohio.
 David J. D. Myers, of Georgia.
 Myrl S. Myers, of Pennsylvania.
 José de Olivares, of Missouri.
 Kenneth S. Patton, of Virginia.
 Lowell C. Pinkerton, of Missouri.
 *John R. Putnam, of Oregon.
 Edward L. Reed, of Pennsylvania.
 Leslie E. Reed, of Minnesota.
 Elliott Verne Richardson, of New York.
 Emil Sauer, of Texas.
 James B. Stewart, of New Mexico.
 Alfred R. Thomson, of Maryland.
 S. Pinkney Tuck, of New York.
 Avra M. Warren, of Maryland.
 Hugh H. Watson, of Vermont.
 Charles D. Westcott, of Pennsylvania.
 Edwin C. Wilson, of Florida.
 Thomas M. Wilson, of Tennessee.
 Alan F. Winslow, of Illinois.
 James B. Young, of Pennsylvania.

CLASS VI

 Walter A. Adams, of South Carolina.
 Charles H. Albrecht, of Pennsylvania.
 J. Webb Benton, of Pennsylvania.
 Percy A. Blair, of the District of Columbia.
 William P. Blocker, of Texas.
 Walter F. Boyle, of Georgia.
 Homer Brett, of Mississippi.
 Charles C. Broy, of Virginia.
 Parker W. Buhrman, of Virginia.
 William C. Burdett, of Tennessee.
 Algar E. Carleton, of Vermont.
 Joseph W. Carroll, of New York.
 Benjamin F. Chase, of Pennsylvania.
 H. Merle Cochran, of Arizona.
 Harris N. Cookingham, of New York.
 Raymond E. Cox, of New York.
 Henry C. A. Damm, of Tennessee.

Thomas L. Daniels, of Minnesota.
 Chester W. Davis, of New York.
 James P. Davis, of Georgia.
 Monnett B. Davis, of Colorado.
 Lawrence Dennis, of Massachusetts.
 Erle R. Dickover, of California.
 Henry I. Dockweiler, of California.
 Clement S. Edwards, of Minnesota.
 Joseph Flack, of Pennsylvania.
 Barton Hall, of Missouri.
 George M. Hanson, of Utah.
 Robert Harnden, of California.
 Thornwell Haynes, of Alabama.
 Frederick P. Hibbard, of Texas.
 Henry B. Hitchcock, of New York.
 John P. Hurley, of New York.
 Jay C. Huston, of California.
 Joseph E. Jacobs, of South Carolina.
 John D. Johnson, of Vermont.
 Curtis C. Jordon, of California.
 Edwin Carl Kemp, of Florida.
 Alfred W. Kliefoth, of Pennsylvania.
 Harry M. Lakin, of Pennsylvania.
 William R. Langdon, of Massachusetts.
 Frederic D. K. Le Clercq, of South Carolina.
 Dayle C. McDonough, of Missouri.
 Joseph F. McGurk, of New Jersey.
 George A. Makinson, of California.
 Lucien Memminger, of South Carolina.
 Cord Meyer, of New York.
 G. Harlan Miller, of Pennsylvania.
 James P. Moffitt, of New York.
 Benjamin Muse, of Virginia.
 Charles Roy Nasmith, of New York.
 Edward I. Nathan, of Pennsylvania.
 H. Dorsey Newson, of New York.
 George Orr, of New Jersey.
 Jefferson Patterson, of Ohio.
 Frederick F. A. Pearson, of Rhode Island.
 Charles J. Pisar, of Wisconsin.
 Harold B. Quarton, of Iowa.
 Elbridge D. Rand, of California.
 John Randolph, of New York.
 Bertil M. Rasmussen, of Iowa.
 Benjamin Reath Riggs, of Pennsylvania.
 John M. Savage, of New Jersey.
 Walter H. Schoellkopf, of New York.
 Walter H. Sholes, of Oklahoma.
 Samuel Sokobin, of New Jersey.
 William B. Southworth, of Pennsylvania.
 Francis R. Stewart, of New York.
 Lucien N. Sullivan, of Pennsylvania.
 Merritt Swift, of the District of Columbia.
 Harold H. Tittmann, Jr., of Missouri.
 Thomas W. Voetter, of New Mexico.
 John J. C. Watson, of Kentucky.
 Orme Wilson, Jr., of New York.
 Warden McK. Wilson, of Indiana.
 Henry M. Wolcott, of New York.

CLASS VII

Philip Adams, of Massachusetts.
 Charles E. Allen, of Kentucky.
 Norman L. Anderson, of Wisconsin.
 W. Roswell Barker, of Minnesota.
 Maynard B. Barnes, of Iowa.
 Frank Bohr, of Kansas.
 Wilbert L. Bonney, of Illinois.
 John L. Bouchal, of Nebraska.
 Richard F. Boyce, of Michigan.
 Robert R. Bradford, of Nebraska.
 Austin C. Brady, of New Mexico.
 George L. Brandt, of the District of Columbia.
 Lawrence P. Briggs, of Michigan.
 Alfred T. Burri, of New York.
 Harry E. Carlson, of Illinois.
 James C. Carter, of Georgia.
 William E. Chapman, of Oklahoma.
 Reed Paige Clark, of New Hampshire.
 Arthur B. Cooke, of South Carolina.
 John Corrigan, Jr., of Georgia.
 Eliot B. Coulter, of Illinois.
 Paul H. Cram, of Maine.
 Cecil M. P. Cross, of Rhode Island.
 Raymond Davis, of Maine.
 Thomas D. Davis, of Oklahoma.

Leonard G. Dawson, of Virginia.
 Harold M. Deane, of Connecticut.
 James Orr Denby, of Indiana.
 Samuel S. Dickson, of New Mexico.
 Hooker A. Doolittle, of New York.
 William F. Doty, of New Jersey.
 J. Preston Doughten, of Delaware.
 Maurice P. Dunlap, of Minnesota.
 Dudley G. Dwyre, of Colorado.
 Francis J. Dyer, of California.
 John G. Erhardt, of New York.
 Hugh S. Fullerton, of Ohio.
 Ilo C. Funk, of Colorado.
 Gerhard Gade, of Illinois.
 William P. George, of Alabama.
 Raleigh A. Gibson, of Illinois.
 John Sterett Gittings, jr., of Maryland.
 Bernard Gottlieb, of New York.
 Louis H. Gourley, of Illinois.
 William J. Grace, of New York.
 Edward M. Groth, of Georgia.
 Don S. Haven, of Pennsylvania.
 Harry F. Hawley, of New York.
 Robert W. Helmgartner, of Ohio.
 Robertson Honey, of New York.
 George D. Hopper, of Kentucky.
 Charles Bridgham Hosmer, of Maine.
 William H. Hunt, of New York.
 Robert L. Kelser, of Indiana.
 Clinton E. MacEachran, of Massachusetts.
 John H. MacVeagh, of New York.
 Karl de G. MacVitty, of Illinois.
 William J. McCafferty, of California.
 Andrew J. McConico, of Mississippi.
 Stewart E. McMillin, of Kansas.
 Renwick S. McNiece, of Utah.
 Robert B. Macatee, of Virginia.
 George R. Merrell, jr., of Missouri.
 Hugh Millard, of Nebraska.
 John R. Minter, of South Carolina.
 W. M. Parker Mitchell, of Virginia.
 Edmund B. Montgomery, of Illinois.
 Orsen N. Nielsen, of Wisconsin.
 Thomas R. Owens, of Alabama.
 Maurice C. Pierce, of Wisconsin.
 Harold Playter, of California.
 Walter T. Prendergast, of Ohio.
 Ernest B. Price, of New York.
 Samuel C. Reat, of Illinois.
 Horace Remillard, of Massachusetts.
 Winthrop R. Scott, of Ohio.
 John F. Simons, of New York.
 Gaston Smith, of Louisiana.
 Carl O. Spamer, of Maryland.
 Clarence J. Spiker, of the District of Columbia.
 Richard L. Sprague, of Massachusetts.
 Paul C. Squire, of Massachusetts.
 Maurice L. Stafford, of California.
 Dana C. Sycks, of Ohio.
 G. Russell Taggart, of New Jersey.
 William H. Taylor, of Pennsylvania.
 Raymond P. Tenney, of Massachusetts.
 Samuel R. Thompson, of California.
 R. A. Wallace Treat, of Ohio.
 Marshall M. Vance, of Ohio.
 Henry C. von Struve, of Texas.
 Egmont C. von Tresckow, of South Carolina.
 George Wadsworth, of New York.
 Harry L. Walsh, of Maryland.
 Henry S. Waterman, of Washington.
 Henry T. Wilcox, of New Jersey.
 Herbert O. Williams, of California.
 Harold L. Williamson, of Illinois.
 Digby A. Willson, of New York.
 Gilbert R. Willson, of Texas.
 Damon C. Woods, of Texas.
 Romeyn Wormuth, of New York.
 William J. Yerby, of Tennessee.
 Bartley F. Yost, of Kansas.

CLASS VIII

Harry J. Anslinger, of Pennsylvania.
 Miss Lucile Atcherson, of Ohio.
 Henry D. Baker, of Illinois.
 Rees H. Barkalow, of New Jersey.

Willard L. Beaulac, of Rhode Island.
 Donald F. Bigelow, of Minnesota.

 William W. Brunswick, of Kansas.
 Howard Bucknell, jr., of Georgia.
 Robert S. Burgher, of Texas.
 Herbert S. Bursley, of the District of Columbia.
 Edward Caffery, of Louisiana.
 John S. Calvert, of North Carolina.
 Reginald S. Castleman, of California.
 J. Rives Childs, of Virginia.
 Thomas W. Chilton, of New York.
 George T. Colman, of New York.
 Edward S. Crocker, 2d, of Massachusetts.
 Nathaniel P. Davis, of New Jersey.
 Richard M. de Lambert, of New Mexico.
 Howard Donovan, of Illinois.
 William W. Early, of North Carolina.
 Stillman W. Eells, of New York.
 Leon H. Ellis, of Washington.
 Robert F. Fernald, of Maine.
 Augustine W. Ferrin, of New York.
 Harold D. Finley, of New York.
 Carl A. Fisher, of Utah.
 Samuel J. Fletcher, of Maine.
 Walter A. Foote, of Pennsylvania.
 Paul H. Foster, of Texas.
 Ray Fox, of California.
 Lynn W. Franklin, of Maryland.
 Waldemar J. Galtman, of New York.
 William P. Garrety, of New York.
 Albert H. Gerberich, of Pennsylvania.
 Herndon W. Goforth, of North Carolina.
 Harvey T. Goodier, of New York.
 Charles I. Graham, of Illinois.
 John Harrison Gray, of New York.
 Julian C. Greenup, of California.
 Christian Gross, of Illinois.
 Stuart E. Grummon, of New Jersey.
 Maxwell M. Hamilton, of Iowa.
 Stanley Hawks, of New York.
 William W. Heard, of Maryland.
 Donald R. Heath, of Kansas.
 Charles H. Heister, of Delaware.
 Jack Dewey Hickerson, of Texas.
 Leighton Hope, of Mississippi.
 William I. Jackson, of Illinois.
 S. Bertrand Jacobson, of New York.
 Robert Y. Jarvis, of California.
 Felix S. S. Johnson, of New Jersey.
 Robert F. Kelley, of Massachusetts.
 Trojan Kidding, of Pennsylvania.
 Gerhard H. Krogh, of North Dakota.
 Clark P. Kuykendall, of Pennsylvania.
 Drew Linard, of Alabama.
 Robert D. Longyear, of Massachusetts.
 Thomas McEnelly, of New York.
 Walter H. McKinney, of Michigan.
 H. Freeman Matthews, of Maryland.
 John J. Melly, of Pennsylvania.
 H. Tobey Mooers, of Maine.
 J. Lee Murphy, of New York.
 James J. Murphy, jr., of Pennsylvania.
 Robert D. Murphy, of Wisconsin.
 Gustave Pabst, jr., of Wisconsin.
 Robert R. Patterson, of Michigan.
 Robert L. Rankin, of New Jersey.
 Walter S. Relneck, of Ohio.
 H. Earle Russell, of Michigan.
 Lester L. Schnare, of Georgia.
 Rudolf E. Schoenfeld, of the District of Columbia.
 Harold Shantz, of New York.
 George P. Shaw, of California.
 Fred C. Slater, of Kansas.
 Alexander K. Sloan, of Pennsylvania.
 E. Talbot Smith, of Connecticut.
 Leland L. Smith, of Oregon.
 John Stambaugh, 2d, of Ohio.
 Christian T. Steger, of Virginia.
 George K. Stiles, of Maryland.
 Francis H. Styles, of Virginia.
 Harold S. Tewell, of North Dakota.
 Edward B. Thomas, of Illinois.

Frederick L. Thomas, of New York.
Howard K. Travers, of New York.

Second Lieut. Lester Frank Watson, Quartermaster Corps, from November 23, 1924.

Second Lieut. William Edwin Vecqueray, Quartermaster Corps, from November 26, 1924.

HOUSE OF REPRESENTATIVES

TUESDAY, December 2, 1924

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Heavenly Father, grant us this day strength of mind and heart that we may have fidelity and courage to overcome difficulties and bear valiantly our responsibilities. Help us to catch the strain of the Man of Galilee in disinterested and

self-denying service. Teach us, O Lord, that he has not learned the vital lesson of life who fails to conquer fear. In our labors, in our devotion to duty, in our broad outlook upon the needs of our country, may we find the title to our place and honor. Amen.

The Journal of the proceedings of yesterday was read and approved.

REPORT FROM COMMITTEE ON RIVERS AND HARBORS

Mr. DEMPSEY. Mr. Speaker, I wish to file a privileged report (H. Rept. 581) from the Committee on Rivers and Harbors. The report was filed previously through inadvertence through the basket, and in order to retain the privilege to which the bill is entitled it is necessary to report it from the floor.

The SPEAKER. Is it a bill authorizing projects?

Mr. DEMPSEY. It is.

The SPEAKER. The gentleman from New York submits a privileged report from the Committee on Rivers and Harbors, which the Clerk will report.

The Clerk read as follows:

Mr. DEMPSEY, from the Committee on Rivers and Harbors, reports the following bill: "A bill (H. R. 8914) authorizing construction of certain public works on rivers and harbors, and for other purposes."

Mr. GARRETT of Tennessee. Mr. Speaker, I do not know that it is necessary, but as a matter of course I reserve all points of order on the bill.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

A message, in writing, from the President of the United States, by Mr. Latta, one of his secretaries.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Mr. ROSENBLUM, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 9561. An act making additional appropriations for the fiscal year ending June 30, 1925, to enable the heads of the several departments and independent establishments to adjust the rates of compensation of civilian employees in certain of the field services;

H. R. 6426. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors;

S. 2265. An act to provide for a rearrangement of the public alley facilities in square 616 in the District of Columbia, and for other purposes;

S. 3397. An act to remit the duty on a carillon of bells to be imported for the Church of Our Lady of the Rosary, Providence, R. I.; and

S. J. Res. 85. Joint resolution authorizing an appropriation for the participation of the United States in the preparation and completion of plans for the comprehensive observance of that greatest of all historic events, the bicentennial of the birthday of George Washington.

ORDER OF BUSINESS

Mr. LONGWORTH. Mr. Speaker, I ask unanimous consent that Calendar Wednesday, to-morrow, be dispensed with. I will give my reasons for making the request if I may have the attention of the minority leader. I am informed that the Committee on Naval Affairs, which has the call to-morrow, is not quite ready with its bill, which is a very important one. That is true also of the Committee on the Post Office and Post Roads, which has the next call. If unanimous consent should be given to do away with the day, I am also informed that the Appropriations Committee will be ready to begin consideration of the Interior Department appropriation bill on Wednesday, and I think it is in the interest of the dispatch of the business of the House if we can dispense with Calendar Wednesday to-morrow.

The SPEAKER. The gentleman from Ohio asks unanimous consent that the business of Calendar Wednesday on to-morrow be dispensed with. Is there objection?

Mr. GARRETT of Tennessee. Mr. Speaker, reserving the right to object, I have no disposition at all to object to that arrangement, but I would like to ask the gentleman from Ohio about the program for the remainder of the week. As I understand, the President's message will be read to-morrow, and the Appropriations Committee will have the remainder of the day. Will there be anything during the remainder of the week aside from the consideration of the appropriation bill?

Mr. LONGWORTH. So far as I know, there is nothing except the appropriation bill.

Mr. GARRETT of Tennessee. That will be the consideration of the Interior Department appropriation bill?

Mr. LONGWORTH. Yes; the Interior Department appropriation bill.

Mr. WINGO. Mr. Speaker, further reserving the right to object, will the gentleman give the House some idea as to when the McFadden bill will be considered?

Mr. LONGWORTH. I will say to the gentleman that personally I would be very glad to have that bill taken up and disposed of before the holidays if possible, but we desire to get through with the appropriation bills as quickly as possible as they come up. I understand there are at least two bills ready.

Mr. WINGO. The gentleman thinks at least there is no possibility of the bill being considered before the holidays?

Mr. LONGWORTH. I can not answer the gentleman definitely, because I do not know whether there is any substantial opposition to the McFadden bill or not. I have been told that there was some at the last session that has been removed by amendments now in the bill.

Mr. WINGO. I noticed that in the New York newspapers, but otherwise I was not advised.

Mr. LONGWORTH. In that case, I shall be glad to help dispose of that bill as soon as possible.

Mr. WINGO. I shall ask for consideration. Although I shall not vote for the bill, I have promised to expedite it. We are concerned with the consideration of the bill, and we are being blamed for the delay. I wanted the Record to show that we are ready to take it up to-day, or to-morrow, or on any day that the majority cares to take it up.

Mr. LONGWORTH. I will say to the gentleman that personally I am in favor of having that bill considered as soon as possible.

Mr. WINGO. I am in favor personally of its expedition.

Mr. HASTINGS. Mr. Speaker, will the gentleman yield?

Mr. LONGWORTH. Yes.

Mr. HASTINGS. Do I understand that the Interior Department appropriation bill has not yet been reported?

Mr. LONGWORTH. It will be reported, as I understand, immediately after the reading of the Budget report to-day.

Mr. BLANTON. Will there be a disposition to give the Members, during the consideration of this Interior Department bill, an opportunity to debate certain items to which there might be objection? In other words, it has not been reported yet. We have no time to consider it. There might be items in it subject to points of order. We would like to have opportunity to look into that bill somewhat before it is pushed through hurriedly.

Mr. LONGWORTH. I have no idea that there is any disposition on the part of the Committee on Appropriations or the gentlemen in charge of that bill to hasten its consideration unduly.

Mr. BUTLER. Is it proposed to-morrow to dispense with business in order on Calendar Wednesday?

Mr. LONGWORTH. Yes. I have made that request, but it has not yet been granted.

Mr. BUTLER. Will the gentleman renew his request to-day?

Mr. LONGWORTH. I have already made the request. It is now pending before the House.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

PENSIONS

Mr. FULLER, from the Committee on Invalid Pensions, submitted, for printing under the rule, a conference report on the bill (H. R. 6941) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War, and certain widows and dependent children of soldiers and sailors of said war.

Mr. GARRETT of Tennessee. Is it the gentleman's purpose to call up that conference report to-morrow?

Mr. FULLER. No. It has to be agreed to in the Senate first. It is hanging over from the last session. It has not yet been agreed to in the Senate.

RATIFICATION OF A PROPOSED AMENDMENT TO THE CONSTITUTION

The SPEAKER. The Chair lays before the House the concurrent resolution of the Legislature of Arkansas, which the Clerk will read.

[For communication, see proceedings of Senate, page 16.]

MESSAGE FROM THE PRESIDENT—THE BUDGET

The SPEAKER laid before the House the following message from the President, which was read and, with the accompanying documents, referred to the Committee on Appropriations.

[For message, see proceedings of Senate, page 34.]

INTERIOR DEPARTMENT APPROPRIATIONS

Mr. CRAMTON, from the Committee on Appropriations, by direction of that committee, reported the bill H. R. 10020, making appropriations for the Department of the Interior for the fiscal year ending June 30, 1926, and for other purposes, which, with the accompanying papers, was read a first and second time and referred to the Committee of the Whole House on the state of the Union.

Mr. CARTER reserved all points of order.

CORRECTIONS

Mr. HILL of Alabama. Mr. Speaker, roll call No. 207, on the conference report on the bill S. 1898, the postal salary bill, given in the Record of June 6, 1924, shows me not voting. I wish to state that I was present and voted "yea" on the roll call.

Mr. COLLINS. Mr. Speaker, on the same roll call on the same date, I was likewise reported as not voting, when, as a matter of fact, I was present and voted "yea."

The SPEAKER. Without objection, the corrections will be made.

There was no objection.

ADJOURNMENT

Mr. LONGWORTH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; and accordingly (at 12 o'clock and 45 minutes p. m.) the House adjourned until to-morrow, Wednesday, December 3, 1924, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

597. A letter from president Board of Managers, National Home for Disabled Volunteer Soldiers, transmitting report of the Board of Managers of the National Home for Disabled Volunteer Soldiers for the fiscal year ending June 30, 1924; to the Committee on Military Affairs.

598. A letter from the chairman of United States Tariff Commission, transmitting a copy of the Eighth Annual Report of the United States Tariff Commission (H. Doc. No. 466); to the Committee on Ways and Means and ordered to be printed, with illustrations.

599. A letter from the Postmaster General, transmitting report of the finances of the Post Office Department for the preceding year, showing the amount of balances due the department at the beginning of the year, the amount of postage which accrued within the year, the amount of engagements and liabilities, and the amount actually paid during the year for carrying mail, showing how much of the amount was for carrying the mail in preceding years, and a report of the amount expended in the department for the preceding year, including detailed statements of expenditures made from the contingent fund; to the Committee on Expenditures in the Post Office Department.

600. A letter from the Director of United States Veterans' Bureau, transmitting a report of the administration of the adjusted compensation act by the United States Veterans' Bureau to date; to the Committee on Ways and Means.

601. A letter from the chairman of the United States Tariff Commission, transmitting a report showing in detail all travel from Washington performed by officers and employees of the Tariff Commission during the fiscal year ended June 30, 1924; to the Committee on Appropriations.

602. A letter from the chairman of the United States Tariff Commission, transmitting a report showing the exchange of typewriters and adding machines by the Tariff Commission during the fiscal year ended June 30, 1924; to the Committee on Appropriations.

603. A letter from the Secretary of the Treasury, transmitting the report of the Surgeon General of the Public Health Service for the fiscal year 1924; to the Committee on Interstate and Foreign Commerce.

604. A letter from the Director of United States Veterans' Bureau, transmitting statement showing by location, salary range, and bureau designation employees receiving an aggregate annual salary of \$2,000 and over, as of November 1, 1924; to the Committee on Appropriations.

605. A letter from the Postmaster General, transmitting statement showing which officers or employees of the Post Office Department (other than special agents, inspectors, or employees who, in the discharge of their regular duties, are required to travel) traveled on official business from Washington to points outside of the District of Columbia from

July 1, 1923, to June 30, 1924; to the Committee on Appropriations.

606. A letter from the Postmaster General, transmitting a report of the public property in the Post Office Department on December 1, 1924; to the Committee on Expenditures in the Post Office Department.

607. A letter from the Postmaster General, transmitting a report giving the aggregate number of the various publications issued by the Post Office Department during the fiscal year 1924, giving same in detail, the cost of the paper used for such publications, cost of printing, and the cost of preparation of each publication, and the number of each which have been distributed; to the Committee on Printing.

608. A letter from the Postmaster General, transmitting statement required by section 5 of the act making appropriations to supply deficiencies in appropriations for the fiscal year 1915, etc., showing data relative to typewriters exchanged by the Post Office Department during the fiscal year ended June 30, 1924; to the Committee on Appropriations.

609. A letter from the Postmaster General, transmitting a tabular statement showing in detail the claims of postmasters for reimbursement for loss of postal, money order, and other funds and stamps resulting from burglary, fire, or other unavoidable casualty, which have been acted upon by the Postmaster General during the fiscal year ended June 30, 1924, the amounts claimed, amounts allowed, disallowances, and cause of loss; to the Committee on Expenditures in the Post Office Department.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. CRAMTON: Committee on Appropriations. H. R. 10020. A bill making appropriations for the Department of the Interior for the fiscal year ending June 30, 1926, and for other purposes; without amendment (Rept. No. 1033). Committed to the Committee of the Whole House on the state of the Union and ordered to be printed.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, the Committee on Pensions was discharged from the consideration of the bill (H. R. 5022) granting a pension to John E. T. Ward; and the same was referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. CRAMTON: A bill (H. R. 10020) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1926, and for other purposes; committed to the Committee of the Whole House on the state of the Union.

By Mr. BLAND: A bill (H. R. 10021) to establish a national military park at the battle field of Yorktown; to the Committee on Military Affairs.

By Mr. DRIVER: A bill (H. R. 10022) to provide for the establishment of a dairying and livestock experiment station at Paragould, Ark.; to the Committee on Agriculture.

By Mr. GILBERT: A bill (H. R. 10023) to amend an act entitled "An act to authorize the Director of the Census to collect and publish additional statistics of tobacco," approved April 30, 1912; to the Committee on the Census.

By Mr. HUDSON: A bill (H. R. 10024) to repeal the excise tax on auto trucks and wagons, automobiles and motor cycles, tires, inner tubes, parts and accessories; to the Committee on Ways and Means.

By Mr. SNYDER: A bill (H. R. 10025) to provide for the permanent withdrawal of certain described lands in the State of Nevada for the use and benefit of the Indians of the Walker River Reservation; to the Committee on Indian Affairs.

By Mr. SPEAKS: A bill (H. R. 10026) to amend the act to adjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and the Public Health Service, approved June 10, 1922; to the Committee on Military Affairs.

By Mr. KINDRED: A bill (H. R. 10027) to regulate the operation of motor-propelled vehicles in the District of Columbia, and to provide penalties for its violation; to the Committee on the District of Columbia.

By Mr. ZIHLMAN: A bill (H. R. 10028) to regulate motor vehicles in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. LINEBERGER: A bill (H. R. 10029) to increase the morale of the naval service; to the Committee on Naval Affairs.

By Mr. SITES: A bill (H. R. 10030) granting the consent of Congress to the Harrisburg Bridge Co. and its successors to reconstruct its bridge across the Susquehanna River at a point opposite Market Street, Harrisburg, Pa.; to the Committee on Interstate and Foreign Commerce.

By Mr. BLAND: Joint resolution (H. J. Res. 299) establishing a commission for the participation of the United States in the observance of the one hundred and fiftieth anniversary of the Battle of Yorktown, authorizing an appropriation to be utilized in connection with such observance, and for other purposes; to the Committee on the Library.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BIXLER: A bill (H. R. 10031) granting a pension to Amanda Koons; to the Committee on Invalid Pensions.

By Mr. BLACK of Texas: A bill (H. R. 10032) granting an increase of pension to Martha Wilcox; to the Committee on Invalid Pensions.

By Mr. BLAND: A bill (H. R. 10033) granting a pension to Frederick L. Eagle; to the Committee on Pensions.

By Mr. BROWNING: A bill (H. R. 10034) granting a pension to Georgia A. Godwin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10035) granting a pension to Kelley Roberson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10036) granting a pension to Leonard Godwin; to the Committee on Invalid Pensions.

By Mr. BYRNS of Tennessee: A bill (H. R. 10037) granting an increase of pension to Robert L. Chick; to the Committee on Pensions.

By Mr. CLANCY: A bill (H. R. 10038) for the relief of William J. Nagel; to the Committee on Claims.

By Mr. COOPER of Wisconsin: A bill (H. R. 10039) granting an increase of pension to Susan A. Stork; to the Committee on Invalid Pensions.

By Mr. CORNING: A bill (H. R. 10040) granting a pension to Jessie Emma Diggery; to the Committee on Invalid Pensions.

By Mr. CURRY: A bill (H. R. 10041) for the relief of the San Francisco, Napa & Calistoga Railway; to the Committee on Claims.

Also, a bill (H. R. 10042) granting a pension to William B. Walker; to the Committee on Pensions.

Also, a bill (H. R. 10043) granting a pension to Guy Warwick; to the Committee on Pensions.

Also, a bill (H. R. 10044) granting a pension to Sarah E. Keefer; to the Committee on Invalid Pensions.

By Mr. DAVIS of Minnesota: A bill (H. R. 10045) granting a pension to Alphald E. Park; to the Committee on Invalid Pensions.

By Mr. DRIVER: A bill (H. R. 10046) granting an increase of pension to Cora Hubbard; to the Committee on Pensions.

By Mr. FISH: A bill (H. R. 10047) granting an increase of pension to Mary E. Croshier; to the Committee on Pensions.

Also, a bill (H. R. 10048) for the relief of Joseph McCloy; to the Committee on Military Affairs.

Also, a bill (H. R. 10049) granting an increase of pension to Emma L. Jesser; to the Committee on Pensions.

By Mr. FLEETWOOD: A bill (H. R. 10050) granting a pension to Augusta Mattemore; to the Committee on Invalid Pensions.

By Mr. GREENWOOD: A bill (H. R. 10051) granting a pension to Martha J. Lawyer; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10052) granting a pension to Nancy E. Quillen; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10053) granting a pension to Jennie City; to the Committee on Pensions.

Also, a bill (H. R. 10054) granting a pension to Dora Tomey; to the Committee on Pensions.

Also, a bill (H. R. 10055) granting a pension to Willie Ray Paris; to the Committee on Pensions.

By Mr. HARDY: A bill (H. R. 10056) granting a pension to Anna J. Manuel; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10057) granting a pension to Harriet D. Waterson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10058) granting an increase of pension to John G. Schempp; to the Committee on Pensions.

By Mr. HUDDLESTON: A bill (H. R. 10059) granting an increase of pension to Sarah E. Smith; to the Committee on Pensions.

By Mr. HUDSON: A bill (H. R. 10060) granting a pension to Louise Holden; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10061) granting a pension to Emma C. Alton; to the Committee on Invalid Pensions.

By Mr. KELLY: A bill (H. R. 10062) granting a pension to Charles W. Hanson; to the Committee on Pensions.

By Mr. KIESS: A bill (H. R. 10063) granting an increase of pension to Julia Embich; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10064) to renew and extend certain letters patent to George J. Pilger; to the Committee on Patents.

By Mr. KOPP: A bill (H. R. 10065) granting an increase of pension to Margaret E. Wilson; to the Committee on Invalid Pensions.

By Mr. KURTZ: A bill (H. R. 10066) granting a pension to Salome M. Wertz; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10067) granting an increase of pension to Anna M. George; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10068) granting an increase of pension to Mary E. Piper; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10069) granting an increase of pension to Harriet M. Hoover; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10070) granting an increase of pension to Mary A. Crum; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10071) granting an increase of pension to Mary C. Fluck; to the Committee on Invalid Pensions.

By Mr. LINEBERGER: A bill (H. R. 10072) granting a pension to Anna Guthery; to the Committee on Invalid Pensions.

By Mr. LUCE: A bill (H. R. 10073) granting a pension to Carrie H. Moffatt; to the Committee on Pensions.

By Mr. McLAUGHLIN of Michigan: A bill (H. R. 10074) to provide for the retirement of Clarence W. Sessions, Judge of the District Court for the Western District of Michigan; to the Committee on the Judiciary.

By Mr. MURPHY: A bill (H. R. 10075) granting an increase of pension to Frank E. Putnam; to the Committee on Pensions.

Also, a bill (H. R. 10076) granting a pension to Mary Orr; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10077) granting an increase of pension to Parnelia Swan; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10078) granting an increase of pension to Elizabeth May; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10079) granting an increase of pension to Rachel L. Herbert; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10080) granting a pension to William G. Hamilton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10081) granting an increase of pension to Martha Burdett; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10082) granting a pension to Martha Hutton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10083) granting an increase of pension to Sarah S. Badger; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10084) granting an increase of pension to Margaret J. Coss; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10085) granting an increase of pension to Cassie A. Cunningham; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10086) granting an increase of pension to Maggie Fetterman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10087) granting a pension to Mary D. Wirebaugh; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10088) granting an increase of pension to Margaret R. Humphrey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10089) granting an increase of pension to Flora A. Fuller; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10090) granting an increase of pension to Julia R. Burris; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10091) granting an increase of pension to Mary E. Deselms; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10092) granting a pension to Elizabeth Olmstead; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10093) granting a pension to Elizabeth Vanfosson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10094) granting an increase of pension to Anna F. Ault; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10095) granting an increase of pension to Ellen Stewart; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10096) granting a pension to Ada M. Buffington; to the Committee on Invalid Pensions.

By Mr. O'CONNELL of New York: A bill (H. R. 10097) granting a pension to Minnie Klingel; to the Committee on Pensions.

By Mr. PHILLIPS: A bill (H. R. 10098) granting a pension to Victor Clark; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10099) granting a pension to Kate Stanton; to the Committee on Invalid Pensions.

By Mr. RAKER: A bill (H. R. 10100) granting a pension to Sarah A. Lansing; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10101) granting an increase of pension to Mary J. Taylor; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10102) to correct the military record of Joseph A. Stevenson; to the Committee on Military Affairs.

By Mr. ROUSE: A bill (H. R. 10103) granting a pension to Louise C. Kimberly; to the Committee on Invalid Pensions.

By Mr. SANDERS of New York: A bill (H. R. 10104) granting an increase of pension to Adaline Minsing; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10105) granting a pension to Mary Pratt; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10106) granting a pension to Mary M. Town; to the Committee on Invalid Pensions.

By Mr. SHREVE: A bill (H. R. 10107) granting a pension to Zora Haggerty; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10108) granting a pension to Martha Cole; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10109) granting a pension to Elizabeth W. Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10110) for the relief of Neal W. Allen; to the Committee on Naval Affairs.

By Mr. SMITH: A bill (H. R. 10111) for the relief of Lawrence J. Kessinger; to the Committee on Claims.

Also, a bill (H. R. 10112) granting a pension to Don C. Had-dock; to the Committee on Pensions.

By Mr. SNELL: A bill (H. R. 10113) for the relief of the Burt Wool & Leather Co.; to the Committee on Claims.

By Mr. SPEAKS: A bill (H. R. 10114) granting an increase of pension to Arthur L. Hamilton; to the Committee on Pensions.

Also, a bill (H. R. 10115) granting an increase of pension to Edith C. Peck; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10116) granting an increase of pension to Hannah Marble; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10117) granting an increase of pension to Margaret A. Hankins; to the Committee on Invalid Pensions.

By Mr. STRONG of Pennsylvania: A bill (H. R. 10118) granting an increase of pension to Margaret C. Wile; to the Committee on Invalid Pensions.

By Mr. SWING: A bill (H. R. 10119) granting a pension to Elizabeth Berry; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10120) granting a pension to Tina C. Baker; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10121) granting a pension to David B. Todd; to the Committee on Invalid Pensions.

By Mr. TINCHER: A bill (H. R. 10122) granting an increase of pension to Charles Andross; to the Committee on Pensions.

By Mr. THOMAS of Kentucky: A bill (H. R. 10123) granting an increase of pension to Sarah Hughes; to the Committee on Invalid Pensions.

By Mr. WATKINS: A bill (H. R. 10124) granting a pension to Rachel E. Mishler; to the Committee on Invalid Pensions.

By Mr. WILSON of Indiana: A bill (H. R. 10125) granting an increase of pension to Emma Meckel; to the Committee on Pensions.

Also, a bill (H. R. 10126) granting an increase of pension to Sophia Fahr; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10127) granting an increase of pension to Emily E. Phillips; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10128) granting an increase of pension to Martha P. Matthews; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10129) granting an increase of pension to Clariissa Jameson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10130) granting an increase of pension to Nancy E. Ulen; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10131) granting a pension to Martha Jane Barton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10132) granting a pension to Anna B. Armistead; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10133) granting a pension to Sophie Atkinson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10134) granting a pension to Albert Braun; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10135) granting an increase of pension to Sarah Maria McGill; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10136) granting an increase of pension to Mary Abbie Meats; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10137) granting an increase of pension to Charlotte Bredenkamp; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10138) granting an increase of pension to Amanda R. Frank; to the Committee on Invalid Pensions.

By Mr. BIXLER: Resolution (H. Res. 369) to pay salary and funeral expenses of Henry R. Thorpe, late an employee in the Doorkeeper's department of the House; to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3051. By the SPEAKER (by request): Petition of Jason Waterman Warren, president of J. W. Warren Co., Cleveland, Ohio, favoring certain amendments to the Constitution of the United States; to the Committee on the Judiciary.

3052. Also (by request), petition of First Baptist Church of Paterson, N. J., approving the purpose of Senate bill 1898; to the Committee on the Post Office and Post Roads.

3053. By Mr. CULLEN: Petition of State commission of prisons, recommending to the Federal Government the erection in New York State of an institution with facilities for the detention of Federal prisoners, both before and after conviction, whereas the increasing number of Federal prisoners committed to county penal institutions of New York State has caused serious overcrowding in county jails and consequent violation of the laws of the State relative to the separation and classification of prisoners, as a result of which the officials in charge of these institutions find themselves in many instances unable to comply with said laws because of the large number of Federal prisoners; to the Committee on the Judiciary.

3054. Also, petition of the American Federation of Labor, advocating an adequate Postal Service wage standard; to the Committee on the Post Office and Post Roads.

3055. Also, petition of New York State League of Savings and Loan Associations, urging an appropriation by Congress for the purpose of an intercensal survey by the Bureau of the Census of building and loan associations in the United States; to the Committee on the Census.

3056. Also, petition of Flatbush Chamber of Commerce, of Brooklyn, N. Y., condemning the provisions of the section of the revenue act of 1924 which pertain to publicity in connection with income tax as radical and un-American; to the Committee on Ways and Means.

3057. By Mr. GALLIVAN: Petition of American Federation of Labor, urging Congress to speedily enact Senate bill 1898, which provides for wage increases for postal workers; to the Committee on the Post Office and Post Roads.

3058. By Mr. SEGER: Petition of Mr. Daniel Meyer, jr., of Haledon, N. J., and 56 residents of Paterson, Haledon, and Hawthorne, N. J., for passage of Senate bill 1898, increasing salaries of postal employees; to the Committee on the Post Office and Post Roads.

3059. Also, petition of Mr. John J. Spruce, of Paterson, N. J., and 53 residents of Paterson, N. J., for passage of Senate bill 1898, increasing salaries of postal employees; to the Committee on the Post Office and Post Roads.

3060. Also, petition of Mr. Krine Patmos, of Paterson, N. J., and 81 residents of Paterson, N. J., for passage of Senate bill 1898, increasing salaries of postal employees; to the Committee on the Post Office and Post Roads.

3061. By Mr. SNELL: Petition of Council 329, L'Union St. Jean-Baptiste d'Amerique, against the passage of any legislation tending to establish a Federal bureau of education; to the Committee on the Judiciary.

3062. Also, petition of St. Anthony's Society, of Ogdensburg, N. Y., against the passage of any legislation tending to establish a Federal bureau of education; to the Committee on the Judiciary.

3063. Also, petition of St. John the Baptist Society, protesting against the creation of a Federal bureau of education and the child labor amendment; to the Committee on the Judiciary.

3064. By Mr. SWING: Petition of the Methodist Church of Fallbrook, Calif., urging an amendment to the preamble of the National Constitution; to the Committee on the Judiciary.

SENATE

WEDNESDAY, December 3, 1924

The Chaplain, Rev. J. J. Muir, D. D., offered the following prayer:

Our Father, in whom we live and move and have our being, enable us to understand our relations to Thee as well as to each other and to the great country in which we live. Grant us Thy guidance in all matters and may we be willing to follow Thy lead as we can understand it and discern Thy ways for us. We ask in Christ's name. Amen.

The reading clerk proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

SENATOR FROM MICHIGAN

The PRESIDENT pro tempore. The Chair lays before the Senate the certificate of the election of JAMES COUZENS, a Senator from the State of Michigan, which will be read.

The reading clerk read as follows:

STATE OF MICHIGAN CERTIFICATE OF ELECTION

We, the undersigned, State canvassers, from an examination of the election returns received by the secretary of state, determine that at the general election held on the 4th day of November, 1924, JAMES COUZENS was duly elected United States Senator for the term ending March 4, 1925.

In witness whereof we have hereto subscribed our names at Lansing this 1st day of December, 1924.

CHAS. J. DELAND,

Secretary of State;

FRANK E. GANNON,

State Treasurer;

THOMAS E. JOHNSON,

Superintendent of Public Instruction;

Board of State Canvassers.

State of Michigan, Department of State, ss:

I hereby certify that the foregoing copy of the certificate of determination of the board of State canvassers is a correct transcript of the original of such certificate of determination on file in this office.

In witness whereof I have hereto attached my signature and the great seal of the State at Lansing this 1st day of December, 1924.

[SEAL.]

CHAS. J. DELAND,

Secretary of State.

The PRESIDENT pro tempore. The credentials will be filed with the Secretary of the Senate.

Mr. CURTIS. The Senator elect from Michigan is present, and I ask that he be sworn in.

The PRESIDENT pro tempore. The Senator elect will present himself at the desk to take the oath of office.

Mr. COUZENS, escorted by Mr. FERRIS, advanced to the Vice President's desk and the oath prescribed by law was administered to him.

COMMITTEE ASSIGNMENTS

Mr. CURTIS. I ask unanimous consent for the entering of the order which I send to the desk.

The PRESIDENT pro tempore. The clerk will read the order.

The reading clerk read as follows:

Ordered, That the following Senators are hereby relieved from further service upon the following committees:

The junior Senator from Idaho [Mr. GOODING] from the Committee on Claims.

The junior Senator from Vermont [Mr. DALE] from the Committee on Education and Labor.

The Senator from Connecticut [Mr. McLEAN] from the Committee on Interstate Commerce.

The senior Senator from Colorado [Mr. PHIPPS] from the Committee on Mines and Mining.

The senior Senator from New Jersey [Mr. EDGE] from the Committee on Post Offices and Post Roads.

The senior Senator from California [Mr. JOHNSON] from the Committee on Military Affairs.

That the following Senators are hereby assigned to membership on the following committees:

The junior Senator from Colorado [Mr. MEANS] to the Committee on Claims; to the Committee on Immigration; to the Committee on the Judiciary; to the Committee on Mines and Mining.

The junior Senator from Rhode Island [Mr. METCALF] to the Committee on Education and Labor; to the Committee on the Library; to the Committee on Naval Affairs; to the Committee on Patents.

The Senator from Connecticut [Mr. MCLEAN] to the Committee on Foreign Relations.

The senior Senator from New Jersey [Mr. EDGE] to the Committee on Foreign Relations.

The junior Senator from Massachusetts [Mr. BUTLER] to the Committee on the Judiciary; to the Committee on Naval Affairs; to the Committee on Patents.

That the senior Senator from Idaho [Mr. BORAH] is hereby relieved from further service as chairman of the Committee on Education and Labor.

That the senior Senator from California [Mr. JOHNSON] is hereby relieved from further service as chairman of the Committee on Territories and Insular Possessions.

That the following Senators are hereby appointed to be chairmen of the following committees:

The senior Senator from Colorado [Mr. PHIPPS] to be chairman of the Committee on Education and Labor.

The senior Senator from Idaho [Mr. BORAH] to be chairman of the Committee on Foreign Relations.

The senior Senator from California [Mr. JOHNSON] to be chairman of the Committee on Immigration.

The senior Senator from Iowa [Mr. CUMMINS] to be chairman of the Committee on the Judiciary.

The senior Senator from Ohio [Mr. WILLIS] to be chairman of the committee on Territories and Insular Possessions.

The PRESIDENT pro tempore. The Senator from Kansas asks unanimous consent for the entering of the order. Is there objection? The Chair hears none, and the order is entered.

Mr. ROBINSON. I ask unanimous consent for the entering of an order for the following committee assignments to be made, and call the attention of the Senator from Kansas thereto.

The PRESIDENT pro tempore. The order will be read. The reading clerk read as follows:

Ordered, That the Senator from Georgia [Mr. GEORGE] be assigned to service on the Committee on Banking and Currency, and the Senator from Arizona [Mr. ASHURST] be assigned to service on the Committee on Irrigation and Reclamation.

The PRESIDENT pro tempore. Without objection, the order is entered.

MEMORIAL SERVICES FOR THE LATE WOODROW WILSON

The PRESIDENT pro tempore. As the members of the committee on the part of the Senate to arrange for the joint meeting of Congress in commemoration of the life, character, and public services of the late President Wilson, provided for in House Concurrent Resolution 30, the Chair appoints the Senator from Virginia [Mr. SWANSON] as chairman of the committee, and the Senator from Maine [Mr. FERNALD], the Senator from New Hampshire [Mr. KEYES], the Senator from Michigan [Mr. COUZENS], and the Senator from Nevada [Mr. PITTMAN].

BOARD OF REGENTS, SMITHSONIAN INSTITUTION

The PRESIDENT pro tempore. The Chair lays before the Senate a communication from the Secretary of the Smithsonian Institution transmitting the resignation of the Senator from Illinois [Mr. MCCORMICK] as a member of the Board of Regents of that institution, which will lie on the table. The Chair appoints instead of the Senator from Illinois [Mr. MCCORMICK] the Senator from Pennsylvania [Mr. PEPPER] as a member of the Board of Regents of the Smithsonian Institution.

REPORTS OF THE SECRETARY OF THE SENATE

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Senate, transmitting, pursuant to law, the report of the Secretary, containing a full and complete account of all property, including stationery, belonging to the United States in his possession on the 1st day of December, 1924 (S. Doc. No. 165), which was ordered to lie on the table and to be printed.

He also laid before the Senate the report of the Secretary of the Senate, transmitting, pursuant to law, a full and complete statement of the receipts and expenditures of the Senate, showing in detail the items of expense under proper appropriations, the aggregate thereof, etc., which was ordered to lie on the table and to be printed.

REPORTS OF THE SERGEANT AT ARMS OF THE SENATE

The PRESIDENT pro tempore laid before the Senate a report of the Sergeant at Arms relative to condemned property of the United States Senate sold and the proceeds thereof since

December 3, 1923 (S. Doc. No. 163), which was ordered to lie on the table and to be printed.

He also laid before the Senate a communication from the Sergeant at Arms of the Senate, transmitting, pursuant to law, a full and complete account of all property in his possession and in the Senate Office Building belonging to the United States on December 24, 1924 (S. Doc. No. 159), which was ordered to lie on the table and to be printed.

TREASURY DEPARTMENT REPORTS

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Treasury, transmitting pursuant to law, statements of approved expenditures under the loan acts of April 24, 1917; of September 24, 1917, as amended; and of September 24, 1917, as amended and extended, which was referred to the Committee on Finance.

He also laid before the Senate a communication from the Secretary of the Treasury, transmitting, pursuant to law, a report relative to the cumulative sinking fund, which was referred to the Committee on Finance.

He also laid before the Senate a communication from the Secretary of the Treasury, transmitting, pursuant to law, a report concerning expenditures to June 30, 1924, under the provisions of section 8 of the first Liberty bond act, approved April 24, 1917, and section 10 of the second Liberty bond act, approved September 24, 1917, as amended, etc., which was referred to the Committee on Finance.

JUDGMENTS OF THE COURT OF CLAIMS (S. DOC. NO. 164)

The PRESIDENT pro tempore laid before the Senate a communication from the chief clerk of the Court of Claims, transmitting, pursuant to law, a statement of all judgments rendered by the Court of Claims for the year ended November 29, 1924, the amounts, the parties, and a synopsis of the nature of claims, which was referred to the Committee on Appropriations and ordered to be printed.

REPORT OF THE DISTRICT PUBLIC UTILITIES COMMISSION

The PRESIDENT pro tempore laid before the Senate a communication from the chairman of the Public Utilities Commission of the District of Columbia, transmitting, pursuant to law, a report of the official proceedings of the Public Utilities Commission for the year ended December 31, 1923, with other information relating to the regulation and operation of public utilities in the District of Columbia, which was referred to the Committee on the District of Columbia.

SALARIES IN THE VETERANS' BUREAU

The PRESIDENT pro tempore laid before the Senate a communication from the Director of the United States Veterans' Bureau, transmitting, pursuant to law, a statement showing by location, salary range, and bureau designation employees receiving an aggregate annual salary of \$2,000 and over as of November 1, 1924, etc., which was referred to the Committee on Finance.

DISPOSITION OF USELESS PAPERS

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Navy, transmitting, pursuant to law, a statement of papers on file in the Bureau of Medicine and Surgery, Navy Department, not needed in the conduct of business and asking for action looking to their disposition, which was referred to a Joint Select Committee on the Disposition of Useless Papers in the Executive Departments. The President pro tempore appointed Mr. HALE and Mr. SWANSON members of the committee on the part of the Senate and ordered that the Secretary notify the House of Representatives thereof.

REPORT ON COST OF HANDLING MAIL MATTER (S. DOC. NO. 162)

The PRESIDENT pro tempore laid before the Senate a communication from the Postmaster General, transmitting, in response to Senate Resolution 269, adopted yesterday, a report (prepared pursuant to law) on cost ascertainment, showing the cost of handling the several classes of mail matter and of conducting the special services for the fiscal year 1923, which was referred to the Committee on Post Offices and Post Roads and, on motion of Mr. STERLING, ordered to be printed with the illustrations.

PRESIDENT'S MESSAGE (H. DOC. NO. 467)

A message in writing from the President of the United States was transmitted to the Senate by Mr. Latta, one of his secretaries.

The message was received by the Assistant Doorkeeper and handed to the President pro tempore.

The PRESIDENT pro tempore. The Chair lays before the Senate a message from the President of the United States, which will be read.

The Secretary (George A. Sanderson) read the message, as follows:

To the Congress of the United States:

The present state of the Union, upon which it is customary for the President to report to the Congress under the provisions of the Constitution, is such that it may be regarded with encouragement and satisfaction by every American. Our country is almost unique in its ability to discharge fully and promptly all its obligations at home and abroad, and provide for all its inhabitants an increase in material resources, in intellectual vigor and in moral power. The Nation holds a position unsurpassed in all former human experience. This does not mean that we do not have any problems. It is elementary that the increasing breadth of our experience necessarily increases the problems of our national life. But it does mean that if we will but apply ourselves industriously and honestly, we have ample powers with which to meet our problems and provide for their speedy solution. I do not profess that we can secure an era of perfection in human existence, but we can provide an era of peace and prosperity, attended with freedom and justice and made more and more satisfying by the ministrations of the charities and humanities of life.

Our domestic problems are for the most part economic. We have our enormous debt to pay, and we are paying it. We have the high cost of government to diminish, and we are diminishing it. We have a heavy burden of taxation to reduce, and we are reducing it. But while remarkable progress has been made in these directions, the work is yet far from accomplished. We still owe over \$21,000,000,000, the cost of the National Government is still about \$3,500,000,000, and the national taxes still amount to about \$27 for each one of our inhabitants. There yet exists this enormous field for the application of economy.

In my opinion the Government can do more to remedy the economic ills of the people by a system of rigid economy in public expenditure than can be accomplished through any other action. The costs of our national and local governments combined now stand at a sum close to \$100 for each inhabitant of the land. A little less than one-third of this is represented by national expenditure, and a little more than two-thirds by local expenditure. It is an ominous fact that only the National Government is reducing its debt. Others are increasing theirs at about \$1,000,000,000 each year. The depression that overtook business, the disaster experienced in agriculture, the lack of employment and the terrific shrinkage in all values which our country experienced in a most acute form in 1920, resulted in no small measure from the prohibitive taxes which were then levied on all productive effort. The establishment of a system of drastic economy in public expenditure, which has enabled us to pay off about one-fifth of the national debt since 1919, and almost cut in two the national tax burden since 1921, has been one of the main causes in reestablishing a prosperity which has come to include within its benefits almost every one of our inhabitants. Economy reaches everywhere. It carries a blessing to everybody.

The fallacy of the claim that the costs of government are borne by the rich and those who make a direct contribution to the National Treasury can not be too often exposed. No system has been devised, I do not think any system could be devised, under which any person living in this country could escape being affected by the cost of our Government. It has a direct effect both upon the rate and the purchasing power of wages. It is felt in the price of those prime necessities of existence—food, clothing, fuel, and shelter. It would appear to be elementary that the more the Government expends the more it must require every producer to contribute out of his production to the Public Treasury and the less he will have for his own benefit. The continuing costs of public administration can be met in only one way—by the work of the people. The higher they become, the more the people must work for the Government. The less they are, the more the people can work for themselves.

The present estimated margin between public receipts and expenditures for this fiscal year is very small. Perhaps the most important work that this session of the Congress can do is to continue a policy of economy and further reduce the cost of government, in order that we may have a reduction of taxes for the next fiscal year. Nothing is more likely to produce that public confidence which is the forerunner and the mainstay of prosperity, encourage and enlarge business opportunity with ample opportunity for employment at good

wages, provide a larger market for agricultural products, and put our country in a stronger position to be able to meet the world competition in trade, than a continuing policy of economy. Of course, necessary costs must be met, proper functions of the Government performed, and constant investments for capital account and reproductive effort must be carried on by our various departments. But the people must know that their Government is placing upon them no unnecessary burden.

TAXES

Everyone desires a reduction of taxes, and there is a great preponderance of sentiment in favor of taxation reform. When I approved the present tax law, I stated publicly that I did so in spite of certain provisions which I believed unwise and harmful. One of the most glaring of these was the making public of the amounts assessed against different income-tax payers. Although that damage has now been done, I believe its continuation to be detrimental to the public welfare and bound to decrease public revenues, so that it ought to be repealed.

Anybody can reduce taxes, but it is not so easy to stand in the gap and resist the passage of increasing appropriation bills which would make tax reduction impossible. It will be very easy to measure the strength of the attachment to reduced taxation by the power with which increased appropriations are resisted. If at the close of the present session the Congress has kept within the Budget which I propose to present, it will then be possible to have a moderate amount of tax reduction and all the tax reform that the Congress may wish for during the next fiscal year. The country is now feeling the direct stimulus which came from the passage of the last revenue bill, and under the assurance of a reasonable system of taxation there is every prospect of an era of prosperity of unprecedented proportions. But it would be idle to expect any such results unless business can continue free from excess-profits taxation and be accorded a system of surtaxes at rates which have for their object not the punishment of success or the discouragement of business but the production of the greatest amount of revenue from large incomes. I am convinced that the larger incomes of the country would actually yield more revenue to the Government if the basis of taxation were scientifically revised downward. Moreover the effect of the present method of this taxation is to increase the cost of interest on productive enterprise and to increase the burden of rent. It is altogether likely that such reduction would so encourage and stimulate investment that it would firmly establish our country in the economic leadership of the world.

WATERWAYS

Meantime our internal development should go on. Provision should be made for flood control of such rivers as the Mississippi and the Colorado, and for the opening up of our inland waterways to commerce. Consideration is due to the project of better navigation from the Great Lakes to the Gulf. Every effort is being made to promote an agreement with Canada to build the St. Lawrence waterway. There are pending before the Congress bills for further development of the Mississippi Basin, for the taking over of the Cape Cod Canal in accordance with a moral obligation which seems to have been incurred during the war, and for the improvement of harbors on both the Pacific and the Atlantic coasts. While this last should be divested of some of its projects and we must proceed slowly, these bills in general have my approval. Such works are productive of wealth and in the long run tend to a reduction of the tax burden.

RECLAMATION

Our country has a well-defined policy of reclamation established under statutory authority. This policy should be continued and made a self-sustaining activity administered in a manner that will meet local requirements and bring our arid lands into a profitable state of cultivation as fast as there is a market for their products. Legislation is pending based on the report of the fact finding commission for the proper relief of those needing extension of time in which to meet their payments on irrigated land, and for additional amendments and reforms of our reclamation laws, which are all exceedingly important and should be enacted at once.

AGRICULTURE

No more important development has taken place in the last year than the beginning of a restoration of agriculture to a prosperous condition. We must permit no division of classes in this country, with one occupation striving to secure advantage over another. Each must proceed under open opportunities and with a fair prospect of economic equality. The

Government can not successfully insure prosperity or fix prices by legislative fiat. Every business has its risk and its times of depression. It is well known that in the long run there will be a more even prosperity and a more satisfactory range of prices under the natural working out of economic laws than when the Government undertakes the artificial support of markets and industries. Still we can so order our affairs, so protect our own people from foreign competition, so arrange our national finances, so administer our monetary system, so provide for the extension of credits, so improve methods of distribution, as to provide a better working machinery for the transaction of the business of the Nation with the least possible friction and loss. The Government has been constantly increasing its efforts in these directions for the relief and permanent establishment of agriculture on a sound and equal basis with other business.

It is estimated that the value of the crops for this harvest year may reach \$13,000,000,000, which is an increase of over \$3,000,000,000 in three years. It compares with \$7,100,000,000 in 1913, and if we make deduction from the figures of 1924 for the comparatively decreased value of the dollar, the yield this year still exceeds 1913 in purchasing power by over \$1,000,000,000, and in this interval there has been no increase in the number of farmers. Mostly by his own effort the farmer has decreased the cost of production. A marked increase in the price of his products and some decrease in the price of his supplies has brought him about to a parity with the rest of the Nation. The crop area of this season is estimated at 370,000,000 acres, which is a decline of 3,000,000 acres from last year, and 6,000,000 acres from 1919. This has been a normal and natural application of economic laws, which has placed agriculture on a foundation which is undeniably sound and beginning to be satisfactory.

A decrease in the world supply of wheat has resulted in a very large increase in the price of that commodity. The position of all agricultural products indicates a better balanced supply, but we can not yet conclude that agriculture is recovered from the effects of the war period or that it is permanently on a prosperous basis. The cattle industry has not yet recovered and in some sections has been suffering from dry weather. Every effort must be made, both by Government activity and by private agencies, to restore and maintain agriculture to a complete normal relationship with other industries.

It was on account of past depression, and in spite of present more encouraging conditions, that I have assembled an agricultural conference made up of those who are representative of this great industry in both its operating and economic sides. Everyone knows that the great need of the farmer is markets. The country is not suffering on the side of production. Almost the entire difficulty is on the side of distribution. This reaches back, of course, to unit costs and diversification, and many allied subjects. It is exceedingly intricate, for our domestic and foreign trade, transportation and banking, and in fact our entire economic system, are closely related to it. In time for action at this session, I hope to report to the Congress such legislative remedies as the conference may recommend. An appropriation should be made to defray their necessary expenses.

MUSCLE SHOALS

The production of nitrogen for plant food in peace and explosives in war is more and more important. It is one of the chief sustaining elements of life. It is estimated that soil exhaustion each year is represented by about 9,000,000 tons and replenishment by 5,450,000 tons. The deficit of 3,550,000 tons is reported to represent the impairment of 118,000,000 acres of farm lands each year.

To meet these necessities the Government has been developing a water-power project at Muscle Shoals to be equipped to produce nitrogen for explosives and fertilizer. It is my opinion that the support of agriculture is the chief problem to consider in connection with this property. It could by no means supply the present needs for nitrogen, but it would help and its development would encourage bringing other water powers into like use.

Several offers have been made for the purchase of this property. Probably none of them represent final terms. Much costly experimentation is necessary to produce commercial nitrogen. For that reason it is a field better suited to private enterprise than to Government operation. I should favor a sale of this property, or long-time lease, under rigid guarantees of commercial nitrogen production at reasonable prices for agricultural use. There would be a surplus of power for many years over any possibility of its application to a de-

veloping manufacture of nitrogen. It may be found advantageous to dispose of the right to surplus power separately with such reservations as will allow its gradual withdrawal and application to nitrogen manufacture. A subcommittee of the Committee on Agriculture should investigate this field and negotiate with prospective purchasers. If no advantageous offer be made, the development should continue and the plant should be dedicated primarily to the production of materials for the fertilization of the soil.

RAILWAYS

The railways during the past year have made still further progress in recuperation from the war, with large gains in efficiency and ability expeditiously to handle the traffic of the country. We have now passed through several periods of peak traffic without the car shortages which so frequently in the past have brought havoc to our agriculture and industries. The condition of many of our great freight terminals is still one of difficulty and results in imposing large costs on the public for inward-bound freight, and on the railways for outward-bound freight. Owing to the growth of our large cities and the great increase in the volume of traffic, particularly in perishables, the problem is not only difficult of solution but in some cases not wholly solvable by railway action alone.

In my message last year I emphasized the necessity for further legislation with a view to expediting the consolidation of our railways into larger systems. The principle of Government control of rates and profits, now thoroughly imbedded in our governmental attitude toward natural monopolies such as the railways, at once eliminates the need of competition by small units as a method of rate adjustment. Competition must be preserved as a stimulus to service, but this will exist and can be increased under enlarged systems. Consequently the consolidation of the railways into larger units for the purpose of securing the substantial values to the public which will come from larger operation has been the logical conclusion of Congress in its previous enactments, and is also supported by the best opinion in the country. Such consolidation will assure not only a greater element of competition as to service but it will afford economy in operation, greater stability in railway earnings, and more economical financing. It opens large possibilities of better equalization of rates between different classes of traffic so as to relieve undue burdens upon agricultural products and raw materials generally, which are now not possible without ruin to small units, owing to the lack of diversity of traffic. It would also tend to equalize earnings in such fashion as to reduce the importance of section 15A, at which criticism, often misapplied, has been directed. A smaller number of units would offer less difficulties in labor adjustments and would contribute much to the solution of terminal difficulties.

The consolidations need to be carried out with due regard to public interest and to the rights and established life of various communities in our country. It does not seem to me necessary that we endeavor to anticipate any final plan or adhere to any artificial and unchangeable project which shall stipulate a fixed number of systems, but rather we ought to approach the problem with such a latitude of action that it can be worked out step by step in accordance with a comprehensive consideration of public interest. Whether the number of ultimate systems shall be more or less seems to me can only be determined by time and actual experience in the development of such consolidations.

Those portions of the present law contemplating consolidations are not sufficiently effective in producing expeditious action and need amplification of the authority of the Interstate Commerce Commission, particularly in affording a period for voluntary proposals to the commission and in supplying Government pressure to secure action after the expiration of such a period.

There are other proposals before Congress for amending the transportation acts. One of these contemplates a revision of the method of valuation for rate-making purposes, to be followed by a renewed valuation of the railways. The valuations instituted by the Interstate Commerce Commission 10 years ago have not yet been completed. They have cost the Government an enormous sum, and they have imposed great expenditure upon the railways, most of which has in effect come out of the public in increased rates. This work should not be abandoned or supplanted until its results are known and can be considered.

Another matter before the Congress is legislation affecting the labor sections of the transportation act. Much criticism has been directed at the workings of this section and expe-

rience has shown that some useful amendment could be made to these provisions.

It would be helpful if a plan could be adopted which, while retaining the practice of systematic collective bargaining, with conciliation and voluntary arbitration of labor differences, could also provide simplicity in relations and more direct local responsibility of employees and managers. But such legislation will not meet the requirements of the situation unless it recognizes the principle that the public has a right to the uninterrupted service of transportation, and therefore a right to be heard when there is danger that the Nation may suffer great injury through the interruption of operations because of labor disputes. If these elements are not comprehended in proposed legislation, it would be better to gain further experience with the present organization for dealing with these questions before undertaking a change.

SHIPPING BOARD

The form of the organization of the Shipping Board was based originally on its functions as a semijudicial body in regulation of rates. During the war it was loaded with enormous administrative duties. It has been demonstrated time and again that this form of organization results in indecision, division of opinion and administrative functions, which make a wholly inadequate foundation for the conduct of a great business enterprise. The first principle in securing the objective set out by Congress in building up the American merchant marine upon the great trade routes and subsequently disposing of it into private operation can not proceed with effectiveness until the entire functions of the board are reorganized. The immediate requirement is to transfer into the Emergency Fleet Corporation the whole responsibility of operation of the fleet and other property, leaving to the Shipping Board solely the duty of determining certain major policies which require deliberative action.

The procedure under section 28 of the merchant marine act has created great difficulty and threatened friction during the past 12 months. Its attempted application developed not only great opposition from exporters, particularly as to burdens that may be imposed upon agricultural products, but also great anxiety in the different seaports as to the effect upon their relative rate structures. This trouble will certainly recur if action is attempted under this section. It is uncertain in some of its terms and of great difficulty in interpretation.

It is my belief that action under this section should be suspended until the Congress can reconsider the entire question in the light of the experience that has been developed since its enactment.

NATIONAL ELECTIONS

Nothing is so fundamental to the integrity of a republican form of government as honesty in all that relates to the conduct of elections. I am of the opinion that the national laws governing the choice of Members of the Congress should be extended to include appropriate representation of the respective parties at the ballot box and equality of representation on the various registration boards, wherever they exist.

THE JUDICIARY

The docket of the Supreme Court is becoming congested. At the opening term last year it had 592 cases, while this year it had 657 cases. Justice long delayed is justice refused. Unless the court be given power by preliminary and summary consideration to determine the importance of cases, and by disposing of those which are not of public moment reserve its time for the more extended consideration of the remainder, the congestion of the docket is likely to increase. It is also desirable that the Supreme Court should have power to improve and reform procedure in suits at law in the Federal courts through the adoption of appropriate rules. The Judiciary Committee of the Senate has reported favorably upon two bills providing for these reforms which should have the immediate favorable consideration of the Congress.

I further recommend that provision be made for the appointment of a commission, to consist of two or three members of the Federal judiciary and as many members of the bar, to examine the present criminal code of procedure and recommend to the Congress measures which may reform and expedite court procedure in the administration and enforcement of our criminal laws.

PRISON REFORM

Pending before the Congress is a bill which has already passed one House providing for a reformatory to which could be committed first offenders and young men for the purpose of segregating them from contact with hardened criminals and providing them with special training, in order to reestablish in

them the power to pursue a law-abiding existence in the social and economic life of the Nation. This is a matter of so much importance as to warrant the early attention of the present session. Further provision should also be made, for a like reason, for a separate reformatory for women.

NATIONAL POLICE BUREAU

Representatives of the International Police Conference will bring to the attention of the Congress a proposal for the establishment of a national police bureau. Such action would provide a central point for gathering, compiling, and later distributing to local police authorities much information which would be helpful in the prevention and detection of crime. I believe this bureau is needed, and I recommend favorable consideration of this proposal.

DISTRICT OF COLUMBIA WELFARE

The welfare work of the District of Columbia is administered by several different boards dealing with charities and various correctional efforts. It would be an improvement if this work were consolidated and placed under the direction of a single commission.

FRENCH SPOILATION CLAIMS

During the last session of the Congress legislation was introduced looking to the payment of the remaining claims generally referred to as the French spoliation claims. The Congress has provided for the payment of many similar claims. Those that remain unpaid have been long pending. The beneficiaries thereunder have every reason to expect payment. These claims have been examined by the Court of Claims and their validity and amount determined. The United States ought to pay its debts. I recommend action by the Congress which will permit of the payment of these remaining claims.

THE WAGE EARNER

Two very important policies have been adopted by this country which, while extending their benefits also in other directions, have been of the utmost importance to the wage earners. One of these is the protective tariff, which enables our people to live according to a better standard and receive a better rate of compensation than any people, any time, anywhere on earth ever enjoyed. This saves the American market for the products of American workmen. The other is a policy of more recent origin and seeks to shield our wage earners from the disastrous competition of a great influx of foreign peoples. This has been done by the restrictive immigration law. This saves the American job for the American workmen. I should like to see the administrative features of this law rendered a little more humane for the purpose of permitting those already here a greater latitude in securing admission of members of their own families. But I believe this law in principle is necessary and sound and destined to increase greatly the public welfare. We must maintain our own economic position; we must defend our own national integrity.

It is gratifying to report that the progress of industry, the enormous increase in individual productivity through labor-saving devices, and the high rate of wages have all combined to furnish our people in general with such an abundance not only of the necessities but of the conveniences of life that we are by a natural evolution solving our problems of economic and social justice.

THE NEGRO

These developments have brought about a very remarkable improvement in the condition of the Negro race. Gradually, but surely, with the almost universal sympathy of those among whom they live, the colored people are working out their own destiny. I firmly believe that it is better for all concerned that they should be cheerfully accorded their full constitutional rights, that they should be protected from all of those impositions to which, from their position, they naturally fall a prey, especially from the crime of lynching, and that they should receive every encouragement to become full partakers in all the blessings of our common American citizenship.

CIVIL SERVICE

The merit system has long been recognized as the correct basis for employment in our civil service. I believe that first, second, and third class postmasters, and without covering in the present membership the field force of prohibition enforcement, should be brought within the classified service by statute law. Otherwise the Executive order of one administration is changed by the Executive order of another administration, and little real progress is made. Whatever its defects, the merit system is certainly to be preferred to the spoils system.

DEPARTMENTAL REORGANIZATION

One way to save public money would be to pass the pending bill for the reorganization of the various departments. This project has been pending for some time, and has had the most careful consideration of experts and the thorough study of a special congressional committee. This legislation is vital as a companion piece to the Budget law. Legal authority for a thorough reorganization of the Federal structure with some latitude of action to the Executive in the rearrangement of secondary functions would make for continuing economy in the shift of Government activities which must follow every change in a developing country. Beyond this many of the independent agencies of the Government must be placed under responsible Cabinet officials, if we are to have safeguards of efficiency, economy, and probity.

ARMY AND NAVY

Little has developed in relation to our national defense which needs special attention. Progress is constantly being made in air navigation and requires encouragement and development. Army aviators have made a successful trip around the world, for which I recommend suitable recognition through provisions for promotion, compensation, and retirement. Under the direction of the Navy a new Zeppelin has been successfully brought from Europe across the Atlantic to our own country.

Due to the efficient supervision of the Secretary of War the Army of the United States has been organized with a small body of Regulars and a moderate National Guard and Reserve. The defense test of September 12 demonstrated the efficiency of the operating plans. These methods and operations are well worthy of congressional support.

Under the limitation of armaments treaty a large saving in outlay and a considerable decrease in maintenance of the Navy has been accomplished. We should maintain the policy of constantly working toward the full treaty strength of the Navy. Careful investigation is being made in this department of the relative importance of aircraft, surface and submarine vessels, in order that we may not fall to take advantage of all modern improvements for our national defense. A special commission also is investigating the problem of petroleum oil for the Navy, considering the best policy to insure the future supply of fuel oil and prevent the threatened drainage of naval oil reserves. Legislative action is required to carry on experiments in oil shale reduction, as large deposits of this type have been set aside for the use of the Navy.

We have been constantly besought to engage in competitive armaments. Frequent reports will reach us of the magnitude of the military equipment of other nations. We shall do well to be little impressed by such reports or such actions. Any nation undertaking to maintain a military establishment with aggressive and imperialistic designs will find itself severely handicapped in the economic development of the world. I believe thoroughly in the Army and Navy, in adequate defense and preparation. But I am opposed to any policy of competition in building and maintaining land or sea armaments.

Our country has definitely relinquished the old standard of dealing with other countries by terror and force, and is definitely committed to the new standard of dealing with them through friendship and understanding. This new policy should be constantly kept in mind by the guiding forces of the Army and Navy, by the Congress, and by the country at large. I believe it holds a promise of great benefit to humanity. I shall resist any attempt to resort to the old methods and the old standards. I am especially solicitous that foreign nations should comprehend the candor and sincerity with which we have adopted this position. While we propose to maintain defensive and supplementary police forces by land and sea, and to train them through inspections and maneuvers upon appropriate occasions in order to maintain their efficiency, I wish every other nation to understand that this does not express any unfriendliness or convey any hostile intent. I want the armed forces of America to be considered by all peoples not as enemies but as friends, as the contribution which is made by this country for the maintenance of the peace and security of the world.

VETERANS

With the authorization for general hospitalization of the veterans of all wars provided during the present year, the care and treatment of those who have served their country in time of peril and the attitude of the Government toward them is not now so much one of needed legislation as one of careful, generous, and humane administration. It will ever be recognized that their welfare is of the first concern and always

entitled to the most solicitous consideration on the part of their fellow citizens. They are organized in various associations, of which the chief and most representative is the American Legion. Through its officers the Legion will present to the Congress numerous suggestions for legislation. They cover such a wide variety of subjects that it is impossible to discuss them within the scope of this message. With many of the proposals I join in hearty approval and commend them all to the sympathetic investigation and consideration of the Congress.

FOREIGN RELATIONS

At no period in the past 12 years have our foreign relations been in such a satisfactory condition as they are at the present time. Our actions in the recent months have greatly strengthened the American policy of permanent peace with independence. The attitude which our Government took and maintained toward an adjustment of European reparations, by pointing out that it was not a political but a business problem, has demonstrated its wisdom by its actual results. We desire to see Europe restored that it may resume its productivity in the increase of industry and its support in the advance of civilization. We look with great gratification at the hopeful prospect of recuperation in Europe through the Dawes plan. Such assistance as can be given through the action of the public authorities and of our private citizens, through friendly counsel and cooperation and through economic and financial support, not for any warlike effort but for reproductive enterprise, not to provide means for unsound government financing but to establish sound business administration, should be unhesitatingly provided.

Ultimately nations, like individuals, can not depend upon each other but must depend upon themselves. Each one must work out its own salvation. We have every desire to help. But with all our resources we are powerless to save unless our efforts meet with a constructive response. The situation in our own country and all over the world is one that can be improved only by hard work and self-denial. It is necessary to reduce expenditures, increase savings, and liquidate debts. It is in this direction that there lies the greatest hope of domestic tranquillity and international peace. Our own country ought to furnish the leading example in this effort. Our past adherence to this policy, our constant refusal to maintain a military establishment that could be thought to menace the security of others, our honorable dealings with other nations, whether great or small, has left us in the almost constant enjoyment of peace.

It is not necessary to stress the general desire of all the people of this country for the promotion of peace. It is the leading principle of all our foreign relations. We have on every occasion tried to cooperate to this end in all ways that were consistent with our proper independence and our traditional policies. It will be my constant effort to maintain these principles and to reinforce them by all appropriate agreements and treaties. While we desire always to cooperate and to help we are equally determined to be independent and free. Right and truth and justice and humanitarian efforts will have the moral support of this country all over the world. But we do not wish to become involved in the political controversies of others. Nor is the country disposed to become a member of the League of Nations or to assume the obligations imposed by its covenant.

INTERNATIONAL COURT

America has been one of the foremost nations in advocating tribunals for the settlement of international disputes of a justiciable character. Our representatives took a leading part in those conferences which resulted in the establishment of The Hague Tribunal and later in providing for a Permanent Court of International Justice. I believe it would be for the advantage of this country and helpful to the stability of other nations for us to adhere to the protocol establishing that court upon the conditions stated in the recommendation which is now before the Senate, and further that our country shall not be bound by advisory opinions which may be rendered by the court upon questions which we have not voluntarily submitted for its judgment. This court would provide a practical and convenient tribunal before which we could go voluntarily, but to which we could not be summoned, for a determination of justiciable questions when they fail to be resolved by diplomatic negotiations.

DISARMAMENT CONFERENCE

Many times I have expressed my desire to see the work of the Washington Conference on Limitation of Armaments appropriately supplemented by further agreements for a further reduction and for the purpose of diminishing the menace and

waste of the competition in preparing instruments of international war. It has been and is my expectation that we might hopefully approach other great powers for further conference on this subject as soon as the carrying out of the present reparation plan as the established and settled policy of Europe has created a favorable opportunity. But on account of proposals which have already been made by other governments for a European conference, it will be necessary to wait to see what the outcome of their actions may be. I should not wish to propose or have representatives attend a conference which would contemplate commitments opposed to the freedom of action we desire to maintain unimpaired with respect to our purely domestic policies.

INTERNATIONAL LAW

Our country should also support efforts which are being made toward the codification of international law. We can look more hopefully, in the first instance, for research and studies that are likely to be productive of results, to a co-operation among representatives of the bar and members of international law institutes and societies, than to a conference of those who are technically representative of their respective governments, although, when projects have been developed, they must go to the governments for their approval. These expert professional studies are going on in certain quarters and should have our constant encouragement and approval.

OUTLAW OF WAR

Much interest has of late been manifested in this country in the discussion of various proposals to outlaw aggressive war. I look with great sympathy upon the examination of this subject. It is in harmony with the traditional policy of our country, which is against aggressive war and for the maintenance of permanent and honorable peace. While, as I have said, we must safeguard our liberty to deal according to our own judgment with our domestic policies, we can not fail to view with sympathetic interest all progress to this desired end or carefully to study the measures that may be proposed to attain it.

LATIN AMERICA

While we are desirous of promoting peace in every quarter of the globe, we have a special interest in the peace of this hemisphere. It is our constant desire that all causes of dispute in this area may be tranquilly and satisfactorily adjusted. Along with our desire for peace is the earnest hope for the increased prosperity of our sister Republics of Latin America, and our constant purpose to promote cooperation with them which may be mutually beneficial and always inspired by the most cordial friendships.

FOREIGN DEBTS

About \$12,000,000,000 is due to our Government from abroad, mostly from European Governments. Great Britain, Finland, Hungary, Lithuania, and Poland have negotiated settlements amounting close to \$5,000,000,000. This represents the funding of over 42 per cent of the debt since the creation of the special Foreign Debt Commission. As the life of this commission is about to expire, its term should be extended. I am opposed to the cancellation of these debts and believe it for the best welfare of the world that they should be liquidated and paid as fast as possible. I do not favor oppressive measures, but unless money that is borrowed is repaid credit can not be secured in time of necessity, and there exists besides a moral obligation which our country can not ignore and no other country can evade. Terms and conditions may have to conform to differences in the financial abilities of the countries concerned, but the principle that each country should meet its obligation admits of no differences and is of universal application.

It is axiomatic that our country can not stand still. It would seem to be perfectly plain from recent events that it is determined to go forward. But it wants no pretenses; it wants no vagaries. It is determined to advance in an orderly, sound, and common-sense way. It does not propose to abandon the theory of the Declaration that the people have inalienable rights which no majority and no power of government can destroy. It does not propose to abandon the practice of the Constitution that provides for the protection of these rights. It believes that within these limitations, which are imposed not by the fiat of man but by the law of the Creator, self-government is just and wise. It is convinced that it will be impossible for the people to provide their own government unless they continue to own their own property.

These are the very foundations of America. On them has been erected a government of freedom and equality, of justice and mercy, of education and charity. Living under it and supporting it the people have come into great possessions on the material and spiritual sides of life. I want to continue in this direction. I know that the Congress shares with me that desire. I want our institutions to be more and more expressive of these principles. I want the people of all the earth to see in the American flag the symbol of a government which intends no oppression at home and no aggression abroad, which in the spirit of a common brotherhood provides assistance in time of distress.

CALVIN COOLIDGE.

THE WHITE HOUSE,

December 3, 1924.

The PRESIDENT pro tempore. The message will lie on the table and be printed. Petitions and memorials are in order.

PETITIONS AND MEMORIALS

Mr. WILLIS presented two memorials, numerous signed, of sundry citizens in the State of Ohio, remonstrating against the ratification of the so-called Hay-Quesada treaty proposing to cede the Isle of Pines to Cuba, which were referred to the Committee on Foreign Relations.

Mr. ROBINSON presented letters and telegrams in the nature of petitions of sundry citizens of Pine Bluff, Russellville, Mulberry, Blytheville, Sheffield, Stamps, Batesville, Texarkana, and Newark, all in the State of Arkansas, praying for the passage of legislation granting increased compensation to postal employees, which were referred to the Committee on Post Offices and Post Roads.

Mr. CAPPER presented telegrams in the nature of petitions from H. W. Priest and O. R. Shelly, and William P. Sherrard, secretary of the local union, Association of Postal Clerks, of Winfield; Ottawa County Postal Employees, of Minneapolis; the postal force of Hays; and Alonzo Brummitt, secretary of Hays letter carriers, of Hays, all in the State of Kansas, praying for the passage of legislation granting increased compensation to postal employees, which were referred to the Committee on Post Offices and Post Roads.

He also presented a resolution of the second district, Rural Letter Carriers' Association, of Ottawa, Kans., favoring the passage of legislation granting increased compensation to postal employees, which was referred to the Committee on Post Offices and Post Roads.

ENROLLED BILLS AND JOINT RESOLUTION PRESENTED

Mr. WATSON, from the Committee on Enrolled Bills, reported that on December 2, 1924, that committee presented to the President of the United States enrolled bills and a joint resolution of the following titles:

S. 2265. An act to provide for a rearrangement of the public-alley facilities in square 616 in the District of Columbia, and for other purposes;

S. 3397. An act to remit the duty on a carillon of bells to be imported for the Church of Our Lady of the Rosary, Providence, R. I.; and

S. J. Res. 85. Joint resolution authorizing an appropriation for the participation of the United States in the preparation and completion of plans for the comprehensive observance of that greatest of all historic events, the bicentennial of the birthday of George Washington.

LEILA A. GRIFFIN

Mr. KEYES. Mr. President, from the Committee to Audit and Control the Contingent Expenses of the Senate, I report favorably four resolutions and ask for their consideration at this time. I think there will be no opposition to any of them. I first report Senate Resolution 266.

The resolution (S. Res. 266) submitted yesterday by Mr. SMITH was read, considered by unanimous consent, and agreed to, as follows:

Resolved, That the Secretary of the Senate is hereby authorized and directed to pay from the contingent fund of the Senate to Leila A. Griffin, daughter of Richard S. Anderson, late a messenger of the Senate, a sum equal to one year's compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

FUNERAL EXPENSES OF THE LATE SENATOR LODGE

Mr. KEYES, from the Committee to Audit and Control the Contingent Expenses of the Senate, reported without amendment the resolution (S. Res. 268) submitted yesterday by Mr.

WALSH of Massachusetts, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Secretary of the Senate is hereby authorized and directed to pay from the contingent fund of the Senate the actual and necessary expenses incurred by the committee appointed by the President pro tempore in arranging for and attending the funeral of the Hon. HENRY CABOT LODGE, late a Senator from the State of Massachusetts, upon vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

FUNERAL EXPENSES OF THE LATE SENATOR BRANDEGEE

Mr. KEYES, from the Committee to Audit and Control the Contingent Expenses of the Senate, reported without amendment the resolution (S. Res. 267), submitted yesterday by Mr. McLEAN, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Secretary of the Senate is hereby authorized and directed to pay from the contingent fund of the Senate the actual and necessary expenses incurred by the committee appointed by the President pro tempore in arranging for and attending the funeral of the Hon. FRANK B. BRANDEGEE, late a Senator from the State of Connecticut, upon vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

FUNERAL EXPENSES OF THE LATE SENATOR COLT

Mr. KEYES, from the Committee to Audit and Control the Contingent Expenses of the Senate, reported without amendment the resolution (S. 265) submitted yesterday by Mr. GERRY, and it was considered by unanimous consent and agreed to, as follows:

Resolved, That the Secretary of the Senate is hereby authorized and directed to pay from the contingent fund of the Senate the actual and necessary expenses incurred by the committee appointed by the President pro tempore in arranging for and attending the funeral of the Hon. LEBARON B. COLT, late a Senator from the State of Rhode Island, upon vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

BILLS INTRODUCED

Bills were introduced, read the first time, and by unanimous consent the second time, and referred as follows:

By Mr. SMITH:

A bill (S. 3530) to amend the act entitled "An act authorizing the Director of the Census to collect and publish statistics of cotton"; to the Committee on Agriculture and Forestry.

By Mr. HARRELD:

A bill (S. 3531) to provide for the permanent withdrawal of certain described lands in the State of Nevada for the use and benefit of the Indians of the Walker River Reservation; and

A bill (S. 3532) authorizing the Chippewa Indians of Minnesota to submit claims to the Court of Claims; to the Committee on Indian Affairs.

By Mr. EDGE:

A bill (S. 3533) for the relief of the New York Shipbuilding Corporation for losses incurred by reason of Government orders in the construction of battleship No. 42; to the Committee on Naval Affairs.

By Mr. NORRIS:

A bill (S. 3534) to correct the military record of Thomas C. Johnson, deceased; to the Committee on Military Affairs.

By Mr. ODDIE:

A bill (S. 3535) to authorize the acquisition of a site and erection of a Federal building at Gardnerville, Nev.; to the Committee on Public Buildings and Grounds.

By Mr. COPELAND:

A bill (S. 3536) granting increase of pension for loss of hand or arm; to the Committee on Pensions.

By Mr. ASHURST:

A bill (S. 3537) for the completion of the first Mesa division of the Yuma auxiliary reclamation project, Arizona, and for other purposes; and

A bill (S. 3538) to reimburse the reclamation fund for the benefit of the Yuma Federal irrigation project, Arizona-California, and to provide funds to operate and maintain the Colorado River front work and levee system adjacent to the Yuma project, Arizona-California; to the Committee on Irrigation and Reclamation.

By Mr. SPENCER:

A bill (S. 3539) granting an increase of pension to George Smith; to the Committee on Pensions.

By Mr. BURSUM:

A bill (S. 3540) granting a pension to Walter D. Quinn;

A bill (S. 3541) granting a pension to Harry J. Kendall; and

A bill (S. 3542) granting an increase of pension to Augusta Probst; to the Committee on Pensions.

By Mr. CAPPER:

A bill (S. 3543) for the relief of John H. Moore (with accompanying papers); to the Committee on Civil Service.

By Mr. HARRISON:

A bill (S. 3544) limiting the provisions of the act of August 29, 1916, relating to the retirement of captains in the Navy; to the Committee on Naval Affairs.

By Mr. ELKINS:

A bill (S. 3545) granting the consent of Congress to the Huntington & Ohio Bridge Co. to construct, maintain, and operate a highway and street railway toll bridge across the Ohio River between the city of Huntington, W. Va., and a point opposite in the State of Ohio; to the Committee on Commerce.

By Mr. UNDERWOOD:

A bill (S. 3546) granting a pension to Reuben Edward Hunting; to the Committee on Pensions.

By Mr. WALSH of Montana:

A bill (S. 3547) granting a pension to Edward M. Murphy; to the Committee on Pensions.

A bill (S. 3548) for the relief of the heirs of Karl T. Larson, deceased (with accompanying papers); to the Committee on Public Lands and Surveys.

By Mr. FERRIS:

A bill (S. 3549) for the relief of Roy A. Darling; to the Committee on Naval Affairs.

A bill (S. 3550) to correct the military record of James M. Patrick; to the Committee on Military Affairs.

A bill (S. 3551) granting a pension to Ada C. Lee; and

A bill (S. 3552) granting a pension to Maria L. McShea; to the Committee on Pensions.

SPANISH SPRINGS IRRIGATION PROJECT, NEVADA

Mr. PITTMAN submitted an amendment proposing to appropriate \$500,000 for continued investigations, acquisition of rights of way and reservoir sites, commencement of construction, and incidental operations, for the Spanish Springs irrigation project, Nevada, intended to be proposed by him to House bill 10020, the Interior Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

PRINTING OF CERTAIN PAPERS RELATIVE TO THE ISLE OF PINES

Mr. MOSES submitted the following resolution (S. Res. 270), which was considered by unanimous consent and agreed to:

Resolved, That certain papers relating to the adjustment of title to the ownership of the Isle of Pines be printed as a Senate document.

INDIAN LAWS AND TREATIES

Mr. HARRELD submitted the following resolution (S. Res. 271), which was referred to the Committee on Indian Affairs:

Resolved, That the Committee on Indian Affairs is hereby authorized to have prepared for the use of the Senate a compilation of the laws, agreements, Executive orders, proclamations, etc., relating to Indian affairs passed and proclaimed since December 1, 1913, to be known as Laws and Treaties Relating to Indian Affairs, volume 4.

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Hattigan, one of its clerks, announced that the Speaker of the House had signed enrolled bills of the following titles, and they were thereupon signed by the President pro tempore:

H. R. 3537. An act for the relief of L. A. Scott; and

H. R. 9559. An act making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes.

PUBLIC BUILDINGS IN THE DISTRICT OF COLUMBIA

The PRESIDENT pro tempore (at 1 o'clock and 5 minutes p. m.). Morning business is closed.

Mr. SMOOT. Mr. President, I ask unanimous consent to proceed to the consideration of the bill (S. 2284) to provide for the construction of certain public buildings in the District of Columbia.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Utah?

Mr. UNDERWOOD. As this is a unanimous-consent request, I want it understood that it will not interfere with the order of the Senate that takes effect at 2 o'clock.

Mr. SMOOT. It could not, if I wanted it to do so.

Mr. UNDERWOOD. It might by unanimous consent. The Senator asked unanimous consent to make the bill the unfinished business. I am not willing to grant that unanimous consent unless it is understood that it does not interfere with House bill 518 being taken up at 2 o'clock.

The PRESIDENT pro tempore. The Chair understands that at 2 o'clock there will be laid before the Senate the bill to which the Senator from Alabama refers.

Mr. UNDERWOOD. Regardless of the unfinished business.

The PRESIDENT pro tempore. And that no change will be made in that order unless by unanimous consent especially referring to that order. The Senator from Utah asks unanimous consent that the Senate proceed to the consideration of Senate bill 2284. Is there objection?

Mr. ROBINSON. Mr. President, pending the request of the Senator from Utah I inquire if the report by the committee was unanimous?

Mr. SMOOT. It was unanimous.

Mr. ROBINSON. It appears to be an effort to comprehensively treat the subject of public buildings in the District of Columbia.

Mr. SMOOT. That is the object of the bill.

Mr. ROBINSON. What is the total amount contemplated to be expended under the bill?

Mr. SMOOT. Within the term of 10 years it will be \$50,000,000, \$5,000,000 a year. I hope the Senators will listen to what I shall have to say. We are in a critical condition here in the District of Columbia with our records and with our employees, and something must be done. The bill will cover what the commission believes is absolutely necessary to meet the serious situation that exists.

Mr. ROBINSON. I have no objection to the consideration of the bill.

Mr. ASHURST. Mr. President, the Senator from Utah asks unanimous consent for the present consideration of a bill which proposes ultimately to expend \$50,000,000 for Federal buildings in the District of Columbia. I believe that such an appropriation is wise and economically prudent as the Government is paying high rents. We are forgetting, however, that it is now nearly 12 years since we have had a public buildings bill.

Referring to the State of Arizona, there are several cities and towns in that State that have doubled their population and doubled their postal receipts within the past 12 years. The rentals which the Federal Government is now paying in some cities in Arizona to house various agencies and offices of the Federal Government are equivalent to interest at the rate of 30 per cent per annum upon such sums as would be required to construct the necessary buildings.

I call attention to the bill introduced yesterday (S. 3511) by the senior Senator from Florida, Mr. FLETCHER, which proposes to increase the cost of construction of those certain public buildings heretofore authorized by Congress to be constructed and for which appropriations were made and for the construction of public buildings on sites heretofore acquired by the Government, and I further call attention of the Senate to pages 28, 29, 30, and 31 of the RECORD of yesterday's proceedings, wherein are set out the names of the cities where sites alone or sites and buildings have been authorized. Take, for example, the city of Globe in Arizona; the limit of cost of construction of the Federal building in that city should be increased and the amount now available could be expended. I refer also to the cities of Prescott and Tucson, where sites were long ago acquired, but for the reason that we have had no public buildings bill for nearly 12 years it has been, of course, impossible to procure the appropriations necessary to construct buildings in these cities. Every Member of Congress realizes that Federal buildings can, for all practical purposes, be authorized only by a general public buildings bill.

No doubt many other cities and towns throughout the United States are likewise in need of public buildings. If the responsible officials of the Government really intend to retrench, no better items could be found than to cease paying these enormously high rentals and to construct adequate public buildings.

Mr. DILL. As I understand the Senator's request, the bill would become the unfinished business?

Mr. SMOOT. No.

Mr. DILL. With the exception of the Muscle Shoals measure?

Mr. SMOOT. I am in hopes that the bill will be passed before 2 o'clock.

Mr. DILL. But if it does not pass before 2 o'clock?

Mr. SMOOT. Then, of course, it goes back to the calendar, just where it is to-day.

Mr. DILL. The reason why I ask the question is that I would like to get some idea of the status of the postal salary bill and the veto message of the President, which has never been brought up before the Senate. I do not want a bill on the calendar made the unfinished business, even the Muscle Shoals bill, that will interfere with bringing up the postal salary bill.

Mr. SMOOT. This bill will go to the calendar in the same position it occupies to-day unless it is passed by 2 o'clock. It will have no standing as against any other bill upon the calendar, I will say to the Senator.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Utah?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2284) to provide for the construction of certain public buildings in the District of Columbia, which had been reported from the Committee on Public Buildings and Grounds with an amendment.

Mr. SMOOT. Mr. President, I want to impress upon Senators the necessity for the immediate adoption of a public-building program in the District of Columbia, for it is a matter of the gravest importance to the Government. The Public Buildings Commission in its reports to Congress has for years called attention to the hazardous and uneconomical arrangement of the Government's housing in Washington. There are reasons by the score why this intolerable and preposterous situation should be remedied without delay.

In the first place, there is the matter of economy. The Government is now paying rentals in the District of Columbia amounting to \$733,469.11 annually. In addition to this, there are the maintenance and upkeep charges on these rented buildings, which the Government pays and which in many cases is as much as the rent. It is therefore safe to say that the construction of public buildings and the elimination of these charges would easily effect a saving of \$1,000,000 annually. Other great economies would result when each department is able to bring its activities together under one roof or at least in the immediate vicinity of each other.

As the situation exists to-day, the Government is squandering untold sums of money for messenger service, automobiles, trucks, time lost by employees going from one building to the other, delays while officials are waiting for papers, and so forth, which in numerous instances must be secured from another division or bureau located at a considerable distance. The time wasted by the public in transacting business with the Government on account of the widely scattered units of each establishment is also large.

It is difficult to accurately estimate the great savings which would result from bringing together the bureaus and divisions of each department. The Comptroller General, for instance, has estimated that a saving of \$250,000 per annum could be effected in administration by having the General Accounting Office in one building, and the Commissioner of Internal Revenue believes a building for that bureau would save at least 15 per cent or 20 per cent in the cost of collecting taxes, besides securing more nearly 100 per cent of the sums due. These are only two instances, but savings of greater and lesser degree could be similarly effected in practically every governmental establishment.

The following table shows the number of buildings occupied by each department and independent bureau:

Number of buildings occupied by department or bureau	
Agriculture.....	46
Allen Property Custodian.....	1
Bureau of Efficiency.....	1
Civil Service Commission.....	4
Commerce.....	7
(The Bureau of Standards group is counted as one building.)	
Court of Claims.....	1
Court of Customs Appeals.....	1
Employees' Compensation Commission.....	1
Federal Board for Vocational Education.....	1
Federal Power Commission.....	2
Federal Trade Commission.....	1
Commission of Fine Arts.....	1
General Accounting Office.....	21
Government Printing Office.....	8
Grain Corporation.....	1
Interior.....	8
International Boundary Commission.....	1
International Joint Commission.....	1
Interstate Commerce Commission.....	2
Justice.....	6
Labor.....	4
National Advisory Committee for Aeronautics.....	1
Navy.....	8
Panama Canal.....	1
Post Office.....	2
(City substations not counted.)	
Public buildings and grounds, office of.....	1

Shipping Board	2
State	30
Superintendent, State, War, and Navy Buildings	
(This is a maintenance organization and necessarily occupies a portion of every building under its control.)	
Tariff Commission	1
Treasury	36
Veterans' Bureau	2
War	14

Mr. COPELAND. Mr. President, may I interrupt the Senator from Utah?

The PRESIDING OFFICER (Mr. SPENCER in the chair). Does the Senator from Utah yield to the Senator from New York?

Mr. SMOOT. Certainly.

Mr. COPELAND. Under the plan which is proposed by the Senator from Utah would each of the various departments be housed in its own buildings owned by the Government?

Mr. SMOOT. Ultimately they would, but I will say to the Senator from New York that it will require 10 years to bring about that very desirable situation.

Mr. President, a serious factor in the situation is that a large part of the Government's office space in Washington is located in the temporary war-time buildings. As is well known, these buildings are of the most inflammable wooden construction and are a serious menace to the safety of thousands of employees, records, and files of the Government. They are rapidly deteriorating, and it is only by the expenditure of considerable money yearly that they are habitable at all. It is difficult to keep them warm in cold weather, and on extremely hot days in the summer the temperature on the upper floors is almost unbearable. On days such as these it is no uncommon occurrence for numbers of employees to be overcome by the heat. There are instances where chiefs of bureaus or divisions have found it necessary to dismiss their employees for the day, rather than subject them to the punishment of working under such intolerable conditions. The Government is under a distinct obligation to furnish its employees comfortable and safe working quarters. No well-conducted business house would subject its employees to such conditions nor imperil its records and files by housing them in such inflammable buildings.

The following statement showing the occupancy of the temporary buildings will illustrate the extent to which they are occupied by important Federal activities:

Building C, a temporary wooden structure: Divisions of the Bureau of Internal Revenue, Public Health Service, and Department of Agriculture.

Building D: General Supply Committee, Bureau of the Census, and District of Columbia Rent Commission.

Building E: World War Records of the War Department.

Building F: Bureau of Supply of the Treasury Department, Department of Agriculture, General Supply Committee, Public Health Service, Records of War Department.

Temporary No. 1: Examination Rooms of Civil Service Commission, United States Grain Corporation, Supply Division of Shipping Board, National Library for the Blind.

Temporary No. 2: Bureau of Valuation of Interstate Commerce Commission.

Temporary No. 3: Personnel Classification Board and Bureau of Internal Revenue.

Temporary No. 4: Federal Trade Commission and Divisions of the Department of Labor.

Temporary No. 5: Old War Trade files (State Department), Federal Traffic Board, Bureau of Internal Revenue, various units of War Department, Federal Power Commission, Veterans' Bureau, School of Photography, unit of Navy Department.

Temporary No. 6: Files of Department of Justice and General Accounting Office, units of War Department.

Temporary No. 7: Troops, District of Washington.

Treasury Annex No. 2: Bureau of the Internal Revenue.

BUREAU OF INTERNAL REVENUE

It will be noted that parts of the Bureau of Internal Revenue are located in four of the temporary buildings. In fact, more than 70 per cent of the bureau's space is located in these nonfireproof structures. In all, this important governmental activity is now occupying 10 buildings in various parts of the city, two of which are rented. However, the most serious feature of this situation is the fact that the major portion of the bureau's activities are carried on under the most dangerous conditions as to fire hazard. The destruction of one or more of these buildings by fire could easily cost the Government several times the amount required for financing the entire public building program. Taking risks of this sort certainly can not be classed as economy. The need for remedying

the housing situation of the Bureau of Internal Revenue is by far the most urgent of any of the building projects.

Mr. COPELAND. Mr. President, may I ask the Senator from Utah a question?

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from New York?

Mr. SMOOT. I yield.

Mr. COPELAND. I desire to ask the Senator from Utah, are we violating fire, sanitary, and health rules which the Government would require the private owners of buildings to observe?

Mr. SMOOT. We certainly are, Mr. President. I know of no private concern nor of no private individual that would take the chances which the Government of the United States is taking to-day in these temporary buildings, both as to the risk of the lives of its employees and the destruction of records of untold value that all the money in the world could not replace.

Not only that, Mr. President, but there are thousands of Government employees who are housed in those buildings. As chairman of the Public Buildings Commission I do not wish to be held responsible for what may happen to those employees in case of a fire in any of those buildings. No one can tell what would happen in case of such a fire. If scores of employees should not meet their death we should be exceedingly fortunate.

CENSUS BUREAU

Another important activity housed in one of these temporary buildings is the Bureau of the Census, which has files and records in Building D, which go back almost to the beginning of the Government. A serious fire would certainly doom these valuable records of historic and genealogic value.

DEPARTMENT OF AGRICULTURE

The Department of Agriculture, a rapidly growing institution of great importance to the country, has been compelled to expand its activities into the temporary buildings, now occupying portions of three of them. Agriculture now occupies 46 buildings of every conceivable type and scattered over various sections of the city. This condition should be remedied without delay.

ARCHIVES BUILDING

In the departments and independent establishments there are thousands of dead and semilactive files and records which could be transferred to an archives building. It has been estimated that more than half a million square feet of good office space is thus occupied.

The construction of an archives building would have the immediate effect of releasing this large amount of space for office purposes, thus relieving a great deal of congestion in some of the departments. Particularly is this true of the Treasury, Justice, Post Office, and War Departments, and the General Accounting Office.

Estimating the value of first-class office space conservatively at \$1 per square foot, it is very apparent that an archives building would alone mean a saving of half a million dollars a year, aside from other considerations. It hardly seems necessary to dwell upon the obvious advantage of having all the permanent records of monetary and historic value housed safely under a single roof, where they would easily be accessible at all times.

DEPARTMENT OF JUSTICE

The Department of Justice has needed a new building for years. Its main offices are now housed in a rented building at Vermont Avenue and K Street NW., for which a rental of \$75,000 per annum is being paid, a much larger rental being demanded. The department is housed in a most unsatisfactory manner, having long since outgrown the main structure, which is badly overcrowded at the present time, in spite of the fact that several units have been removed to other buildings in order to partially relieve the overcrowded condition in the main building.

Scarcely a month passes that I have not a letter from the owners of the building asking that the employees of the department be removed, and stating that they have a chance of renting the building for nearly four times the amount the Government is now paying. Of course, I think those letters are written for the purpose, when suit may be brought against the Government of the United States, of being used as evidence against the Government in securing a judgment for additional rental.

Other departments in urgent need of more adequate housing facilities are State, Post Office, Commerce, Interior, par-

ticularly the Patent Office, Interstate Commerce Commission, Labor, and numerous independent bureaus and offices.

With reference to the situation of the Patent Office, a measure of relief has recently been provided by removing a number of activities from the Old Land Office Building and assigning the space thus vacated to the Patent Office. This situation can be further relieved by turning over the entire Land Office Building to the Patent Office as soon as circumstances will permit.

It can be said without fear of successful contradiction that there is scarcely a department of the Government in Washington which is adequately and satisfactorily housed, and this condition of affairs is steadily going from bad to worse. Congress is constantly passing laws creating new Federal activities and imposing additional duties on the ones now in existence, which means that the personnel and housing requirements of the Government are on the increase. The seriousness of the housing situation of the Government here can hardly be exaggerated and it is of the most vital importance that immediate relief be provided.

Mr. President, I have before me statistics relating to the space occupied and the rentals paid by each department. I am not going to take the time of the Senate now to read them, but I ask that they may be inserted in the RECORD as a part of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

Statistics relating to space occupied and rentals paid by each department

Department	Total gross space occupied by entire department	Total Government-owned space not including temporary buildings	Total space in temporary buildings	Total rented space	Total rent now being paid
	Sq. feet	Sq. feet	Sq. feet	Sq. feet	
Agriculture	1,138,249	430,849	156,051	551,340	\$196,866.00
Alien Property Custodian	17,121	17,121			
Bureau of Efficiency	11,235	11,235			
Civil Service Commission	78,114	13,735	17,433	46,946	16,875.00
Commerce	1,131,775.8	704,452	220,527	195,404.8	68,000.00
Court of Claims	31,500	31,500			
Court of Customs Appeals	12,822			12,822	7,000.00
Employees' Compensation Commission	12,254	12,254			
Federal Board for Vocational Education	38,920	38,920			
Federal Power Commission	6,160	6,160

Total	14,082,248.8	9,617,481	2,166,596	2,151,622.8	733,469.11

¹ Figures not given for space occupied and rentals paid by postal substations.

² The superintendent's office is a maintenance organization, and all public portions of each building are assigned to his office.

Miscellaneous and unclassified space 146,549 square feet.

Mr. SMOOT. I will say that no Senator can study these figures without wondering why action has not been taken

before. If a firm or an individual doing business in the United States should take the same position that the Government is taking in relation to rented buildings and should run the risks that are now being assumed by the Government, such firm or individual would not receive credit from institutions from which they desired to purchase goods.

Mr. DILL. Mr. President—

Mr. SMOOT. I yield.

Mr. DILL. For how long a period does the Senator think that this bill will take care of the public-building situation in the District of Columbia?

Mr. SMOOT. I think by the end of the 10-year period under the expenditure of \$50,000,000 every department of the Government can be housed, and housed comfortably, and the records of the Government can be put in a place where they may be safely kept.

Mr. DILL. The Senator, then, thinks that the bill will take care of the situation for 10 years more?

Mr. SMOOT. For a longer time than that, I am quite sure; I have no doubt about it.

Mr. President, I have had taken in each of the departments of which I have spoken some photographs showing the hazardous conditions under which Government property and records are housed in these temporary buildings. I think it is wicked for the Government to continue longer hazardous life and the safety of its records in maintaining these wooden shanties, if you please, for governmental activities.

If Senators who want personally to observe the deplorable conditions will take the time to do so, I ask them to go down and look at the temporary buildings across the road from the building where the Navy Department is now located. If they will do so, I say that they can not help but become advocates of razing of those buildings and erecting proper structures in which to house the Government employees and safeguard the records of the Government.

Mr. President, I have the reports of the Public Buildings Commission, created under the act of March 1, 1919, for the years 1922, 1923, and 1924. For that length of time the commission has been pleading with Congress to take some action. The President of the United States is in full sympathy with this program; he approves of it. There is not a head of a department of the Government but who says it is absolutely necessary; and as a Senator of the United States I tell the Senate that another session of Congress should not be allowed to pass without putting this program into operation. Therefore, Mr. President, I ask that the bill may be considered and passed at this time.

Mr. COPELAND. Mr. President, before the Senator takes his seat, will he not kindly give the Senate a résumé of exactly what it will mean in money if the bill is passed—what the immediate demand upon the Treasury will be? Let us have it in a few words.

Mr. SMOOT. Mr. President, for instance, we are paying to-day for rented buildings in the District \$733,469.11. Again, at least a million dollars will be saved in time and expense by having each department of our Government under one roof. The head of every department and every division has appeared before the commission and given an estimate of what could be saved in time spent if his activities were all in one building. For instance, I have not any doubt but that in the work of the Commissioner of Internal Revenue alone there would be millions of dollars saved. The Comptroller General testified before the committee that if his employees were all together in one building, there would be a saving of \$250,000 a year there; and I could go into every department of our Government and show similar savings. I want to say to the Senators here that considering the loss of time and the loss of efficiency under present conditions, with the rents that are paid, if we appropriated the \$50,000,000 to-day the interest upon it would not be as much as the loss is alone.

In the case of the temporary buildings and buildings that we are renting in different parts of the District, we have to heat and light every one of them. Some of them it is almost impossible to keep warm in the winter, and, as I stated before, in the summer it is almost impossible for the employees in the buildings to live on account of the heat.

Mr. UNDERWOOD. Mr. President, I did not want to stop the Senator from Utah in the middle of his speech. I concur in what he says in the main in regard to the importance of the Government properly housing its own employees in its own buildings, and in the end I think it can be done at an interest rate that will be less than the rental; but there are some things in this bill that I am not sure I approve of.

This bill authorizes the Public Buildings Commission, with \$50,000,000 in its purse, among other things, to buy land. It says that these buildings shall be constructed—

On lands now owned, or which may hereafter be acquired, by the United States.

And the commission is given the power to acquire them hereafter. There is no limitation.

It seems to me that we ought to stop buying land. We have a lot of land in this District. We bought it from time to time. We do not use it. We rent it at desirable rentals to other people, and then they do not want us to take it away, and the real-estate agents want to sell us some more land. This bill would be very much more satisfactory to me if the Senator would limit these buildings to the land we have already acquired; and I should like to ask him a question in that connection, as he is better informed than I am.

The Government now owns the tract of land lying south of Pennsylvania Avenue opposite the New Willard Hotel, between Fifteenth and Fourteenth Streets, and running back to the Mall. There are three or four blocks in that tract of land bought for the purpose of erecting Government buildings.

Mr. SMOOT. It will all be utilized under this bill.

Mr. UNDERWOOD. Then I understand that down near the Pan American Building, close to the present War and Navy Buildings, we bought several blocks of land.

Mr. SMOOT. Directly west of the Pan American Building and north of the Navy Building.

Mr. UNDERWOOD. Can the Senator tell me how much land we bought there?

Mr. SMOOT. The independent offices appropriation act, approved June 12, 1922, authorized the Commission in Charge of the State, War, and Navy Departments Buildings to purchase the sites of the seven temporary buildings west of Seventeenth Street and south of Pennsylvania Avenue at a limit of \$1,500,000. Seven squares were acquired at a cost of \$1,391,280.27, thus saving \$108,719.73 of the original appropriation. There were 28 transactions involved in the acquisition of these squares and it was necessary to resort to condemnation in only one instance, all other purchases being made in the open market at an approximate average price of \$1.90 per square foot. In the case where condemnation was resorted to, the Government was compelled to pay \$3.20 per square foot.

I will say to the Senator that the commission asked certain individuals here in the District to help us purchase that land. We did not ask for options in the name of the Government; but when the options were obtained in the names of men who were friendly to the Government they were turned over to the Government, and the Government purchased them for less than a million and a half dollars. We saved something like \$135,000 out of the appropriation that was made to purchase all of that land.

Mr. UNDERWOOD. I do not know the land values here, but it seems to me the commission did very well. I know nothing about land values in the District, but it is available property for the purposes that are contemplated. Now, with all that land—four blocks of land lying adjacent to other public buildings south of Pennsylvania Avenue between Fourteenth and Fifteenth Streets, and four or five blocks of land lying on the other side, near the War and Navy Building—is not the Senator willing to limit the terms of this bill so as to provide that these buildings shall be erected on this Government land, and not have everybody who wants to sell a piece of property somewhere else engaged in trying to sell his property to the Government and have it paid for out of this \$50,000,000?

Mr. SMOOT. I will say to the Senator that they have not had very much influence with the commission.

Mr. UNDERWOOD. I am sure of that. I know the Senator, and I have confidence that he is not going to be amenable to influence of that kind; but times change. I hope the Senator will live a thousand years, but he may not; and with all this land available for the construction of public buildings, and in view of the message of the President which has just been laid before the Congress asking for economy, I think we might refrain from buying more land and be content to erect these buildings on the land that we now own.

Mr. SMOOT. I want to assure the Senator that the commission never would buy a foot of land in the District of Columbia to erect any kind of a building as long as they had lands suitable for that purpose.

Mr. UNDERWOOD. Of course, that is a very great broadening of the situation, because the word "suitable" might be construed into anything by a new commission. There is rivalry for the location of these buildings. The land that we hold and

own to-day masses the public buildings together. It brings them close to the functions of the Government.

Mr. SMOOT. As far as I am concerned, if I remain a member of the commission, I have no idea whatever now of purchasing any lands in addition to those we have already purchased. The Senator will remember that when we talked about an archives building, and purchasing land at Eighteenth Street, we did not at that time own the lands that I have just described, which were purchased for less than a million and a half dollars, or the lands covered by those temporary buildings.

Mr. UNDERWOOD. I understand that.

Mr. SMOOT. Now we have all of those lands, and in my opinion no member of the commission would ever think of purchasing an acre of land as long as the Government has lands suitable for erecting the buildings.

Mr. UNDERWOOD. Then why should we give them legislative authority to do so? If we have plenty of lands now, we will save the commission trouble and harassment if we strike out of this bill the power to go and buy more lands.

Mr. SMOOT. There may be a building that is already constructed that we would like to build onto, and we would have to have adjacent lands for that purpose. It will not amount to much.

Mr. UNDERWOOD. There is a provision here in relation to the Government Printing Office. I have no objection to the main part of that provision, but it is limited to that building.

Mr. COPELAND. What is it that the Senator objects to, specifically?

Mr. UNDERWOOD. Specifically, when we have 10 or 12 blocks of land well situated, lying adjacent to the other public buildings, on which these buildings can be erected, I object to giving the commission the opportunity to use such portion of \$50,000,000 as they desire to go and buy other lands. We have this land. It is available. It was bought for the purpose of erecting buildings, and what I want to ask the Senator to do is to agree to an amendment striking out, on page 1, the words "or which may hereafter be acquired."

Mr. SMOOT. Mr. President, I see no real objection to that, because if a particular case should arise where we would have to have a small piece of land for some particular purpose we could come to Congress and ask for it.

Mr. UNDERWOOD. Undoubtedly.

Mr. SMOOT. I have no objection to that amendment.

Mr. UNDERWOOD. Then, Mr. President, I move to amend the bill on page 1, in lines 5 and 6, by striking out, after the word "owned," the words "or which may hereafter be acquired."

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Alabama.

The amendment was agreed to.

Mr. UNDERWOOD. Then on page 5 I want to amend lines 7, 8, and 9 by striking out the words "as sites for any of the buildings authorized by this act" and inserting the words "for the site for the building described in this section."

Mr. SMOOT. That applies to the Government Printing Office. I have no objection to that amendment. It is only carrying out the original thought.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Alabama.

The amendment was agreed to.

Mr. FLETCHER. Mr. President, I think this is a very excellent measure and that we ought to act upon it promptly; and as the bill is amended I am strongly in favor of it. I agree with the position taken by the Senator from Utah, that we are wasting a lot of money here in paying rent when we ought to go on and put up the buildings that the Government needs on the land that the Government now owns, thus not only economizing—as to which we have been so strongly urged by the President, and very properly—but also making more safe the documents and records which the Government owns, and promoting efficiency generally in the Government departments. I want to suggest, however, that there is another matter which, to my mind, is of quite equal importance.

The last public buildings bill was passed in 1913 and signed by President Taft on March 4, 1913. Under that bill a number of sites for post offices were acquired throughout the country. Many sites were donated to the Government; others were purchased at very reasonable prices, and under that bill the construction of buildings in various portions of the country, in practically all of the States, was authorized. But it was found when the Government went to let the contracts that the prices of material had so risen and the cost of labor had so increased that the Government could not construct the buildings authorized within the amounts of the appropriations, and in a number of instances the sites have remained vacant because no appropriation was made for building at all. In a

number of instances they have been vacant because the appropriation was inadequate to construct the buildings. That situation has continued now for 11 years, and Congress has failed to provide these buildings. The Senator from Arizona [Mr. ASHURST] put his finger on the spot a few minutes ago when he referred to the condition in his State.

Mr. SMOOT. I think the same situation exists in every State in the Union.

Mr. FLETCHER. In nearly all of them. But in his State, for instance, at Globe, the site was acquired November 14, 1911, at Prescott in 1915, and at Tucson in 1914, and no buildings have yet been put up on any of those sites. The appropriation made in each instance was wholly inadequate. The Senator from Arizona has said that it is costing the Government for rent 30 per cent of the amount that would be required to afford the accommodations needed.

That situation has continued in various States, and I had inserted in the Record yesterday a report from the Post Office Department showing the conditions, which appears on pages 28 and 29 of the Record. I also had inserted a communication from the Secretary of the Treasury and one from the Postmaster General bearing on the subject, which will be found on pages 30 and 31. The Treasury Department reported on the bill which I introduced yesterday, which is the same bill I introduced at the previous session, as follows:

The passage of this bill would permit the construction of those buildings authorized and limits of cost fixed under act of March 4, 1913, which, on account of the increased cost of labor and materials, can not now be erected within such limits. The completion of these projects and the erection of Federal buildings in many places where sites only have been authorized would be a substantial help in relieving the congestion in the Postal Service.

The Postmaster General recites that—

The Postal Service is growing steadily and its requirements are difficult to meet without constant recourse to enlarged quarters, which are secured on a rental basis at an expense much greater than that which would result from Government construction and ownership. A vast sum is paid annually for these rentals. The reasons in favor of some plan of Government ownership of post-office buildings for postal use where an economy would be realized is set forth in detail in my letter to the Joint Commission on Postal Service, which reads as follows:

At pages 30 and 31 of the RECORD that letter is given. It appears from that letter that there are at present 5,846 post offices in leased quarters and 1,119 post offices in buildings owned by the Government. The aggregate annual rental paid for the occupancy of these 5,846 leased quarters is \$9,262,515, but this aggregate does not include the amount paid for quarters not under lease, which, when added to the \$9,262,515, makes a total annual rental bill of \$11,660,056, the amount paid by the Post Office Department for the rental of buildings in that service. That does not include garages to be paid for by the Government from appropriations made for the Post Office Department. The report continues:

There are at present 5 Government-owned buildings actually under construction and 11 under contract for construction in which post offices will find quarters.

The report goes on to show the earnings of the Post Office Department, which have doubled in the last 10 years, and it also shows that the increasing business warrants the construction of these buildings which have been authorized. It further states:

During the last holiday season several cities handled heavy parcel-post business on the sidewalks under protection of guards, but without protection against the weather. This increased volume of postal business has forced the use of basements and sub-basements and has brought about a congestion in workrooms in some of our larger cities.

That is the condition with reference to the post offices throughout the country, and I submit that that needs remedying just as much as does the situation here in the District of Columbia with reference to these Government offices. The report goes on to show that the annual expenditure for rentals now totals \$12,248,977.

The whole matter is set out in the CONGRESSIONAL RECORD of yesterday, and I trust Senators will read it. What I want to suggest now is that there should be incorporated in this bill provisions to take care of this situation, which has gone on and continued over the protest of the Post Office Department, to the neglect of the public, a situation which is growing worse and worse all the while, and which calls for some action now in order to prevent the necessity of actually handling the mails on the sidewalks in different portions of

the country. I shall offer as an amendment to this bill, as section 7, the bill which I introduced yesterday.

Mr. SMOOT. I hope the Senator will not do that. The situation in my State is exactly the same as that in other States in this respect. I believe we have as many post offices unprovided for as there are post offices unprovided for in Arizona and perhaps more. But let this bill stand on its own footing, and let us take the Senator's bill up at the proper time and pass it as a separate measure. There will have to be amendments made to it. I could not let it go through without some amendment to cover two or three cities in my State which are in exactly the same situation as those referred to in the bill. It would not be right to take two or three out of all the number that are in the same situation.

Mr. FLETCHER. No; and this does not do that. This is what the bill provides:

That the following sums be, and the same are hereby, appropriated for the objects hereinafter expressed, namely:

(a) For increase in the limit of cost of construction of those certain public buildings, heretofore authorized by Congress to be constructed and for which appropriations were made, referred to in Senate Document No. 28, Sixty-eighth Congress, first session, \$15,130,780, or so much thereof as may be necessary.

(b) For the construction of public buildings on those certain sites, heretofore acquired, for the construction of which buildings no appropriations were made, referred to in Senate Document No. 28, Sixty-eighth Congress, first session, \$23,557,500, or so much thereof as may be necessary.

There are just two objects, and the items to be covered are set forth in this document. They cover Utah, as well as every other State.

Mr. SMOOT. They cover part of Utah, and I think parts of other States. That measure is a different proposition entirely, and I hope the Senator will not offer that as an amendment to this bill. I would like to have this bill passed.

Mr. FLETCHER. I hesitate to do anything that would imperil the Senator's bill, but it seems to me it is just as important to serve the public through the Post Office Department and to take care of the needs of that department, as shown by the report, which I have not taken the time to read in full, merely referring to certain extracts from it. The present condition is simply intolerable. It is a condition that was recognized as far back as 1913, and has continued right down to date. Of course, the war came on and the effort to correct this evil was interrupted; but that has passed now, and I wish the Senator would allow this amendment to go onto the bill. I think it ought to go on this bill, because I believe it is just as much in the public interest and as sound a proposition of public economy as is the measure proposed by the Senator from Utah.

Mr. DIAL. Mr. President, may I ask the Senator if the amendment refers to places where the Government already owns the sites?

Mr. FLETCHER. Yes; sites which have been acquired under previous legislation.

Mr. SMOOT. Mr. President, I have no doubt but that there will be a general public buildings bill, perhaps at this session; if not, then at the next. But this is an entirely different subject. The records of the United States are involved in this legislation, records which could not be replaced by the expenditure of any amount of money. It would be an impossibility to replace them. I do not think the health of the postmasters throughout the country is at stake, as is the health of the employees here in the District of Columbia. Neither are there the fire risks.

I ask the Senator not to offer his bill as an amendment to this bill. Let us put through a general bill rather than put the matter on this bill, to which the commission has given so much attention. I ask the Senate to pass the bill now, and I hope the Senator will not offer the amendment.

Mr. FLETCHER. Mr. President, I feel like asking that the amendment be submitted. I am in hearty accord with the Senator's bill, but I really think this is just as important to the country at large as the provision regarding these offices here in the District.

Mr. SMOOT. Mr. President, I would very much prefer to have the bill laid aside, because I do not want to send anything over to the House over which I know there will be a conflict. If we want to have this bill enacted into legislation, the only way to do it is to pass it in its present form, in my opinion, and rather than accept the amendment I would prefer to let the bill go over. I do not like to have it tied up with other matters.

Mr. ASHURST. Mr. President, we in this body have no right nor desire to refer to proceedings in another branch of

Congress, but the Senator from Utah is too experienced a man not to know that this bill will never pass the other branch of Congress unless and until there is a public buildings bill attached to it in accordance with the data submitted by the Secretary of the Treasury and printed in the Record yesterday at the request of the Senator from Florida [Mr. FLETCHER]. There is not a Senator, unless he came here within the last week, who does not know that this bill will never pass the other branch of Congress until full justice is done to the country. Let us handle the situation here in a practical way. Let us add the appropriate amendment.

Mr. SMOOT. All appropriation bills originate in the House of Representatives. The House can, at any time they desire, originate a bill providing for the erection of public buildings. I do not see the necessity of having these two subject matters combined at this time.

Mr. ASHURST. It may seem strange that I should presume to tell the Senator something, but I do say this to him, that if this bill passes the Senate a public buildings bill for the entire country would not pass the Senate at this short session. We will have slinned away our day of grace or lost our opportunity to pass a public buildings bill.

Mr. SMOOT. If the Senator objects to it, I will withdraw the bill. If the Senate does not want to pass the bill as it is, then I withdraw the bill from further consideration.

The PRESIDENT pro tempore. Does the Senator from Florida offer an amendment?

Mr. FLETCHER. I offer the amendment and will ask to have it pending.

Mr. SMOOT. I will withdraw the bill.

Mr. FLETCHER. The Senator can not withdraw his bill. The bill is before the Senate by unanimous consent, and I have offered an amendment to it.

The PRESIDENT pro tempore. The Chair may make the observation that it will be withdrawn, under the unanimous-consent agreement, in about one minute.

Mr. FLETCHER. I know that, but I have offered the amendment as section 7 of the bill. Let it be read.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Florida will be read.

The PRINCIPAL LEGISLATIVE CLERK. On page 5, after line 18, insert a new section, as follows:

Sec. 7. That the following sums be, and the same are hereby, appropriated for the objects hereinafter expressed, namely:

(a) For increase in the limit of cost of construction of those certain public buildings, heretofore authorized by Congress to be constructed and for which appropriations were made, referred to in Senate Document No. 28, Sixty-eighth Congress, first session, \$15,130,780, or so much thereof as may be necessary.

(b) For the construction of public buildings on those certain sites, heretofore acquired, for the construction of which buildings no appropriations were made, referred to in Senate Document No. 28, Sixty-eighth Congress, first session, \$23,557,500, or so much thereof as may be necessary.

MUSCLE SHOALS

The PRESIDENT pro tempore. The hour of 2 o'clock having arrived, in accordance with the unanimous-consent agreement entered into on the 4th day of June, 1924, the Chair lays before the Senate House bill 518, which will be reported.

Mr. HARRISON. Mr. President, a parliamentary inquiry. The PRESIDENT pro tempore. The Senator from Mississippi will state his parliamentary inquiry.

Mr. HARRISON. Does the bill that was just being considered go to the calendar under the rule?

The PRESIDENT pro tempore. The bill called up by the Senator from Utah is now on the calendar.

Mr. HARRISON. What becomes of the amendment offered by the Senator from Florida?

The PRESIDENT pro tempore. The amendment will be pending when the bill is next taken up. House bill 518 is before the Senate.

Mr. UNDERWOOD. Has the Clerk reported the bill?

Mr. NORRIS. The bill has not yet been formally reported.

The PRESIDENT pro tempore. Does the Senator desire that the bill be read?

Mr. NORRIS. The Clerk has not followed the direction of the Presiding Officer and has not, as a matter of fact, formally reported the bill. I ask that it be formally reported, so there may be no question about it having been reported.

The PRESIDENT pro tempore. The bill will be read by its title.

The PRINCIPAL CLERK. A bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful

products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17 on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

Mr. NORRIS. I ask unanimous consent that the formal reading of the bill be dispensed with.

The PRESIDENT pro tempore. Without objection, that order is made.

Mr. NORRIS. Mr. President, the bill comes up pursuant to the unanimous-consent agreement that appears on the calendar and with which Senators are familiar. The Committee on Agriculture and Forestry have made a report in which they recommend striking out all of the bill after the enacting clause and inserting the language of another bill, which is printed as a substitute amendment. Several Senators this morning have asked me if I would be willing not to take up the bill to-day, because they had an anxiety to read particularly the bill introduced yesterday by the Senator from Alabama [Mr. UNDERWOOD], which is later to be offered as a substitute for the committee bill, and also to read the report, and even the committee bill itself. I have no objection to postponing consideration of the bill until to-morrow and have so expressed myself to those Senators who have talked to me about it; and I think on the strength of that statement some of them have gone who want to be here when it is taken up.

Mr. UNDERWOOD. Mr. President, may I interrupt the Senator for a minute?

Mr. NORRIS. Certainly.

Mr. UNDERWOOD. I have no objection to debate and consideration of the bill going over until to-morrow, but I suggest that the Senator have his amendment in the nature of a substitute read this evening, and the other amendment, too, if it can be read at this time. I have reference to the one which I have offered as a substitute. That may be a little out of order, but, of course, it can be done by unanimous consent.

Mr. NORRIS. I have no objection to the amendment being read now. Technically, of course, it is not in order.

The PRESIDENT pro tempore. Before any agreement is made the Chair would like to inquire of the Senator from Alabama, who is the author of the agreement, whether he understands that under the agreement the bill can be temporarily laid aside?

Mr. UNDERWOOD. I think it can be temporarily laid aside only by unanimous consent for the transaction of other business, because the order can not be changed except by unanimous consent. However, I was going to suggest to the Senator from Nebraska, if agreeable to him, that when that is done, instead of adjourning until to-morrow we take a recess until to-morrow, so that debate may proceed as soon as we meet at 12 o'clock.

Mr. NORRIS. That course would be very agreeable to me if it is satisfactory to others.

Mr. CURTIS. That would be satisfactory to me, except that I want a short executive session this afternoon after the disposition of the day's legislative business.

Mr. UNDERWOOD. That is all right if we can have the understanding.

Mr. NORRIS. Then let us have an understanding that instead of adjourning at the close of the executive session we shall take a recess until to-morrow at 12 o'clock.

Mr. CURTIS. That will be all right.

Mr. DILL. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Nebraska yield to the Senator from Washington?

Mr. NORRIS. I yield.

Mr. DILL. I want to ask the Senator whether, so long as this bill is before the Senate, we will be kept from taking up the postal employees' salary veto message, or whether this measure holds its place until it is disposed of and it will be impossible to take up the veto message?

Mr. NORRIS. I can only speak for myself, because it would require unanimous consent to temporarily lay aside the bill; but so far as I am concerned, for a proposition like the veto message, which is in the nature of unfinished business, I shall not object and would be glad if unanimous consent could be obtained to temporarily lay the bill aside in order to take up the veto message of the President.

Mr. CURTIS. May I suggest to the Senator from Washington that we are trying to reach some agreement about a time to take up the postal measure; and if the Senator will let it go a day or two, I think we will reach an agreement.

Mr. DILL. I want to say to the Senator from Kansas that I do not want any agreement entered into that will keep any of us, who might have the right to make the motion for a vote, from having such a vote taken on the veto message.

Mr. CURTIS. That will be taken up in the presence of the Senate. Nothing will be done except in the open. We are trying to reach some agreement. We can then present it here and have the matter taken up.

Mr. DILL. The Senator just said that arrangements were being made.

Mr. CURTIS. I said we would talk it over, but we will have to submit it to the Senate. I have talked to Senators on the other side, including the leader, who is not here at the moment. There will be no snap judgment taken of any kind or character.

Mr. DILL. There is a parliamentary situation here about which I am concerned, namely, that a motion to refer the postal bill and message to a committee might take precedence over a motion for a vote on the veto message itself. That parliamentary situation, it seems to me, ought to be considered.

The PRESIDENT pro tempore. The Chair is in grave doubt with regard to a proper interpretation of the agreement. The agreement says specifically that the Senate shall take up House bill 518 and that it shall not be "laid aside until finally disposed of, and that this order," which embraces the entire subject, "shall not be set aside except by unanimous consent." The doubt in the mind of the Chair is whether, if unanimous consent is given to lay aside the bill temporarily, it can be resumed at the suggestion of any Senator.

Mr. NORRIS. I am rather surprised at the opinion expressed. I have had no doubt that under the unanimous-consent agreement, which requires unanimous consent to modify or change or set aside, it would, of course, require unanimous consent to temporarily lay it aside and take up something else. However, it never occurred to me that when that was done the unanimous-consent agreement would not come right back into effect the same as it always does under any such unanimous-consent agreement.

The PRESIDENT pro tempore. The Chair wants no misunderstanding about it. The Chair is rather inclined to agree with what has just been said by the Senator from Nebraska. By unanimous consent the bill can be temporarily laid aside, but it will be in order for any Senator to bring it again to the consideration of the Senate upon suggestion.

Mr. UNDERWOOD. I think that is correct.

Mr. NORRIS. I think we all agree that that is the proper construction of the agreement. I do not want any doubt about it, because I would dislike to lay the bill aside temporarily and then have the construction put on the unanimous-consent agreement that we could not take it up again. I think it comes up automatically.

The PRESIDENT pro tempore. If it is temporarily laid aside at this time and we have a recess, it will come up automatically at the opening of the session to-morrow. If we have an adjournment, it will not come up before 2 o'clock to-morrow.

Mr. NORRIS. Yes; I understand that.

Mr. BORAH. Do I understand that it is agreed upon all hands that the bill can not be laid aside for anything else except by unanimous consent?

The PRESIDENT pro tempore. It can not.

Mr. NORRIS. With that understanding, if the Senator from Kansas wants to move an executive session, I am ready to proceed to the consideration of executive business.

Mr. UNDERWOOD. So that it will not have to be done to-morrow, if there is no hurry for an executive session, will not the Senator allow his committee amendment and my substitute to be read? We will save just that much time to-morrow.

The PRESIDENT pro tempore. The Chair understands the Senator from Nebraska to ask unanimous consent that the bill shall be temporarily laid aside.

Mr. NORRIS. I ask first that the committee amendment be read. I want to say to the Senator from Alabama that I think his amendment ought not to be read until we have formally voted on the substitute proposed by the committee.

Mr. UNDERWOOD. That is satisfactory.

Mr. NORRIS. If there be no objection, I am willing to take that vote now.

Mr. UNDERWOOD. That is satisfactory. I will have my substitute read after the other is voted on.

The PRESIDENT pro tempore. The Senator from Nebraska has asked that the formal reading of the bill be dispensed with.

Mr. NORRIS. I had already obtained that unanimous consent, but that referred to the House text. I presume we will have to read the amendment reported by the committee; that even by unanimous consent we could not waive that.

Mr. UNDERWOOD. It will take some time to read it.

Mr. NORRIS. I ask that the Clerk now read the committee amendment.

The PRESIDENT pro tempore. The amendment of the committee will be read.

The principal clerk read the substitute reported by the Committee on Agriculture and Forestry, which was to strike out all after the enacting clause and insert:

That the Secretary of War is hereby authorized and directed to complete the construction of Dams Nos. 2 and 3 in the Tennessee River at Muscle Shoals, Ala., in accordance with report submitted in House Document 1262, Sixty-fourth Congress, first session: *Provided*, That the Secretary of War may, in his discretion, make such modifications in the plans presented in such report as he may deem advisable in the interest of power or navigation: *Provided further*, That funds for the prosecution of this work may be allotted from appropriations heretofore or hereafter made by Congress for the improvement, preservation, and maintenance of rivers and harbors; and in order to provide for a larger amount of primary power to be developed on the Tennessee River if a suitable site or sites can be found upon investigation where practical storage reservoirs can be obtained at reasonable cost, the Secretary of War is directed to take the necessary steps to secure such sites and to build the necessary dams for the impounding of water therein. If the Secretary of War, under authority of this act, constructs one or more dams for the purpose of impounding the waters of said river, he shall give due consideration in the construction of such dams to the development of hydroelectric power, to the necessities of navigation, and flood control.

Sec. 2. That in the construction of said Dam No. 3, or in the construction of other dams or other works provided for in this act, the Secretary of War is hereby authorized to use and to remove any of the temporary buildings now owned by the Government of the United States and erected anywhere in the vicinity of Muscle Shoals or nitrate plants Nos. 1 or 2, providing the removal of such buildings will not interfere with the operations of the Federal power corporation as hereinafter set forth.

Sec. 3. That if the Secretary of War should find it advisable and practical to construct storage reservoirs on the Tennessee River or any of its tributaries as hereinbefore provided, and that by virtue thereof the flow of the Tennessee River is equalized and a larger amount of primary power thereby developed, he shall require of any private person, partnership, or corporation maintaining a dam on said river for the development of power to contribute his or its proportionate share for the construction of said reservoirs, and he is hereby authorized to take the necessary action or actions in court for the purpose of compelling contribution to such development by any person, partnership, or corporation receiving the benefits therefrom; and if the right to dam said river for the purpose of developing hydroelectric power is hereafter given by virtue of any law of the United States to any person, partnership, or corporation, one of the requirements of said grant shall be that the person, partnership, or corporation given the privilege to build any such dam shall pay his or its proportionate share of the expenses of the construction of any such reservoir or reservoirs either then constructed or thereafter constructed by virtue of this act.

Sec. 4. That there is hereby incorporated and created a corporation by the name, style, and title of "the Federal power corporation" (hereafter referred to as the corporation). Said corporation shall have perpetual succession and shall have power—

- (1) To adopt, use, and alter a corporate seal;
- (2) To sue and be sued and to complain and to defend in any court of law and equity within the United States;
- (3) To make and enforce such contracts as may be necessary to carry out the provisions of this act;
- (4) To appoint and fix the compensation of such employees, attorneys, and agents as are necessary for the transaction of the business of the corporation, to define their duties, require bonds of them, and fix the penalties thereof; but in no case shall any such employee receive a salary in excess of \$7,500 per annum;
- (5) To prescribe, amend, and repeal by-laws not inconsistent with this act for the conduct of its business;
- (6) In the name of the United States Government, to exercise the right of eminent domain, and in the purchase of any real estate or in the acquisition of real estate by condemnation proceedings the title to such real estate shall be taken in the name of the United States Government; and

(7) To exercise all the rights, powers, and privileges conferred upon it by this act and such additional powers as may be necessary to carry out the provisions of this act.

SEC. 5. That the business of said corporation shall be transacted by a board of directors (hereinafter called the board), consisting of three persons, to be appointed by the President of the United States, by and with the advice and consent of the Senate. Members of said board shall hold their offices during good behavior and shall receive a salary of \$7,500 per year, payable monthly: *Provided*, That any member of said board may be removed from office at any time by a concurrent resolution of the House of Representatives and the Senate. No member of said board shall during his continuance in office be engaged in any other business, but shall give his entire time to the business of said corporation. Said board shall select one of its members as president. It shall select a treasurer and as many assistant treasurers as it deems proper, and such treasurer and assistant treasurers may be corporations or banking institutions and shall give such security for the safe-keeping of the moneys of said corporation as the board may require.

SEC. 6. In the appointment of officials and the selection of employees for said corporation and in the promotion of any such employees or officials no political test or qualifications shall be permitted or given consideration, but all such appointments and promotions shall be given and made on the basis of merit and efficiency. The board shall keep a record of all requests, oral and written, made to any member thereof, coming from any source, asking for any favor in behalf of any person or the promotion of any employee, which record shall be open to the public inspection. Any member of said board who permits the use of political or partisan influence in the selection of any employee, or in the promotion of any such employee of said corporation, or who gives any consideration to political consideration in the official action of said board, or who, knowing that such political influence has been or is attempted, does not record the same in said record shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in a sum not exceeding \$1,000 or be imprisoned not to exceed six months, or both such fine and imprisonment, and the conviction of any member of said board of the offense herein defined shall have the effect of removing such member from office.

SEC. 7. That upon the completion of the organization of said corporation the President and Secretary of War shall turn over to said corporation the steam plant located at nitrate plant No. 2, at Muscle Shoals, Ala., together with all real estate used in connection therewith; all machinery, tools, equipment, accessories, and materials thereunto belonging; the railroad, together with the engines, cars, tools, materials, machine shops, and all accessories used in the operation of said steam plant; and all transmission lines connecting said plant with nitrate plants Nos. 1 and 2 and Dam No. 2: *Provided, however*, That the transfer of any of the property above described to said corporation shall be subject to such use of said property by the Secretary of War as he may elect in the construction and development of the dams herein provided for. As soon as any of the dams herein provided to be constructed by the Secretary of War have been completed the President and the Secretary of War shall turn the same over to said corporation and thereafter said property shall be in the control and under the management of said corporation, and the said corporation shall manage said dams and keep the same in first-class condition: *Provided, however*, That said corporation shall be under no obligation to repair or to maintain any of the locks in said dams placed there for the purposes of navigation. There shall also be turned over to said corporation all the real estate, including all residences and other buildings now owned by the United States in the vicinity of Dam No. 2.

SEC. 8. That in case all the power developed at Dams Nos. 2 and 3, or any other dam or dams constructed by the Secretary of War under the provisions of this act and turned over to said corporation, can not be used to practical advantage and is not necessary for the manufacture of fertilizer or explosives as herein provided, the board may, in its discretion, sell any such surplus power so developed to any State, municipality, district, corporation, partnership, or person, upon such terms and under such conditions as the board may deem just; and in making such sale the board shall give preference to States, counties, municipalities, and districts, and if the sale of such surplus power is made to private individuals, corporations, or partnerships, for distribution or resale, the board may, as one of the conditions of such sale, provide in the contract therefor, for the regulation of the price at which any such individual, partnership, or corporation shall charge the consumer in a resale of such power. It shall be the policy of said corporation in selling electric energy to fix the time of such sale for as short a term as possible and in no case for a longer term than 25 years.

In order to convert secondary power into primary power and thereby cheapen the hydroelectric power produced and increase the

number of people to be benefited by such use, as well as to cheapen the price thereof to the consumer, the corporation is hereby authorized to enter into agreements with the owners of existing transmission lines, or with the owners of transmission lines hereafter constructed, to bring about the exchange of power whenever the same can be advantageously done. The corporation is authorized to construct transmission lines for the purpose of giving wider distribution to the use of the hydroelectricity developed at any of said dams, and to enter into contracts with persons, partnerships, corporations, municipalities, districts or States, for the joint construction and joint use of such transmission lines, having always in view that one of the objects of this act is to give as wide a distribution as possible at the smallest practicable cost, the use of the electric current developed at any of the dams herein provided for.

SEC. 9. The corporation is hereby authorized to complete the steam auxiliary plant at nitrate plant No. 2, in accordance with the original plan.

It shall also have power to purchase or lease transmission lines owned by other parties, or to purchase or lease an interest in the same for joint use.

SEC. 10. There shall be turned over to said corporation by the Secretary of the Treasury, the sum of \$3,172,487.25, received by the United States for the sale to the Alabama Power Co. of the Gorgas steam plant at Gorgas, Ala., and said sum is hereby appropriated, out of any money in the Treasury not otherwise appropriated. The Secretary of War is directed to sell all surplus materials at Muscle Shoals not needed by said corporation or the Secretary of Agriculture in carrying out the provisions of this act and turn the proceeds thereof over to said corporation, which sums shall be considered the operating capital of the corporation. The corporation shall continue to increase said capital from its net earnings until the sum amounts to \$25,000,000, and thereafter all the income from said corporation not necessary for depreciation, management, and other legitimate expenses of said corporation, shall be turned over to the Treasury of the United States.

SEC. 11. The corporation shall supply to the Government of the United States, free of charge, a sufficient amount of power necessary to operate all the locks that are established in any of the dams herein provided for, for navigation purposes.

SEC. 12. The corporation shall at all times furnish power for the operation of nitrate plants Nos. 1 and 2, as the same may be demanded or called for by the Secretary of Agriculture, or any other agency having in charge the operation of said nitrate plants, except as provided herein; and in the reconstruction or modification of either one or both of said nitrate plants the corporation shall likewise supply all power necessary for such construction purposes.

In order to cheapen the cost of fertilizer products as much as possible, it shall be the duty of the Secretary of Agriculture, in the operation of said nitrate plants, to use the most economical grade of power available, and he shall not demand of the Federal power corporation for such purposes more than 100,000 horsepower, of which not more than 25,000 shall be primary power. The price charged for power so supplied shall not exceed the lowest price for similar power at which the same is sold to any other purchaser.

SEC. 13. The board shall make a complete and detailed report of its operations as soon after the close of each calendar year as possible to the Congress, and the Secretary of War shall at least once each year make a complete audit of all the accounts and of all the financial operations of said corporation and shall include in his annual report to Congress a detailed statement thereof.

The principal place of business of said corporation shall be established by the board at or in the vicinity of Muscle Shoals, Ala.

SEC. 14. Upon the passage of this act nitrate plants Nos. 1 and 2, the Waco Quarry in Franklin County, Ala., the steam plant at nitrate plant No. 1, the railroad and the engines, cars, and other personal property necessary for the operation of the same, together with the real estate and residences owned by the United States at nitrate plants Nos. 1 and 2 and at the said Waco Quarry, shall be placed under the control and jurisdiction of the Secretary of Agriculture. The Secretary of Agriculture is hereby authorized to provide for the operation of one or both of said plants, through the Fixed Nitrogen Research Laboratory, or through such other means as he may deem advisable, and he is hereby authorized, if in his judgment better results can be obtained, to enter into a contract or contracts with private persons or corporations for the operation, either in whole or in part, of said nitrate plants, or other property or parts thereof and to likewise, through the instrumentalities aforesaid, provide for experimentation, study, and research in any other manner that he may deem advisable for the cheapening of the manufacture and sale of fertilizer or other products. He is hereby authorized to remodel nitrate plant No. 1 and to use the same in the manufacture of fertilizer or other products and in experimental work designed to cheapen the production of such products. He is also authorized to add to or change nitrate plant No. 2 for the purpose of supplying fertilizer or other ingredients: *Provided, however*, That no change shall be made in nitrate plant

No. 2 that will interfere in any way with its use to its full capacity in the manufacture of explosives to be used for war purposes, unless and until by the experiments above provided for it shall have been ascertained and developed that the manufacture of explosives can be cheapened and improved over the method provided for by the use of nitrate plant No. 2, and until the Secretary of War shall have determined that such new improved method has been installed with sufficient capacity to equal the present capacity of nitrate plant No. 2.

SEC. 15. It is hereby declared to be one of the objects of this act to cheapen as much as possible the cost of fertilizer and fertilizer ingredients and other products helpful to agriculture, and to bring about such objects the Secretary of Agriculture shall have power to manufacture fertilizer ingredients or a completed fertilizer and such other products ready for use, and in order to prevent a monopoly of the fertilizer or other business or an undue or unreasonable enhancement in the price thereof he is authorized to sell such products direct to farmers or to organizations of farmers, or to dealers in, and manufacturers of fertilizer, and to likewise sell to the trade generally fertilizers and any by-products that may be obtained in the manufacture of fertilizer or other products. In the sale of such products to dealers and manufacturers he shall likewise have authority to provide that in the resale by the purchaser of said products to consumers thereof that no more than a reasonable profit shall be exacted.

SEC. 16. In the appointment of officials and the selection of employees under this act by the Secretary of Agriculture or any of his subordinates, such appointments and selections and all promotions shall be made in accordance with the requirements of section 6 of this act, and all of the provisions of said section shall apply with full force and effect to all such appointments, selections, or promotions.

SEC. 17. To enable the Secretary of Agriculture to carry out the provisions of this act with reference to the cheapening and improvement of fertilizer products and other products, and the manufacture of fertilizer, by or under the authority herein given to the Secretary of Agriculture, there is hereby appropriated out of the Treasury of the United States the sum of \$1,500,000, available until expended, and all receipts for the sale of any such fertilizer products or other products shall be covered into the Treasury of the United States as miscellaneous receipts and a full and detailed report of all such operations shall be made annually to Congress.

SEC. 18. All laws relating to embezzlement, conversion, improper handling, redemption, use, or disposal of moneys of the United States shall apply to moneys of the corporation while in the custody of any officer, employee, or agent of the United States or of the corporation.

SEC. 19. All transmission lines constructed by the Federal power corporation, excepting transmission lines connecting the dams herein provided for and other properties of the Government at Muscle Shoals, shall be subject to taxation under the laws of the State wherein located.

SEC. 20. It is hereby declared to be the spirit and intention of Congress in passing this act—

(a) Primarily to provide for the national defense by maintaining ready for immediate use for war purposes nitrate plant No. 2.

(b) To promote agriculture by developing cheap fertilizers and other things of benefit to agriculture to the highest degree.

(c) To assist in the development of electric power by the complete storage and utilization of the waters of our rivers and their tributary streams in conjunction with steam and other sources of fuel to the end that electrical energy may be carried to all citizens.

(d) These objects shall be carried out as nearly as possible without interference with private enterprise.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

RECESS

Mr. CURTIS. I move that the Senate take a recess until tomorrow at 12 o'clock noon.

The motion was agreed to; and (at 2 o'clock and 30 minutes p. m.) the Senate took a recess until tomorrow, Thursday, December 4, 1924, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate December 3, 1924

APPOINTMENTS IN THE OFFICERS' RESERVE CORPS OF THE ARMY

To be major generals

Charles White Barry, major general, New York National Guard, from September 20, 1924.

Milton Joseph Foreman, major general, Illinois National Guard, from September 20, 1924.

Quincy Adams Gillmore, major general, New Jersey National Guard, from November 10, 1924.

Benson Walker Hough, major general, Ohio National Guard, from September 20, 1924.

John Augustus Hulen, major general, Texas National Guard, from September 20, 1924.

Baird Hockett Markham, major general, Oklahoma National Guard, from September 19, 1924.

Mathew Adrian Thaley, major general, Iowa National Guard, from November 5, 1924.

Robert Henry Tyndall, major general, Indiana National Guard, from October 29, 1924.

To be brigadier generals

Clarence Bretton Blethen, brigadier general, Washington National Guard, from September 24, 1924.

Ellerbe Winn Carter, brigadier general, Kentucky National Guard, from September 18, 1924.

Abel Davis, brigadier general, Illinois National Guard, from September 19, 1924.

William Graham Everson, brigadier general, Indiana National Guard, from September 19, 1924.

Alfred Franklin Foote, brigadier general, Massachusetts National Guard, from November 17, 1924.

Frank David Henderson, brigadier general, Ohio National Guard, from September 20, 1924.

Henry Hutchings, brigadier general, Texas National Guard, from September 19, 1924.

Robert Bruce McCoy, brigadier general, Wisconsin National Guard, from September 19, 1924.

Charles E. McPherron, brigadier general, Oklahoma National Guard, from September 19, 1924.

John Lea McQuigg, brigadier general, Ohio National Guard, from September 19, 1924.

Edward Martin, brigadier general, Pennsylvania National Guard, from September 19, 1924.

Churchill Brown Nehard, brigadier general, Pennsylvania National Guard, from November 7, 1924.

Paul Lincoln Mitchell, brigadier general, Ohio National Guard, from November 18, 1924.

Alva Joseph Niles, brigadier general, Oklahoma National Guard, from September 18, 1924.

Morris Benham Payne, brigadier general, Connecticut National Guard, from September 19, 1924.

Winfield Scott Price, brigadier general, New Jersey National Guard, from October 20, 1924.

George Perry Rains, brigadier general, Texas National Guard, from September 19, 1924.

William August Raupp, brigadier general, Missouri National Guard, from September 18, 1924.

Willie McDaniel Rowan, brigadier general, Kansas National Guard, from September 18, 1924.

Louis Arthur Toombs, brigadier general, Louisiana National Guard, from November 6, 1924.

Robert Jesse Travis, brigadier general, Georgia National Guard, from September 18, 1924.

John Pearson Wood, brigadier general, Pennsylvania National Guard, from September 19, 1924.

To be major general, auxiliary section

George Herbert Harries, from September 16, 1924.

To be brigadier general, medical section

John Miller Turpin Finney, from September 24, 1924.

To be brigadier general, ordnance section

John Tallafarro Thompson, from November 22, 1924.

PROMOTIONS IN THE REGULAR ARMY

MEDICAL CORPS

To be lieutenant colonels

Maj. Howard Houghton Baily, Medical Corps, from July 8, 1924.

Maj. Paul Lamar Freeman, Medical Corps, from July 8, 1924.

VETERINARY CORPS

To be captains

First Lieut. Kenneth Earl Buffin, from June 11, 1924.

First Lieut. Robert Payne McComb, from June 22, 1924.

First Lieut. William Roy Wolfe, from June 23, 1924.

First Lieut. Chauncey Edmund Cook, from June 23, 1924.

To be captains with rank from July 1, 1924

First Lieut. Robert Patrick Kunnecke.

First Lieut. Clifford Eugene Pickering.

First Lieut. Stanley Clifford Smock.

First Lieut. Howard Newell Beeman.

First Lieut. Howard Mayo Savage.
 First Lieut. Burlin Chase Bridges.
 First Lieut. Mott Ramsey.
 First Lieut. Josiah Wistar Worthington.
 First Lieut. Fred Chester Waters.
 First Lieut. Homer Johnson.
 First Lieut. Joseph Fenton Crosby.
 First Lieut. Raymond Irvin Lovell.
 First Lieut. Ralph Brown Stewart.
 First Lieut. George Jacob Rife.
 First Lieut. Maximilian Siereveld, jr.
 First Lieut. Charles Mansur Cowherd.
 First Lieut. John Knox McConeghy.
 First Lieut. Sawyer Adelbert Grover.
 First Lieut. Charles Sears Williams.
 First Lieut. Oness Harry Dixon, jr.
 First Lieut. John Wesley Miner.
 First Lieut. Seth C. Dildine.
 First Lieut. Fred W. Shinn.
 First Lieut. Philip Henry Riedel.
 First Lieut. Irby Rheuel Pollard.
 First Lieut. Frank Benjamin Steinkolk.
 First Lieut. Francois Hue Karl Reynolds.
 First Lieut. Raymond Randall.
 First Lieut. Frank Caldwell Hershberger.

To be captains

First Lieut. Gerald Woodward FitzGerald from July 9, 1924.
 First Lieut. Charles Brenton Dumphy from July 15, 1924.
 First Lieut. Harry Edward Van Tuyl from July 31, 1924.
 First Lieut. Louis Lathrop Shook from August 2, 1924.

To be captains with rank from August 3, 1924

First Lieut. Daniel Henry Mallan.
 First Lieut. Louis Goldman Weisman.
 First Lieut. Everett Cooper Conant.
 First Lieut. James Alexander McCallam.
 First Lieut. Harry John Juzek.
 First Lieut. William Henry Dean.
 First Lieut. Solon B. Renshaw.
 First Lieut. Frank H. Woodruff.
 First Lieut. Will Charles Griffin.
 First Lieut. Lloyd Clifford Ewen.
 First Lieut. Charles Oliver Grace.
 First Lieut. Edward Michael Curley.
 First Lieut. James Russell Sperry.
 First Lieut. Floyd Chauncey Sager.
 First Lieut. Henry Emil Hess.
 First Lieut. Vincent Brown Wright.
 First Lieut. Paul Roberts King.
 First Lieut. Forest Lee Holycross.
 First Lieut. Daniel Sommer Robertson.

To be captains

First Lieut. Earl Floyd Long from August 5, 1924.
 First Lieut. Joseph Hiram Dornblaser from September 16, 1924.
 First Lieut. George Leslie Caldwell from September 18, 1924.
 First Lieut. Jacob Landes Hartman from September 18, 1924.
 First Lieut. John Harold Kintner from September 18, 1924.
 First Lieut. Arthur Dunlap Martin from September 18, 1924.
 First Lieut. Samuel George Kleismeyer from September 21, 1924.
 First Lieut. Peter Thomas Carpenter from September 22, 1924.

MEDICAL ADMINISTRATIVE CORPS

To be first lieutenants

Second Lieut. Stanley Alling Clark from June 24, 1924.
 Second Lieut. Francis Moore from July 24, 1924.
 Second Lieut. Max Verne Talbot from August 24, 1924.
 Second Lieut. Alexander Joseph Doray from October 13, 1924.
 Second Lieut. Harvey Israel Rice from October 19, 1924.

CHAPLAINS

To be chaplains with the rank of captain

Chaplain Joseph Gail Garrison, from June 17, 1924.
 Chaplain Faye Arnold Moon, from July 14, 1924.
 Chaplain Ivan Loveridge Bennett, from July 29, 1924.
 Chaplain Monroe Starkey Caver, from August 1, 1924.
 Chaplain John Knox Bodell, from August 13, 1924.
 Chaplain William Roy Bradley, from August 24, 1924.
 Chaplain James Lloyd McBride, from August 26, 1924.
 Chaplain Thomas Lawrence McKenna, from August 27, 1924.
 Chaplain Mylon Dickinson Merchant, from September 1, 1924.
 Chaplain Maurice William Reynolds, from September 8, 1924.

Chaplain Henry Russell Westcott, jr., from September 27, 1924.

Chaplain Albert Floyd Vaughan, from October 2, 1924.

Chaplain Edgar Nathaniel Thorn, from October 3, 1924.

Chaplain Jodie Gibson Stewart, from October 7, 1924.

Chaplain Gynther Storaasli, from October 11, 1924.

Chaplain Commodore Robert Watkins, from October 20, 1924.

Chaplain Ivan Gochnauer Martin, from November 6, 1924.

CADET APPOINTMENTS IN THE REGULAR ARMY

To be second lieutenants with rank from June 12, 1924

CORPS OF ENGINEERS

Cadet Wallace Howard Hastings.
 Cadet Emerson Leroy Cummings.
 Cadet Fisher Shinholt Blinn.
 Cadet Donald Charles Hill.
 Cadet Reginald Langworthy Dean.
 Cadet Merrow Egerton Sorley.
 Cadet Philip Robison Garges.
 Cadet John Ludden Monseau Des Islets.
 Cadet Gerald Joseph Sullivan.
 Cadet Arthur Gilbert Trudeau.
 Cadet Emerson Charles Itschner.
 Cadet Howard Ker.
 Cadet Herbert Davis Vogel.
 Cadet Fremont Swift Thompson.
 Cadet Emil John Peterson.
 Cadet Gordon Edmund Textor.
 Cadet Clinton Frederick Robinson.
 Cadet Frederic Allison Henney.
 Cadet Leonard Lawrence Bingham.

SIGNAL CORPS

Cadet John Henry Brewer.
 Cadet Victor Allen Conrad.
 Cadet Francis Elmer Kidwell.
 Cadet Cary Judson King, jr.
 Cadet Jesse Bernard Wells.
 Cadet John Sewell Thompson.
 Cadet James Stewart Willis.
 Cadet Czar James Dyer.
 Cadet Lawrence Wendall Adams.
 Cadet Merton Goodfellow Wallington.
 Cadet Emil Lenzner.

CAVALRY

Cadet John Held Riepe.
 Cadet Wendell Blanchard.
 Cadet Charles George Meehan.
 Cadet Harry Jordan Theis.
 Cadet Lawrence Russell Dewey.
 Cadet William Armstrong Bugher.
 Cadet Wilbur Kincaid Noel.
 Cadet Andrew Allison Frierson.
 Cadet Carl William Albert Raguse.
 Cadet Henry Sterling Jernigan.
 Cadet Frank Jay Thompson.
 Cadet Augustine Davis Dugan.
 Cadet Clarence William Bennett.
 Cadet Gordon Byrom Rogers.
 Cadet George Curnow Claussen.
 Cadet Murray Bradshaw Crandall.
 Cadet William Joseph Reardon.
 Cadet George William Busbey.
 Cadet William Louis Howarth.
 Cadet Cary Brown Hutchinson.
 Cadet Clarence Keith Darling.
 Cadet Joe L. Loutzenheiser.
 Cadet Zachery Winfield Moores.
 Cadet William Bellemere Wren.
 Cadet Peter Conover Hains, 3d.
 Cadet Harry Taylor Cavanaugh.
 Cadet Bernard Warren Justice.
 Cadet Frank Glover Trew.
 Cadet Walter Louis Weinaug.
 Cadet John Harry Stadler, jr.
 Cadet Laurence Knight Ladue.

FIELD ARTILLERY

Cadet George Dakin Crosby.
 Cadet Ernest Orrin Lee.
 Cadet Charles Day Palmer.
 Cadet Samuel Vance Krauthoff.
 Cadet George Arthur Duerr.
 Cadet Raymond Thomas Beurket.
 Cadet John Franklin Williams.
 Cadet Amel Thomas Leonard.

Cadet Harry Van Wyk.
 Cadet Glenn Bruce McConnell.
 Cadet Raymond Hendley Coombs.
 Cadet Wellington Alexander Samouce.
 Cadet William Hubbard Barksdale, jr.
 Cadet Robert Clement Lawes.
 Cadet Oren Wilcox Rynearson.
 Cadet James Thomas Loomie.
 Cadet Leslie Seekell Fletcher.
 Cadet Thomas Edwin Binford.
 Cadet Marcus Butler Stokes, jr.
 Cadet Francis Mariou Day.
 Cadet Bernard Francis Luebbermann.
 Cadet James Angus Watson, jr.
 Cadet Russell Layton Mabie.
 Cadet William John Eyerly.
 Cadet George Dunbar Pence.
 Cadet Lester Joseph Tacy.
 Cadet Charles Lanier Dasher, jr.
 Cadet Perry William Brown.
 Cadet Lindsay Patterson Caywood.
 Cadet Vonna Fernleigh Burger.
 Cadet Charles Dwelle Daniel.
 Cadet James Alexander Drvidson, jr.
 Cadet John Gilbert Moore.
 Cadet Edward Lynn Andrews.
 Cadet James Grafton Anding.
 Cadet Joseph Rogers Burrill.
 Cadet Francis Anthony Kreidel.
 Cadet Nathaniel Clay Cureton, jr.
 Cadet Howard Everett Kessinger.
 Cadet Walter Armin Linn.
 Cadet Walton Gracey Procter.
 Cadet Eleazar Parmly, 3d.
 Cadet Edward Orlando McConahay.
 Cadet William Joseph Cleary.
 Cadet Oliver Malcolm Barton.
 Cadet Bjarne Furuholmen.
 Cadet Charles Pelot Summerall, jr.
 Cadet Thomas George McCulloch.
 Cadet Frederick Cruger Pyne.
 Cadet Louis Chadwick Friedersdorff.
 Cadet Walter Domenick Marinelli.
 Cadet Daniel Francis Healy, jr.
 Cadet George Hinkle Steel.
 Cadet John Philip Maher, jr.
 Cadet Frank Smith Kirkpatrick.
 Cadet George Walter Vaughn.
 Cadet Thomas Jefferson Holmes, jr.
 Cadet William Harry Bertsch, jr.
 Cadet William Reineman Forbes.
 Cadet Gerald Jay Reid.
 Cadet James William Clyburn.
 Cadet Roy Deck Reynolds.
 Cadet David Griffith Erskine.
 Cadet Albert Newton Stubblebine, jr.
 Cadet Robert Charles Cameron.
 Cadet William Leo Coughlin.
 Cadet William Thaddeus Sexton.
 Cadet Robert Augustus Ellsworth.
 Cadet George Edmund Wrockloff, jr.
 Cadet Carroll Rigs Griffin.
 Cadet Charles Edward Hart.
 Cadet Kenneth Negley Decker.
 Cadet Thomas Allen Jennings.
 Cadet Joseph Massaro.
 Cadet James Barry Kraft.
 Cadet Howard Jehn John.
 Cadet Charles Loomis Booth.

COAST ARTILLERY CORPS

Cadet Robert Vernon Lee.
 Cadet Benjamin Schultz Mesick, jr.
 Cadet Frank Lawrence Lazarus.
 Cadet Everett Chalmers Wallace.
 Cadet Venum Charles Stevens.
 Cadet Floyd Allen Mitchell.
 Cadet Joseph Peter Shumate.
 Cadet Robert Lee Miller.
 Cadet John Ismert Hincke.
 Cadet Elmer Ernest Count, jr.
 Cadet Robert Ward Berry.
 Cadet Harold Peabody Tasker.
 Cadet Claude Earl Moore.
 Cadet Grayson Schmidt.
 Cadet Leslie Earl Simon.

Cadet Ralph Irvin Glasgow.
 Cadet James William Alexander McNary.
 Cadet Harold Phineas Gard.
 Cadet William Lloyd Richardson.
 Cadet Ovid Thomason Forman.
 Cadet George Wesley Palmer.
 Cadet Clark Cornelius Witman.
 Cadet Ernest August Merkle.
 Cadet Herbert Theodore Benz.
 Cadet Clarence Everett Rothgeb.
 Cadet George Bernard Finnegan, jr.
 Cadet Peter Wesley Shunk.
 Cadet Emil Pasoli, jr.
 Cadet Sanford Joseph Goodman.
 Cadet Gerald Goodwin Gibbs.
 Cadet Frank Satchwell Lyndall, jr.
 Cadet John Clair Smith.
 Cadet George Edmund Young.
 Cadet Albert Delmar Miller.
 Cadet James Edward McGraw.
 Cadet Darwin Denison Martin.
 Cadet George Avery Tucker.
 Cadet Clarence Sterling Raymond.
 Cadet John Alfred McComsey.
 Cadet Maxwell Wood Tracy.
 Cadet William Lewis Johnson.
 Cadet William Henry Kendall.

INFANTRY

Cadet Otis McCormick.
 Cadet Thomas Du Val Roberts.
 Cadet David Jerome Ellinger.
 Cadet Francis John Clark.
 Cadet Heyward Bradford Roberts.
 Cadet Bruce Woodward Bidwell.
 Cadet William Howard Arnold.
 Cadet Charles Trueman Lanham.
 Cadet Richard Warburton Stephens.
 Cadet John Henry Haile, jr.
 Cadet Richard Longworth Baughman.
 Cadet Edwin Henry Harrison.
 Cadet Cecil Ernest Henry.
 Cadet Craig Alderman.
 Cadet Charles Raeburne Landon.
 Cadet George Arthur Hadsell, jr.
 Cadet Earl Mattice.
 Cadet Charles Goldsmith Stevenson, jr.
 Cadet William Herbert Schaefer.
 Cadet Ewing Hill France.
 Cadet Edward Fearon Booth.
 Cadet William Hill Lamberton.
 Cadet Haydon Lemaire Boatner.
 Cadet David Marcus.
 Cadet James Edward Moore.
 Cadet Silas Woodson Hosea.
 Cadet Ellis Spurgeon Hopewell.
 Cadet Harold James Keeley.
 Cadet Richard Emmel Nugent.
 Cadet Walter Allen Buck.
 Cadet Cleland Charles Sibley.
 Cadet George Morgan Kernan.
 Cadet Francis Edwin Gillette.
 Cadet Albert Kellogg Stebbins, jr.
 Cadet Richard Givens Prather.
 Cadet Douglas Byron Smith.
 Cadet Robert Edward Cullen.
 Cadet Samuel Glenn Conley.
 Cadet Stephen Wilson Ackerman.
 Cadet Lewis Spencer Kirkpatrick.
 Cadet Charles Hunter Coates.
 Cadet Otto Lauren Nelson, jr.
 Cadet John Curtis LaFayette Adams.
 Cadet Robert Wells Harper.
 Cadet Augustus Jerome Regnier.
 Cadet Willard Koehler Liebel.
 Cadet John Archer Stewart.
 Cadet Lewis Curtis Barks.
 Cadet George Alvin Millener.
 Cadet Robert Harvey Thompson, jr.
 Cadet Russell Andrew Baker.
 Cadet Paul Cooper.
 Cadet Lee William Gilford.
 Cadet Ralph Pulsifer.
 Cadet Logan Carroll Berry.
 Cadet Onto Price Bragan.

Cadet Gilbert Francis Baillie.
 Cadet Robert Joseph McBride.
 Cadet Charles Ward Van Way, jr.
 Cadet Harry Dillon McHugh.
 Cadet Armistead Davis Mead, jr.
 Cadet Charles Harold Royce.
 Cadet George Patrick O'Neill.
 Cadet Oswaldo de la Rosa.
 Cadet Henry Coates Burgess.
 Cadet James Edgar Macklin, 2d.
 Cadet Armand Joseph Salmon.
 Cadet Frederick Raymond Keeler.
 Cadet Edward Amedee Chazal.
 Cadet Reed Graves.
 Cadet Mark Edward Smith, jr.
 Cadet John Gillespie Hill.
 Cadet Wolcott Kent Dudley.
 Cadet Andrew Suter Gamble.
 Cadet Earl Lynwood Scott.
 Cadet Andrew Paul Foster, jr.
 Cadet John Jacob Outcalt.
 Cadet Melvin Eugene Melster.
 Cadet Hobart Amory Murphy.
 Cadet William Henry Maglin.
 Cadet Camille Henry Duval.
 Cadet William Samuel Triplet.
 Cadet George Winifred Smythe.
 Cadet Jesse Thomas Traywick, jr.
 Cadet Leslie Ellis Griffith.
 Cadet Philip McCaffrey Kernan.
 Cadet Howard Alexander Malin.
 Cadet James Earl Purcell.

John G. Bruce to be postmaster at Lander, Wyo., in place of F. E. Godfrey. Incumbent's commission expired June 5, 1924.

HOUSE OF REPRESENTATIVES

WEDNESDAY, December 3, 1924

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O Lord, our Lord, holy, holy, holy is Thy name, and righteousness is the habitation of Thy throne. We would cherish that greatest of gifts, the mercy of a grateful heart. We praise Thee for the things that gladden and enrich our lives, for all are of Thy bounty. As Thy children, Thou dost understand us. So discipline us that our defects and excesses shall yield a more complete perfection and greater usefulness. Amid this sweet stillness, forgive us while we bow and have mercy upon us when we are judged in the light of Thy throne. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9559) making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes.

Resolved, That the Senate recedes from its amendments Nos. 29 and 34.

The message also announced that the Senate had concurred in the following resolution:

House Concurrent Resolution 30

Resolved by the House of Representatives (the Senate concurring), That Monday, the 15th day of December, 1924, be set aside as the day upon which there shall be held a joint session of the Senate and the House of Representatives for appropriate exercises in commemoration of the life, character, and public service of the late Woodrow Wilson, former President of the United States.

That a joint committee, to consist of five Senators and seven Members of the House of Representatives, to be appointed by the President pro tempore of the Senate and the Speaker of the House of Representatives, respectively, shall be named, with full power to make all arrangements and publish a suitable program for the joint session of Congress herein authorized, and to issue the invitations hereinafter mentioned.

That invitations shall be extended to the President of the United States, the members of the Cabinet, the Chief Justice and Associate Justices of the Supreme Court of the United States, and such other invitations shall be issued as to the said committee shall seem best.

That all expenses incurred by the committee in the execution of the provisions of this resolution shall be paid, one-half from the contingent fund of the Senate and one-half from the contingent fund of the House of Representatives.

ENROLLED BILLS SIGNED

Mr. ROSENBLOOM, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 9559. An act making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes; and

H. R. 3537. An act for the relief of L. A. Scott.

NOTIFICATION TO THE PRESIDENT

Mr. LONGWORTH and Mr. GARRETT of Tennessee appeared, and

Mr. LONGWORTH said: Mr. Speaker, your committee, which was appointed to join a similar committee from the Senate to advise the President that a quorum of the two Houses was present and ready to receive any communication he desired to make, has performed that duty. The President advised the joint committee that he will submit in writing his regular message.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

A message, in writing, from the President of the United States, by Mr. Latta, one of his secretaries.

The SPEAKER. The Chair lays before the House the following message from the President of the United States.

Mr. William Tyler Page, Clerk of the House of Representatives, read the message from the President of the United States, as follows:

[For message, see proceedings of Senate, p. 52.]

The SPEAKER. Without objection, the message will be referred to the Committee of the Whole House on the state of the Union and ordered to be printed.

There was no objection.

THE COWLITZ TRIBE OF INDIANS

Mr. SNYDER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 71, an act authorizing the Cowlitz Tribe of Indians, residing in the State of Washington, to submit claims to the Court of Claims, disagree to all the Senate amendments, and ask for a conference.

The SPEAKER. The gentleman from New York asks unanimous consent to take from the Speaker's table the bill H. R. 71, disagree to all the Senate amendments, and ask for a conference. Is there objection?

There was no objection.

The SPEAKER appointed as conferees on the part of the House Mr. SNYDER, Mr. DALLINGER, and Mr. HAYDEN.

INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. CRAMTON. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 10020) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1926, and for other purposes; and pending that motion I ask unanimous consent that the time for general debate be limited to six hours, if that is agreeable to my friend from Oklahoma, three hours to be controlled by the gentleman from Oklahoma [Mr. CARTER] and three hours by myself.

Mr. CARTER. That would be satisfactory.

The SPEAKER. The gentleman from Michigan moves that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of the Interior Department appropriation bill, and pending that asks unanimous consent that the time for general debate be limited to six hours, three hours to be controlled by himself and three hours by the gentleman from Oklahoma [Mr. CARTER]. Is there objection?

There was no objection.

The motion of Mr. CRAMTON was then agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. SANDERS of Indiana in the chair.

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent that the first reading of the bill be dispensed with. Is there objection?

There was no objection.

Mr. CRAMTON. Mr. Chairman and gentlemen of the committee, in August the President said, "I am for economy, and after that I am for more economy." However we may disagree as to many matters that were or were not decided at the recent election we must all agree that that declaration of the President has met with universal approval. [Applause.]

In the able and fearless and thoroughly sane presentation of affairs touching the state of the Union to which we have just listened, through the reading of the President's message, there stands out prominently that same declaration. The President has emphasized that this Congress can accomplish more for the people of the country through rigid economy than through any other action; that no person in the country escapes the effect of unnecessary expenditure or of extravagance; that every person shares in the benefits of reduction of taxes; and that the most important work we have is to make possible tax reduction. In the beginning of my remarks upon this first appropriation bill to receive the consideration of this session of the Congress I wish to emphasize that intimate relationship between expenditures authorized by appropriations and tax reduction. Tax reduction is not possible without reduction of expenditures. We ask your support in the economy program set forth in these appropriation measures.

Recognizing that this is the short session of Congress, with 11 appropriation bills to be considered, realizing that a due regard for efficient conduct of the Government as well as proper economy in expenditure demands the careful consideration of these matters, the forceful and energetic chairman of the Committee on Appropriations [Mr. MADDEN] arranged a schedule and started the various subcommittees to work on the several bills as early as advance proofs of the Budget estimates were available, and it is his purpose and the program of the committee, acting under his leadership, to bring these bills before you as rapidly as the House can dispose of them.

Accordingly, this, the first of the series, was reported to the House yesterday immediately after the formal presentation of the Budget.

Hearings began on the bill now before you on the 12th of November, in advance of the session, and the time since that date has been constantly occupied by the subcommittee in consideration of the estimates transmitted by the President.

A majority of the subcommittee have been in the study of these matters as members of the subcommittee for the past three years in the framing of the three former bills for this department.

My colleague, Mr. CARTER, ranking minority member of the subcommittee, as you know, formerly served a number of years with distinction as chairman of the great Committee on Indian Affairs, handling the appropriations for that service which are now so largely a part of this bill. The gentleman from Idaho [Mr. FRENCH] and the gentleman from Colorado [Mr. TAYLOR] have spent most of their lives in contact with these problems in our western country. The gentleman from Ohio [Mr. MURPHY] and I have been students at their feet.

COMPARATIVE FIGURES ON THE BILL

So that this bill does not come before you with slight consideration even though it is presented in the first week of the session. The bill carries all of the appropriations for the Interior Department and nothing else. The appropriations for that department for the current year, including those set forth in the deficiency bill that has just gone to the President and in the classification salary bill, totals \$268,959,114.80. In the estimates I speak only of the annual appropriations, with no reference to the permanent or indefinite appropriations. The estimates for 1926 are \$239,704,138.67. The bill that is now before you for your consideration totals \$238,240,926. That is a reduction of \$30,718,188.80 below the current year and \$1,463,212.67 below the estimate. Comparing the bill before you with the current year, the principal reductions are: for Army and Navy pensions, \$25,500,000; a reduction of \$4,297,520 for the Reclamation Service, \$1,046,011.30 for the Indian Service, and \$617,010 under the General Land Office. The following table presents a general view of the bill:

A comparative statement of the appropriations for 1925, the Budget estimates for 1926, and the amounts recommended in the accompanying bill for 1926

Object	Appropriations for 1925, including amounts in pending deficiency and field classification bills	Budget estimates for 1926	Amount recommended in the bill for 1926	Increase (+) or decrease (-), bill compared with 1925 appropriation	Increase (+) or decrease (-), bill compared with 1926 Budget estimates

This department is a great constructive department. Its problems are of great interest to the whole country. There are many matters that I would like to discuss, but in the limited time that I feel proper to take now I shall speak especially of some outstanding problems that faced the committee. I want to be perfectly courteous, and if I fail to make myself clear at any time I shall be glad to yield for a correction or for an inquiry, but in the main I hope that I may be permitted to proceed without interruption in the interest of economy of time.

The matters that I want especially to speak about have to do with steps toward economy in Government administration and steps to protect Government expenditures with regard to their proper use to secure the greatest benefit of the country. These problems are intimately involved in the program of economy that the President has set before us and that the country urgently demands. I hope that the House will regard the Committee on Appropriations in connection with this bill as their servants who have sought merely in the work we have done and now place before you to carry into effect the will of the country for the best administration, the greatest efficiency, and the greatest measure of economy.

ECONOMY IN THE GENERAL LAND OFFICE

I shall first discuss some problems in respect to the General Land Office. That great bureau administers our public lands. It handles very considerable revenues, as is shown here:

Statement of receipts, including fees and commissions, for the General Land Office for the fiscal year 1924

Salaries, General Land Office (copies of records).....	\$14,896.97
Salaries and expenses, offices of surveyors general (copies of records).....	5,590.50
Surveying the public lands (sales of Government property).....	603.36
Reproducing plats of surveys, General Land Office (sales of plats).....	4,373.00
Sales of public lands.....	551,339.00
Sales of Indian lands.....	389,088.97
Fees and commissions.....	684,650.98
Royalties, rentals, and bonuses, mineral leasing act.....	13,631,840.72
Sales of land and timber in Oregon and California railroad grant.....	978,710.78
Sales of land and timber in Coos Bay wagon road grant.....	148,761.00
Sales of reclamation town sites.....	8,697.32
Sales of town lots, Alaska.....	5,975.12
Royalties on coal leases, Alaska.....	9,161.83
Sales of timber, Alaska.....	8,930.58
Royalties and rentals, potash deposits.....	8,792.91

Power permits.....	\$9,110.61
Miscellaneous.....	25,223.57
Protecting public lands, timber, etc., as follows:	
Timber trespasses.....	\$25,349.07
By civil and criminal action in cases of depredations on public lands and violations of public land laws.....	30,924.02
	58,273.09
Total.....	16,403,928.06
Deduct amount recovered by Department of Justice by civil and criminal action in cases of depredations on public lands and violations of public land laws.....	30,924.02
Total receipts collected by the General Land Office.....	16,373,004.04

A comparative statement of the appropriations for 1925, the Budget estimates for 1926, and the amounts recommended in the accompanying bill for 1926

Object	Appropriations for 1925, including amounts in pending deficiency and field classification bills	Budget estimates for 1926	Amount recommended in the bill for 1926	Increase (+) or decrease (-), bill compared with 1925 appropriation
Salaries.....	\$885,920.00	\$805,000.00	\$805,000.00	-\$80,920.00
Inspection, expenses of.....	5,000.00	3,000.00	3,000.00	-2,000.00
Maps:				
United States and other.....	18,000.00	15,000.00	15,000.00	-3,000.00
State and Territorial.....	1,500.00	1,300.00	1,300.00	-200.00
Filing appliances.....	3,000.00			-3,000.00
Surveyors general.....	214,680.00			-214,680.00
Surveying public lands.....	792,820.00	840,290.00	840,290.00	+47,470.00
Reproducing plats of surveys.....	5,000.00	6,000.00	6,000.00	+1,000.00
Registers and receivers.....	315,000.00	125,000.00	125,000.00	-190,000.00
Contingent expenses of land offices.....	415,280.00	350,000.00	350,000.00	-65,280.00
Protecting public lands, timber, etc.....	526,400.00	420,000.00	420,000.00	-106,400.00
Hearings in land entries.....	15,000.00	15,000.00	15,000.00	
Restoration of lands in forest reserves.....	2,000.00	2,000.00	2,000.00	
Opening Indian reservations (reimbursable).....	1,000.00	1,000.00	1,000.00	
Total, General Land Office.....	3,200,600.00	2,583,590.00	2,583,590.00	-617,010.00

The total appropriations for the Land Office in 1925, the current year, were \$3,200,600. In the bill before you we recommend the sum of \$2,583,590, a reduction of \$617,010, or about 20 per cent. Within the control of the bureau are certain economies, which they have resolutely carried through. Take their salary roll, for instance, for the service in the city of Washington. It is sometimes charged that a department or a bureau will never do away with employees or reduce their rolls. Please note that the Land Office was authorized for 1924 for their service here in Washington 545 employees and for the current year 488 employees. Yet, notwithstanding that authorization, they are going to turn back this year of that fund \$70,000 unexpended. For 1926, 418 employees are authorized in this bill, a reduction of 127 from 1924 to 1926, or about 25 per cent. That is within their authority, and no assistance is required from Congress to accomplish that economy.

ABOLISHING LAND OFFICES

But there are some items where the assistance of Congress is necessary, and this committee has accepted the recommendations of the department with reference to those economies that they desire and in which they require the cooperation of Congress. I appeal to this House to give thorough support to the program of economy recommended by the General Land Office. There is involved in the matter, first, the question of abolishing numerous land offices, a question that has been discussed in past years and which this committee has for several years sought to accomplish as a measure of economy. The bill before you provides:

Registers: For salaries and commissions of registers of district land offices, at not exceeding \$3,000 per annum each, \$125,000: *Provided*, That the offices of register and receiver of such of the following land offices as may now have two officials shall be consolidated, effective July 1, 1925, and the applicable provisions of the act approved October 28, 1921, shall be followed in effecting such consolidations: Montgomery, Ala.; Anchorage, Fairbanks, and Nome, Alaska; Phoenix, Ariz.; Little Rock, Ark.; Los Angeles, Sacramento, San Francisco, and Visalia, Calif.; Denver, Glenwood Springs, Montrose, and Pueblo, Colo.; Gainesville, Fla.; Boise and Lewiston, Idaho; Baton Rouge, La.; Marquette, Mich.; Cass Lake, Minn.; Havre, Helena, Miles City, and Missoula, Mont.; Lincoln, Nebr.; Carson City, Nev.; Las Cruces, Roswell, and Santa Fe, N. Mex.; Bismarck, N. Dak.; Guthrie, Okla.; Lakeview, Portland, Roseburg, The Dalles, and Vale, Oreg.; Pierre and Rapid City, S. Dak.; Salt Lake City, Utah; Seattle and Spokane, Wash.; and Buffalo, Douglas, Evanston, and Lander, Wyo.: *Provided further*, That the following land offices are hereby abolished, effective July 1, 1925: Harrison, Ark.; El Centro, Eureka, Independence, and

The bureau presents a program of expenditures that represents a total reduction of 20 per cent in the entire cost of the bureau for the year 1926 as compared with 1925. That reduction is recommended by the bureau; it is recommended by the Secretary of the Interior, is recommended by the Budget and by the President of the United States. That is real economy, and so thoroughly has the committee appreciated that program as a real exemplification of what we have all been talking about in the campaign, viz, economy, that we have recommended the adoption of their estimates as they came to us in the Budget, making no change. The following table presents vividly this example of real retrenchment:

Susanville, Calif.; Del Norte, Durango, Lamar, Leadville, and Sterling, Colo.; Blackfoot, Coeur d'Alene, and Hailey, Idaho; Topeka, Kans.; Crookston and Duluth, Minn.; Jackson, Miss.; Billings, Bozeman, Glasgow, Great Falls, Kallispell, and Lewistown, Mont.; Alliance, Nebr.; Elko, Nev.; Clayton and Fort Sumner, N. Mex.; Dickinson, N. Dak.; Burns and La Grande, Oreg.; Bellefourche, S. Dak.; Vernal, Utah; Vancouver, Walla Walla, Waterville, and Yakima, Wash.; Wausau, Wis.; Cheyenne and Newcastle, Wyo., and their necessary personnel, together with such records, furniture, and supplies as may be necessary, shall be transferred to such of the land offices enumerated above and not abolished by this act as the Secretary of the Interior may direct, except that the records of the Topeka, Kans., Jackson, Miss., and Wausau, Wis., land offices shall be disposed of in accordance with existing law.

That means the abolition of 39 land offices and the abolition of the office of receiver at all other land offices, continuing those other offices in charge of a register only. These economies mean a saving of \$255,280, as follows:

	1925	1926
For registers and receivers (Interior bill).....	\$315,000	\$125,000
Field classification.....	60,280	
Contingent expenses.....	355,000	350,000
Total appropriations.....	730,280	475,000
Saving proposed.....		255,280

Please note that that change has the indorsement of the Commissioner of the General Land Office, Mr. Spry, a former Governor of the State of Utah, and of Doctor Work, the Secretary of the Interior, both from public-land States and well informed in respect to the problems of those States. It also has the indorsement of the President as a part of his economy program. I insert here a statement from the hearings, being that of Mr. Bond, the chief clerk of the General Land Office, who is probably as familiar with this question from a practical standpoint as anyone, because he has spent his life in the general land service and formerly was in a general land office, I think, in Montana or Wyoming. When asked about the effect of this reduction upon the service to the public Mr. Bond said that he was asked by the Budget Committee about that and told them that in his judgment it is a good administrative proposition, and he said that the public would not be adversely affected as to the service rendered to them. The following excerpts from his testimony before the committee will be of interest:

Statement showing district land offices proposed to be abolished, number of officials, acreage unappropriated, and unreserved lands and acreage embraced in unperfected entries, as of July 1, 1924; and entries made, entries perfected, receipts, and expenses during fiscal year ended June 30, 1924.—Continued

Offices which will remain:

Alabama: Montgomery.
Alaska: Anchorage, Fairbanks (ex officio), and Nome (ex officio).
Arizona: Phoenix.
Arkansas: Little Rock.
California: Los Angeles, Sacramento, San Francisco, and Visalia.
Colorado: Denver, Glenwood Springs, Montrose, and Pueblo.
Florida: Gainesville.
Idaho: Boise and Lewiston.
Louisiana: Baton Rouge.
Michigan: Marquette.
Minnesota: Cass Lake.
Montana: Havre, Helena, Miles City, and Missoula.
Nebraska: Lincoln.
Nevada: Carson City.
New Mexico: Las Cruces, Roswell, and Santa Fe.
North Dakota: Bismarck.
Oklahoma: Guthrie.
Oregon: Lakeview, Portland, Roseburg, The Dalles, and Vale.
South Dakota: Pierre and Rapid City.
Utah: Salt Lake City.
Washington: Seattle and Spokane.
Wyoming: Buffalo, Douglas, Evanston, and Lander.
Total, 45 offices.

Of this work the cooperation of Congress is asked. A large annual saving will result and we have assurance of the officials best qualified to speak that service to the public will not suffer.

SURVEYORS GENERAL

There is another matter in which the General Land Office asks the cooperation of Congress to secure economy. They ask that the office of the surveyors general be abolished and that the work heretofore handled by the surveyors general be

consolidated with the field surveying service. The bill contains this paragraph:

The office of surveyor general is hereby abolished, effective July 1, 1925, and the administration of all activities theretofore in charge of surveyors general, including the necessary personnel, all records, furniture, and other equipment, and all supplies of their respective offices, are hereby transferred to and consolidated with the field surveying service, under the jurisdiction of the United States supervisor of surveys, who shall hereafter administer same in association with the surveying operations in his charge and under such regulations as the Secretary of the Interior may provide.

Governor Spry, Commissioner of the General Land Office, thus stated the purpose of this:

Mr. SPRY. To bring the entire field surveying service under one administrative head and secure greater economy in operation the position of United States surveyor general should be abolished and the work of their offices consolidated with the field surveying service under the supervisor of surveys.

This change will result in an immediate and continuing annual saving of \$167,210.

Comparison of appropriations

	1925	1926
Surveying public lands, Interior Department.....	\$700,000	\$840,290
Surveying public lands, field classification.....	92,820	
Surveyors general, Interior Department.....	175,000	
Surveyors general, field classification.....	39,680	
Total appropriations.....	1,007,500	840,290
Total reduction.....		167,210

This question has to do with the important work of surveying the public lands.

Statement showing, in acres, area of public lands surveyed during the fiscal year 1924, also total area surveyed and unsurveyed on June 30, 1924.

As was stated to the committee by Governor Spry, the surveyors general were originally created under authority of section 2207, United States Revised Statutes, as district headquarters, from which the field work of surveying the public lands under the old contract system was administered. The act of Congress approved June 25, 1910 (36 Stat. 703-740), brought to a close the practice of having these surveys executed under contracts by authorizing the employment of a permanent corps of United States surveyors and engineers selected under competitive civil-service requirements. The change affected very materially the functions of these offices, and "since that time they have been a more or less unnecessary intermediate agency between the administrative and supervisory unit in the General Land Office and the field surveying organization, and should therefore, in the interest of economy and efficiency, be consolidated with the field surveying service as recommended in these estimates."

In the hearings Mr. Bond, chief clerk of the office, stated the bill carries enough money to handle the work efficiently.

The change involves only the abolition of political jobs and a consolidation of the work. In numerous western cities we have now side by side headquarters of the field surveying service and offices of the surveyors general. There is duplication of expense and lessening of efficiency. The surveyors general are political appointments, in the main filled by men without technical training. A few weeks ago one of them failed to cooperate with the Department of Justice in furnishing needed information from his records because his political friends were affected. The bureau recommends that this work be consolidated, that the political positions be abolished, and that there

be a unified technical service to carry on this important work. It occurs to me that in a bureau that is so rigorously enforcing economy in those branches where they have authority, it is incumbent upon Congress, if we are in earnest in this matter of economy, to cooperate with the General Land Office and bring about this consolidation that is at once in the interest of efficiency and economy.

ARMY AND NAVY PENSIONS

This bill carries \$197,000,000 for payment of Army and Navy pensions. That is \$25,500,000 below the appropriation for that purpose the current year and about \$17,000,000 to \$18,000,000 below the probable actual expenditures. The estimate last year was \$230,000,000 for the current year, which impressed the committee as higher than necessary, and while we wished to be sure of avoiding a deficit we felt safe in recommending a reduction to \$222,500,000, which was accepted by the House. When the bill was under consideration by the House I stated concerning this—

We do not agree with the Pension Office that \$230,000,000 is necessary for 1925. We went into the matter carefully and with more detail than I care to go into with you at this time, and as a result of our investigations we felt perfectly safe in reducing the amount to the extent of \$7,500,000. My personal opinion is, from such study as I can give the matter in my amateur way, that unless the laws should be changed the expenditures will likely not exceed \$215,000,000 in 1925. But we have wanted to be safe, although we have not gone to the extreme degree of safety that the bureau did in their estimates.

I have no desire to imperil any reputation that may gain me as a forecaster on this involved matter, but I feel assured the estimate sent to Congress of \$197,000,000 for 1925 is as low as it is safe for us to go.

In connection with this subject the following information in tabloid form will be of interest:

Pensioners of the different wars on the roll at the close of last fiscal year

	1924	Veterans	Widows
Civil War	399,951	146,815	250,341
War with Spain	101,142	85,038	13,206

World War	78	56	14
Total	525,539	248,116	270,194

Pensioners of the Civil War on the roll at the close of the last 15 fiscal years

Year	Soldiers	Widows	Minors, dependents, etc.	Total
1913	462,370	293,129	6,931	762,430
1914	429,354	292,343	6,432	728,129
1915	396,370	280,218	6,018	696,606
1916	362,277	286,080	5,650	654,007
1917	329,226	284,216	4,884	618,326
1918	298,808	288,815	4,170	591,793
1919	271,391	263,244	3,708	538,343
1920	243,520	286,844	3,365	533,729
1921	218,775	278,096	3,229	500,102
1922	193,791	269,245	3,039	466,075
1923	168,542	264,580	3,104	436,226
1924	146,815	250,341	2,795	399,951

Amount paid to pensioners, 1900 to 1924, inclusive

War of the Revolution	\$70,000,000.00
War of 1812	46,145,923.39
Indian wars	25,640,832.23
War with Mexico	56,545,304.31
Civil War	6,427,106,586.49
War with Spain	129,673,359.67
Regular Establishment	67,557,368.44
World War	168,538.79
Unclassified	16,513,425.54
Total	6,836,351,398.86

The number of claims to be filed this year is estimated at 100,000. The largest number ever filed in one year being 138,078 in 1921. In 1924 there were filed claims as follows:

Civil War veterans	21,822
Civil War widows	12,095
Spanish War veterans	56,127
Spanish War widows	4,215
Others	21,560
Total	115,825

The largest number of claims ever pending at one time was 99,100 in 1921. There are now pending 50,000 claims, and the work is practically current.

The largest number of pensioners was in 1902, when 990,402 were on the roll. There were 525,539 on the roll June 30, 1924.

The largest expenditure was \$263,012,500.18 for 1923 as against \$215,000,000 the current year.

The salary roll is 786 employees, the smallest force in over 40 years, 51 less than 1925, 201 less than 1924, and 329 less than 1917.

The oldest pensioner is 105 years old and is the widow of a veteran of the War of 1812. There were at the close of the fiscal year 1924, 33 widows of veterans of that war. The youngest is now 65. She married the veteran in 1883 when she was 23 and he 86, he having been a boy of 16 when in the service. If she lives to the age of 86, his age at their marriage, she will in 1945 be drawing pension as the result of her husband's military service 130 years before. You see something of the possibilities that come where patriotism, national gratitude, and romance are intertwined.

THE PATENT OFFICE

In the bill before you last year in reference to the item for the Patent Office, there was a plan worked out by the committee and the commissioner intending to bring the work of the Patent Office up current at the earliest possible time. Because of the time needed to organize the temporary force it was estimated that two years would be required, the fiscal years 1925 and 1926. That program was adopted and provisions made for it the current year. In order to complete that program and be able to hold the commissioner wholly responsible to his promise, it is necessary to give \$191,000 for the temporary roll for 1926, and we recommend that figure though \$36,000 above the estimate. Thereby he will be able to continue the force now organized for that purpose and be current by July 1, 1926.

These figures will be of interest in that connection:

Applications for patents, including releases, designs, trade-marks, labels, and prints

Year ended June 30—	
1914	81,539
1915	79,116
1916	80,621
1917	81,538
1918	73,307
1919	75,657
1920	102,940
1921	107,656
1922	113,674
1923	100,809
1924	99,653

PAYMENTS IN LIEU OF TAXES

There are some matters to which I desire to call your attention. First, there was in the estimate this item:

For payment of certain local taxes to the counties of Stevens and Ferry, in the State of Washington, on allotted Colville Indian lands, as provided by the act of June 7, 1924, \$115,767.67.

June 30—	Applications awaiting action
1914	22,283
1915	18,270
1916	16,559
1917	16,058
1918	14,709
1919	17,735
1920	34,355
1921	49,334
1922	67,367
1923	71,927
1924	62,645
Nov. 28, 1924	56,948

This office has an intimate connection with our industrial welfare, is self-sustaining, and the highest state of efficiency is imperative. The commissioner and his staff are making great efforts, as our hearings will fully demonstrate. The total receipts for 1924 were, net, \$3,042,276.22. The expenditures were \$231,065.15 above that figure, but the Patent Office has to its credit a net surplus of \$8,232,249.64 of receipts over expenditures to date.

INDIAN AFFAIRS

I want to discuss also the Bureau of Indian Affairs, a great bureau that has to do with the Government's relations and efforts for the Indian population totaling 346,902, a population that has been increasing of late years. It has the administration of the business affairs of those Indians, and the revenues belonging to the Indians collected by the Indian Service during the last fiscal year exceeded \$32,000,000. The Indians have individual and tribal property, which in 1924 totaled \$1,052,000,000, and in 1923, \$1,010,000,000. In other words, in a year the value of their individual and tribal property increased some \$42,000,000.

The largest part of the revenue for 1924 came from royalties and bonuses on oil leases on Indian lands, proceeds from the sale of timber on Indian reservations, and reimbursement accounts with Indians for livestock, farming implements, and other equipment.

The \$32,861,768 receipts of the Indian Bureau were deposited in the Treasury of the United States to the credit of the various Indian tribal funds, but a large part was later drawn out during the year and paid to individual Indians. The greatest distribution was to the Osage Indian Tribe of Oklahoma.

The total expense of the Indian Service from the Treasury, exclusive of tribal funds, for the current year is \$12,929,281, of which \$2,162,970 is reimbursable. In the bill before you there is a total of \$11,883,270 from the Treasury, a decrease of \$1,046,011.80 below the current year and \$493,757.67 below the estimates. The following statement gives a general view of their expenditure:

That was authorized by the following act:

An act to authorize the payment of certain taxes to Stevens and Ferry Counties, in the State of Washington, and for other purposes

Be it enacted, etc., That the Secretary of the Interior be, and he is hereby, authorized and directed to pay to Stevens and Ferry Coun-

ties, in the State of Washington, as taxes claimed by said counties under section 2 of the act of July 1, 1892, relating to the payment of local taxes on allotted Colville Indian lands, the following sums, to wit: To Stevens County, \$44,309.67; to Ferry County, \$71,458: *Provided*, That there may be deducted from said amounts by the Secretary of the Interior such sum or sums as he may find have been paid to said counties for Indian tuition; also the excess, if any, where the rate based on the value of Indian allotments may be found to be in excess of the rate on taxable land.

SEC. 2. That there is hereby authorized to be appropriated out of any money in the Treasury not otherwise appropriated, \$115,767.67 or so much thereof as may be necessary, for the payment of said sums to said counties, as provided in the foregoing section.

The report on that bill in the House carried this letter from the Secretary of the Interior:

DEPARTMENT OF THE INTERIOR,
Washington, February 5, 1924.

Hon. HOMER P. SNYDER,
Chairman Committee on Indian Affairs,
House of Representatives.

DEAR MR. SNYDER: The receipt is acknowledged of your request dated January 9, 1924, for report on H. R. 1414, Sixty-eighth Congress, first session, entitled "A bill to authorize the payment of certain taxes to Stevens and Ferry Counties, in the State of Washington, and for other purposes."

The claims of Stevens and Ferry Counties are based upon section 2 of the act of July 1, 1892 (27 Stat. 62), and no objection will be made to the enactment of H. R. 1414 into law.

The provisions of the bill are identical with H. R. 5418, Sixty-seventh Congress, first session, a favorable report upon which was made to your committee on May 16, 1921, in which reference was made to a report dated December 6, 1920, to the President of the Senate on paragraph 22 of the Indian appropriation act approved February 14, 1920 (41 Stat. 408, 432). These reports contain in full the reasons for favorable action.

Very truly yours,

HUBERT WORK.

The statement of the department that the claims were based on the act of 1892 would naturally disarm opposition to the bill. But investigation in our hearings developed that the act of July 1, 1892, provided:

SEC. 2. * * * set apart in the Treasury of the United States for the time being, but subject to such future appropriation for public use as Congress may make, and that until so otherwise appropriated may be subject to expenditure by the Secretary of the Interior from time to time, in such amounts as he shall deem best, in the building of schoolhouses, the maintenance of schools for such Indians, for the payment of such part of the local taxation as may be properly applied to the lands allotted to such Indians, as he shall think fit, so long as such allotted lands shall be held in trust and exempt from taxation, and in such other ways as he may deem proper for the promotion of education, civilization, and self-support among said Indians.

That is to say, it authorized these payments in lieu of taxes from the tribal funds, if sufficient was available. The act of June 7, 1924, provides for payment from public funds.

In the first place, the act of 1924 provides for \$115,767.67 to be paid, less the amount that has been paid for tuition of Indian children in the public schools in those counties. After inquiry we learned that the tuition amounted to \$26,000 and more, and the payment to the counties would need to be reduced accordingly. Further, the act of 1924 required that it should be ascertained that the rate of taxation that would be applied on these Indian lands was not to be at a higher rate than on other lands.

But there have been no steps taken to bring about the ascertainment of the truth as to that, so that in any event we are not ready to act upon this particular item. In the hearings Mr. Meritt said:

Referring to the inquiry about the report of the official who made the investigation regarding the claims of Stevens and Ferry Counties, in the State of Washington, you are advised that our records show that this report was transmitted to the Secretary of the Senate under date of December 6, 1920, and this report has not been returned to the files of this office. Careful investigation of the records of the Indian Office show that there has been expended for tuition of Indian children in Ferry County, \$18,263.37, and for tuition of Indian children in Stevens County, \$6,033.93. We have no information about "the rate based on the value of Indian allotments may be found to be in excess of the rate on taxable land." Any further information available from the files of this office desired by the committee will be gladly furnished.

But there is more involved in this than that. The act of 1892, as I have said, authorized the payment of these moneys

in lieu of taxes out of the funds of the Indians received from the sale of the ceded portion of the reservation. But the act of 1924, which it was said was to carry into effect the act of 1892, concerns a payment out of the Treasury, and not out of the funds of the Indians.

To make this appropriation of \$115,000, as authorized by the act of 1924, would be a precedent that if carried out logically would involve the Treasury in the expenditure of hundreds of millions of dollars, because there are probably a thousand counties in the West that are fully as much entitled to such recognition from the Treasury as are those two counties, as far as payment from public funds is concerned. And so the committee have eliminated that item from the bill.

INDIAN EDUCATION

There are said to be, according to the last available figures, Indian children of school age and eligible to the number of 80,906, and there were actually in school in 1924, 65,184; and the present actual attendance is 67,125. There were 4,071 more Indian children in school in 1924 than there were in 1923. There are about 2,000 more in school now than there were a year ago. They have, out of about 81,000, 67,000 in school.

Some of your sensationalists, who live upon their attacks upon the Government administration of Indian affairs, charge that there are so many thousand Indian children out of school, and they seem to feel that we have been terribly recreant in our duty to that race. But I have a statement by the Bureau of Education to the effect that nearly as great a proportion of all the children of the United States are also out of school. The bureau says:

Total children, white and colored, of school age, 28,627,201.

Of the total number of children of school age, there were enrolled in public schools 23,239,227; in private schools, 1,580,873; total, 24,820,100.

But your committee is highly appreciative of the importance of increased and improved facilities for education.

The committee for several years has been increasing the capacity of the Indian schools, and the bureau has been diligent in getting them into school, and it is probable that we have nearly reached the point where we have facilities for all the Indian children that can be put to school. At the same time there is a rapid growth in the appreciation on the part of the Indians of the educational facilities offered them.

TABLE NO. 2.—Indian and school population, number eligible for school attendance, number in schools, etc., and capacity of schools provided for Indian children during fiscal year ended June 30, 1924

States and superintendencies	Indian population	Number of school age	Eligible for attendance	Eligible not in school	Total in school	Total capacity in all schools
Grand total.....	312,702	87,627	80,906	15,512	65,484	73,065

¹ Report of 1923.

That has been increased since and will be further increased when current construction is completed.

The total in the pending bill for education is \$6,194,500 from the Treasury, well over half of the total expenditure of \$11,883,270 for the bureau.

CONSERVATION OF HEALTH

A second great agency in solving the Indian problem is through conservation of health. It is surprising that no specific

appropriation was made for the conservation of the health of the Indians until 1910, when \$12,000 was given. The amount was increased until in 1924 it was \$370,000. For the current year, by reason of the experience of members of the committee who had examined the conditions on the reservations and elsewhere, it was increased to \$500,000, and the bill before you further increases it to \$800,000, including the cost of field classification.

IRRIGATION ECONOMIES

There is a reduction of \$283,310 in the appropriation for irrigation and drainage on Indian reservations; \$178,910 of that reduction results from this one motive. Many of these irrigation projects, large and small, serve both the Indians and the whites who are either adjacent to them or who intermingle with them in their land settlements. The theory is that those white owners or lessees shall pay their share of the cost of operation of the project—a pro rata that should be fairly assessed to their lands. There was an act passed in 1914 which came to the attention of the committee—I had not known of it myself before—that authorized any collections of that kind to be used for the same purpose, and they would then become available until expended and be a species of revolving fund.

There has been nothing said about that and the practice has been to appropriate the full amount deemed necessary to operate and maintain these projects. Then during the year, if they did succeed in making collections from the whites, they had that; they were able to use first the appropriation that was limited to the specific year, and then they had the other funds to fall back upon if they should need it. We really have not known much about it, and this year when we tried to find out about it the information was so diversified in its habitat outside of Washington that the bureau here was not able to give us very complete information. They were kind enough to telegraph to the reservations, but even so the hearings do not give definitely the information we ought to have as to the cost of operation and maintenance, or as to the amount assessed against the white owners and lessees, and to the amount that reasonably ought to be assessed against them. The committee felt that we should know more about these things. We might have recommended the repeal of that provision of 1914 enabling them to use these funds. That is a custom that does not prevail generally as to governmental receipts. But it seemed desirable also to force a more active program of proper assessments of the charges against the whites to the white-owned and white-leased lands, to force a more active program of properly assessing and collecting such charges. So we tried in a rough way to deduct from the estimates required the amount that the white lands ought to contribute. These deductions are as follows:

Yuma	\$28,710
Fort Hall	25,000
Flathead	35,000
Blackfoot	7,000
Crow	24,000
Confederated Utes	24,000
Wind River	35,000
Total	178,710

As to these several projects the following summarizes the available information:

YUMA

Under works, 8,312 acres.
Indian, 2,800 acres; white owned or leased, 5,220 acres.
Operation and maintenance charges on whites, \$28,710. Estimate reduced that amount.

FORT HALL

Under works, 52,000 acres; cultivated, 30,517 acres.
Indian owned and not leased, 17,858 acres, of which 7,249 acres cultivated; white owned, 14,706 acres, of which 3,822 acres cultivated; white leased, 19,446 acres. Total, 52,010 acres.
Assessment, 1924, against white-owned lands, \$18,382.50; against white-leased lands, \$24,307.50. Total, \$42,690.
Amount collected, 1924, \$21,958.21.
Estimate, \$40,000; recommended, \$15,000.

FLATHEAD

Under constructed works, 105,000 acres, which is all assessed a minimum of 25 cents, \$26,250.
Actually irrigated, 34,500 acres, \$40,250; subject to additional assessment.
Cultivated by Indians, 2,226 acres; cultivated by whites, 32,274 acres.
Operation and maintenance, 1924, was \$35,000; personnel since reduced.
Estimate, \$45,000; recommended, \$10,000.

BLACKFOOT

Under constructed works, 20,900 acres.
Irrigated by 55 Indians, 292 acres; irrigated by whites, 3,549 acres. Minimum, \$2,061.75; additional assessments, \$5,323.50. Total, \$7,985.25.
Total operation and maintenance, \$12,492.37; minus, \$7,985.25. Total, \$4,507.12.
Estimate, \$12,000; recommended, \$5,000.

CROW

Under constructed works assessed at \$1.50 per acre, 1924, 53,000 acres.
Irrigated, 30,632 acres.
Irrigated by Indians, 8,076 acres.
Irrigated by whites, 21,956 acres.
Total assessment, \$79,500.
Total collections, \$11,039.
Operation and maintenance cost, 1924, \$77,707.75.
Mr. Reed says, page 853, ought to be cut down this year one-third or more. Hope to operate for \$40,000.
Estimate, \$40,000.
Recommend \$16,000.

CONFEDERATED UTES

Under constructed works, 77,195 acres.
Actually irrigated, 53,222 acres.
Irrigated by Indians, 8,646 acres.
Irrigated by whites—owned, 16,506 acres.
Irrigated by whites—leased, 28,070 acres (exempt).
1924, much assessed was extended.
1924, collected \$16,096.42 from white owners. 1924, collected \$1,700.36, canal carriage right capacity. Total, \$17,796.78.
Mr. Reed says, page 864, \$40,000 will cover operation and maintenance for 1926.
Estimate, \$40,000.
Recommend \$16,000.

WIND RIVER

Necessary to combine ceded and diminished, as no information available separately.
Under construction works, 55,000 acres.
Irrigated, 25,447 acres.
Indians cultivated, 7,693 acres.
White owned and leased, 22,299 acres.
Total assessments, at \$1.50 per acre, \$82,500.
Collected, 1924, \$12,052.
Cost of operation and maintenance, 1924, \$85,524.
Whites, four-ninths of \$85,000, \$37,000.
Balance for Indians, \$48,000.
Estimate, \$105,000.
Recommend, \$50,000.

The orders which are in effect from the department in all cases require, apparently, that those charges be paid in advance, so that we are trying to appropriate here enough to cover the Indians' share of the project for operation and maintenance, and it is up to the Indian Office to collect, and it is up to the whites to pay their share of the cost, in order to have the project properly operated. As I say, our information is not exact, so we have tried to err on the side of liberality for this year, trusting that in another year a full presentation will be made which will enable us to make a more complete disposition of the money.

THE COOLIDGE DAM

The bill carries an item of \$450,000 to commence construction of the Gila River Reservoir. This is the only new Indian irrigation project in the bill and is of much importance, planned to cost \$5,500,000 and serve Indian and white owned land and public lands, and was authorized by the act of June 7, 1924, with greater safeguards for success of the project and return of the construction costs to the Treasury with interest than has heretofore been the case.

The dam on the Gila River is to be 200 feet high and impound 760,000 acre-feet of water. The Indian lands served are those of the Pimas, historically peace loving and friends of the whites and followers of agriculture through irrigation for many centuries, and whose water rights have been greatly diminished through encroachments above their lands. Acting upon the suggestion of Representative HAYDEN, in whose district and State the project lies, the committee recommends the dam be hereafter known as the Coolidge Dam.

Pending a thorough examination of the whole subject, further construction in the Montana irrigation projects does not seem wise, and the estimates, restricted to operation and maintenance costs, are accepted with reductions based upon contributions by white owners and lessees as above referred to.

RECLAMATION PROBLEMS

Reclamation, stressed in the President's message you have heard read, is one of the greatest problems for the future of the West and therefore for the future of the country. The placing of men upon land which they themselves own and which they themselves till is the surest foundation for a democracy, and I am a great believer in the program of reclamation for the West. But my contact with it during the past three years and more—during which time I have visited nearly all of the great reclamation projects and during which time I have had charge here of the appropriations for carrying on the work—has impressed me with this fact: That the welfare of the West and the welfare of the country as bound up in the policy of reclamation demands that it is absolutely necessary that this whole program be now put upon a business basis. It must be taken out of politics. Projects must be selected not through political logrolling but upon the basis of merit and with reference to the opportunity there is for each project to succeed and make good. But there never was a time when we were more at sea as to what is going to happen in reclamation than now.

In this work \$150,000,000 has been spent. Some \$18,000,000 or \$20,000,000 has come back. Most of the rest is not yet due. We have provided liberally for accretions to the fund. Out of the amount which has been spent, \$106,990,339 came from the sale of public lands, but that source of revenue is pretty much gone, and during 1926 there is expected to come from that source only \$600,000. For the next fiscal year the principal source of increase for that fund, 1926, will be from oil-leasing royalties, \$7,000,000. The leasing act of 1920 provided that 52½ per cent of the receipts from that source should go to the reclamation fund, 37½ per cent to the States, and 10 per cent to the United States.

When I attempt to intimate that my constituents up in Michigan are interested in the economical and wise expenditure of these funds, the immediate response is that we do not need to worry; that we do not give any of that money; that it comes out of the reclamation fund. In the first place, any big, worth-while program of further extension, such as is demanded, will only be possible through taking more money out of the Federal Treasury, a part of it contributed by my constituents. But, more than that, the principal revenue which goes into that fund next year is \$7,000,000 from oil-leasing royalties. The States in which that oil lies have been pretty well recognized when we turn over immediately to them, without any expenditure on their part for supervision or enforcement of the law, 37½ per cent of all of the value of the oil that comes out of that Government-owned land, and we take 10 per cent for the cost of administration, 52½ per cent going into the reclamation fund. The Nation has an interest in the proper expenditure of the proceeds of our natural resources on the public domain. Where are they to get the money we are to appropriate for reclamation? Well, there is a balance of \$6,000,000 which they expect to have on the 1st of July. They expect to get \$600,000 from the sale of public lands during the year 1926; they expect to get \$7,000,000 from oil-leasing royalties, and \$10,000 from potassium and power royalties. Two million five hundred thousand dollars, when we are spending some \$6,000,000 or \$8,000,000 offhand, for construction. They expect to get back \$2,500,000 in construction repayment on a program which has been under way for 20 years.

Then for operation and maintenance repayments. The figures before us from the service, for the operation and maintenance of these projects for the next fiscal year, are \$3,000,000, and how much do they expect will be repaid to the fund just from operation and maintenance, an annual cost which ought to be taken care of annually? Two million five hundred thousand dollars.

The Bureau of Reclamation is forced to give us figures showing that there will be \$500,000 less repaid to the fund than is paid out of it for operation and maintenance alone. That does not sound very businesslike to me. The estimate in full is as follows:

Estimated funds available, fiscal year 1926	
Probable balance, July 1, 1925	\$6,110,000
Receipts from sale of public lands	800,000
Receipts from oil-leasing royalties	7,000,000
Receipts from potassium and power royalties	10,000
Construction repayments	2,500,000
Operation and maintenance repayments	2,000,000
Rentals of irrigation water	850,000
Power returns	350,000
Miscellaneous returns	550,000
	13,360,000
Total	19,470,000

Less:	
Repayment on loan from General Treasury	\$1,000,000
Budget, 1926	9,750,000
	\$10,750,000
Probable carry over, July 1, 1926	8,711,000

You recall the deficiency bill which passed this House last session and just yesterday received final action in another legislative body. You recall the circumstances under which that bill passed this House. It carried provisions in it authorizing the commencement of construction upon several new reclamation projects—the Owyhee, the Salt Lake Basin project, the Kittitas division of the Yakima, and a power plant for the North Platte. Most of those projects had never been recommended by the Interior Department or by the Budget, but items were put in the deficiency bill in another body for their construction. It carried also new general legislation. The old reclamation act provided for the repayment of this money, the cost of construction, in 20 years without interest, but the deficiency act which has just gone to the President provides for the repayment of the money not in stated annual portions but with reference to the gross crops produced upon the farms. We have got to keep books on all our farms out there and take a part and titling of their production each year.

Under this method it is estimated by those best qualified to judge that instead of this money for construction being repaid in 20 years without interest it will run from 35 to 40 years without interest, and as to certain of these new projects the director of the reclamation gave us to understand that probably the time to repay the construction costs as to one project, for instance, that was included in this deficiency bill, would be as much possibly as 138 years, without interest, and the money taken from the Federal Treasury.

I do not care where that money comes from; it is now a trust fund that we ought to handle with special care and with a view to the proper development of the great West.

This House did not believe in those projects being inserted in that way, a haphazard, political, logrolling method, and this House did not believe in the changes in legislation proposed. Some of us thought that the legislation went too far and some of us thought it did not go far enough. I undertake to say there is practically no one in this House that thinks that the legislation with reference to reclamation and so vitally affecting it is wise as it stands in the deficiency bill. But you remember, in the closing moments of the session, a great appropriation bill, that carried emergency appropriations for every branch of the Government, provided for the administration of the bonus, provided for many things vital to good administration, notice was served that that bill could not become law unless this political logrolling was permitted to succeed. In other words, the rule of force, rather than that of reason, was used to select new projects and make new law for this great problem of reclamation, in which we are trying to build for all the centuries to come a contented, land-owning people.

This subcommittee felt that in the present uncertain situation with regard to reclamation and its policies, we ought not to start any new projects, and hence an item included in the estimates with reference to the Spanish Springs project to cost some \$6,000,000 additional expenditure from the Treasury, was eliminated by us, not as condemnation of that project but because we believe the logical thing is to first adopt a policy with reference to repayments and land settlement and so forth, and after that make the appropriations.

There were other items for the Salt Lake, the Kittitas, and the North Platte. Especially as to the Salt Lake and the Kittitas, if we had been allowed to follow our judgment we would have omitted those items also until a new policy could be adopted by the Congress to govern them, but their beginning has been authorized in the deficiency act that just goes to the President. So the items for their further construction we have been obliged to approve, but have attempted to surround them with safeguards that we hope will meet with the approval of the House.

THE SALT LAKE PROJECT

As to these items that are before us, in the interest of conservation of time, I am going to discuss only two. First, the Salt Lake project, where something like \$375,000 was carried in the deficiency bill authorizing the project, and \$1,000,000, is in this bill. We have cut that \$1,000,000 to \$900,000 because of a reappropriation of \$100,000 that they will not be able to use from the other item.

As to the Salt Lake project. The original purpose of reclamation was to develop the public lands of the West; to provide cheap homes to settlers; to take care of reclamation

problems where several States were involved and the interstate rights might come into play; or tremendously large projects like the Boulder Canyon project, where many States are involved and the expenditure is enormous, or where other problems, such as power and its proper conservation for the public use came into play. The Salt Lake project, as I understand it, is this: An area of land, entirely in private ownership and entirely settled and under irrigation, has an insufficient water supply for the whole season. They desire to turn from field crops that mature early to garden truck, and so forth, which would require a longer growing season; but their water supply fails them in early July.

If the construction of a certain reservoir they can be given an additional water supply to carry them through the season. It is an additional facility for an agricultural section. It is an additional facility for many farms now in private ownership and under private cultivation. It is a desirable project, apparently. It is a good business matter, so far as these people are concerned, to have this additional facility; but, you know, up in my country if a farmer wants a silo or some additional facility on his farm he can go to the Farm Loan Board of the United States and can borrow the money for that purpose. The farmer has 40 years in which to repay or amortize the loan, with interest at $4\frac{1}{4}$ per cent, if I am correct. They are the terms on which my constituent would get that aid for an additional facility for his farm, but how is it proposed to give this facility to these farmers of Utah in the deficiency bill that has just gone to the President?

It is proposed to spend some two or three million dollars there and to get the money back in 35 to 40 years; or at the best, under the Warren Act, 20 years, if the work goes under the Warren Act. At any event, the loan is without interest. Now, what reason is there for that? Why for an area in private ownership, should the Treasury of the United States spend its money, on terms more or less vague and uncertain, to provide these private facilities? The only reason they turn to the Federal Government is that they are unable to finance the scheme themselves. All we put in the bill is a provision not unfriendly to the project but friendly to the Treasury and, we think, important to the full success of the policy of reclamation, a provision similar to that that my constituents would have to meet for a loan of this money up there for 40 years, with interest at 4 per cent—an amortization plan. We propose:

Salt Lake Basin project, Utah, first division: For construction of Echo Reservoir and Weber-Provo Canal and incidental operations, \$900,000: *Provided*, That any unexpended balance of any appropriation available for the Salt Lake Basin project for the fiscal year 1925 shall remain available during the fiscal year 1926: *Provided further*, That no part of this appropriation shall be used for construction purposes until a contract or contracts, in form approved by the Secretary of the Interior, shall have been made with an irrigation district or with irrigation districts organized under State law, providing for payment by the district or districts as hereinafter provided. The Secretary of the Interior shall by public notice announce the date when water is available under the project, and the amount of the construction costs charged against each district shall be payable in annual installments, the first installment to be 5 per cent of the total charge and be due and payable on the 1st day of December of the year following the date of said public notice, the remainder of the construction charge, with interest on deferred amounts from date of said public notice at 4 per cent per annum, to be amortized by payment on each December 1 thereafter of 5 per cent of said remainder for 40 years, or until the obligation is paid in full: *Provided further*, That the operation and maintenance charges on account of land in this project shall be paid annually in advance not later than March 1, no charge being made for operation and maintenance for the first year after said public notice. It shall be the duty of the Secretary of the Interior to give such public notice when water is actually available for such lands.

That policy was adopted last June by the House when it adopted the bill for the San Carlos Reservation in Arizona, where 80,000 acres were involved—40,000 belonging to the Indians and 40,000 to the whites. The House adopted a provision exactly in line with this provision with reference to the Salt Lake as to repayment and amortization, with interest at 4 per cent.

THE KITTITAS

Now, the other project is the Kittitas unit of the Yakima project. I have been on the project, and though I am not thoroughly familiar with it, I have some impressions concerning it and no unfriendly attitude toward it when we get around to a definite, businesslike line of procedure.

We have built a dam that stores the water, and they now ask us to spend some \$6,000,000 additional for canals to carry the water to this additional Kittitas unit. The land there is almost entirely in private ownership, as in the Utah project; but unlike that in the Utah project, it is not developed. There has been a little attempt at irrigation, but not much. In the main it is undeveloped but in private ownership. There again it seems to me that we ought to have a business policy. If we are going to spend \$6,000,000 we ought to have a definite provision for the repayment, and so we have the same provision in reference to repayment that was put in with reference to the San Carlos Reservoir and that we have inserted in the Salt Lake project. As in those we provide for the creation of an irrigation district, so that instead of doing business with the individual water users, as the Government has been asked to do in other projects, we require the land to be formed into an irrigation district. That will have this important result, that the charges collectible annually would be collected as taxes and then turned over to us by the district. So that if it is carried out the people of the Kittitas unit on this Yakima project would have the water brought down through the canal to the land and then turn it over to a local organization that would do the rest.

But there is another important feature. We suggest, further, to protect against exploitation, as the San Carlos bill provided:

That no part of the sum provided for herein shall be expended for construction on account of any lands in private ownership until an appropriate repayment contract in accordance with the terms of this act and in form approved by the Secretary of the Interior shall have been properly executed by a district organized under State law, embracing the lands in public or private ownership irrigable under the project, and the execution thereof shall have been confirmed by decree of a court of competent jurisdiction, which contract, among other things, shall contain an appraisal approved by the Secretary of the Interior, showing the present actual bona fide value of all such irrigable lands fixed without reference to the proposed construction of said Kittitas division, and shall provide that until one-half the construction charges against said lands shall have been fully paid no sale of any such lands shall be valid unless and until the purchase price involved in such sale is approved by the Secretary of the Interior, and shall also provide that upon proof of fraudulent representation as to the true consideration involved in any such sale the Secretary of the Interior is authorized to cancel the water right attaching to the land involved in such fraudulent sale; and all public lands irrigable under the project shall be entered subject to the conditions of this section which shall be applicable thereto: *Provided further*, That no part of the sum hereby appropriated shall be expended for construction until a contract or contracts shall have been executed between the United States and the State of Washington pursuant to its land settlement act embodied in chapter 188, Laws of 1913, as amended by chapter 90, Laws of 1921, and by chapters 34 and 112, Laws of 1923, or additional enactments, if necessary, whereby the State shall assume the duty and responsibility of promoting the development and settlement of the project after completion, including the subdivision of lands held in private ownership by any individual in excess of 100 irrigable acres, the securing, selection, and financing of settlers to enable the purchase of the required livestock, equipment, and supplies, and the improvement of the lands to render them habitable and productive. The State shall provide the funds necessary for this purpose and shall conduct operations in a manner satisfactory to the Secretary of the Interior: *Provided further*, That the operation and maintenance charges on account of land in this project shall be paid annually in advance not later than March 1, no charge being made for operation and maintenance for the first year after said public notice. It shall be the duty of the Secretary of the Interior to give such public notice when water is actually available for such lands.

We suggest measures to guard against speculative values in the land to protect the settler. When on the project I was assured any measure of this kind would be acceptable. We provide for State and Federal cooperation, and our suggestion is in accordance with the recommendation of a local committee of business men—I do not know whether they are all residents of Ellensburg, but several gentlemen of that section who have prepared a very interesting statement. Speaking of the sources of credit open to respective settlers, they refer to the Federal land act, the livestock association, the local banks and insurance, mortgage companies, and private individuals. Then they say:

The committee is of the opinion that in addition to these, special attention should be called to the statement on page 75 of the report relative to the land settlement law of the State of Washington. It is believed that the provisions of this law furnish a very important source of possible credits to settlers on the Kittitas unit.

The State of Washington has enacted a land settlement law to aid in the development of the State and the proper settlement of its land. It has something of a fund to be used for the purpose of extending credit to those who are developing the unsettled parts of the State. The pending bill proposes that the State of Washington and the United States shall cooperate in this work of reclamation as we cooperate in road building, and so forth.

The CHAIRMAN. The Chair will state to the gentleman from Michigan that he has occupied one hour.

Mr. CRAMTON. I will yield myself 10 minutes more, in which time I expect to be through. That cooperation will be along these lines: The United States would build the works, bringing the water to the land, and then we would deal with the reclamation district, and the State would supervise the settlement of the land and the financing of the settler.

That, we believe, would insure the success of the project and safeguard the return of our investment at some time.

That is just the beginning of the problem. The land has to be cleared and leveled and gotten ready, and it is not an immediate proposition that prosperity comes. It is hard work, and it is work where a man needs to know his business. Under the present law, as it stands, we choose these settlers by lot. The man who draws the lucky ticket gets the 40 acres of land. Of course, under that system we often get men who can not make a success of the development of the land.

VIEWS OF DIRECTOR OF RECLAMATION

The views that I am suggesting to-day are not radical. I do not think they are unfriendly to a proper reclamation development or to these particular projects. The director of the reclamation fund, Doctor Mead, is one of the greatest authorities in the country on that subject, and holds very similar views. He has had great experience.

Doctor Mead was formerly professor of rural institutions in the University of California and was recently chairman of the State land settlement board in that State and a member of the fact finding commission, etc.

Doctor Mead served as consulting engineer in Australia in the planning of irrigation and development and study of land settlement in connection with a commission appointed by the British Government.

He has had a life-long experience in irrigation administration, beginning as assistant State engineer of Colorado, then State engineer of Wyoming, then chief of irrigation and drainage investigations of the United States Department of Agriculture, chairman of the State Rivers and Waters Supply Commission of Australia, consulting engineer of the Interior Department and of a number of countries in which irrigation is an important problem.

Doctor Mead is a graduate in engineering and agriculture of Purdue University and of Iowa State College, a member of the American Society of Civil Engineers and other engineering bodies, and an honorary member of the American Society of Agricultural Engineers.

He made a statement in our hearings which will be found on page 991, and which I shall incorporate as a part of my remarks. We had asked Doctor Mead about the need of reclamation, whether the legislation in the deficiency appropriation bill which had just gone to the President was sufficient and whether under it he could go ahead safely in the development of these projects. The bill before us carried the words "if found feasible." He said that those words had reference not to the engineering possibilities, but to the enactment of further legislation. He told us that the legislation as sent to the President was incomplete. Doctor Mead says:

NEED FOR GENERAL REVISION OF THE RECLAMATION ACT

Mr. MEAD. I would like to express the belief that the future success of reclamation will be promoted by a complete revision of the reclamation act. Many things indispensable to the adjustment of project costs and to the prompt and successful colonization of the land are not included in the bill now before Congress. Among the matters which should have consideration are the following:

(a) The Bureau of Reclamation should have its duties and responsibilities more clearly defined. At present the bureau is a creation of the Secretary to enable him to carry out the duties imposed by Congress. The extent of the commissioner's authority and the policies which control the bureau change with the views of different Secretaries. Such an arrangement is not favorable to continuity of action or the carrying out of a long-time program of development. Giving the bureau definite authority and responsibility would relieve the Secretary of a burden that is destined to become far more arduous in the future.

(b) The time has come for considering requiring interest payments on the construction costs of all new projects. If this were done, it

would put reclamation on a business basis. It would end the favoritism that is now shown the owners of private land in the development of their properties with interest-free money. It would tend to stop the inflation of prices of unimproved land, which has been a continuing abuse in the past and has often prevented realizing the desirable social and economic purposes of the act. If interest is paid, it does not greatly matter when payment begins on the money spent on the works. They could remain the property of the Government until irrigators were ready to assume control, and if the interest rate were made low, say 3 or 4 per cent, no additional burden would be imposed on the settler of small means. On the contrary, it might improve his condition, as he now sometimes pays twice for his water right, once to the Government and again in high land prices and high interest rates on borrowed money.

(c) The increased cost of works and the large amount of money which has to be spent in changing unimproved land into habitable farms make the methods of colonization and farm development matters of first importance. Provision should be made for soil surveys, appraisal of prices of farms according to productive value, whether the land is the property of the Government or excess holdings of private owners. The qualifications of settlers should be scrutinized. There must be publicity to call attention to the opportunities of these projects and a farm development program to aid the beginner in his development. These things are necessary to bring under cultivation abandoned farms on old projects, check the unhealthy increase in tenancy, and insure the prompt settlement, development, and payment of charges on all new projects.

(d) This law ought to be an opportunity for home ownership for the settler of small means. If it is to be this, a fund must be provided from which advances can be made to help in the improvement and equipment of farms of selected settlers who lack all the capital required. We now appropriate immense sums of money to be repaid without interest, for the construction of works which improve the landed possessions of private owners, but we do nothing to help the farmer of small means become the owner of that land. Our terms of payment for works are the most generous of any country. Our aid to the settler and for farm development is the least. The time has come for a reversal of the objects of the Government's liberality.

(e) It is believed that the law should require State approval and State cooperation in the case of all new projects. This is now required in the building of highways and in agricultural extension. Doing this will bring to this complex task a knowledge of local conditions possessed by the State, will arouse the effort and interest of the people most concerned in the success of these new communities, and will lessen the burden on the Federal fund. Now the law not only does not require State effort but gives no opportunity for its exercise.

In his report which has just come to the Congress he emphasizes the seriousness of the situation when he says:

CHANGING CONCEPTION OF RECLAMATION

Discussions in Congress, official reports, and articles in the press all bear testimony to the fact that a change is taking place in our conception of what is needed to make national reclamation by irrigation a social and economic success. All are agreed that a lofty purpose animated the framers of the national reclamation act; yet all familiar with its history realize that not all the conditions under which it would operate were foreseen, and that the results are unlike those anticipated.

When this act was framed the country was still in the pioneer period of development; irrigation works as a rule were neither large nor costly, areas watered from a single project were not extensive, and settlement of these areas shaped itself without organization or plan except in particular cases like those controlled by the Mormon Church. It was the common belief that all that was needed to obtain irrigated farms and prosperous homes was to provide water by building canals and reservoirs. The sponsors of Federal reclamation believed it would be a simple matter to change arid, unimproved land into farms because they thought the settler would have virtually free land, and that water would be cheap because the irrigation works would be constructed by the Government without profit, and with interest-free money.

As a result of this conception, the act dealt almost entirely with the construction and operation of irrigation works. The obstacles settlers would encounter in subdividing the land, equipping farms, and meeting payments on water rights were not regarded as serious enough to require a place in the development program. Time has shown that this was a mistake. Land has not been free; a majority of the settlers had to buy their farms from private owners, in some cases at extortionate prices.

It is now known that the cost of changing 40 or 80 acres of raw land into a farm is not only much greater than was anticipated, but often equals or exceeds the cost of canals and reservoirs. It is beginning to be realized that development under important works requires a study of agricultural and economic problems and the work-

ing out of settlement and development plans if the land is to be brought under cultivation without disastrous delays and waste of money and effort.

In the 22 years of the act's operation, social and economic conditions in the arid region have undergone a revolutionary change. People are no longer willing to undergo the hardships or privations that once were a part of pioneer life or adopt the methods which enabled pioneers to succeed when land was free, when they had no debts for land and very small payments for water rights. Even if they were willing, these methods will not answer to-day when the farmer has to pay higher taxes, pay the higher irrigation charges, pay more for improving farms, and too often pay high interest rates on money borrowed to buy or equip his farm. The financial problems of land settlement have assumed an importance which did not exist 20 years ago and which as yet is only partly realized.

FACT FINDING

The committee organized and began its investigations on October 15, 1923. Its report was submitted on April 10, 1924, and was thereafter approved by the Secretary and the President, and transmitted to Congress.

Unfortunately it did not reach Congress until near the end of the session. Time was lacking to give adequate consideration to all the committee's recommendations. A bill (H. R. 9559, sec. 5) having for its main purpose the financial relief of settlers on existing projects has passed the House and is now before the Senate. This bill is based on the committee's recommendations, but does not include some that are of fundamental importance to future development. If enacted in its present form, it will authorize the following modifications in reclamation methods:

1. The annual payments on construction charges will be based on the average annual gross crop return; now they are based on a percentage of the project cost, fixed without relation to the productivity of the land.
2. Where lack of soil fertility, scarcity of water, or other adequate cause renders settlers unable to pay project costs the Secretary may make such investigation as will disclose the pertinent facts and report them to Congress with recommendations looking to a correction of the fault. The present law calls for repayment of project costs in full regardless of the value of the water made available for irrigation.
3. Operation and maintenance charges will be paid in advance, thus bringing Government practice in harmony with that of privately owned works. Such charges are now for the most part paid after the service is rendered.
4. The costs of the Washington office, including expenses of general investigations similar to the one undertaken by the committee, will be charged to the reclamation fund, but not to the water users, as at present.

SUCCESS OF FUTURE PROJECTS DEPENDENT ON FURTHER LEGISLATION

All the foregoing changes will be helpful in the operation of existing projects; but if legislation stops with these, the amended reclamation act will not provide a working plan for the development of new projects. The reason for this is the fact that many of the best opportunities for future reclamation are where the land is now privately owned. Under the grazing homestead act filings have been made on virtually all the land which can be irrigated, and much of this land is held in areas larger than homestead units and by people who have no intention of becoming irrigators if works are built.

It was never the purpose of the reclamation act to subsidize private owners by furnishing interest-free money to develop their properties, leaving them free to capitalize the Government's investment in reclamation works and add it to the price at which they sell their excess holdings to actual settlers. Nor was it the intention to improve arid estates by supplying water and then leave the owners of those estates to create a system of tenantry and rent the land on an irrigation basis.

Yet the law in its present form is conducive to both of these things and both have happened repeatedly. Lack of adequate authority has prevented the Bureau of Reclamation from adopting a coordinated or orderly subdivision and settlement of these privately owned properties. In too many cases high prices asked for land, held in large tracts before the Government works were authorized, have retarded settlement and agricultural development, have increased tenantry, and made the act an instrument for creating poverty among oversanguine and inexperienced farm buyers.

LEGISLATION RECOMMENDED BY THE ADVISERS

The evidence of the benefits of a coordinated plan of settlement was so convincing that the committee of special advisers sought to provide this. It proposed what seemed to it the only effective means, which was that the Government buy or secure absolute control of all the privately owned land held by any individual in excess of a homestead unit before works are authorized or development begun.

Recommendation No. 12 deals with this subject, was embodied in section 3 of a draft of a bill that accompanied the committee's report, and reads as follows:

"12. DISPOSITION OF PRIVATE LANDS IN EXCESS OF FARM UNIT

"That no reclamation project should hereafter be authorized until all privately owned land in excess of a single homestead unit for each owner shall have been acquired by the United States or by contract placed under control of the Bureau of Reclamation for subdivision and sale to settlers at a price approved by the Secretary. This price to be considered in determining what land and water will cost settlers and hence the feasibility of the project under the payment conditions of the law."

This was opposed by some who do not realize the difficulties in obtaining settlers under existing projects, public or private, and by others who regard land speculation as a legitimate feature of reclamation. Still others believed that the purchase of the land would involve too large an investment of money in a single project and would increase the complications of reclamation. For these reasons this section of the bill was omitted from the measure now before Congress.

If, however, control of settlement were made possible the bureau could go ahead with development, certain that the future settler could get his farm at its actual value. It could proceed to subdivide excess lands into farms of proper size, could adjust the prices of land to agree with productive values, and could give long-time payments with low interest. If the Government owns or controls the land in excess of homestead units, it can properly give liberal terms to farm buyers and make it possible to obtain settlers with small capital but equipped by character and experience to succeed. In other words, if plans for settlement and farm development are made a part of reclamation, the policy will be complete instead of stopping as it now does where engineering ends and agriculture and human welfare begin.

The advisory board framed other recommendations to accord with this control of excess land. One of the sections of the act provides that under new works construction charges would not be imposed until a period varying from one to five years after water was ready for irrigators. This is a desirable feature for harassed settlers trying to improve and equip farms, but it will open the way to abuses if it is to apply to excess holdings owned by individuals.

Taking part of the advisory board's legislation recommendations and rejecting part creates an unworkable plan. It is useless to apportion construction costs carefully if the owner of large project areas ignores these in fixing selling prices of lands to settlers. To let the owner of large holdings escape any payment of project costs for one year or five years, as is provided in subsection E of the bill now before Congress, will delay development and jeopardize some of the most beneficent possibilities of the act.

FUTURE DEVELOPMENT MUST BE SAFEGUARDED AGAINST LAND SPECULATION

The evidence placed before the advisory board was conclusive as to the need for safeguarding future development against the evils of land exploitation.

Unless the law is changed there is no reason to anticipate better results in the future. On new projects some landowners will look to reap their advantages from sales of land to settlers at inflated prices rather than from an increase in earning capacity.

If irrigators have to buy their farms from these owners, what will they be asked to pay for land? On one area where competent opinion fixed the value of land at \$5 an acre, one owner said his price was \$50 an acre. He believes that he can get \$45 an acre rake-off as his part of the benefit of Government construction. He sees nothing wrong in this. Nevertheless the wrong and the injury exist. Money that ought to be spent on improvements would go to make inflated land payments. The field officers of the Bureau of Reclamation would face the heartbreaking experience of seeing settlers work under conditions so discouraging as to give almost no hope of success.

MONEY MUST BE PROVIDED TO SUPPLEMENT SETTLER'S CAPITAL

Nowhere is early and successful closer settlement more important than under Government projects. On all new projects under consideration the existing population must be largely increased if the best results are to be obtained from the cultivation of the land, but it is becoming increasingly difficult to secure settlers equipped with means to develop homes on these new projects. A number of States realizing this have either enacted laws providing financial assistance to group settlement or are considering doing so.

NECESSITY FOR SAFEGUARDS

So the action of this committee and the restrictions we place about these particular items have been forced upon us by the necessities of the case. They are in harmony with the findings of the fact finding commission and the views of the Director of Reclamation. Legislation of a general character may come or may not. We have preferred to let all of these new projects await the enactment of a general, well rounded, well considered, businesslike plan, but our hands are forced. These new projects have been approved in the deficiency bill and it is now proposed to continue them. We are simply in this bill throwing a safeguard about the funds that we are asked to appropriate. I hope that the House will give very careful consideration to these matters. I hope especially that our action will

meet with the full approval of those gentlemen from the West who understand these problems so well, and who are so deeply concerned about their future.

The safeguards that we put in last year with reference to the Minidoka resulted in \$1,984,000 being placed in the Treasury, money that in the main would perhaps have come sometime much deferred, but included were from \$60,000 to \$100,000 of interest charges that never would have been collected except for those safeguards.

THE WILLISTON PROJECT

We propose in this bill certain legislation with reference to the Williston project, where about 1,000 acres receives water and the appropriation requested was \$105,000. But the main business carried on there is not irrigation but the operation of a lighting plant for the town of Williston, and in order to run our pumping plant to furnish electricity to the town of Williston we have got a Government coal mine in operation where we get our fuel. Each year we operate it, but we do not get back enough to pay the cost of operation and maintenance, to say nothing about construction costs. They are saying that if we will appropriate between \$15,000 and \$20,000 for more machinery they can pump the water a little more cheaply. We thought it all right for somebody else to try that, so we have left out any appropriation here for further operation or maintenance of the Williston project, and we propose to give the director of reclamation authority to lease or sell that plant on the best terms possible, an action on our part entirely in accord with his recommendation.

I greatly regret there is not time for me to discuss the problems and work of the Bureau of Mines, the Geological Survey, the National Park Service, and others, but I can not take more time now and I thank you for your patience. [Applause.]

PERMANENT AND INDEFINITE APPROPRIATIONS

Mr. MORTON D. HULL. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. MORTON D. HULL. The report makes a distinction between annual appropriations and permanent and indefinite appropriations, amounting to about \$28,000,000. Will the gentleman inform us generally what are the permanent and indefinite appropriations?

Mr. CRAMTON. The annual appropriations are those that are not effective unless we make them each year, and they are good for only one year. The permanent and indefinite appropriations go on until Congress stops them, and the report on page 34 contains a list of those. For instance, there is a fund for schools in Alaska, then there is indemnity for swamp lands to States, and then, for instance, the land-grant colleges get their money through an indefinite and permanent appropriation. These permanent and indefinite appropriations result from various acts of Congress in the past.

Mr. MORTON D. HULL. Does that mean that the appropriation is made to be drawn upon indefinitely until consumed or that it is an appropriation continued year after year?

Mr. CRAMTON. It is an appropriation that may involve money that is indefinite in extent, that will come into the Treasury during the year, and then the same act provides for its expenditure, perhaps, without any action of Congress. It may require action by a bureau or a department, but without action of Congress that money is paid out during each year in accordance with the original act. [Applause.]

Mr. CARTER. Mr. Chairman, I yield 25 minutes to the gentleman from Alabama [Mr. HUDDLESTON].

Mr. HUDDLESTON. Mr. Chairman, I ask unanimous consent to extend my remarks.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

CONSCRIPTION OF PROPERTY AND LABOR FOR WAR

Mr. HUDDLESTON. Mr. Chairman, the proposal to conscript property and labor for war is, upon the surface, highly attractive, but fundamentally it is vicious and illogical.

The proposal has for its avowed purposes to take the profits out of war and to strengthen the national defense. In reality it will do neither. On the other hand, it is open to the most serious objections. Its advocates appear to have dealt with the proposal in a purely objective, near-at-hand sort of way and not to have tried to think it out to the ultimate result or to visualize the consequences that it may ultimately produce.

CONSCRIPTION OF PROPERTY NOT A NEW IDEA

As an abstract proposition all will agree that there should be no profits made out of war. All will agree to the justice of the position that if men are to be conscripted for war, property

should also be taken. These ideas are not new. On July 9, 1917, in a speech which appears in part 8, volume 55, of the CONGRESSIONAL RECORD, page 479, I said:

It seems fundamental to me that there should be no profits in war; that neither financiers nor war contractors should be allowed to make money out of their country's misfortune and from human misery and suffering.

Men are being conscripted for the war. Why should not profits and incomes also be conscripted? What moral right is there in big business concerns to pile up swollen fortunes while the country is being bankrupted and bled white? This war should be paid for by those who are able to pay, by those who make a profit from it. They should not be permitted to come out richer than they went in, while the plain people come out decimated and impoverished.

I reiterated on numerous occasions that "no man should be allowed to come out of the war richer than he entered it."

But not always may abstract principles be made rules of action. My views remain the same as during the war. I realized then that it was impracticable to attempt to conscript property; that the final results of such an attempt would prove disastrous; that it were better to permit profit making than to try to stop it by such a means; that it would "be insane to burn the house merely to destroy the vermin."

WHAT THE PROPOSAL IS

The proposal for the conscription of property and labor is presented by several pending measures. Typical of them is H. R. 4841, a bill drafted by a committee of which the commandant of the Army War College, General Ely, was a member and probably the controlling influence. We may therefore accept this bill as showing the attitude of the military mind.

H. R. 4841 authorizes the President, when he considers war to be imminent, to conscript "material resources, industrial organizations, and services" at his discretion, and to fix prices for "services and commodities," both for public and private use.

The bill authorizes the conscription of men of all ages for labor in public and private works. It authorizes the conscription of men to labor for private persons and in privately owned plants from which the owners make profits.

Much was said at the hearings concerning the conscription of all property and of the entire population. But the bill does not so provide. It leaves all persons not required for service as laborers or soldiers free. It authorizes the fixing of prices upon essential services and commodities. It leaves producers and dealers in nonessentials to profiteer at will.

CONSCRIPTION OF PROPERTY AND LABOR

Not attempting to point out the many technical and minor faults of the bill, I prefer to discuss upon principle the proposal which it presents, to wit, the conscription of property and labor for war.

The reasons for my opposition to the conscription of soldiers have often been stated in the House. My position remains unchanged. I will not reiterate my views on conscription of soldiers, but will discuss the aspect of the proposal which contemplates the conscription of property.

However, I refer briefly to the proposal to conscript men for labor in public works and in private enterprises. The constitutional authority to conscript soldiers is found in the power granted Congress to raise armies. There is no provision which can be stretched into an authorization to conscript men for the performance of labor not connected with the production of war materials. The conscription of labor is therefore violative both of fundamental principles and of the clauses of the Constitution which protect civil liberties.

The conscription of labor, where the entire population is not drafted, is a violation of the principle of equality which the proposal professes to protect. Even if the entire population is taken, there is a resulting inequality unless all are placed at the same kind of work. Labor of all kinds is not merely labor, for some callings are more hazardous and some are less pleasant than others. To conscript a man to do hard, dirty, and monotonous drudgery is quite different from conscription for some light and interesting employment. To conscript a man to perform the duties of a calling which he has heretofore followed makes the rule of social maladjustment and inequality into an edict of law. Men follow the occupations which will bring them bread and do the work which they are able to find, and not all work is of equal desirability, nor are all tasks performed by those best fitted for them.

As to conscription of labor for private enterprises or for private advantage it is scarcely necessary to point out that this is merely a form of slavery. It is a slavery in which the master is not required to own the slave and has not the incentive of

selfish interest in his welfare and not even to recognize a tradition of a master's duty and honor. And such a system it is proposed to establish by starting with the workers of America.

A COMMUNISTIC ATTACK ON PRIVATE PROPERTY

The proposal to conscript property for war is a direct attack upon the institution of private property such as would be worthy of extreme communism. It is an attack from above and not from below. Constantly we are warned by the champions of property rights that there is danger that the propertyless multitude may strike at private ownership as an institution. Here we have an attack on property by the Government itself.

A precedent is established of subverting the owner's interest because of an emergency due to war. But war is merely one of many conceivable causes of national emergencies. Flood, famine, and plague may produce emergencies as great as war. If private ownership may be set aside for a war emergency, it may with propriety be set aside on account of other emergencies. And at last the principle being established it is left for those in position of decision to say what is an "emergency." The propertyless masses may conceive of an economic emergency arising from the collection of natural resources and wealth into the control of a few. The proletariat may find in the conscription of property for a war emergency a precedent for confiscation to remedy economic conditions. The attack on property, started from above by those who control the machinery of government, may yet be offered as an excuse for an attack on property from those dissatisfied with the distribution of wealth.

CONFERS POWER NO DESPOT HAS EVER DARED TO EXERCISE

The proposal authorizes the President to conscript property and men at discretion upon a finding that war is imminent. It confers upon the Executive power exceeding that ever given to a constitutional monarch and such as even a despot has never in the world's history dared to exercise.

Under the Constitution the President is Commander in Chief of the Army and Navy. By virtue of this authority already he may wage actual war, although Congress has refused to declare war. He may send our Navy to bombard seaports and our Army to invade nations with which we are at peace. The President having power to involve us in actual warfare, there is no check upon his authority other than the power of Congress to withhold the soldiers and supplies required to conduct a war.

With the power to conscript property an ambition-mad President might wage war against the overwhelming will of Congress and the people. With the country turned into an armed camp he might rule indefinitely as a military dictator. No Old World "war lord" ever had such power as it is proposed that democratic America shall concede to the President.

SUSPENDS THE GUARANTEES OF THE CONSTITUTION

It is fundamental in the American system that the Constitution remains in operation alike during peace and war and that its safeguards are never suspended. The authorization to conscript property and men upsets for the period of its exercise all constitutional safeguards. It suspends the functions of Congress and courts and throws the people upon the mercy of military authorities, of which the President is the supreme head, and who must regard his will as law. It establishes an absolute military autocracy to continue during the will of the dictator. With the Nation converted into a military camp and under a military régime there can no longer remain trial by jury, exemption from search and seizure, or any of the forms of civil liberty now guaranteed by the Constitution—all will be suspended, possibly lost beyond recall. The control which the President is authorized to exercise over men and property goes to this logical extent.

VIOLATES FIFTH AMENDMENT

It makes no difference whether the conscription of property takes the form of price fixing or of physical seizure and use, it is a taking of property. The war powers which, by construction, Congress is given, can not override the express provisions of the Constitution, which secure to the citizen actual possession of his property and the freedom to contract with regard to it.

It is very clear that the conscription of property for war or other emergency is a taking of property within the prohibition of the fifth amendment to the Constitution. It is clearly a violation of the fifth amendment and probably of other constitutional provisions.

Always I fear the entering wedge. If conscription of men for soldiers and workers is a proper exercise of the functions

of government, there is warrant for governmental concern to see that men are fit for the taking, and the Government may logically interfere in every detail of men's daily lives, to correct their habits, conduct, and practices to the end that they may be more efficient when conscripted.

If conscription of property is proper, then the Government is warranted in seeing to it that the most desirable property is available for the taking. And again there is no bounds beyond which officialdom may not go in meddling with the affairs of the citizen.

COLLECTIVISM AGAINST INDIVIDUALISM

The opposing schools of political thought are the individualists and the collectivists. The former hold that by the exercise of individual responsibility may the evolution and development of the race be best promoted. The collectivists regard society as a mass, a whole, and look for development through raising the general level, including the lowest and weakest elements.

The individualist holds that man has a natural moral right to govern himself, to order his own actions, to live his own life, and that no restrictions should be placed upon the individual except for the protection of the rights of other men. The collectivist is not interested in the individual and feels that he has no natural or moral rights inconsistent with the welfare of the mass.

It is undoubtedly true that our civilization is developing toward collectivism, and that the rights of the individual are held in diminishing regard. Conscription of men and property can be excused only upon the principles of collectivism. Unless we are prepared to accept in its entirety the philosophy of collectivism, we should oppose conscription in all its forms, or, if accepting anything of conscription at all, carry it no further than the occasion absolutely requires.

To conscript unnecessarily or merely to gratify a taste for abstractions is to strike at individualism. Conscription in any form is a step toward collectivism. This is illustrated by the proposal to conscript property, which follows logically upon the conscription of men. No one would have dared to make such a proposal had we not conscripted soldiers. That affords the excuse and the precedent for the conscription of property.

Those who object to Government ownership of railroads and other utilities should recognize that the proposal under discussion goes infinitely further toward collectivism.

CONSCRIPTION OF PROPERTY IMPRACTICABLE

The proposal is unworkable and impracticable. Conscription of property must take the form of physical seizure or of fixing prices. The major part of property is not useful for war purposes. If all is seized, the expense and the vast machinery required for administration will far outweigh any possible benefit. If only the useful property is seized, there will yet be waste, disorder, and difficult machinery to manipulate, with inevitable discrimination, favoritism, corruption, tyranny, and every conceivable governmental abuse.

To whatever extent property may be seized, there will result a corresponding social and economic disruption, with consequences of far-reaching extent and lasting long after the war has ended.

If there is conscription by the fixing of prices, the benefit, in any event, will probably not equal the harm which will be done. Prices are to be fixed for the period of the war only, with no account of the previous prices or prices after the close of the war. Again, there will be overwhelming disruption and confusion, which only the greatest war disaster would cause. The most serious economic aspect of war is the disrupting of the ordered channels of business activity. Governmental price fixing will greatly aggravate the economic disorder which follows a war and make worse that which must necessarily be bad.

The proposal is that "in case of war" the President shall be authorized to conscript. The authority is not contingent upon the strength of our adversary, but may be exercised upon war with some puny and ineffective power. He may exercise it in a war with the least of the nations if in his opinion it is desirable. We may therefore find a war deliberately provoked merely to bring this great power of the President into play, and find it exercised for reasons and under conditions never contemplated by Congress.

There are many who advocate peace-time price fixing for monopolized products or to prevent undue profits. The answer of their opponents is that freedom of contract is inherent in our system and fundamental. If, however, prices may be fixed because of a war emergency, they may with propriety be fixed because of any emergency or for other good cause.

In conscription by price fixing, a precedent will be found for price fixing at any and all times—and away with the freedom of contract.

WILL NOT TAKE PROFIT OUT OF WAR

To conscript property either by seizure or fixing prices will not take the profit out of war. It begins with the beginning of war or when it is imminent. Profits which have been made in anticipation are left intact. During the year and a half prior to our entry into the World War greater profits were made than during the period of the war. The year and a half following the signing of the armistice was a continuous orgy of profiteering and profit making.

Perhaps, after all, the profit makers most dangerous to peace are those who make a business of furnishing Army and Navy supplies between wars—the preparedness-for-private-profit element. Vast profits are made in times of peace by Army and Navy contractors. It is to their interest that there should be great armaments on land and sea, and they foster war scares and other movements for the increase of Army and Navy. Their activities tend far more to produce conditions which make for war than the alleged influence of those who expect to make money while the war is on. The bill does not attempt to reach the peace-time military contractors nor to take away their profits.

The advocates of the proposal agree that where property is seized or prices fixed the owners shall be allowed a reasonable return for its use or profit in its sale. Again, the opportunity for favoritism and corruption in the exercise of discretion in fixing the profit and return.

No class ever derives benefits from war comparable to the professional soldier—the officer who has chosen arms as a profession. With war comes his opportunity for distinction and for rapid promotion. In war the officer caste receives the highest social honors and respect with an accretion of dignity to its calling. The officer is honored and glorified, with a corresponding enhancement of influence and emoluments. Trained to arms, he naturally relies upon force and regards war as a reasonable and proper means for the settlement of disputes between nations. No scheme for deprofiteering war should omit regard for this influential class of war beneficiaries.

DEPRIVES PEOPLE OF POWER TO VETO WAR

The Government of the United States belongs to our citizens. It is the instrumentality by which they express themselves and work their will. The people have the right to govern this country, even to misgovern it if they choose. The people are the source of all authority and have the right to decide public questions. It is a natural and moral right belonging to our system. The people have the right to decide whether there shall be peace or war. To wage war against the deliberate will and judgment of the majority is an indefensible governmental usurpation. There should be no declaration of war not supported by the considered judgment of a substantial majority of the people.

It is practically impossible to have a worth-while referendum upon war. The institution of war under our system must be left to the legislative and executive branches. But there should always be left to the people an opportunity to express their will upon it. They should always have the power to veto the war by refusing to support it. One reason why I have always opposed conscription of soldiers is that it deprives the people of their opportunity for decision upon war by forcing them to serve whether they agree with the justice of the cause. I oppose conscription of property upon the same grounds. It is not only bad public policy and violative of democratic principles, but it violates the natural and moral right of the citizen to take his property for the support of a war waged against his will and for purposes which his conscience does not approve.

PACIFISTS—EX-SOLDIERS—MILITARISTS

Strange to say, the proposal to conscript property and labor has assembled as its advocates antagonistic groups such as pacifists, ex-soldiers, and militaristic advocates of preparedness. Each group supports the measure for separate reasons of its own, reasons which are faulty and illogical except as to the militarists, whose position is in part well taken for their purposes.

The pacifist theory is that it will discourage movements for war. This theory assumes that expectant profiteers deliberately cause wars so that they may derive profits therefrom. Such influences are the least of all factors in producing war. The prospect for profits is too remote and dependent upon too many contingencies, and the hazard of loss too great to move any substantial number, no matter how selfish and wicked

they might be. The profit makers are usually already men of property. Not all such men make war profits. Frequently they sustain heavy losses because of war. Profit making from war depends largely upon chance, the securing of contracts, the particular business in which men are engaged, and other factors which no one can foresee.

I fully agree that in the main wars are about property interests and their consequences are measured in terms of property, but the activities of profit makers most dangerous to the Nation's peace occur prior to war and only finally culminate in war. For illustration, financiers and industrialists advocate larger military forces so as to increase the Government's influence in imperialistic practices—in finding markets and opportunity for investment, and other means of exploitation of foreign fields. It is with no deliberate purpose to cause war that the financier demands of his government that he be given a share in a foreign loan, or that the Philippines be retained so that he may invest and trade. The war comes may be a generation later as the final and unforeseen result of governmental activity taken at his behest, and possibly by the war his investment and accumulations are lost. He did not will the war. Probably he will be dead when it comes.

All efforts to prevent or avoid wars which do not take account of the causes of war are wasted and vain. Wars can not be prevented by paper agreements. They are preventable only by dealing with their causes. Foolish indeed is the pacifist who hopes to avoid war by preparation for war, by organizing his country for war, by increasing its military strength and preparing to wage the most effective war. Such measures do but promote the war spirit and develop the "will for war" and the reliance upon force instead of upon right.

The ex-soldier, rankled by his own conscription, demands that property be put upon an equality with men. But let him reflect that among the conscripts themselves some were exalted and others thrust into the mire—there was no equality, for hundreds of thousands found the easier places and the easier way. Millions of others, for no sufficient reasons, were excused and exempted, and millions more were over or under age, and other millions were not conscripted because they were women. Under no possible system of conscription of soldiers can there be an equality of sacrifice.

Nor would the conscription of property produce equality of sacrifice, for never can the jeopardy of property equal the jeopardy of life, nor can the loss of property bring a pang equal to that of the soldier in the field. Equality of sacrifice, like equality of opportunity, is an abstraction and must remain a dream. In seeking it we must not enter upon impracticable and unsound schemes which will lead us far astray.

FAULTY LOGIC OF THE MILITARISTS

Of the groups supporting the measure only the militarists are sustained by a measure of logic. With conscription of men and property at the discretion of the military Commander in Chief, our Nation will be organized for war as never in all history was any nation before us. It will intimidate the nations, and will give us temporarily a preponderating strength. With 110,000,000 of population potentially under arms, backed by vast natural and industrial resources and an aggregate wealth of near 300,000,000,000, the nations will have cause for fear for our maneuver.

The nations will probably tremble temporarily. They will tremble until they themselves have put similar measures into operation. They will tremble only until by alliances they have restored their relative strength. Then we will be exactly where we began and the world will be camped on a field mined with deadly explosives.

It is the way of all "preparedness." It leads toward war, for it is preparedness for war and not for peace. Nations that arm themselves drive nations with conflicting interests to arms, and the more thorough the preparation of one nation the more thoroughgoing must be the organization of its possible adversaries, until with each increase in burden in the competition in armaments a point is finally reached when the burdens become more onerous than even defeat might be, and the pressure to put the contest to an issue becomes irresistible.

There is no "adequate preparedness." Its meaning comes to depend wholly upon the strength of possible combinations of adversaries, and as the preparation must be made "adequate" to each change in the condition of the adversary there can be no stability and nothing fixed, but always an increasing competition in the burdens of alliances and armaments. All for doing a vain and useless thing.

Again, war is not merely a matter of machines and automatics. The human element must not be overlooked. At last,

courage and love of country are necessary. Those who drive on and on with militaristic measures do not seem to realize that conscription does not make for love of country, that state slavery does not tend to produce intelligence, courage, and patriotism. In the long run the bravest men and the best soldiers are to be found among the freest men. Even with the world's brief experience with conscription it is demonstrated that conscript armies are not finally the most reliable. The test of a soldier is defeat. The free, the voluntary soldier, reforms and fights again, but the soldier who was driven to the trenches is freed by defeat and goes his way. The world never saw such military collapse as that which followed upon the defeat during the World War of the conscript armies of Germany, Austria, and Russia.

Therefore those who drive for conscription of men and property go forward to destroy the quality of the materials with which they would seek victory—as they sacrifice the liberties of the people for efficiency in war, they destroy the efficiency which they would promote. Conscription is not an instrument for permanent military success. Rather it is a means to final destruction and defeat.

WAR SHOULD BE OUTLAWED

I am in full harmony with those who would prevent war. I would join them in outlawing war and, failing that, in minimizing its horrors and its consequences.

War is a crime against civilization and humanity. It is the most stupendous folly of mankind. Few wars are worth what they cost, for the price of victory nearly always outruns any benefit which may be gained. Even in victory there is defeat, for in success are nearly always the seeds of eventual disaster.

War is never justified unless it be fought in defense of liberty. No people ever gained an increased measure of liberty for themselves by waging a successful foreign war. Frequently the vanquished are freed by the defeat which discredits their ruling class, and frequently conquest feeds a nation's pride in military prowess and causes the surrender of cherished liberties to the demand for more perfect organization. Defeated Germany, first to use conscript armies, substituted the rule of democracy for the autocrat, while victorious America turns toward gross materialism and submits to the indignity of conscription. [Applause.]

Mr. CARTER. Mr. Chairman, I yield 30 minutes to the gentleman from Mississippi [Mr. LOWREY].

Mr. LOWREY. Mr. Chairman and gentlemen of the committee, as we enter upon this course of legislation with the current appropriation bill there are a number of things we would do well to consider at the start. We have been in a national campaign of late. We have been talking economy, and I think we all believe in economy. I think we all really want economy. I doubt if there is a man in this House who is not honestly in his heart in favor of economy; but it is hard for us to keep from yielding on matters of this appropriation and that. Each appropriation perhaps in itself seems small, and yet they pile up into a large sum as we yield time after time to many unjustifiable and questionable items. We yield to the solicitation of this element and that among our constituents and to this class and that. The soldier boys want certain things; the Grand Army men want certain things; the postal employees want certain things; and these things one after another come, and we yield to the demand or the appeals of this class and that, and there is where we come in at last with our extravagance, I think, in legislation. I had hoped I would have a little time to discuss this thought, but I am going to pass on, because there is one item in this bill which I opposed a year ago and want to discuss a little further to-day. That is the item of \$400,000 and a little over to be appropriated for Howard University. Now, I want to say to all alike that I challenge any man in this House from any section of the country to be any more truly a friend of the Negro than I am. I have been raised with him and been his friend from the time we played around the doorstep in our dresses, when I was small enough to wear dresses. I have worked negroes under my direction for years. I never struck one a lick in all my life. I never had any trouble with one in my life, and they know, where I live, that I am their friend and that I want the best things for them and want them to get the best things for themselves.

Only a man who has had these years of association knows just how to be their friend. My opposition to this item in this bill is not from any unwillingness that the Negro race shall have the very best opportunity to make the very best possible of themselves and for themselves. I would not be guilty of trying to shut the door of hope or close the way to progress to any man or any race of men. I am a friend to

the negro. Now, you notice I say "negro." Booker Washington, I think, pretty nearly always said "negro" and not "colored person." His successor in a speech which he made at the Lincoln Memorial dedication said "negro" all the way through, and not "colored people." I received a copy of a paper published in New York by that race called, I believe, "The Negro World" and not "Colored Man's World." And at its masthead it said that it was devoted to the progress of the "Negro" race, and not the colored race. And I use the word not because I dislike the negro or want to use a term that is unwelcome to him, but, like one of the great men of his race, I think that it is the historic name of his race and one that he ought to be taught to be proud of and rejoice in and not be taught that his ancestral name is disgraceful.

And now in regard to the appropriation for the Howard University. I stated my view last year that it was contrary to our constitutional Government—that it was really an illegal appropriation for this House to make. As I remember, only one man of those favoring the bill undertook to answer that in any way, and he undertook to answer it entirely on an appeal to precedent by saying that this Congress has been doing this for 50 years. But he did not undertake to go into our Constitution and show that it was legal to make such an appropriation. I can say in answer to the proposition, that we have no right to appropriate to Howard University.

If so, we have a right to appropriate to George Washington University. We have a right to appropriate to the two Catholic universities of this city. We have a right to appropriate to any college in my State or in yours. And if this item is germane, then I would have the right to offer a bill to appropriate so much money to the Presbyterian synodical college of my district or to the University of Mississippi, which is in my district, and it would be as germane as this is. But certainly nothing could justify a thing so extremely doubtful, from the legal and constitutional standpoint, unless it were an absolute emergency. I am not admitting that even an emergency in the matter of the education of the negro would justify this Congress in appropriating money to an institution that in no way belongs to the Government. I do not believe that even an emergency would justify it.

But let us see whether or not any emergency exists. There are in the United States 653 schools for negroes, outside of our public-school system—colleges and high schools, boarding schools, and so forth. And, by the way, of the 653 schools over 600 are in the Southern States. This is an average of 36 schools each for 17 Southern and border States. Of those schools 294 are classed as "large and important" schools, and of those 294 classed as "large and important" schools less than half a dozen are outside of the Southern States. That is, they are where the negroes are more numerous, where negro schools would be most needed, and in that part of the country where they go entirely to their own schools. Under public control—of "large and important" schools—there are 28; and of land-grant schools there are 16 classed as "large and important," and they are mostly in the Southern States.

Of denominational schools there are 507, and 220 of those are classed as "large and important." Of this 220 only 3 are in the North. Two hundred and seventeen of these large and important denominational schools are in the 17 Southern and border States, which is an average of more than 12 such schools to the State already supplied to this race, and supplied by the philanthropy of the white friends of the negro or by the negro's own generosity. Then certainly there is no special emergency. Please let me stop here to say that the data which I am now giving is taken from Department of Interior Bulletin, 1916, No. 38, on negro education.

Let me run over the list of land-grant schools for a moment. There are—

Alabama Agricultural and Mechanical, Arkansas Normal, Delaware State College, Georgia State Industrial College, Kentucky Industrial Institute, Louisiana Southern University and Agricultural and Mechanical, Maryland Princess Ann Academy, Mississippi Alcorn Agricultural and Mechanical, Missouri Lincoln Institute, North Carolina Agricultural and Technical College, Oklahoma Agricultural and Normal University, South Carolina Normal Industrial, Agricultural, and Mechanical, Tennessee Agricultural and Industrial Normal, Texas Prairie View State Normal, West Virginia Collegiate Institute.

I could read over a further list. There are, in addition to these land-grant colleges, 11 State schools, colleges, universities, or normal schools supported by the States. It seems to me that we have gone far enough into that proposition to show that there is at least no emergency, and that the opportunity exists fully outside of the Howard University for the education of the Negro race, and that we can not make this appro-

priation on any claim that there is any emergency demand for it.

I think I shall take time to read over a little further statement. Alabama has a total of 74 schools for negroes, outside of the public-school system, colleges and boarding schools, and schools private and under State management, and so forth. Of these, 40 are classed as "large and important." Arkansas has 27, 12 of which are classed as "large and important." Florida has 27, 9 of which are classed as "large and important." Georgia has 70; 33 classed as "large and important." Kentucky has 18; 7 classed as "large and important." Louisiana has 65; 14 classed as "large and important." Mississippi has 47; 24 classed as "large and important." North Carolina has 76; 34 classed as "large and important." Oklahoma has 5, of which 2 are classed as "large and important." South Carolina 61, of which 27 are classed as "large and important." Tennessee has 32, of which 16 are classed as "large and important." Texas has 30, of which 18 are classed as "large and important." Virginia has 56, of which 27 are classed as "large and important."

I think those figures demonstrate the fact that we have no need of Federal appropriations to meet an emergency to give education to the colored people. Provision is amply made and amply made outside of Howard University.

Now understand, I am not opposed to Howard University. I approve the great campaign that is being made for its private endowment. I believe it can be endowed privately. I am willing to see it done that way. I have no fight to make on the institution or on that move. But when this Congress has appropriated money that now runs into the millions, and has given it splendid equipment, and has backed it for half a century, it does seem to me that with the provisions existing for the education of that race elsewhere there is no legitimate reason why we should step over our Constitution and step over the whole question of legality and make an appropriation from the United States Treasury, from trust funds committed to us for governmental purposes, for this institution.

Now, I am very sure that in the first place the Negro race themselves are amply able to carry on this institution if they see the importance of it and really want it. Their own estimate, as recently published, is that they own \$1,500,000,000 worth of property in the United States now and that they own 22,000,000 acres of land in the United States. I "hand it to them" that they have made such splendid achievements in the accumulation of property like that. But if they are not able to endow it out of their own splendid achievements, then there is the white philanthropy to which they can always resort.

By the way, it is interesting to note what a large number of these schools of which I have spoken are supported by the philanthropy of the white people. Three hundred and fifty-four of the 653 schools existing are supported by white denominational philanthropy, by the churches of the white race, and the white race has always shown itself ready to rally to the need of the negro when it comes to philanthropy in helping him in the matter of education. Recently you noted, I guess, that in this move to raise \$2,000,000, I believe, for Hampton and Tuskegee, one banker in New York has offered to start the subscription with \$250,000 in one gift. So the thing can certainly be met by philanthropy and without the need of our voting trust funds committed to us for governmental purposes in order to maintain an institution which I do not believe any man in this House doubts would be maintained if we did not appropriate another dollar.

It would be maintained when it was left to make its appeal to philanthropy, and if the same appeal is made to the people of this country that has been made to this House there is no need for this House to respond, because the people of this country will respond. And yet I am going to say—and I ask your attention especially to this proposition, and this does not mean I am not a friend to the Negro race, as I said—there is not a man here from Chicago, there is not a man here from Indianapolis, and there is not a man here from Philadelphia who does not know that what I am about to say is a serious fact.

At a luncheon in this city, given by one of the great commercial bodies of this city, citizens approached me and a prominent Republican Congressman from far north, up next to the Lakes, on the question of the franchise for the District. Now, note that I did not make the reply. My ardent Republican friend from up on the lake coast made the reply. He said: "Well, I will tell you, LOWREY, I do not know about that." He said, "I would be very slow to vote for a measure which would enfranchise this large number of negroes in the District of Columbia. I would be afraid of such a measure when there

is such an immense negro population in the District that would come near putting our National Capital under negro domination." Now, it was not this mean southern Democrat who said that; it was one of the most prominent Republicans on that side of the House, who lives up on the lake coast. He was afraid of any proposition which would tend to put our National Capital largely under the domination of the Negro race. And with the immense population that is here now and the continued population coming, I throw this out simply as a final statement, and I want somebody to consider it seriously:

Have we a right to continue to do things that will inevitably make our Capital City more and more a Mecca for a great influx of negro population? Unquestionably, a great institution, fostered and forever kept free, forever kept abreast, and forever kept open by the National Government in the National Capital, tends to make our National Capital a great Mecca for the Negro race. I do not believe there is a man in this House from North or South, Republican or Democrat, who would say he believes that is good for the National Capital or that that is good for the Nation. I believe every man before me, if he will meet the issue squarely, knows it is not good for the National Capital and it is not good for the Nation. [Applause.] And therefore we are doing very doubtful things when we legislate to make Washington more and more a great place for the influx and gathering of a great colored population—and it is growing more and more. It is now about one-third of the population of the National City. And while we would not oppress, and while we want to do those people justice, I believe every man of us, if he will look the thing squarely in the face and be honest with his own heart, must admit that we are doing our Nation a wrong, we are doing our Capital City a wrong, and we are doing the Negro race itself a wrong every time we pass legislation that tends more and more to place our National Capital under the domination of the Negro race, if they should be given the franchise. We are perilously near that now, because there are enough to-day to hold the balance of power in almost any election, if not enough to make a majority in any election.

Mr. Chairman, I shall not continue the discussion. How much time have I left?

The CHAIRMAN. The gentleman has five minutes.

Mr. LOWREY. I yield back the remainder of my time. [Applause.]

The CHAIRMAN. The gentleman yields back five minutes.

Mr. CARTER. Mr. Chairman, I yield 20 minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Chairman and gentlemen, another two years' cycle has rolled around, and we have all been back to and returned from the people whom we have the honor to represent. My only purpose in mentioning the facts which I intend to put before you is to furnish an encouragement to Members to take stands, not passive but active stands, against bills which do not appeal to their consciences.

There were several proposed measures in the past session which I fought actively and vigorously on this floor. One was the proposal to turn over Muscle Shoals to Henry Ford. I did not believe that was a sound measure economically. I did not believe the people of this Government ought to bind themselves to repair, maintain, and operate those dams, gates, and locks at their own expense for Henry Ford and his corporation for 100 years. I did not believe in it, and I saw fit to fight it with all the strength there was in my being, however much I regretted opposing so many of my friends on this side of the aisle who were strongly in favor of that bill, and I hated to incur their displeasure.

I also fought the McNary-Haugen bill, which sought to create another great wasteful corporation, and I opposed it even though it was called "a farmers' bill." It was a bill which, in my judgment, would have wasted \$200,000,000 out of the Treasury. That bill also provided for \$1,000,000,000 worth of bonds which this proposed corporation was authorized to issue and which the Government, of course, would have had to pay some of these days. I saw fit to fight that measure when I represent an agricultural district. I knew that if the farmers in my district misunderstood my position on that bill or misunderstood the measure itself I would be penalized and punished for standing against legislation which was claimed to be framed for the benefit of farmers.

I also saw fit to fight from the very beginning what I considered a socialistic, communistic measure, denominated the Howell-Barkley bill, sponsored by one of the finest colleagues we have in the House, the gentleman from Kentucky [Mr. BARKLEY]. But watching our friend here for several years, I had reached the conclusion that such proposal was not in

accord with the position he had maintained for years and I could not support the bill, and I helped to fight it, and I am glad to say that those of our colleagues whom I helped in the fight defeated it. I knew at the time that if I had done wrong in this respect the people at home would not again support me.

I am glad to know that the people back home have a right to pass on us every two years. I am glad to go back to them and submit my record every two years. It is a right they have, to pass upon us and our actions here. It is a right that should never be taken away. The people make mistakes sometimes, but they have an opportunity every two years to rectify mistakes. If they defeat a Congressman wrongfully, they have an opportunity to put him back in two years, and if they ought to defeat a man, they are given the opportunity every two years to do so, and I am glad they have that right.

I went down to my district with the kind of a record I have mentioned, knowing that every feature of it was going to be submitted to the voters of my district. It was submitted to them. Do not ever imagine that this particular Member can get by without a contest. There were men in my district who would have liked to keep me in Texas and out of Congress, and every vote that I had cast here along lines which apparently would be unpopular was submitted to the people, and they passed upon every one of them, and I am glad to say that the Democratic convention in my district went on record and approved these positions taken by me.

The young man who ran against me this year also ran in the preceding campaign two years ago, then making 40 speeches, after which he withdrew just before the primary. He had been secretary of the chamber of commerce of the great city of Brownwood. He had also been secretary of the chamber of commerce in the great oil city of Ranger. Before he again entered the race this year he came to Washington and got acquainted with nearly all of our Members, going to your offices trying to gather campaign thunder against me, but I do not believe that he was very successful, and then he went back to make his campaign. He established campaign headquarters in my home city of Abilene, selected campaign committees, effected organizations in the counties, and made numerous speeches, but he failed to know even how to get his name on the ticket in some of the counties. After he had made numerous speeches, and from his intensive campaign of the district realized his inevitable defeat, he put a little notice in the Fort Worth Star-Telegram, stating he had decided he could not be elected and would not conduct his campaign any further.

The next day the Ku-Klux Klan indorsed him. I did not belong. My opponent, Mr. Albright, did belong. They did not prefer my opponent, but they indorsed him because he was a Klansman and I was not one. From Abilene, Tex., where I live, the Ku-Klux Klan mailed its statement and its ticket embracing the names of its candidates. It mailed same just a few days before the primary. Same was mailed out from Abilene, Tex., on July 19, 1924, just seven days before the election was to come off on July 20, and it had on the envelope, as the return, post-office box 858, which box is rented by the Abilene Klan of the Knights of the Ku-Klux Klan. The following is this Klan statement, with its complete Ku-Klux Klan ticket, from United States Senator down to constable, and, as stated, they saw fit to recommend my opponent, Mr. Ernest G. Albright, for Congress.

Let me read this statement and ticket:

As a Klansman you know that the Klan is not in politics, and never has been, except when it has been forced to meet the assaults of the enemy. Certainly as between its enemies and its friends the Klan stays with its friends—nothing else could or should be expected.

"Self-preservation is the first law of nature."

"Self-defense is recognized both by nations and individuals."

Therefore it naturally follows that when a man announces for office in opposition to the Klan and at the same time threatens it with destruction loyal Klansmen will meet the attack and will, if the opportunity is afforded, vote for a Klansman or one who is friendly to the Klan.

We must know our friends.

We must know our enemies.

Fully mindful of the above we have patiently and diligently investigated the entire field of candidates and absolutely know the friends and enemies of the Klan. The election of Klansmen to the office means victory for the great patriotic principles for which we stand. Our defeat means victory for those seeking our destruction.

The enemies of the Klan are waging an uncompromising war on every candidate they know to be a Klansman or believed to be in sympathy with its principles.

We are therefore inclosing with this letter a ticket containing a name of the Klansmen and those known to be friendly to the order.

Certainly Klansmen will vote as they please, but believing, as we do, that loyal Klansmen will prefer to vote for their friends instead of those who seek their destruction, we most respectfully submit the names on ticket for your serious consideration.

We will have our regular meeting at the usual place Tuesday, July 22, and hold a rally at Fair Park Thursday, July 24.

Please attend both these meetings, especially the meeting Thursday, as matters of importance will be discussed.

KLAN TICKET

For United States Senator: MORRIS SHEPPARD, of Bowie County.
For governor: Felix D. Robertson, of Dallas County.
For lieutenant governor: Will C. Edwards, of Denton County.
For attorney general: Edward B. Ward, of Nuecos County.
For comptroller: O. D. Baker, Milam County.
For State treasurer: C. V. Terrell, of Wise County.
For State superintendent of public instruction: S. M. N. Marrs, of Travis County.
For commissioner of agriculture: Robert E. Sparkman, of Ellis County.
For railroad commissioner: J. C. Mason, Taylor County, six-year term; W. A. Nabors, Wood County, four-year term; Walter M. W. Splawn, Bell County, two-year term.
For chief justice, supreme court: William Clayton Wear, of Hill County.
For associate justice, court of criminal appeals: O. S. Lattimore, Travis County.
For associate justice, civil appeals, second district: Irby Dunklin, Tarrant County.
For Congress, seventeenth district: Ernest G. Albright, Eastland County.
For Senator, twenty-fourth district: Ben L. Russell, of Callahan County.
For Representative, one hundred and sixteenth district: W. S. Cummings, Taylor County.
For judge, forty-second judicial district: W. R. Ely, of Taylor County.
For district attorney: Milburn S. Long, Taylor County.
For district clerk: J. K. Fuller.
For sheriff: John Bond.
For county judge: Carlos D. Speck.
For county attorney: Thomas M. Willis or Frank E. Smith.
For county clerk: W. E. Beasley.
For county treasurer: Austin Pitts.
For tax assessor: Joe T. Perry.
For tax collector: R. A. McLain.
For county superintendent public instruction: M. A. Williams.
For surveyor: ———.
For county commissioner, precinct 1: Dave Booth.
For justice of the peace, precinct 1, place No. 1: M. C. Lambeth; place No. 2, P. B. Ford.
For constable, precinct 1: R. D. (Bob) Allen.
For public weigher, precinct 1: R. L. Young.

If you think this kind of an indorsement is not calculated to take votes away from a man, you are mistaken. If you think this organization is not strong down in my district, you are mistaken. I happen to know that some of the biggest preachers in my district belong to it. I happen to know that some of the most influential men in my city belong to it. I happen to know that one of my former campaign managers belongs to it [laughter and applause], yet the Klan was strong enough to put this indorsement of my opponent over in spite of him, although this former manager was a klegle in the organization. [Laughter.] That is how strong they were.

Let me read a little statement from my opponent which he put in the Comanche paper the week preceding the primary election. Comanche is the home city of a former distinguished Member of Congress who has twice opposed me in years past. Mr. Albright asked the voters of Comanche County to scratch my name from the ballot and put in his name, stating that he was in the race to the end.

The statement is as follows:

[From the Comanche Enterprise, July 17, 1924]

ATTENTION VOTERS

On account of some technical error my name has been left off the ballot in Comanche County for the office of Congress for this, the seventeenth district, and this is to notify my friends in Comanche County that I am in the race to the finish and will ask them to write my name on the ballot and then scratch the name of my opponent, the Hon. THOMAS L. BLANTON, who is running for the fourth consecu-

tive term. I will appreciate the support of each and every voter in Comanche County. Don't forget to write my name on the ticket when you go to make out your ballot.

Yours for clean politics,

ERNEST G. ALBRIGHT,
Ranger, Tex.

The following returns, officially certified, show that only 33 persons in Comanche County complied with his very urgent request:

PRIMARY ELECTION RETURNS FOR COMANCHE COUNTY, TEX., CONGRESSIONAL RACE, SEVENTEENTH DISTRICT

To Hon. FRED COCKRELL,

Chairman Democratic Executive Committee,
Seventeenth Congressional District, Abilene, Tex.

SIR: In accordance with the requirements of law, as chairman of the Democratic executive committee of Comanche County, Tex., I hereby certify to you the official returns of all votes cast in the primary election held in said Comanche County on July 26, 1924, for the office of Representative of the seventeenth congressional district of Texas, as follows, to wit:

Votes cast for THOMAS L. BLANTON..... 4,180
Votes cast for Ernest G. Albright..... 33

To the correctness of the above I hereby certify.

N. A. PALMER,
Chairman Democratic Executive Committee of
Comanche County, Tex.

Mr. Albright claimed to be a resident of Ranger, Eastland County, Tex. For several years he had been secretary of the chamber of commerce there. The following returns, officially certified, show that he received only 1 vote in Eastland County, and that was in his home city of Ranger:

PRIMARY ELECTION RETURNS FOR EASTLAND COUNTY, TEX., CONGRESSIONAL RACE, SEVENTEENTH DISTRICT

To Hon. FRED COCKRELL,

Chairman Democratic Executive Committee,
Seventeenth Congressional District, Abilene, Tex.

SIR: In accordance with the requirements of law, as chairman of the Democratic executive committee of Eastland County, Tex., I hereby certify to you the official returns of all votes cast in the primary election held in said Eastland County on July 26, 1924, for the office of Representative of the seventeenth congressional district of Texas, as follows, to wit:

Name of precinct	Number of precinct	Votes cast for Thomas L. Blanton	Votes cast for Ernest G. Albright
Eastland.....	1	1,457	1
Ranger.....	2	414	
Tudor.....	3	8	
Sabano.....	4	39	
East Cisco.....	5	359

Do.....	27	215	
Do.....	28	450	
Total.....		6,811	1

To the correctness of the above I hereby certify.

MILBURN MCCARTY,
Chairman Democratic Executive Committee
of Eastland County, Tex.

The following are the returns, officially certified, showing the votes cast in all of the 19 counties in my district:

CERTIFIED ELECTION RETURNS FOR THE SEVENTEENTH CONGRESSIONAL DISTRICT

I, Fred Cockrell, chairman of the Democratic executive committee for the seventeenth congressional district of Texas, do hereby certify

that the following is the official vote for Congress cast in said district in the Democratic primary election held July 26, 1924, as officially certified to me by the Democratic county chairmen of the 19 counties in said district, to wit:

County	Votes cast Thomas L. Blanton	Votes cast Ernest G. Albright
Brown.....	4,130	0
Burnet.....	2,111	0
Callahan.....	2,166	0
Coleman.....	3,001	788
Comanche.....	4,180	33
Concho.....	1,394	0
Eastland.....	6,841	1
Jones.....	4,374	6
Lampasas.....	2,271	0
Llano.....	1,719	0
McCluskey.....	2,127	380
Mills.....	1,090	0
Nolan.....	1,051	661
Palo Pinto.....	1,841	1,070
Randall.....	3,827	0
San Saba.....	2,441	0
Shackelford.....	1,364	5
Stephens.....	1,985	1,185
Taylor.....	3,007	812
Total.....	53,310	4,930

To the correctness of which I hereby certify.

FRED COCKRELL,
Chairman Democratic Executive Committee,
Seventeenth Congressional District of Texas.

ABILENE, TEX., August 23, 1924.

After the primary election was over, a Democratic convention was held in my district. It was composed of delegates selected by the Democrats of the 19 counties of my district. They are not very dissimilar from your constituents. If you Republicans, even, were to go down there and you did not have pointed out to you which were Republicans and which were Democrats, you could not tell many of them apart by looking at them. [Laughter.] They are business men just like you are and like my colleagues on this side of the aisle. They think and act like you do in many respects. If you leave out this infernal tariff and this infernal ship subsidy and this infernal way of conducting Cabinet offices by Republican Cabinet officials, they think like you, and they act like you in many respects, and they are in favor of the same kind of legislation in many respects that you are in favor of. There is not such a very great dissimilarity. My district joins the district of my good friend and former State senator, the gentleman from Texas [Mr. HUDSPETH], and he can vote with you even for that infernal tariff bill and yet come back here with an almost unanimous vote from his district. I want you to notice what this Democratic convention said. I want to get before you the indorsement of the positions I have taken on the questions and the issues which have been brought before us on the floor of the House.

Mr. HUDSPETH. Will the gentleman from Texas yield?

Mr. BLANTON. I yield.

Mr. HUDSPETH. My colleague voted for the infamous emergency tariff bill, did he not?

Mr. BLANTON. Yes; to meet the agricultural emergency because it was the only protection possible to the producers of this nation—their only salvation. [Laughter and applause.] But I did not vote for the Fordney tariff measure that followed it. Mr. Chairman, I will ask that the Clerk read the action of said Democratic convention which met in my district on August 23, 1924, which resolution I send to the Clerk's desk.

The CHAIRMAN. Without objection the Clerk will read. The Clerk without objection read as follows:

The committee on resolutions, duly appointed for the Democratic congressional convention, composed of Lloyd B. Thomas, Mrs. Laura Cook Mitchell, Dr. Lou W. Hollis, Jr., R. G. Cogdell, and Judge E. N. Kirby, presented to the convention the following resolution:

Whereas, in the Democratic primary election held July 26, 1924, Congressman THOMAS L. BLANTON, of Abilene, Tex., received 53,310 votes, while his opponent received only 4,930 votes, demonstrating conclusively that said Congressman THOMAS L. BLANTON has practically the unanimous support and indorsement of his constituents: Therefore be it

Resolved by the Democrats of the Seventeenth Congressional District of Texas in convention assembled—

(1) That we do hereby heartily indorse said THOMAS L. BLANTON and his work in Congress;

(2) That we commend said THOMAS L. BLANTON for his untiring efforts in making a personal survey and investigation of expenditures made by all the various bureaus and departments of Government, and his fights to eliminate all waste and extravagance from their appropriations;

(3) That we commend said THOMAS L. BLANTON for his incessant fights against the practice of sending out free garden seeds under the franks of Senators and Congressmen, which resulted in abolishing such petty graft, thus saving to the people \$360,000 each year;

(4) That we commend said THOMAS L. BLANTON for the fearless fights he made which resulted in a law being passed by Congress preventing Senators and Congressmen from buying anything but necessary office supplies from the stationery rooms;

(5) That we specially commend the said THOMAS L. BLANTON for the uncompromising fights he has made to free the people of the United States from the unjust burden of paying a large per cent of the local civic expenses of the 437,000 people of Washington, and for his continued insistence that the ridiculous tax rate of only \$1.20 on the \$100 enjoyed by said Washingtonians at the expense of the whole people shall cease and that the Government shall pay no part of said expenses until said people of Washington shall themselves pay a reasonable rate of taxation of at least \$2.75 on the \$100, which is less than the people anywhere else in the United States have to pay, and concerning this we demand action by our Senators;

(6) We commend THOMAS L. BLANTON for his fight against the bill which sought to turn over to Henry Ford's corporation for 100 years our \$100,000,000 Muscle Shoals power plant, obligating the people to maintain and operate the dams, gates, and locks for 100 years at their own expense with no adequate remuneration therefor;

(7) We commend said THOMAS L. BLANTON as the recognized leader in Congress of the American open-shop movement, guaranteeing to every person the right to labor without being forced to join and pay dues to a union. We know him to be the loyal, dependable friend of every man who labors. We indorse the fights he has made against the provisions forced by labor leaders into the Army and Navy appropriation bills prohibiting the Government from exercising rightful supervision over the work done by its thousands of employees in arsenals and navy yards, and we demand of our Senators that they shall give him cooperation and help along this line;

(8) That we commend said THOMAS L. BLANTON for leading the fight against the pernicious Howell-Barkley bill, which sought to eliminate the public's representation at the council tables and sought to tax the public with paying \$7,000 salaries to 40 board members, allowing them unlimited employees at unlimited salaries, with no enforcement of said board's decisions; and

(9) That we commend the said THOMAS L. BLANTON for the fight he made against the McNary-Haugen bill, which was a sham and a fraud upon the farmers of America and which would have wasted a \$200,000,000 appropriation and an additional \$1,000,000,000 authorized bond issue, to have been dissipated by a corporation, and which measure undoubtedly would have placed on the Government pay roll an additional 50,000 Federal employees with little assurance of relief to farmers: And be it further

Resolved, That our Congressman is hereby assured that in his future endeavors he has the confidence, good will, and commendation of practically a unanimous constituency, who will heartily support him in all of his fights for the people.

Same was unanimously adopted.

R. W. HAYNIE,
Chairman of Convention.

Attest:

Mrs. CLYDE FULWILER,
Secretary of Convention.

Mr. BLANTON. Gentlemen, I bring these facts before you, as I say, to let you know that you need not be afraid to present issues of this kind before the people of the United States. I have been at the head of organized labor's black list. When organized labor gets up in the gallery through its high-salaried leaders and demands of us something that is not sound economically, something against the best interests of the whole people of this Government, we do not have to vote for it simply because they threaten us with defeat. When they demand anything that is proper I support it. I have never denied them support of any measure that I thought was proper. Whenever it is not selfish class legislation, when it is not detrimental to the interests of the whole people, I give it my hearty support. It is only when they demand something improper that I stand up, look them in the face, and tell them when they sit up there in the gallery that I am going to vote against them, and they can go into my district and let my people know about it.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BLANTON. I ask for two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BLANTON. Just to show that I support proper labor measures I want to put before you the following statements from two leading organizations in Washington.

The statements are as follows:

CITY FIRE FIGHTERS' ASSOCIATION OF WASHINGTON, D. C.,

Washington, D. C., June 24, 1924.

Editor DAILY REPORTER,

Abilene, Tex.

DEAR SIR: Congressman THOMAS L. BLANTON has proven himself to be the loyal, dependable friend of every member of the City Fire Fighters' Association of the District of Columbia.

Not only did he champion and help to pass a bill giving all firemen here a living wage, but also he was the author of a measure, which he fought for until he got it approved by the committee and passed by Congress, which gives to all firemen here one day off each week in lieu of Sunday.

The 700 firemen of Washington, D. C., are all his friends, and we want Congressman BLANTON's constituents to know that we appreciate his efforts in Congress.

While he fights against all waste and extravagance, he is always willing to help meritorious legislation.

Capt. EDWARD O'CONNOR,

President City Fire Fighters' Association, Washington, D. C.

POLICEMEN'S ASSOCIATION OF THE DISTRICT OF COLUMBIA,

Washington, D. C., June 16, 1924.

NEWSPAPERS, Abilene, Tex.

GENTLEMEN: Through you we want to express to the constituents of Congressman THOMAS L. BLANTON our appreciation of his loyal friendship and his valuable efforts in our behalf.

He gave his hearty support to our bill giving a living wage to the Metropolitan police of Washington, and he was the author of a measure granting to every policeman in Washington one day off each week in lieu of Sunday, which will be a boon we have never enjoyed before, and Congressman BLANTON fought for same until he got the committee to approve it and Congress to pass it.

We want you and his constituents to know that the 1,030 members of the Metropolitan police of Washington, D. C., highly appreciate the service your Congressman is giving the people. When he gets behind a bill you may be sure that there is no graft or waste or extravagance in it. We are his friends and he is ours, and we indorse him.

Feeling that you would be pleased to know of our feeling toward Mr. BLANTON, I am,

Very sincerely yours,

MILTON D. SMITH,

President Policemen's Association.

Mr. BLANTON. Now, we are going to have the Howell-Barkley measure before us again if newspaper reports are accurate. We will have to pass on that measure again, not with an election intimidating us but with the people's mandate against the bill staring us in the face. We are also going to have another so-called farmers' relief measure brought before us, and I hope our Committee on Agriculture will see to it when they bring in another bill before the House and seek its passage, that they will have a measure of proper relief for the farmers, and not a sham—with all due respect to the men who reported it—the McNary-Haugen bill. I hope that when the President seeks to whip in line some of our good friends over on the Republican side into giving Muscle Shoals to Henry Ford, I hope the distinguished leader of the majority will stand up there and tell the President and the country that whenever Henry Ford or any other Republican—and I say that advisedly—gets Muscle Shoals, he is going to pay dollar for dollar for it in value to the American people. We are going to have the Cape Cod subsidy up again. You have not got an election staring you in the face now. Our President recommends that we give the money over to these people. You do not have to do it unless you want to; if you do not believe in that legislation you have a right to stand up and tell the leader that you are not going to support him.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. CRAMTON. Mr. Chairman, I yield 20 minutes to the gentleman from Washington [Mr. SUMMERS].

THE LONG AND THE SHORT OF IT

Mr. SUMMERS of Washington. Mr. Chairman, during the development of our great railroad systems innumerable unjust discriminations in passenger and freight rates were made between individuals and localities.

The interstate commerce act was passed and the Interstate Commerce Commission was created 37 years ago for the purpose of securing to all the people of the United States just and equitable passenger and freight rates, and for other purposes.

The fourth section, or rate section, of the act has been the bone of contention from that day till this. It has been amended several times. Each time the language was ambiguous. It has been the subject of much litigation. Each decision has left many questions unsettled.

This ambiguous fourth section of the interstate commerce act has largely occupied the time of the Interstate Commerce Commission during all these 37 years.

Section 4 has cost communities, railroads, and the Federal Government multiplied millions of dollars for "hearings" during this 37-year controversy.

The discriminations and violations under section 4 have cost the shippers and consumers of this country not millions but hundreds of millions of dollars.

These violations have throttled water transportation, have nullified section 500 of the transportation act, which provides that—

It is hereby declared to be the policy of Congress to promote, encourage, and develop water transportation, service, and facilities in connection with the commerce of the United States, and to foster and preserve in full vigor both rail and water transportation—

have made the expenditure of \$1,200,000,000 for the construction of canals and the improvement of rivers and harbors almost useless.

Till this fourth-section controversy is settled it scarcely seems advisable that we make further appropriations for water transportation.

What is the present situation? A member of the commission testifies millions of applications are now and for 13 years have been pending before the commission. Applications have been granted without hearings because of lack of time.

A few months ago a new application for more exasperating discriminations was filed and is now pending.

The object of this last application is clearly to close the Panama Canal so far as United States commerce is concerned.

THE REMEDY

What is the remedy? During the closing days of the last session of Congress the Senate passed Senate bill 2327, the Gooding bill, the purpose of which is to stop further discriminations and to save water transportation from utter destruction. This bill is now before the House Committee on Interstate and Foreign Commerce. We seek and believe we are entitled to immediate hearings. Since exhaustive hearings have already been held by the Senate committee, we hope our own committee will report the bill out before the holidays.

MAP AND CHARTS

The map and charts before you tell the story graphically of present discriminations and of some others sought in the pending application.

Northwestern discriminations

Dry goods, carloads, from Chicago to—	Miles	Present rate	Proposed rate
Detroit, Minn.....	613	\$1.10	-----
Steele, N. Dak.....	812	1.58	-----
Seattle, Wash.....	2,314	1.58	\$1.10

If this violation of the fourth section is permitted, Detroit, Minn., which is only 613 miles from Chicago, will pay the same freight rate that the merchant 2,314 miles from Chicago pays.

The consumers out in North Dakota will pay a higher rate than the merchant 1,500 miles farther west.

Western discriminations

Dry goods, carload, 40,000 pounds, from Chicago to—	Miles	Present rate	Proposed rate
Scranton, Iowa.....	376	\$1.11	-----
Ogallala, Neb.....	820	1.58	-----
Portland, Oreg.....	2,262	1.58	\$1.10
Seattle, Wash.....	2,445	1.58	1.10

If the application of the railroads now pending before the Interstate Commerce Commission is granted then the merchant in Scranton, Iowa, will pay more freight than the merchant 2,069 miles further west, and the merchants of North

and South Dakota, Wyoming, Montana, Idaho, Spokane and Walla Walla, in east Washington, and Oregon will pay a higher freight rate than the merchant in Portland and Seattle.

Dry goods, carloads, from Chicago to—	Miles	Present rate	Proposed rate
Willard, Kans.....	601	\$1.10	-----
Haviland, Kans.....	749	1.58	-----
San Francisco, Calif.....	2,760	1.58	\$1.10

If this application is allowed the people of Willard, Kans., will pay the same rate San Francisco will pay for three and one-half times as long a haul.

At the present time the consumers of Haviland, Kans., and all points in Colorado and Utah are paying the same rate on dry goods as San Francisco. If this fourth section violation of the interstate commerce act is allowed, the consumers of Haviland, Kans., and Colorado and Utah will continue to pay a freight rate of \$1.58 on dry goods while San Francisco will pay \$1.10 per 100 for a haul that is 2,011 miles longer.

Southwestern discriminations

Dry goods, carloads, from Chicago to—	Miles	Present rate	Proposed rate
Greenville, Miss.....	747	\$1.10	-----
Amesville, La.....	931	1.58	-----
San Francisco, Calif.....	3,408	1.58	\$1.10

If the proposed rate is granted then the Amesville, La., merchants and consumers will pay 48 cents more per hundred for a 2,477-mile shorter haul.

Intermediate merchants in Louisiana, Texas, New Mexico, Arizona, and interior California will continue to pay \$1.58 per hundred, while San Francisco will pay \$1.10—or the same rate as Greenville, Miss., which is 2,661 miles nearer Chicago.

The distance from St. Louis, Chicago, Milwaukee, Springfield, and Indianapolis to New Orleans is 203 miles greater than the distance to Meridian, Miss., yet the railroads have an application before the commission to make higher rates from those points to Meridian, Miss., than to New Orleans on 41 different commodities.

The present rate on dry goods in carloads, from Chicago to Little Rock, Ark., a distance of 634 miles, is \$1.90½ per 100 pounds.

The present rate on dry goods in carloads, from Chicago to San Francisco, a distance of 3,408 miles, is \$1.58 per 100 pounds. For a shorter haul by 2,774 miles the people of Little Rock pay \$0.32½ more.

The present rate on dry goods in carloads, from Chicago to Pine Bluff, Ark., a distance of 677 miles, is \$1.99½ per 100 pounds.

The proposed rate on dry goods in carloads, from Chicago to San Francisco, a distance of 3,408 miles, is \$1.10 per 100 pounds.

For a shorter haul by 2,731 miles the people of Pine Bluffs will have to pay \$0.89½ more.

Southeastern discriminations

Fertilizer, in carloads, from Savannah, Ga., to—	Present rate per ton
Memphis, Tenn., 678 miles.....	\$5.29
Corinth, Miss., 588 miles.....	6.64

Corinth, Miss., for the shorter distance of 90 miles pays \$1.35 per ton more than Memphis, Tenn.

Molasses, in carloads, from New Orleans to—	Present rate per ton
Norfolk, Va., 1,093 miles.....	\$9.00
Spartanburg, S. C., 688 miles.....	11.70

Although Spartanburg, S. C., has 405 miles shorter haul than Norfolk, Va., the rate is \$2.70 a ton more.

Fertilizer, in carload lots, from Savannah, Ga., to—	Present rate per ton
Vicksburg, Miss., 632 miles.....	\$4.95
Jackson, Miss., 588 miles.....	5.63

Jackson for the shorter haul of 44 miles pays 68 cents more.

WATER TRANSPORTATION

One thing that is of especial importance to us at this time is the fact that we are called on from year to year to make additional appropriations to facilitate water transportation, and at the same time the terminal-discriminating rates are putting the water transportation practically out of business. We have spent \$1,200,000,000 for canals and harbors and for

bettering waterways. The rates that are asked for here to the Pacific coast practically eliminate commerce through the Panama Canal. The railroads contend that they must have this additional transportation in order to successfully operate their lines, whereas the additional freight that they might possibly hope to gain if they eliminate the haul through the Panama Canal would add to their tonnage only about 1 per cent.

Mr. HASTINGS. Mr. Chairman, will the gentleman yield? Mr. SUMMERS of Washington. Yes.

Mr. HASTINGS. Will the gentleman explain briefly how the Gooding bill will correct the evils of which he makes complaint?

Mr. SUMMERS of Washington. There have been several attempts to amend the fourth section of the interstate commerce act so as to make it impossible for decisions by the Interstate Commerce Commission to permit the railroads to make these rates. I am not saying that the Interstate Commerce Commission deliberately does this thing; but it seems that in endeavoring to enact language fair to the roads, so that a road that has a little additional mileage in reaching a western point may have equal opportunity with other more direct lines, the language is always ambiguous. When this has gone up to the courts, the courts have sustained the roads. Under these decisions there have been different rates on different commodities at different stations; and, multiplied, they run into the millions. The Gooding bill, it is believed, is so worded that it will not discriminate against the road that has a longer haul because of its line being a little more circuitous than another line and, at the same time, will not permit the rate making that I have been describing. The Gooding bill passed the Senate almost unanimously and is now before the Interstate and Foreign Commerce Committee of the House, and we are hoping to have it reported out soon.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. SUMMERS of Washington. Yes.

Mr. BLANTON. On the issue of the disparagement of rates, I hope the gentleman will write a former Member of Congress, Mr. George J. Kindel, of Denver, Colo., for the data and figures that he has on this subject. He spent probably the last 8 or 10 years gathering statistics upon this question, and has the most comprehensive data and tables and maps that I have ever seen on the subject.

Mr. SUMMERS of Washington. I know of Mr. Kindel's data, but I already have more material than I can use. I am bringing this to your attention at this time because of the effort that is being made to have hearings started at a very early date and have this bill reported out, in order that the House may discuss it and take action upon it during this short session. I believe we ought to have hearings immediately and that the bill ought to be reported out by the committee before the holidays, in view of the conditions that we are pointing out here and to relieve the congestion that obtains. As I have stated, there are millions of applications that have been pending now for 13 years, and many of them have had favorable action without hearings. It is a matter of clearing up the calendar and securing justice for all concerned, as I interpret it, and not a discrimination against the coast points at all. A little fairer rate to the interior would enable that part of the country to develop. We would then spend dollars with our coast cities where we now spend pennies. I believe it is wrong to discriminate against all of this territory up here in the great northwest interior and we ought to stop it. Water transportation can not possibly become a competitive factor there. That territory belongs to the railroads. The points on the Pacific coast are bound to be the market centers from which the trade will be carried on with these interior towns and cities. The larger and more prosperous the interior communities, the greater the volume of trade. All of this interior country is backing up the coast and building up the coast cities. The intermediate territory to which I have referred should not be compelled to pay a higher rate by 48 cents a hundred. These rates place a discrimination against 1,500 miles of territory, and that makes it impossible to bring capital into that territory and develop it. We want fair play and a square deal—nothing more, nothing less. The same may be said of the intermediate territory in the Middle West. Some of the worst discriminations that I have observed are against the State of Arkansas. There are some very bad ones over in the southeastern part of the United States also.

This is a matter that concerns the whole country. As one who is interested in the transportation question, and believing that water transportation should be developed to carry the heavy freight and the slow freight, and at the same time permit the greatest possible development of the railroads for the

more rapid freight, I solicit your interest in this nation-wide question and your cooperation in securing hearings at the earliest possible date. [Applause.]

Mr. CRAMTON. I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and Mr. MAPES having resumed the chair as Speaker pro tempore, Mr. SANDERS of Indiana, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 10020, had come to no resolution thereon.

The SPEAKER. The Chair lays before the House the following personal requests:

LEAVE OF ABSENCE

By unanimous consent,

Mr. JEFFERS (at the request of Mr. McDUFFIE) was granted leave of absence for six days on account of business in connection with his official duties.

Mr. DREWRY was granted leave of absence for four days on account of sickness.

MEMORIAL SERVICES FOR THE LATE WOODROW WILSON

The SPEAKER. The Chair appoints the following committee to act as a committee in charge of the exercises in memory of President Wilson.

The Clerk read as follows:

Mr. BACHARACH, Mr. ANTHONY, Mr. GREEN, Mr. SCOTT, Mr. GARRETT of Tennessee, Mr. POT, and Mr. MOORE of Virginia.

ADJOURNMENT

Mr. CRAMTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 11 minutes p. m.) the House adjourned until to-morrow, Thursday, December 4, 1924, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

610. A letter from the chief clerk of the Court of Claims, transmitting, pursuant to law, a statement of all judgments rendered by the Court of Claims for the year ended November 29, 1924, the amounts, the parties, and a synopsis of the nature of claims; to the Committee on Claims.

611. A letter from the Comptroller General, transmitting a report showing the typewriters, adding machines, and other similar labor-saving devices belonging to the General Accounting Office which were exchanged during the fiscal year 1924; to the Committee on Appropriations.

612. A letter from the Comptroller General, transmitting a report of travel performed on official business by officers and employees of the General Accounting Office from Washington to points outside of the District of Columbia during the fiscal year 1924, giving the destination, the business on account of which the same was made, and the total expense to the United States; to the Committee on Appropriations.

613. A letter from the Chief of United States Bureau of Efficiency, transmitting a report showing the publications issued by the Bureau of Efficiency during the fiscal year 1924, the cost of preparation, printing, and paper, and the total number distributed; to the Committee on Printing.

614. A letter from the Secretary of the Treasury, transmitting statement in detail of purchases of United States bonds and Treasury notes for the cumulative sinking fund during the fiscal year 1924 (H. Doc. No. 469); to the Committee on Ways and Means and ordered to be printed.

615. A letter from the Secretary of the Treasury, transmitting statement of purchases of United States bonds from repayments by foreign governments during the fiscal year of 1924 (H. Doc. No. 470); to the Committee on Ways and Means and ordered to be printed.

616. A letter from the Secretary of the Treasury, transmitting statements of approved expenditures under the provisions of section 8 of the first Liberty bond act and section 10 of the second Liberty bond act on account of expenses of loans through the fiscal year ended June 30, 1924 (H. Doc. No. 471); to the Committee on Ways and Means and ordered to be printed.

617. A letter from the Secretary of the Navy, transmitting a list of useless records in the Bureau of Medicine and Surgery, Navy Department, which are no longer needed for use in connection with the transaction of public business and have no

permanent value or historical interest; to the Committee on Disposition of Useless Executive Papers.

618. A letter from the Secretary of the Navy, transmitting detailed statements of expenditures under the contingent appropriations for the Navy Department (civil) for the fiscal year ended June 30, 1924; to the Committee on Expenditures in the Navy Department.

619. A letter from the Secretary of the Treasury, transmitting a statement of the proceeds of all sales of old materials, condemned stores, supplies, and other public property for the fiscal year ended June 30, 1924, deposited and covered into the Treasury as miscellaneous receipts; to the Committee on Expenditures in the Treasury Department.

620. A letter from the Secretary of War, transmitting statement showing in detail what officers and employees of the War Department have traveled on official business from Washington to points outside of the District of Columbia during the fiscal year ended June 30, 1924; to the Committee on Appropriations.

621. A letter from the chairman of the Public Utilities Commission of the District of Columbia, transmitting eleventh annual report of the Public Utilities Commission of the District of Columbia for the year ended December 31, 1923; to the Committee on the District of Columbia.

622. A letter from the Comptroller of the Currency, transmitting the annual report of the Comptroller of the Currency covering activities of the Currency Bureau in the year ended October 31, 1924; to the Committee on Banking and Currency.

623. A letter from the Director of the United States Veterans' Bureau, transmitting report of typewriters and other labor-saving machines purchased in exchange during the fiscal year ended June 30, 1924; to the Committee on Appropriations.

624. A letter from the Director of the United States Veterans' Bureau, transmitting a report of traveling expenses incurred by officers and employees of the central office of the United States Veterans' Bureau traveling on official business outside of Washington during the fiscal year 1924; to the Committee on Appropriations.

625. A letter from the Secretary of the Treasury, transmitting statements from 12 offices and bureaus of the Treasury Department showing in detail what officers and employees performed travel on official business from Washington to points outside of the District of Columbia during the fiscal year ended June 30, 1924; to the Committee on Appropriations.

626. A letter from the Secretary of War, transmitting a report of The Adjutant General of the Army relative to the administration of the World War adjusted compensation act so far as the War Department is concerned; to the Committee on Ways and Means.

627. A letter from the Secretary of the Treasury, transmitting detailed report of the expenditures under "Preventing the spread of epidemic diseases" for the fiscal year ending June 30, 1924; to the Committee on Expenditures in the Treasury Department.

628. A letter from the Secretary of the Treasury, transmitting a combined statement of the receipts and disbursements, balances, etc., of the Government during the fiscal year ended June 30, 1924 (H. Doc. No. 465); to the Committee on Appropriations and ordered to be printed, with accompanying papers.

629. A letter from the Secretary of the Treasury, transmitting statement showing claims for refund approved by the Commissioner of Internal Revenue during the fiscal year ended June 30, 1924, and forwarded to the disbursing clerk of the Treasury for payment or to the General Accounting Office for direct settlement; to the Committee on Ways and Means.

630. A letter from the Secretary of War, transmitting report of expenditures on account of appropriation "Contingencies of the Army" during the fiscal year ending June 30, 1924; to the Committee on Expenditures in the War Department.

631. A letter from the Secretary of the Interior, transmitting two tables showing the cost and other data with respect to Indian irrigation projects as compiled to the end of the fiscal year June 30, 1924; to the Committee on Indian Affairs.

632. A letter from the Secretary of the Interior, transmitting statement of fiscal affairs of Indian tribes for the fiscal year ended June 30, 1924; to the Committee on Indian Affairs.

633. A letter from the Secretary of the Interior, transmitting statement of expenditures for the fiscal year 1924 from the appropriation "Industry among Indians, 1924," act of August 1, 1914 (38 Stat. L. 586); to the Committee on Indian Affairs.

634. A letter from the Secretary of the Interior, transmitting report for the fiscal year 1924 showing the amounts expended at each Indian school and agency from the appropriation for construction, lease, purchase, repair, and improvement of school and agency buildings; to the Committee on Indian Affairs.

635. A letter from the Secretary of the Interior, transmitting report of expenditures for the purpose of encouraging industry among the Indians of the various reservations during the fiscal year ended June 30, 1924, from the appropriation of \$100,000 under the act of June 30, 1913 (38 Stat. L. 77-81); to the Committee on Indian Affairs.

636. A letter from the Secretary of the Interior, transmitting report for the fiscal year ended June 30, 1924, relating to the appropriation, "Indian schools, support, 1924"; to the Committee on Indian Affairs.

637. A letter from the Secretary of the Interior, transmitting report of labor-saving devices purchased for the Department of the Interior during the fiscal year 1924; to the Committee on Appropriations.

638. A letter from the Secretary of the Interior, transmitting report of expenditures for the purpose of encouraging industry and support among the Indians on the Tongue River Reservation, Mont., during the fiscal year ended June 30, 1924; to the Committee on Indian Affairs.

639. A letter from the Secretary of the Interior, transmitting statement of expenditures from the tribal funds of the Chippewa Indians of Minnesota for the fiscal year ended June 30, 1924; to the Committee on Indian Affairs.

640. A letter from the Secretary of the Interior, transmitting report of expenditures for the purchase of cattle for the Northern Cheyenne Indians on the Tongue River Reservation, Mont., for the fiscal year ended June 30, 1924; to the Committee on Indian Affairs.

641. A letter from the Secretary of the Interior, transmitting a statement of expenditures on account of the Indian Service for the fiscal year ended June 30, 1924, from the appropriation "Industrial work and care of timber, 1924"; to the Committee on Indian Affairs.

642. A letter from the Secretary of the Interior, transmitting report of expenditures from the permanent fund of the Sioux Indians during the fiscal year ended June 30, 1924; to the Committee on Indian Affairs.

643. A letter from the Secretary of the Interior, transmitting detailed report of expenditures from the \$250,000 authorized from the funds of the Apache, Kiowa, and Comanche Indians for the fiscal year ended June 30, 1924; to the Committee on Indian Affairs.

644. A letter from the Secretary of the Interior, transmitting report of all moneys collected and deposited during the fiscal year ended June 30, 1924, under the appropriation "Determining heirs of deceased Indian allottees, 1924"; to the Committee on Indian Affairs.

645. A letter from the Secretary of the Interior, transmitting a detailed report of expenditures from the tribal funds of the Confederate Bands of the Utes during the fiscal year ended June 30, 1924; to the Committee on Indian Affairs.

646. A letter from the Secretary of the Interior, transmitting report showing the diversion of appropriations for the pay of specified employees in the Indian Service for the fiscal year ended June 30, 1924; to the Committee on Appropriations.

647. A letter from the Secretary of the Interior, transmitting a statement of the expenditures for the fiscal year ended June 30, 1924, of money carried on the books under the caption "Indian moneys, proceeds of labor"; to the Committee on Indian Affairs.

648. A letter from the Secretary of the Interior, transmitting statement of travel expenses incident to the detail of employees from the office of one surveyor general to another during the fiscal year ended June 30, 1924; to the Committee on the Public Lands.

649. A letter from the Secretary of the Interior, transmitting statement of cost of survey and allotment work, Indian Service, for the fiscal year ended June 30, 1924; to the Committee on Indian Affairs.

650. A letter from the Secretary of the Interior, transmitting report showing that no expenditures were made during the fiscal year ended June 30, 1924, for the construction of hospitals from the appropriation, "Relieving distress and prevention of diseases among the Indians"; to the Committee on Indian Affairs.

651. A letter from the Secretary of the Interior, transmitting statement showing the receipts from rentals, extension of Capitol grounds, for a period from December 1, 1923, to and including November 30, 1924; to the Committee on Public Buildings and Grounds.

652. A letter from the Secretary of the Interior, transmitting report on the claims of members of the Sioux Nation of Indians residing in the State of South Dakota for horses killed on the Cheyenne River Indian Reservation in the years 1895, 1896, and 1897, which horses are alleged to have been erroneously suspected of being infected with glanders; to the Committee on Indian Affairs.

653. A letter from the Secretary of the Interior, transmitting report of the disbursements of the proceeds of the public lands to the more complete endowment and support of the colleges for the benefit of agriculture and the mechanic arts for the fiscal year ending June 30, 1925; to the Committee on Expenditures in the Interior Department.

654. A letter from the Secretary of the Interior, transmitting detailed statement of receipts and expenditures on account of pay patients admitted to Freedmen's Hospital for the fiscal year ended June 30, 1924; to the Committee on Expenditures in the Interior Department.

655. A letter from the Secretary of the Interior, transmitting detailed statement of expenditures for professional and other services in the Freedmen's Hospital for the fiscal year ended June 30, 1924; to the Committee on Expenditures in the Interior Department.

656. A letter from the Secretary of Agriculture, transmitting detailed report showing the names of all persons employed, their designations, and rates of pay, in the Bureau of Animal Industry, for the suppression of contagious, infectious, or other communicable diseases of domestic animals, during the fiscal year ended June 30, 1924; to the Committee on Expenditures in the Department of Agriculture.

657. A letter from the Secretary of Agriculture, transmitting report giving in detail the aggregate number of publications issued by the Department of Agriculture during the fiscal year ended June 30, 1924, together with the cost of preparation, paper, and printing of each publication and the number of each distributed; to the Committee on Printing.

658. A letter from the Secretary of Agriculture, transmitting detailed statement of the manner in which the appropriation "Miscellaneous expenses, Department of Agriculture, 1924," has been expended; to the Committee on Expenditures in the Department of Agriculture.

659. A letter from the Secretary of Agriculture transmitting report of all labor-saving devices exchanged during the fiscal year 1924 in part payment for new machines; to the Committee on Appropriations.

660. A letter from the Secretary of Agriculture, transmitting statement showing the cost of maintenance, operation, and repair of all motor-propelled and horse-drawn passenger-carrying vehicles and motor boats owned by the department and operated outside of the city of Washington during the fiscal year 1924; also a report of the motor-propelled or horse-drawn passenger-carrying vehicles or motor boats purchased by the department during the fiscal year 1924; to the Committee on Appropriations.

661. A letter from the Secretary of Agriculture, transmitting report of sale of paper no longer needed for public business, receipts for sale of this useless paper for the fiscal year amounting to \$2,669.85; to the Committee on Disposition of Useless Executive Papers.

662. A letter from the Secretary of Agriculture, transmitting report of contributions on account of cooperative work with the Forest Service and the amount refunded to depositors on account of excess deposits, national forests fund, for the fiscal year 1924; to the Committee on Expenditures in the Department of Agriculture.

663. A letter from the Secretary of Agriculture, transmitting report of sums of money allotted to the Bureau of Chemistry that were used for compensation of or payment of expenses of officers or other persons employed by State, county, or municipal governments; to the Committee on Expenditures in the Department of Agriculture.

664. A letter from the Secretary of Agriculture, transmitting report of revenues derived from the operation, and expenditure made on behalf of, the Center Market, Washington, D. C., during the fiscal year ended June 30, 1924; to the Committee on Expenditures in the Department of Agriculture.

665. A letter from the Secretary of Agriculture, transmitting a statement showing in detail the travel, from Washington to points outside of the District of Columbia, performed by officers and employees (other than special agents, inspectors, and employees who in the discharge of their regular duties are required to constantly travel) of the Department of Agriculture during the fiscal year 1924; to the Committee on Appropriations.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. FREDERICKS: A bill (H. R. 10139) to establish an extension to the transcontinental Air Mail Service from Salt

Lake City, Utah, to Los Angeles, Calif.; to the Committee on the Post Office and Post Roads.

By Mr. CURRY: A bill (H. R. 10147) to create a department of aeronautics, defining the powers and duties of the Secretary thereof, providing for the organization, disposition, and administration of a United States air force, and providing for the development of civil and commercial aviation, the regulation of air navigation, and for other purposes; to the Committee on Military Affairs.

By Mr. MOORE of Illinois: A bill (H. R. 10148) extending to inhabitants of Hawaii the provisions of subdivision b of section 9 of the act of October 6, 1917, as amended; to the Committee on the Territories.

By Mr. JOHNSON of South Dakota: A bill (H. R. 10149) to amend the World War veterans' act, 1924; to the Committee on Military Affairs.

By Mr. ALMON: A bill (H. R. 10150) to authorize the construction of a bridge across the Tennessee River at or near the city of Decatur, Ala.; to the Committee on Interstate and Foreign Commerce.

By Mr. DEAL: A bill (H. R. 10151) to authorize the acquisition of a site and the erection thereon of a Federal building at Boykin, Va.; to the Committee on Public Buildings and Grounds.

By Mr. GASQUE: A bill (H. R. 10152) granting the consent of Congress to the Huntley-Richardson Lumber Co., a corporation of the State of South Carolina, doing business in said State, to construct a railroad bridge across Bull Creek at or near Eddy Lake, in the State of South Carolina; to the Committee on Interstate and Foreign Commerce.

By Mr. ROACH: A bill (H. R. 10153) for the erection of a Federal post-office building at the city of Eldon, Mo.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 10154) for the erection of a Federal post-office building at the city of Centrahia, Mo.; to the Committee on Public Buildings and Grounds.

By Mr. TIMBERLAKE: A bill (H. R. 10155) for the purchase of a site for a public building at Littleton, Arapahoe County, Colo.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 10156) for the purchase of a site for a public building at Loveland, Larimer County, Colo.; to the Committee on Public Buildings and Grounds.

By Mr. GIBSON: A bill (H. R. 10157) to acquire a site and erect a public building at Derby Line, Vt.; to the Committee on Public Buildings and Grounds.

By Mr. GARNER of Texas: Joint resolution (H. J. Res. 300) extending the time during which certain domestic animals which have crossed the boundary line into foreign countries may be returned duty free; to the Committee on Ways and Means.

By Mr. JOHNSON of South Dakota: Resolution (H. Res. 370) extending the time for rendering the report of the Committee on World War Veterans' Legislation to February 15, 1925; to the Committee on Rules.

By Mr. GRAHAM: Resolution (H. Res. 371) to print the manuscript entitled "Hearing on the proposed child labor amendments to the Constitution of the United States"; to the Committee on Printing.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALDRICH: A bill (H. R. 10158) granting an increase of pension to Sarah C. Webb; to the Committee on Invalid Pensions.

By Mr. ARNOLD: A bill (H. R. 10159) granting an increase of pension to Joseph E. W. Bergbower; to the Committee on Pensions.

Also, a bill (H. R. 10160) granting a pension to Olive Griffin; to the Committee on Invalid Pensions.

By Mr. BEERS: A bill (H. R. 10161) granting an increase of pension to Nancy Evaline Hammon; to the Committee on Invalid Pensions.

By Mr. BLAND: A bill (H. R. 10162) granting a pension to Mary Fitchett; to the Committee on Invalid Pensions.

By Mr. CANFIELD: A bill (H. R. 10163) granting a pension to Edgar M. Riggs; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10164) granting an increase of pension to Mary A. Scobey; to the Committee on Pensions.

Also, a bill (H. R. 10165) granting a pension to Frank Isgrig; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10166) granting a pension to Anna C. Tonnemacher; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10167) granting a pension to Mary E. Scudder; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10168) granting a pension to James K. Waltermire; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10169) granting a pension to Mary E. Eubank; to the Committee on Invalid Pensions.

By Mr. COOK: A bill (H. R. 10170) granting a pension to Lida Bahr; to the Committee on Pensions.

Also, a bill (H. R. 10171) granting a pension to Emily J. Hornel; to the Committee on Invalid Pensions.

By Mr. CRISP: A bill (H. R. 10172) granting an increase of pension to Mattie Hepler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10173) granting an increase of pension to Mrs. William R. Lebert; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10174) granting an increase of pension to Garbin Patrick; to the Committee on Pensions.

By Mr. DEAL: A bill (H. R. 10175) to place Capt. Herbert L. Lee on the retired list of the United States Army; to the Committee on Military Affairs.

Also, a bill (H. R. 10176) to extend the benefits of the employers' liability act of September 7, 1916, to James Robert Allen; to the Committee on Claims.

Also, a bill (H. R. 10177) granting six months' pay to Virginia Weaver Plonk; to the Committee on Naval Affairs.

By Mr. ELLIOTT: A bill (H. R. 10178) granting an increase of pension to Nellie J. Wyrick; to the Committee on Invalid Pensions.

By Mr. FAUST: A bill (H. R. 10179) granting a pension to Thomas H. Savage, alias William Johnson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10180) granting an increase of pension to William Thomas Bond; to the Committee on Pensions.

By Mr. FISHER: A bill (H. R. 10181) to reinstate in the naval service Joseph W. Peete, jr.; to the Committee on Naval Affairs.

By Mr. FITZGERALD: A bill (H. R. 10182) for the relief of the estate of Elijah Abbott; to the Committee on Claims.

By Mr. FREE: A bill (H. R. 10183) granting a pension to Frances M. Armstrong; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10184) granting a pension to Melissa Kitchen; to the Committee on Invalid Pensions.

By Mr. FRENCH: A bill (H. R. 10185) granting an increase of pension to Carrie Miller; to the Committee on Pensions.

By Mr. FULLER: A bill (H. R. 10186) granting an increase of pension to Mary E. Cummins; to the Committee on Invalid Pensions.

By Mr. GERAN: A bill (H. R. 10187) granting an increase of pension to William A. Hankinson; to the Committee on Invalid Pensions.

By Mr. GLATFELTER: A bill (H. R. 10188) granting an increase of pension to Annie Hoover; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10189) granting an increase of pension to Julia N. Sheely; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10190) granting an increase of pension to Mary A. Morningstar; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10191) granting an increase of pension to Elizabeth Hale; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10192) granting an increase of pension to Mary Ellen Myers; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10193) granting an increase of pension to Jane W. Rohrbach; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10194) granting an increase of pension to Anna M. Zeigler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10195) granting an increase of pension to Justina Wenner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10196) granting an increase of pension to Mary L. Householder; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10197) granting an increase of pension to Mary A. Ness; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10198) granting an increase of pension to Mary A. Hoffman; to the Committee on Invalid Pensions.

By Mr. GRIEST: A bill (H. R. 10199) granting an increase of pension to Elizabeth Jones; to the Committee on Invalid Pensions.

By Mr. HAWLEY: A bill (H. R. 10200) granting an increase of pension to Priscilla DeWitt; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10201) granting an increase of pension to Minnie V. Main; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10202) granting an increase of pension to Nancy J. Ross; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10203) granting an increase of pension to Ezekiah C. Cotner; to the Committee on Pensions.

Also, a bill (H. R. 10204) granting an increase of pension to Mary Emily Stanberry; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10205) granting an increase of pension to Sarah J. Gray; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10206) granting an increase of pension to Margaret Ellen Fisher; to the Committee on Invalid Pensions.

By Mr. WILLIAM E. HULL: A bill (H. R. 10207) granting an increase of pension to Mary M. Eaton; to the Committee on Invalid Pensions.

By Mr. KETCHAM: A bill (H. R. 10208) granting a pension to Frances A. Burdsal; to the Committee on Invalid Pensions.

By Mr. LEE of Georgia: A bill (H. R. 10209) granting an increase of pension to John A. Petty; to the Committee on Pensions.

By Mr. LEHLBACH: A bill (H. R. 10210) granting a pension to Minnie E. Banks; to the Committee on Invalid Pensions.

By Mr. LOZIER: A bill (H. R. 10211) granting an increase of pension to James W. Fisher; to the Committee on Pensions.

Also, a bill (H. R. 10212) granting an increase of pension to Sarah Fisher; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10213) granting an increase of pension to William T. Lamme; to the Committee on Pensions.

Also, a bill (H. R. 10214) granting an increase of pension to Amanda Hall; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10215) granting an increase of pension to Sarah M. Kuhn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10216) granting a pension to Robert T. McElhiney; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10217) granting a pension to William M. Silver; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10218) granting a pension to Eunice Catherine Dearing; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10219) granting a pension to Sarepta Richards; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10220) granting a pension to Daniel Wesley Roberts; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10221) granting a pension to Catherine Cowhick; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10222) granting a pension to William W. Alverson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10223) granting an increase of pension to Nancy Burton; to the Committee on Invalid Pensions.

By Mr. McKEOWN: A bill (H. R. 10224) granting an increase of pension to Hattie A. Frazier; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10225) granting an increase of pension to Jane Grant; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10226) granting an increase of pension to Mary E. Nixon; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10227) granting an increase of pension to Eliza J. Taylor; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10228) granting an increase of pension to Zoe Rodd; to the Committee on Invalid Pensions.

By Mr. McLAUGHLIN of Nebraska: A bill (H. R. 10229) granting an increase of pension to Risby Jane McLaughlin; to the Committee on Invalid Pensions.

By Mr. McREYNOLDS: A bill (H. R. 10230) granting an increase of pension to John A. Brammett; to the Committee on Pensions.

By Mr. MERRITT: A bill (H. R. 10231) granting a pension to Dora E. F. Terhune; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10232) granting a pension to Edna F. Verity; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10233) granting an increase of pension to James M. Burns; to the Committee on Pensions.

Also, a bill (H. R. 10234) granting an increase of pension to Mary Eliza Brewster; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10235) granting an increase of pension to Emma L. Jimmerson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10236) granting an increase of pension to Sophia J. Bartram; to the Committee on Invalid Pensions.

By Mr. MORGAN: A bill (H. R. 10237) granting a pension to Eldora Temple; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10238) granting a pension to Margaret Diehl; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10239) granting an increase of pension to Anna Cochran; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10240) granting an increase of pension to Elizabeth Lilly; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10241) granting an increase of pension to Rebecca M. Reese; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10242) granting an increase of pension to Sarah L. Murphy; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10243) granting an increase of pension to Susan V. Rogers; to the Committee on Invalid Pensions.

By Mr. O'BRIEN: A bill (H. R. 10244) for the relief of William Winterbottom; to the Committee on Claims.

By Mr. OLDFIELD: A bill (H. R. 10245) granting an increase of pension to Elizabeth Reeves; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10246) granting an increase of pension to Grandville A. Henry; to the Committee on Pensions.

By Mr. PARKER: A bill (H. R. 10247) granting a pension to Rosetta Connelly; to the Committee on Invalid Pensions.

By Mr. RAMSEYER: A bill (H. R. 10248) granting an increase of pension to Ann E. Pike; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10249) granting an increase of pension to Luttia Neff; to the Committee on Invalid Pensions.

By Mr. ROACH: A bill (H. R. 10250) granting a pension to Addie Davis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10251) granting a pension to Catherine D. Jones; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10252) granting a pension to Nancy J. Martin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10253) for the relief of Alfred Mason; to the Committee on the Post Office and Post Roads.

By Mr. ROBSON of Kentucky: A bill (H. R. 10254) granting a pension to James M. Cawood; to the Committee on Pensions.

Also, a bill (H. R. 10255) granting a pension to Nancy C. Patrick; to the Committee on Invalid Pensions.

By Mr. ROGERS of New Hampshire: A bill (H. R. 10256) granting a pension to Margaret E. McCarthy; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10257) granting an increase of pension to Ida Paquette; to the Committee on Pensions.

Also, a bill (H. R. 10258) granting an increase of pension to Arophine C. Knox; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10259) granting an increase of pension to Esther Huntress; to the Committee on Invalid Pensions.

By Mr. SHREVE: A bill (H. R. 10260) granting a pension to Helena Dearborn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10261) granting a pension to Mary E. Grey; to the Committee on Invalid Pensions.

By Mr. SPROUL of Illinois: A bill (H. R. 10262) granting a pension to Lester Swanberg; to the Committee on Pensions.

By Mr. STRONG of Kansas: A bill (H. R. 10263) granting an increase of pension to Aroline H. Atwood; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10264) granting an increase of pension to Bert Myers; to the Committee on Pensions.

By Mr. THATCHER: A bill (H. R. 10265) granting an increase of pension to Mattie P. Gilbert; to the Committee on Pensions.

By Mr. THOMPSON: A bill (H. R. 10266) granting an increase of pension to Martha J. Keeler; to the Committee on Invalid Pensions.

By Mr. WATRES: A bill (H. R. 10267) granting an increase of pension to Edward Sweeney; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3065. By Mr. ALDRICH: Petition of Department of Rhode Island, Veterans of Foreign Wars, favoring increase of pay and allowances of men in Army bands, the commissioning of band leaders, and the designation of band leaders as band commanders; to the Committee on Military Affairs.

3066. By Mr. BYRNS of Tennessee: Papers accompanying House bill 10037, granting an increase of pension to Robert L. Chick; to the Committee on Pensions.

3067. By Mr. FREDERICKS: Petition of citizens of Pasadena, Calif., praying that doctors practicing drugless methods of health be added to the staff of hospitals treating disabled veterans; to the Committee on World War Veterans' Legislation.

3068. Also, petition of citizens of Los Angeles, Calif., remonstrating against the passage of Senate bill 3218; to the Committee on Education.

3069. By Mr. GALLIVAN: Petition of Massachusetts Civic League, Boston, Mass., recommending early and favorable consideration of House bill 5195, which provides for the establishment of a probation system in the United States district courts; to the Committee on the Judiciary.

3070. By Mr. HAWLEY: Petition of citizens of Lane County, Oreg., opposing the enactment of Senate bill 3218; to the Committee on the District of Columbia.

3071. By Mr. KIESS: Petition of citizens of Potter County, Pa., protesting against the passage of Senate bill 3218; to the Committee on the Judiciary.

3072. By Mr. KINDRED: Petition of the Prison Association of New York, recommending the erection in New York of an institution for the detention of Federal prisoners both before and after conviction; to the Committee on the Judiciary.

3073. By Mr. O'CONNELL of New York: Petition of the Regular Democratic Organization of the Twentieth Assembly District of Brooklyn, N. Y., favoring the postal salary increase bill; to the Committee on the Post Office and Post Roads.

3074. By Mr. O'CONNELL of Rhode Island: Petition of Cumberland Post, No. 14, American Legion, Department of Rhode Island, in favor of equalizing pay of Army and Navy musicians; to the Committee on Military Affairs.

3075. By Mr. PHILLIPS: Affidavits to accompany House bill 10099, granting a pension to Kate Stanton; to the Committee on Invalid Pensions.

3076. Also, affidavits to accompany House bill 10098, granting a pension to Victor Clark; to the Committee on Invalid Pensions.

3077. By Mr. ROUSE: Petition of 207 citizens of Kenton County, Ky., against the passage of Senate bill 3218 or any religious legislation; to the Committee on the Judiciary.

3078. By Mr. VARE: Petition of Army and Navy Union, United States of America, Capt. Charles V. Gridley Garrison, No. 4, Erie, Pa., urging that an increase of pension be granted to veterans of all wars and their dependents; to the Committee on Pensions.

SENATE

THURSDAY, December 4, 1924

(Legislative day of Wednesday, December 3, 1924)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

PROPOSED GIFT BY ELIZABETH SPRAGUE COOLIDGE TO THE LIBRARY OF CONGRESS

The PRESIDENT pro tempore. The Chair lays before the Senate a letter from the Librarian of Congress, submitting an offer from Mrs. Frederic Shurtleff Coolidge to build an auditorium in connection with the Library of Congress. Without objection, the letter will be printed in the RECORD, and it will be referred to the Committee on the Library for consideration. The communication is as follows:

LIBRARY OF CONGRESS,
OFFICE OF THE LIBRARIAN,
Washington, D. C., December 4, 1924.

HERBERT PUTNAM, Esq.,
Librarian of Congress.

SIR: I have the gratification of communicating to Congress the offer of a unique gift. It is set forth in the following letter from Mrs. Frederic Shurtleff Coolidge, of New York City and Pittsfield, Mass., already a benefactor of the Library of Congress and of music in America:

99 IRVING STREET, CAMBRIDGE, MASS.

MY DEAR MR. PUTNAM: Confirming the intentions expressed in my letter of October 23, 1924, and welcomed by you, I ask you to submit to Congress the following offer, to wit:

In pursuance of my desire to increase the resources of the music division of the Library of Congress, especially in the promotion of chamber music, for which I am making an additional provision in the nature of an endowment, I offer to the Congress of the United States the sum of \$60,000 for the construction and equipment in connection with the Library of an auditorium which shall be planned for and dedicated to the performance of chamber music, but shall also be available (at the discretion of the Librarian and the chief of the music division) for any other suitable purpose secondary to the needs of the music division.

Yours most sincerely,

ELIZABETH SPRAGUE COOLIDGE
(Mrs. Frederic Shurtleff Coolidge).

The need of such an auditorium—a small hall seating about 600 persons—in connection with the Library has been felt ever since it entered upon its larger activities. Any present design for the building would have included it. The space for it—preferably in the northwest courtyard, adjacent to the music division—is available.

Its primary purpose, in connection with the music division, would add influentially to the resources of this division in promoting the study and appreciation of music in America, which our great collection of musical material—now one of the largest in the world—is designed to serve. Its secondary uses—for staff meetings and for lectures and discussions in the study and interpretation of the collections—would meet a need now generally recognized in library buildings.

The coincident gift which Mrs. Coolidge refers to as "in the nature of an endowment" is a provision for the utilization of the resources of the music division and the extension of its service in the interest of music and appreciation of it. The details of this provision are now under consideration.

In the meantime prompt action upon the offer of the auditorium is desirable. And my hope is that the offer may be referred to the Committee on the Library for consideration, report, and recommendation.

Very respectfully,

HERBERT PUTNAM,
Librarian of Congress.

The honorable the PRESIDENT pro tempore,
United States Senate.

CREDENTIALS

The PRESIDENT pro tempore laid before the Senate a certificate of the Governor of Colorado certifying to the election of LAWRENCE C. PHIPPS as a Senator for the term beginning March 4, 1925, which was read and ordered to be filed, as follows:

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 4th day of November, 1924, LAWRENCE C. PHIPPS was duly chosen by the qualified electors of the State of Colorado a Senator from said State to represent said State in the Senate of the United States for the term of six years, beginning on the 4th day of March, 1925.

Witness: His excellency our governor, William E. Sweet, and our seal hereto affixed at Denver, this 29th day of November, in the year of our Lord 1924.

[SEAL.]

By the governor:

WILLIAM E. SWEET, Governor.

CARL S. MILLIKEN,
Secretary of State.

The PRESIDENT pro tempore also laid before the Senate a certificate of the Governor of Colorado certifying to the election of RICE W. MEANS as a Senator for the unexpired term of the late Senator SAMUEL D. NICHOLSON, ending March 3, 1927, which was read and ordered to be filed, as follows:

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 4th day of November, 1924, RICE W. MEANS was duly chosen by the qualified electors of the State of Colorado a Senator from said State to represent said State in the Senate of the United States for the unexpired term of the Hon. SAMUEL D. NICHOLSON.

Witness: His excellency our governor, William E. Sweet, and our seal hereto affixed at Denver this 29th day of November, in the year of our Lord 1924.

[SEAL.]

By the governor:

WILLIAM E. SWEET, Governor.

CARL S. MILLIKEN,
Secretary of State.

REPORT OF THE LIBRARIAN OF CONGRESS

The PRESIDENT pro tempore laid before the Senate a communication from the Librarian of Congress, transmitting, pursuant to law, his annual report for the fiscal year ended June 30, 1924, which was referred to the Committee on the Library.

REPORT OF THE FEDERAL WATER POWER COMMISSION

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of War, as ex officio chairman of the Federal Power Commission, transmitting, pursuant to law, a report showing permits and licenses issued under the Federal water power act during the fiscal year ended June 30, 1924, together with the names of parties and the moneys received on account thereof, which was referred to the Committee on Commerce.

REPORT OF NATIONAL FOREST RESERVATION COMMISSION

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of War, as ex officio chairman of the National Forest Reservation Commission, transmitting, pursuant to law, the report of the commission for the fiscal year ended June 30, 1924, which was referred to the Committee on Public Lands and Surveys.

REPORTS OF THE SECRETARY OF THE INTERIOR

The PRESIDENT pro tempore laid before the Senate two communications from the Secretary of the Interior, transmitting, pursuant to law, reports for the fiscal year ended June 30, 1924, which were referred to the Committee on the District of Columbia, as follows:

A report of the surgeon in chief of the Freedmen's Hospital showing the expenditures of the said institution for professional and other services; and

A report of the surgeon in chief of the Freedmen's Hospital showing the receipts and expenditures of the said institution on account of pay patients.

The PRESIDENT pro tempore also laid before the Senate certain communications from the Secretary of the Interior, transmitting, pursuant to law, statements and reports for the fiscal year ended June 30, 1924, which were referred to the Committee on Indian Affairs, as follows:

A report showing the cost and other data with respect to Indian irrigation projects;

A report of expenditures made for the purpose of encouraging industry among Indians of the various reservations from the appropriation "Industry among Indians, 1924";

A report of expenditures from the appropriation "Indian schools, support, 1924," together with a statement that no part of the said appropriation was used in the construction of schoolhouses or for their repairs;

A report of expenditures at each school and agency from the appropriation for construction, lease, purchase, repair, and improvement of school and agency buildings;

A report of expenditures made for the purpose of encouraging industry among the Indians of the various reservations from the appropriation of \$100,000 made in the act of June 30, 1913;

A statement of expenditures on account of the Indian Service from the appropriation "Industrial work and care of timber, 1924";

A report of expenditures from the \$250,000 authorized from the funds of the Apache, Kiowa, and Comanche Indians;

A report of expenditures made for the purchase of cattle for the Northern Cheyenne Indians on the Tongue River Reservation, Mont.;

A report stating that no expenditures were made during the fiscal year 1924 for the construction of hospitals from the appropriation "Relieving distress and prevention, etc., of diseases among Indians, 1924";

A statement of expenditures of money carried on the books of the department under the caption "Indian moneys, proceeds of labor";

A report of expenditures made from the tribal funds of the Chippewa Indians of Minnesota;

A report relative to expenditures made for the purpose of encouraging industry and support among the Indians on the

Tongue River Reservation, Mont., and stating that no expenditures have been made therefrom since June 30, 1916;

A report of expenditures made from tribal funds of the Confederated Bands of Utes;

A statement of the cost of all survey and allotment work on Indian reservations;

A report showing the diversion of appropriations for the pay of specified employees in the Indian Service;

A report of all moneys collected and deposited under the appropriation "Determining heirs of deceased Indian allottees, 1924"; and

A report of expenditures made from the permanent fund of the Sioux Indians.

The PRESIDENT pro tempore also laid before the Senate two communications from the Secretary of the Interior, transmitting, pursuant to law, reports, which were referred to the Committee on Appropriations, as follows:

A report of expenditures for traveling expenses incident to the detail of employees from the office of one surveyor general to another during the fiscal year ended June 30, 1924; and

A report showing the number and kind of typewriters, adding machines, and other labor-saving devices purchased and exchanged during the fiscal year ended June 30, 1924.

The PRESIDENT pro tempore also laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, a report in regard to the claims of certain members of the Sioux Nation of Indians for damages occasioned by the destruction of their horses, which was referred to the Committee on Indian Affairs.

RENTALS FROM PROPERTY IN CAPITOL GROUNDS EXTENSION

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, a report showing the receipts from rentals of property acquired for the extension of the Capitol Grounds for the period from December 1, 1923, to November 30, 1924, which was referred to the Committee on Public Buildings and Grounds.

COLLEGES OF AGRICULTURE AND MECHANIC ARTS

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, a report of the disbursements made for the current fiscal year to the several States and Territories under the acts approved August 20, 1890, and March 4, 1907, applying a portion of the proceeds of the sale of public lands to the more complete endowment and support of colleges for the benefit of agriculture and the mechanic arts, together with a statement of the amounts paid out to the several States and Territories since the enactment of said acts, which was referred to the Committee on Agriculture and Forestry.

REPORTS OF SECRETARY OF AGRICULTURE

The PRESIDENT pro tempore laid before the Senate certain communications from the Secretary of Agriculture, transmitting, pursuant to law, reports for the fiscal year ended June 30, 1924, which were referred to the Committee on Agriculture and Forestry, as follows:

A report showing the number of motor-propelled and horse-drawn passenger-carrying vehicles and motor boats purchased by the Department of Agriculture, together with the cost of maintenance, operation, and repair thereof, for use outside of the city of Washington, D. C.;

A report showing the names of all persons employed, together with their designations and rates of pay, in the Bureau of Animal Industry for the suppression of contagious, infectious, or communicable diseases of domestic animals;

A report showing the payment to officers or other persons employed by State, county, or municipal governments of sums allotted to the Bureau of Chemistry;

A report showing contributions received on account of cooperative work with the Forest Service and the amount refunded to depositors on account of excess deposits, national forests fund; and

A report of expenditures from the appropriation "Miscellaneous expenses, Department of Agriculture, 1924."

The PRESIDENT pro tempore also laid before the Senate certain communications from the Secretary of Agriculture, transmitting, pursuant to law, reports for the fiscal year ended June 30, 1924, which were referred to the Committee on Appropriations, as follows:

A report relative to the disposition of the accumulation of department files which do not constitute permanent records

and stating that the receipts from the sale of obsolete and useless documents amounted to \$2,669.85;

A report showing the number of typewriters, adding machines, and other labor-saving devices purchased and exchanged;

A report showing the revenues derived from the operation and expenditures made on behalf of the Center Market, Washington, D. C.; and

A report showing in detail the travel from Washington to points outside of the District of Columbia performed by certain officers and employees of the Department of Agriculture.

The PRESIDENT pro tempore also laid before the Senate a communication from the Secretary of Agriculture, transmitting, pursuant to law, a report giving in detail the aggregate number of publications issued by the Department of Agriculture during the fiscal year ended June 30, 1924, together with the cost thereof, which was referred to the Committee on Printing.

REPORTS OF THE UNITED STATES VETERANS' BUREAU

The PRESIDENT pro tempore laid before the Senate two communications from the Director of the United States Veterans' Bureau, transmitting, pursuant to law, reports, which were referred to the Committee on Appropriations, as follows:

A report of expenses incurred by officers and employees of the United States Veterans' Bureau for traveling on official business from Washington to points outside of the District of Columbia for the fiscal year ended June 30, 1924; and

A report showing the number of typewriters, adding machines, and other labor-saving devices purchased and exchanged during the fiscal year ended June 30, 1924.

TYPEWRITERS, ETC., UNITED STATES RAILROAD ADMINISTRATION

The PRESIDENT pro tempore laid before the Senate a communication from the Director General of the United States Railroad Administration, transmitting, pursuant to law, a statement showing the make, model, and serial number of typewriters exchanged during the fiscal year ended June 30, 1924, which was referred to the Committee on Appropriations.

MEMORIAL

Mr. WILLIS presented a memorial of sundry citizens of Akron, Ohio, remonstrating against the ratification of the so-called Hay-Quesada treaty, proposing to cede the Isle of Pines to Cuba, which was referred to the Committee on Foreign Relations.

REPORT OF A COMMITTEE

Mr. McNARY, from the Committee on Irrigation and Reclamation, to which was referred the bill (S. 3035) to provide for the appointment of a commissioner of reclamation, and for other purposes, reported it with an amendment and submitted a report (No. 797) thereon.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMOOT:

A bill (S. 3553) to authorize the settlement of the indebtedness of the Republic of Poland to the United States of America; and

A bill (S. 3554) to authorize the settlement of the indebtedness of the Republic of Lithuania to the United States of America; to the Committee on Finance.

By Mr. WILLIS:

A bill (S. 3555) for the relief of C. M. Rodefer (with accompanying papers); to the Committee on Claims.

By Mr. HALE:

A bill (S. 3556) granting an increase of pension to James S. Pendergast (with accompanying papers);

A bill (S. 3557) granting an increase of pension to Louise M. Little (with accompanying papers);

A bill (S. 3558) granting an increase of pension to Joseph J. King (with accompanying papers);

A bill (S. 3559) granting an increase of pension to Ellen H. Phillips (with accompanying papers);

A bill (S. 3560) granting a pension to Jennie L. Sargent (with accompanying papers); and

A bill (S. 3561) granting an increase of pension to Ellen Blanchard Littlefield (with accompanying papers); to the Committee on Pensions.

A bill (S. 3562) to correct the military record of Alexander W. Goodreau; to the Committee on Military Affairs.

By Mr. PEPPER:

A bill (S. 3563) authorizing the Secretary of Agriculture to establish a national arboretum, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. REED of Pennsylvania:

A bill (S. 3564) granting an increase of pension to Lillie Stewart; to the Committee on Pensions.

AMENDMENTS TO INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. ASHURST submitted an amendment proposing to appropriate \$597,088 to reimburse the reclamation fund for the benefit of the Yuma Federal irrigation project in Arizona and California for all costs, as found by the Secretary of the Interior, heretofore incurred and paid from the reclamation fund, for the operation and maintenance of the Colorado River front work and levee system adjacent to said project, and so forth, intended to be proposed by him to House bill 10020, the Interior Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

He also submitted an amendment proposing to appropriate \$200,000 for operation and maintenance and completion of construction of the irrigation system required to furnish water to all of the irrigable lands in part 1 of the Mesa division, otherwise known as the first Mesa unit of the Yuma auxiliary project, and so forth, intended to be proposed by him to House bill 10020, the Interior Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

MARY A. MERRIFIELD—WITHDRAWAL OF PAPERS

On motion of Mr. HALE, it was

Ordered, That the papers accompanying the bill S. 1804, Sixty-eighth Congress, first session, granting a pension to Mary A. Merrifield, be withdrawn from the files of the Senate, no adverse report having been made thereon.

PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that on December 2, 1924, the President had approved and signed the following acts and joint resolution:

S. 2265. An act to provide for a rearrangement of the public-alley facilities in square 616 in the District of Columbia, and for other purposes;

S. 3397. An act to remit the duty on a carillon of bells to be imported for the Church of Our Lady of the Rosary, Providence, R. I.; and

S. J. Res. 85. Joint resolution authorizing an appropriation for the participation of the United States in the preparation and completion of plans for the comprehensive observance of that greatest of all historic events, the bicentennial of the birthday of George Washington.

COTTON-CROP REPORTS

Mr. McKELLAR. Mr. President, I ask to have inserted in the RECORD a resolution of the board of directors of the Tennessee Cotton Growers' Association in reference to the cotton crop reports and some short editorials that go with it.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is ordered accordingly.

The matter referred to is as follows:

Whereas the United States Crop Reporting Board has, for the first time during the growing season of 1924, issued two cotton-crop reports monthly; and

Whereas those frequent reports have given the growers of cotton and the legitimate cotton trade more accurate and timely information regarding the growing crop and reduced speculation and violent fluctuations in the market; and

Whereas cotton speculators and the New Orleans and New York cotton exchanges are waging an active campaign to induce Congress to prevent the Crop Reporting Board from issuing semimonthly cotton-crop reports during the growing season of 1925: Therefore be it

Resolved, That the board of directors of the Tennessee Cotton Growers' Association, in regular monthly meeting, November 19, 1924, urgently requests the Senators and Representatives of Tennessee, and earnestly solicits the cooperation of all other Senators and Representatives, especially those from all other cotton-growing States, to make every effort to have these semimonthly cotton-crop reports continued; and be it further

Resolved, That a copy of this resolution be sent to every Senator and Representative from the cotton-growing States.

ROBT. S. FLETCHER, Jr., Secretary.

[From the Progressive Farmer]

FREQUENT OFFICIAL COTTON-CROP REPORTS

How often should official cotton-crop reports be issued?

If frequent crop reports are good, as issued by spinners, merchants, exchanges, and speculators, why does the "trade" object to frequent official cotton-crop reports?

Do frequent official cotton-crop reports "disturb trade"?

In the light of the concerted and persistent attacks of the exchanges and speculators, including merchants and spinners—all generally known as the "trade"—on the official cotton-crop reports, we submit that the foregoing are pertinent questions.

They are also questions which every cotton grower in the South should ask himself. Particularly should every large cotton producer and politician, who is now attacking the official cotton reports—and, to their shame, there are many of them—ask himself these questions and consider well his answers. As cotton growers ourselves, and for self-evident reasons interested in all other cotton growers in the country, we have asked ourselves these questions. Not in any prejudiced spirit, but in all seriousness, for the whole question is a serious one to every cotton grower who desires his product to be free from the control of speculation. Having asked ourselves these questions and given some thought and study to obtain correct answers, we are giving our conclusions to our readers.

1. HOW OFTEN SHOULD THE OFFICIAL COTTON CROP REPORTS BE ISSUED?

Our answer is as often as practicable with the money and facilities available. Why this answer? Because if one cotton-crop report a month is good two a month can not be bad. The objections offered to two reports a month are really the objections the so-called "trade" has against any official cotton-crop reports at all. The real reasons why at least two official cotton-crop reports a month should be issued, from August to December, are:

First, the "trade" issues frequent so-called cotton-crop reports, many times more than twice a month, and since they are bound to be biased and based on insufficient observations, therefore frequent official reports are necessary to check the effects of these biased reports on prices, or to prevent violent fluctuations caused by speculation.

Second, during any month of the growing season, great changes in the condition of the cotton crop may take place, and if there were no official report issued in the middle of the month as a check, then these changes in the crop would be exaggerated by the private reports for selfish reasons, and violent and unjustified fluctuations in prices would be brought about. The experience of the past season, the first we have had two official reports a month, has proved this. Exaggerated reports and violent fluctuations have been less than formerly.

2. SINCE THE "TRADE" ISSUES NUMEROUS COTTON REPORTS WHY DOES IT OBJECT TO FREQUENT OFFICIAL REPORTS

The first reason is that the so-called "trade"—meaning the spinners, the cotton merchants, and the speculators—object to official cotton-crop reports of any sort. This is shown by the fact that they first tried to destroy the official reports by charging that they were dishonest. When this failed, as it was bound to, they started a campaign to discredit the official reports, because, as they claimed, they were "inaccurate." When it was shown that the official reports were the most accurate we had, because unbiased and the data gathered with more care and intelligence, they grasped as a last straw to their drowning cause, the fiction that frequent official reports "disturb trade."

The so-called "trade" objects to official cotton-crop reports because they reduce speculative control and protect the producers from a complete control of the market by speculation. Official cotton-crop reports, particularly frequent ones, are objected to by spinners, merchants, exchanges, and speculators because they interfere with speculation. Disguise and deny it as they may, that is the whole truth, and the proof is plain to any man who is not blind if he will but investigate the whole question.

3. DO FREQUENT OFFICIAL COTTON-CROP REPORTS "DISTURB TRADE"?

The exchanges and speculators say that frequent official cotton-crop reports "disturb trade." We say that frequent official reports "disturb speculation," and the real difference in these statements must not be overlooked, for therein lies the whole secret of the fact that the exchanges all over the world are combining to wage war on these frequent official reports. The Liverpool exchange, the New York exchange, and the New Orleans exchange, the three most important cotton exchanges, are conferring and cooperating to fight these frequent official crop reports. Letters are being sent out by these exchanges for the purpose of working up a concerted action against these twice-a-month official reports.

Some of those who, as producers, should have supported the crop reporting board in its efforts to protect the growers of cotton have been carried off their balance by the campaign of ignorance and falsehood carried on by the speculators and have joined them in their efforts to destroy the only protection against speculation the producers now have. The attack of the exchanges on the mid-month official reports has also been encouraged by the attacks of certain Congressmen and representatives of political organizations claiming to represent the growers.

If any additional evidence were needed to prove that frequent official reports are in the interest of the growers and antagonistic to speculation, the attacks the exchanges are making on these frequent reports ought to be sufficient, but the question is such a simple one that it is beyond understanding that any politician or producer should "fall" for this campaign against frequent official reports.

If these frequent reports "disturb trade," it is because the "trade" is on a speculative basis, but the facts show that since these frequent reports have been issued prices have been more stable. This year, with the largest acreage ever planted, with very little boll-weevil damage, and with a dry season since June over most of the belt, if there had not been these frequent reports, who believes the price of cotton would have remained above 22 cents a pound? If we had not had official reports, the "trade" reports under such conditions of the crop would have "predicted" a 15,000,000-bale crop and cotton might have sold for 15 cents a pound until the "error" was discovered. And the "error" would not have been discovered until the producers had sold most of their crop.

We ask our readers to write their Congressmen and Senators asking them to keep "hands off" the crop reporting board and these frequent crop reports; because these are their only protection from the speculators who have always in the past controlled the cotton markets. Do not neglect this, Mr. Reader, it is a most important matter to you as a cotton producer.

[From the Progressive Farmer]

WHOM SHOULD OFFICIAL COTTON REPORTS SERVE

Why are official cotton-crop reports issued? From the source of the attacks made on them, with the avowed purpose of forcing their discontinuance, one may well ask, Is the purpose of these cotton-crop reports by the Government to serve the interests of the producers and the legitimate cotton trade, or are they issued for the special benefit of the speculators and the cotton exchanges?

It should be clearly understood that the speculators and the exchanges will always be opposed to official reports. Moreover, so long as the cotton "trade," as represented by the spinners and old-line cotton merchants, is so largely dominated by speculation these interests will also be opposed to official crop reports.

The speculators, merchants, and spinners do not want Government cotton-crop reports. They would prefer to issue "private" reports—unchecked by official and more accurate reports—which could be made to better serve their "private" purposes.

In fact, a representative of a large organization of spinners, in a conference for the improvement of the cotton-crop reports, in all sincerity and innocent of the transparent selfishness of the suggestion, stated that the interests he represented "wanted only one report a year, and that issued after January 1 of the year following the production of the crop."

Yes; this kind of a report would suit the exchanges, the spinners, and the speculators, but no official report at all would suit them still better.

I

There is nothing surprising about this, but it is surprising that so many producers and particularly so many Congressmen, Senators, and other politicians, who pretend to want to serve the interests of producers, can not see through such a transparent scheme as the concerted and organized attacks of the speculators on the official cotton-crop reports. Not seeing, or if seeing not caring, that the true object of these attacks is to destroy the official reports, they fall in line with the exchanges and speculators and do all they can to destroy the only unbiased and the most accurate source of information the producers and legitimate trade now have regarding the condition of the crop and the probable production.

If these producers and politicians, for there are a few producers who are false to the interests of the producers, who are assisting the speculators in their attacks on the official cotton-crop reports, would ask themselves, what is the interest of the exchanges and speculators in these reports, they might be able to realize the injustice of their activities to the producers of cotton.

There is no question but that we will have cotton reports from the "trade" and the speculators, whether there are official reports or not. If by doing away with the Government reports all reports would cease, then there might be found some show of consistency in the activities of those who want first to have the Government reports stopped entirely and, failing in that, then by false charges and unjust criticism to destroy confidence in them.

But reports we will have. If not unbiased and reasonably accurate official reports, then biased and inaccurate reports will still be issued. Therefore, the only protection the producers can have from the biased, inaccurate, and selfish reports of the speculators and the "trade" is the official Government reports.

The first line of attack on the official reports was that they were dishonest. When that was disproved, the next line of attack was on the fancied inaccuracy of the reports. This has also been met by the facts, showing that the Government reports are the most accurate we have had, even though the so-called reports of the "trade" are largely based on the last Government report.

The charge of a lack of dependability has also been given the "lie" by the speculators and merchants themselves, by their acceptance of the Government reports and buying or selling future contracts ac-

cording to whether they considered the reports "bullish" or "bearish." If they had really believed the reports were dishonest or inaccurate they would not have bet their money to the limit allowed by the rules of the exchanges.

II

We make the unqualified statement that the official reports have been the most accurate of any class of reports issued and challenge anyone to disprove this statement.

Then when this line of attack failed, as it must when the facts were learned, the next and last ditch stand is made on the frequency of the reports and their disturbance of "trade." The wrong word is being used. These frequent and more accurate reports disturb "speculation."

We hope our readers, every one of them, will write their Congressmen and Senators and state in no uncertain language that since cotton reports are going to be issued by the "speculators" they insist on the continuance of the more accurate and unbiased official reports, and that they be issued as often as practicable, and not less than twice a month from August to December.

It would also be well for the rank and file of the cotton farmers of the South to let certain officious large producers and small politicians, who are more interested in speculation and "cussing the Government" than in the interests of the farmers, understand that they had better stop giving assistance to the "enemy" by spreading its "propaganda."

There is not a shadow of a doubt but the largest acreage ever planted in cotton in this country was planted in 1924. There has been very little damage by boll weevils, taking the belt as a whole. After an unfavorable spring, the season has generally been dry, which is always favorable to the fruiting of the cotton crop.

These are well known facts with which all are familiar.

III

Now, let each reader of the Progressive Farmer ask himself the question: If there had been no official reports which, because the information on which they are based is gathered from all sections, took into consideration the bad stands and abandoned acreage, and gave out accurate reports of the condition of the crop at the time the reports were gathered, how large a crop of cotton would the "trade" and the speculators have "reported" for this season? Would they have said, "we have the largest acreage ever planted, there is no boll weevil damage, and from June on the weather has been generally dry, which is favorable to the fruiting of cotton; therefore, we will certainly make 15,000,000 bales"? Indeed, might they not have made it 16,000,000 bales, because that would have suited their purposes better? Where would the decline in prices have stopped? Would we now be getting more than 15 cents a pound for cotton?

What do you think, Mr. Reader? These are matters which are worth thinking about in connection with these attacks of the speculators, spinners, and politicians on the official cotton-crop reports.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 71) authorizing the Cowlitz Tribe of Indians, residing in the State of Washington, to submit claims to the Court of Claims, requested a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. SNYDER, Mr. DALLINGER, and Mr. HAYDEN were appointed managers on the part of the House at the conference.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17 on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1282, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

The PRESIDENT pro tempore. The question is upon agreeing to the substitute reported by the Committee on Agriculture and Forestry.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Clerk will call the roll.

The principal legislative clerk (Harvey A. Welsh) called the roll, and the following Senators answered to their names:

Ashurst	Fernald	Keyes	Shipstead
Ball	Ferris	Ladd	Shortridge
Bayard	Foss	McKellar	Smith
Borah	Fletcher	McKinley	Smoot
Brookhart	Frazier	McLean	Spencer
Broussard	George	McNary	Stanfield
Bruce	Gerry	Mayfield	Sterling
Bursum	Glass	Means	Swanson
Butler	Gooding	Metcalf	Underwood
Capper	Greene	Neely	Wadsworth
Caraway	Hale	Norris	Walsh, Mass.
Copeland	Harrell	Oddie	Walsh, Mont.
Couzens	Harris	Overman	Warren
Cummins	Harrison	Pepper	Watson
Curtis	Heflin	Phillips	Weller
Dial	Howell	Pittman	Wheeler
Dill	Johnson, Minn.	Ralston	Willis
Edge	Jones, N. Mex.	Reed, Pa.	
Edwards	Jones, Wash.	Robinson	
Ernst	Kendrick	Sheppard	

Mr. FLETCHER. I wish to announce that my colleague, the junior Senator from Florida [Mr. TRAMMELL], is unavoidably absent. On the matter of Muscle Shoals legislation he has a general pair with the Senator from South Dakota [Mr. NORBECK].

Mr. HARRISON. My colleague, the junior Senator from Mississippi [Mr. STEPHENS], is absent on account of sickness. He has a general pair with the junior Senator from Vermont [Mr. DALE].

The PRESIDENT pro tempore. Seventy-seven Senators have answered to their names. There is a quorum present.

Mr. McNARY. Mr. President, in the issues of the Saturday Evening Post of May 24 and 31, 1924, two articles appeared, written by Senator GEORGE W. NORRIS, the senior Senator from Nebraska, under the caption, "Shall we give Muscle Shoals to Henry Ford?" These articles throw a flood of information upon this important subject, and I ask unanimous consent that they may be printed in the RECORD.

The PRESIDENT pro tempore. Is there objection? The Chair hears no objection, and it is so ordered.

The articles referred to are as follows:

SHALL WE GIVE MUSCLE SHOALS TO HENRY FORD?

[By GEORGE W. NORRIS, United States Senator from Nebraska]

During the World War it became apparent to many governments, and particularly to many government officials who had inside and confidential information, that the Allies were in danger of defeat because of the growing scarcity of nitrogen in the manufacture of explosives. An inexhaustible supply of nitrogen is contained in the air we breathe, but the method of its extraction and the expensive character of all such operations then known to the scientific world outside of Germany made it impossible for a sufficient supply to be obtained from that source. The best-understood method at that time for the extraction of nitrogen from the atmosphere was what is known as the cyanamide process. This process required as one of its essential features a very large amount of power. An abundance of cheap power was absolutely necessary, therefore, in order to secure the supply of nitrogen necessary to carry on the war, and those behind the scenes knew that if the war should continue very long this supply of nitrogen meant the difference between victory and defeat.

With a view of meeting this emergency, our Government selected Muscle Shoals, Ala., as the place where it would develop enormous quantities of power on the Tennessee River and go into the business of extracting nitrogen from the atmosphere. Muscle Shoals is a term applied to a section of the Tennessee River in northern Alabama, where the power possibilities are very great.

This section of the country was entirely undeveloped, and the Government went into the enterprise much the same as it would go into a virgin forest if it were desirous of securing lumber on a wholesale scale. It was necessary to employ thousands of men and to build habitations not only for those who should be engaged in the construction of the works necessary but to provide permanent residences for families of employees and officials necessary for the operation of the works when they were completed. The first workmen were housed in tents while temporary living quarters were built. A railroad was built connecting the various localities with the two railroad systems in that vicinity of the country. The Government purchased about 5,000 acres of land. It built about 100 miles of standard-gauge railway. It bought engines and all the box cars and flat cars necessary to carry on the work in the most economical way.

Limestone is one of the necessary materials in the extraction of nitrogen from the air by the cyanamide process. Twenty-six miles away from the works at Muscle Shoals the Government purchased between four and five hundred acres of limestone land and opened a large quarry. It constructed two nitrate plants, known as No. 1 and No. 2, several miles apart. It built a steam plant at each one of these nitrate plants having an aggregate capacity of 120,000 horsepower. These steam plants are as modern as any similar plants anywhere in the world. At each of these two nitrate plants the Government laid out and built a town with macadamized streets, electric-light facilities,

and everything necessary for permanent living quarters. These houses are modern in every way, containing bathrooms, hot and cold water, and surrounded by beautiful lawns and growing trees. In short, by the expenditure of public funds a desert was converted into a garden, and everything known to science for the comfort and happiness of the inhabitants has been installed. Many of these houses are furnished with modern, up-to-date furniture. In one of these towns a club house was built for the enjoyment of officials and employees. It is modern in every way, and completely furnished. It compares favorably with anything of its size ever constructed. A hotel was built containing 100 rooms, completely furnished and operated by the Government for the convenience of its employees and the public. The Government also owns the land around these towns, so that they are capable of almost indefinite expansion.

DAM NO. 2

While these building operations were going on at nitrate plants No. 1 and No. 2 the Government was engaged in the building of Dam No. 2 on the Tennessee River, several miles farther up the stream. It purchased the land on the river abutting the location of this dam. It laid out another town with macadamized streets, sewers, waterworks, a filtration plant, and electric-light system. This town is similar in all respects to the two other towns located at the nitrate plant. This location is connected with the other towns by a standard-gauge railway. The dam itself is the largest concrete structure of its kind in the world. Its total length from bank to bank is approximately 4,500 feet. It dams the water of the Tennessee River for a distance of over 14 miles, and the lake thus formed will cover an area of over 14,000 acres. The height in round numbers is 100 feet. When completed it will contain a roadway 20 feet above this height. The foundations extend nearly 20 feet into the bedrock of the river. At bedrock the dam is 100 feet thick, and it has an apron of about 60 feet, making a total width of approximately 160 feet. The maximum head of water on the turbines will be 96 feet, and the minimum will be 68 feet. When completed it will have units installed that will be capable of 540,000 horsepower. The flow of the river, however, is sufficient at some times to produce about a million horsepower, but the river in some exceedingly dry seasons has gone down so low that the horsepower would be reduced on some occasions to about 100,000. It was because of this variation between the high and low water flow of the Tennessee River that the immense steam plants which I have heretofore described were constructed. They can be used to convert the secondary power of this great dam into primary power, so that when the two are combined the power possibilities at Muscle Shoals, considering this dam alone, compare favorably with the greatest power projects of the world.

The Government has been working on Dam No. 2 ever since the beginning of operations at Muscle Shoals. It has spent on this dam alone to date somewhere between twenty-five and thirty millions of dollars. It is estimated that its total cost when completed will be between forty-five and fifty millions of dollars.

DAM NO. 3

The plans of the Government contemplate the construction of another dam still farther up the river, located at the head of the lake formed by the backwater from Dam No. 2, just described. This dam is to be known as Dam No. 3. It is similar to Dam No. 2, excepting that it will be only 40 feet high and nearly 7,000 feet long. Its power possibilities will be a little over 40 per cent of the power possibilities of Dam No. 2.

The construction of Dam No. 3, however, will greatly increase the power possibilities of Dam No. 2, because it will be able to hold back large quantities of water when the river is high and thus convert, at Dam No. 2, secondary into primary power.

Dam No. 3, when constructed, will back up the water of the Tennessee River for 65 miles; and it is seen, therefore, that the flood-control proposition involved in addition to its power possibilities is a great item, increasing not only the power which is developed at Dam No. 3 but also at Dam No. 2. Nothing has been done at Dam No. 3 except the necessary surveys, soundings, and borings. The estimated cost of Dam No. 3 is \$25,000,000.

TOTAL GOVERNMENTAL EXPENDITURES

I have thus briefly outlined the activities of the Government and have also noted the condition of the entire project up to date. The total expenditure of the Government up to the present time on the entire enterprise is between \$125,000,000 and \$130,000,000.

It might be well to consider what the property owned at Muscle Shoals by the Government is fairly worth at the present time. Much of the work was done during the war period when prices were high; but both the cost of material and of labor have decreased very little since that time, and it is doubtful whether the property could be replaced for much less than it actually cost.

It should be remembered also that this wild, barren land has been converted into streets and towns and that as far as the land is concerned its value has increased many fold. If a city is to spring up in the vicinity of Muscle Shoals, as many people believe, the Govern-

ment could sell vacant and improved lots in these three towns and make vast sums of money by the operation. It is not contemplated, of course, that the Government will do this, but if the property is sold or given away to a private corporation, such a possibility becomes an actual reality; and without doubt if this vast property is turned over to some private corporation it will proceed at once, as good business would dictate, to sell all the buildings and vacant lots located in the three towns above described. Such a corporation would very likely plat the adjoining land which it would thus acquire and thus increase in a very legitimate manner the value of its investment.

MR. FORD'S BID

Mr. Ford has made a bid to the Government for all this property which I have enumerated and described. He proposes that the Government shall give him a warranty deed to all this property, except Dams Nos. 2 and 3 and the one town and the real estate located at Dam No. 2, and that the Government shall give him a lease for 100 years to Dam No. 2 and Dam No. 3, together with the real estate and the town located at Dam No. 2. It will therefore be seen that Mr. Ford's bid can properly be divided into two parts. I will consider these subdivisions of his bid in the order named.

1. PROPERTY CONVEYED BY WARRANTY DEED

The property which Mr. Ford proposes shall be deeded to him in fee simple has cost the Government in round numbers about \$85,000,000. As a consideration for the conveyance of this property by warranty deed Mr. Ford proposes to pay the Government \$5,000,000. He also agrees that he will operate nitrate plant No. 2, or its equivalent, to its present capacity, which is admitted to be 40,000 tons of nitrogen per annum. Since his bid provides for a profit on this operation of 8 per cent, I do not consider it any valuable consideration for this deed of conveyance. I will discuss the proposed fertilizer operation of Mr. Ford later on.

Included in the bid of Mr. Ford, to which he will get absolute title, is not only the real estate which I have heretofore described but a vast amount of personal property as well. There is personal property which under his bid would be conveyed to him amounting in value in round numbers to \$2,000,000. Most of this personal property has a definite fixed market value. There are all kinds and quantities of building materials, all stored in sheds and kept in perfect condition. This building material was bought by the Government and stored on the property because it was thought at the time it might be necessary to use it in extending the towns owned and built by the Government, and in the construction of other shops and works. For instance, there is more than 6,000,000 feet of lumber, millions of common and fancy brick, immense quantities of slate shingles and hollow building tile. There are more than 10,000 wooden doors and 3,000 screen doors, vast quantities of shingles and windows, and, in short, all the material that goes into the construction of modern homes. All this material is the same as new, has not deteriorated in any respect, and could all be put on the market and sold for cash without any delay whatever. In addition to this there is a vast quantity of secondhand lumber and other kinds of building material used in the construction by the Government of temporary homes and halls for the use of its employees in the early stages of construction. There is also a large amount of office furniture, typewriters, desks, etc. All the tents and other camping equipment used by the Government at the beginning of its development at Muscle Shoals are still there, properly stored and in excellent condition. In addition to this there are supplies for the use of the nitrate plants, much more than would be needed within any reasonable length of time in the operation of these plants. For instance, there is one item of platinum having a definite known market value of more than \$700,000. Many miles of standard-gauge railroad, built during the construction period of nitrate plants Nos. 1 and 2 and the two steam plants, are unnecessary in the operation of these plants. There are also numerous engines and freight cars, all in good condition, used during the construction period, which are unnecessary in the operation of the plants. Mr. Ford could dispose of this personal property, if he so desired, upon the market and realize sufficient cash money from it to pay the entire \$5,000,000 which he proposes to give to the Government for the entire property.

It is an open secret that if Mr. Ford gets this property he does not intend to sell any of the electricity which he develops at these great dams. He intends to use it himself for manufacturing purposes and to supply power for such manufacturing as he may desire to develop at Muscle Shoals. It will follow, therefore, that quite a city will spring up in this vicinity. By the bid Mr. Ford will get several thousand acres of land adjoining the two towns at these two plants. He will be able—and it would be a perfectly honorable and legitimate thing to do—to lay out this real estate into lots and sell it. He would perhaps not only sell the vacant lots but he would sell all the residence property in these two towns which the Government has already improved by building modern homes.

There is no reason why the owner of these steam plants, these nitrate plants, this stone quarry, and the lessee of these dams should own the homes in which the citizens of the vicinity will live. It would prob-

ably be good business judgment to sell them and thus have a city of home owners instead of a city of tenants. If Mr. Ford took this course with the property, which under his bid would be perfectly legitimate and good business, he could sell these lots and residences for many times the \$5,000,000 which he pays for the entire property. It would be safe to say, therefore, that on this part of his bid alone he would be able to make millions of dollars and still have left by fee-simple title all the property necessary or desirable to its use and its utilization. The lots comprising these towns are already worth many times what the Government actually paid for them. If Mr. Ford builds a large manufacturing plant in the vicinity, their value would double and treble within a comparatively short length of time.

The effect, therefore, of the bid would be not only that Mr. Ford would acquire this property without any consideration whatever, but that he would make a profit out of it, without any other consideration, of many millions of dollars. For him and the corporation which he proposes to organize it would be the most gigantic and profitable deal that he ever made in his wonderful business career. If he builds the manufacturing establishments that he has given the country to understand he will construct at Muscle Shoals, he can make enough profit out of this land speculation alone to build all his manufacturing establishments and have sufficient money left to operate them without at any time investing a single dollar. His operations in the automobile world, which have resulted in such wonderful success, would sink into insignificance compared with the enormous profit there would be to him and his corporation in the Muscle Shoals development. This conveyance would in effect be the greatest and most magnificent gift ever recorded in history, and, as I have said on a former occasion, it would be the greatest gift ever bestowed on mortal man since salvation was made free to the human race. It would not only assure Mr. Ford that he would be the richest man in the world, but it would give him a power in the commercial field by which he could dominate the industries not only of this country but of the world. And if Mr. Ford loses, his loss will be greater than any loss ever incurred in the speculative world and could only be compared with the loss of Adam and Eve when they were driven out of the Garden of Eden.

2. THE 100-YEAR LEASE

We have seen the enormous possibilities of profit to the Ford corporation in that part of the property to which under Mr. Ford's bid it secures absolute title. The opportunities for making the vast sum outlined would not be possible if it were not for that part of the bid which provides for the leasing of these two great dams. The conveyance of the property by fee simple, while resulting in a loss of over \$75,000,000 to the Government, and while important in itself, sinks into insignificance when compared to that part of the bid in which Mr. Ford demands a lease to his corporation for 100 years for these dams. No one has ever secured from the Government of the United States or, so far as I know, from any civilized government of the world such an advantageous lease.

The conservation of the natural resources of the country, so far as navigable streams are concerned, has been one under discussion for many years. The importance of the question increases with the passing of the years. These great streams belong to all the people. The wonderful power possibilities ought to be developed so as to benefit all the people. It would be an economic sin for Congress to turn over to any corporation the use of this power for 100 years without regulation of any kind. We owe something to the generations that will come after us. We have no right to mortgage the inheritance of unborn millions for the benefit of a private corporation unregulated and unrestrained.

In the wildest stretch of the imagination we can not foresee the wonderful possibility of electric energy generated from these streams in the next 40 or 50 years. We only know that the use of electricity is becoming more general every day, that it is part of our civilization, and that in one form or another every citizen has a right to enjoy the privileges which it affords. It should be understood to begin with that Mr. Ford's bid provides that the Ford corporation shall have the electricity developed at Muscle Shoals without regulation either by Federal or State authority. For the space of 100 years this electricity becomes the property of the corporation as absolute and as outright as though he were a king or a potentate and owned in fee simple all the property and all the people of his domain. The bid provides that these dams shall be constructed at the cost of the Government of the United States. The taxpayers of the country, through the Treasury of the United States, contribute every dollar that goes into them. When the dams are completed then a lease is given to Mr. Ford's corporation for 100 years.

MR. FORD'S CORPORATION

We ought to pause and give consideration to the fact that in Mr. Ford's bid he assumes no personal obligation, except that he will form a corporation with a paid-up capital stock of \$10,000,000. It is with this corporation that we are dealing. Mr. Ford has done all that he has agreed to do in his bid when he forms this corporation. The deed I have been speaking of is given to this corporation. The lease I have

mentioned goes to this corporation. There is not even an implication in Mr. Ford's bid that he will even control this corporation during his lifetime. It is assumed, of course, that Mr. Ford will control it and that all its stock will be owned by Mr. Ford or members of his immediate family, but we ought to understand to begin with that when we consider Mr. Ford's bid we are dealing with a corporation that at the very best can not be controlled by Mr. Ford for more than a few years. Those who favor his bid, if they do so upon the ground of the great confidence that the people generally have in his honesty, must realize that even if we give Mr. Ford credit for every virtuous attribute that his friends and admirers ascribe to him, it will nevertheless follow, in the course of human events, that this corporation will eventually be owned and managed as all other corporations are. I am not criticizing Mr. Ford. I have always had great admiration for him, but I do not agree with some of his admirers who think that he is superhuman. He is only an individual after all, anxious, perhaps, to outstrip all competitors of the world by becoming richer than any other human being. He is asking a deed that will convey for all time this property that belongs to all the people, and a lease for 100 years to other valuable concessions, and the people who are advocating the acceptance of his bid do not seem to realize that he will not be with us long, and that our children and our children's children will be dealing with a corporation as cold and as clammy as though organized by a Rockefeller or a Stinnes. Long after Mr. Ford has gone to his reward, long after he has obtained a monopoly of the manufacture of heavenly chariots that rattle over the golden-paved streets of the eternal city, our descendants will be sweating and toiling in the sun to pay tribute to the soulless corporation that he has left behind.

CONSIDERATIONS FOR THE LEASE

It is claimed by the Ford adherents that under Mr. Ford's bid this corporation will pay to the Government a rental of 4 per cent on the actual cost of these dams. This is one of the many points of deception that have been heralded before the people of the country. An analysis of the bid discloses that there is no such payment provided for. The bid provides—with an exception that will be noted later—that the corporation shall pay 4 per cent on such expenditures made after May 31, 1922, the date of Mr. Ford's bid. The corporation does not agree and is not obligated to pay any interest on any expenditure made before that time. It must be remembered that prior to that date the Government had purchased the land abutting this dam and had built the town heretofore mentioned at one end of the dam, and that the dam was partially completed on that date. The Government had spent at that time \$17,000,000 at this dam. Mr. Ford's bid does not pay one penny of interest on that investment.

There is another exception that a close analysis of the bid discloses which is important. It is provided in the bid that for six years after the completion of Dam No. 2 this corporation, instead of paying interest, shall pay \$200,000 per annum. This will be interest for six years of the term at less than one-half of 1 per cent upon the money already expended and to be expended in the completion of this one dam.

The bid provides that the 4 per cent interest does not commence to run on Dam No. 3 until three years after it is completed. During these three years the corporation pays an annual rental, instead of interest, of \$160,000. This will be interest on the money invested in Dam No. 3 for three years during the term at less than 1 per cent upon the cost of the dam.

The bid does not contemplate the payment of any interest until these dams are completed. This means that no interest shall be paid upon any of the money invested in these dams until completion, and then for six years and three years, respectively, the payment of interest upon the Government's investment at less than 1 per cent. Upon the money that is expended from the Treasury of the United States from year to year, amounting in the aggregate on the two dams to about \$75,000,000, no interest whatever is paid during the construction period, and the 4 per cent interest does not commence to run on Dam No. 2 until six years after its completion and on Dam No. 3 until three years after its completion.

If we make a computation, giving Mr. Ford's corporation credit for the 4 per cent while he pays it, and the rental installments above mentioned before the 4 per cent interest commences to run, and apply it to the investment of the Government from the various dates of expenditure on these two dams, we find that the mathematical result of such computation is that Mr. Ford's corporation is paying the Government exactly 2.79 per cent interest for this money; and when we realize that this corporation has the use of this money for 100 years we begin to comprehend the generosity of the tax-paying public in behalf of Mr. Ford's corporation.

THE SO-CALLED AMORTIZATION PAYMENTS

To be absolutely fair with Mr. Ford's corporation it must be admitted that he makes other payments besides the interest payments above analyzed. It is claimed by the advocates of the Ford offer that he actually pays back to the Government its entire investment in these dams by way of so-called amortization payments. This is one of the

most interesting and deceptive propositions contained in the Ford offer. It has been heralded over the country that as a matter of fact the investment of the Government is entirely returned to the Treasury of the United States, and millions of our people believe to-day that if this lease is made to Mr. Ford's corporation the Government in the course of 100 years will secure a return of the taxpayers' money which is used in the construction of these dams.

The Ford offer proposes that commencing with the seventh year of the lease on Dam No. 2 and the fourth year of the lease on Dam No. 3 there shall be paid semiannually as to Dam No. 2, \$19,868, and as to Dam No. 3, \$3,505. It is alleged that if the Government would take these payments and loan them out at interest at 4 per cent, then collect the interest every six months and continue to loan such collections at 4 per cent, that in 100 years the fund would reach an amount practically equal to the cost of the dams, less the \$17,000,000 paid by the Government prior to the Ford offer. It is not claimed even by the Ford adherents that the Government would ever get any return on any interest on this \$17,000,000. Everybody knows that such a proposition is not only impractical but perfectly nonsensical. Neither the Government nor any business institution ever has or ever could go into such a deal.

Mr. Ford will not even dare apply his own amortization theory to his own business, but, on the other hand, his corporation should receive credit for every one of these payments. If we figure them up, we find that during the 100-year period these payments so made by the Ford corporation would amount to \$4,368,378, and, of course, the corporation is entitled to and should receive credit for these various installments upon the date when they are paid. These payments will have a tendency, in a very small degree, to increase the interest that Mr. Ford's corporation pays upon the Government's investment. If we give the corporation credit for every cent that it pays at the time it pays it, we find that after adding all these payments, which he calls amortization payments, to the interest payments, the corporation will be paying interest upon the Government's investment at the rate of 2.85 per cent. Analyzing the proposition, therefore, and reducing it to actual figures, we find that the Government would be loaning to the Ford corporation about \$75,000,000 for 100 years, at an annual interest rate of 2.85 per cent. In other words, it means that the Government has not only loaned this money at this wonderfully cheap rate to this corporation for 100 years, but that at the end of the 100 years it will not have received back one cent of the investment.

In justice to the taxpayers of the country, who must contribute this money, and in justice to the present generation and to the unborn generations, who have title to the property conveyed, how can any law-making body acquiesce in the unreasonable demand that this corporation shall become the greatest beneficiary of public money in the history of civilization? By what magic has this financial wizard gained control of the public conscience so as to induce our public servants to thus barter away the inalienable rights not only of those who live but of unborn generations who shall follow?

But the loan of this money is not the only gift involved in the financial part of the transaction. Not only does the Government loan to this corporation for 100 years \$75,000,000 at 2.85 per cent interest, but it gives to the corporation, which is the beneficiary of this loan, the absolute title to all the electricity developed without reserving any power to the Federal Government or to the State government to control or regulate in any way its use or distribution.

But suppose we apply Mr. Ford's amortization theory to his corporation. If the Ford adherents still claim that this foolish and unreasonable amortization theory is correct and that the Government should be so unwise as to accept it, they will certainly admit that the same rule ought to be applied to the corporation that is the beneficiary of the Government's charity. If we assume that a fair rate of interest in the commercial world is 6 per cent and that therefore 6 per cent is what Mr. Ford would have to pay for this money that he gets from the Government at less than 3 per cent, we find when we consider the Government's investment in these two dams that the difference on the investment between 6 per cent and what the Ford corporation actually pays is about \$236,250,000 during the entire lease period. This would be the actual profit if the money were used in business and is, as a matter of fact, a fair statement of the actual profit based on this one item alone; but if we apply Mr. Ford's amortization theory and require this corporation to take the annual earnings on this interest item each year and loan them out at interest, compounding them the same as he asks the Government to compound his payments, we would find that at the end of the 100-year period the Ford corporation would have a cash fund of \$14,500,000,000. If Mr. Ford's theory is correct as applied to the Government and the same theory is applied to his corporation, we find that at the end of this period this corporation would be able to completely control and dominate the business not only of the United States but of the entire world.

The only other consideration for this lease in the Ford offer is that the corporation agrees to furnish power free of charge to the Government for the operation of the locks that are to be installed in both Dam No. 2 and Dam No. 3. This is such a small item when it is taken

into consideration with the enormity of the entire proposition that it is hardly worthy of notice, and it would be difficult to make a computation of its value.

KEEPING THE DAMS IN REPAIR

Another piece of deception very carefully concealed from the public is that in the Ford bid it is provided that the Government shall keep these dams in repair for the benefit of this corporation during the entire 100-year period. Again we approach a proposition that dazzles the human mind and causes us to wonder not only how any living mortal could ask the Government to undertake such an enormous task for the benefit of a private corporation but how it could be possible that when such a proposition is made the public would not as one man rise up in righteous indignation. In the history of our country no citizen has ever presumed to make such an unrighteous demand. In every law that has ever been passed by Congress, and in the general leasing law providing for the building of dams upon our navigable streams, it is distinctly provided not only that the lessee shall furnish the money to build the dams but that he shall keep them in repair during the leasing period. If this proposition were made without connecting it with the name of any man, it would be really laughable and would not receive consideration for a single moment by any citizen. The corporation under this bid does generously agree to keep its power house and the machinery in the power house in repair, but the balance of the dam must be kept in repair and maintained in good condition by the Government of the United States during the entire 100 years.

I have often wondered if Mr. Ford does not laugh in his sleeve when he realizes that a proposition like this is given serious consideration by the lawmakers of the country.

In effect this means that the Government shall go into the insurance business. It is true that Mr. Ford's bid provides that this corporation shall pay the Government \$35,000 annually for this insurance on Dam No. 2 and \$20,000 annually on Dam No. 3. Thus the Government insures these two dams for 100 years upon the annual premium of \$55,000. It is the most gigantic insurance policy ever conceived by the human mind. No insurance company in the world organized on business principles would give the proposition a moment's consideration. Every expert who testified on this proposition expressed the opinion that these insurance premiums were absolutely and entirely inadequate for the risk assumed. Dam No. 2 is the largest concrete structure of its kind in the world. In the history of engineering there is no basis upon which an expert could fairly compute what the premium on such insurance should be. Do the taxpayers of America want to assume this risk for 100 years' time upon the payment of this nominal fee? This is putting the Government into business with a vengeance. It is putting it into a business that everybody knows in advance will be a losing venture. It is binding the Treasury of the United States for 100 years in the future to save harmless a corporation that is already smothered in governmental gifts at the expense of the taxpayers. If we give to this corporation by warranty deed all the property heretofore enumerated, and then give it a lease for 100 years' time, without any regulation as to the hydroelectric energy it shall produce, and in effect finance the operations for 10 years on a \$75,000,000 basis at less than 3 per cent interest, why should the suffering public be still further mulcted by guaranteeing to this corporation any loss or any damage that might be sustained from the elements of nature during an entire century?

The plans of Dam No. 2 provide for large steel gates running all the way across the dam proper. No one believes that these structures will last for 100 years. It is conceded that they will have to be replaced several times during this period. They are liable also to damages at any time during high water. No one can foresee what the possibilities may be. A crazy anarchist might blow out a section of this dam with dynamite. In case of a war the entire structure might be destroyed in a few moments by explosives dropped from airplanes. Extremely high water might cut around the dams or otherwise damage them. An earthquake might damage or totally destroy either one or both of these dams. Should the loss in any such case fall upon the taxpayers, who have practically given all this property to Mr. Ford's corporation? A cloud-burst might tear away some of the structure. There are hundreds—yes, there are thousands of ways in which extremely great damage might occur. We hope it will not occur. We do not expect them all to happen, but it is safe to say that in the course of 100 years many of them will naturally occur. If a portion of this dam were torn out, under Mr. Ford's bid it would at once be the duty of the Government to reconstruct it at its own expense. If it were injured by an enemy or an idiot, the Government alone would be responsible for the damages. If a commercial corporation could be induced to issue a policy of insurance upon these dams, it would under no condition issue one for a longer period than from three to five years. It is doubtful indeed whether any insurance institution would issue such a policy under any consideration. If the Government were going into the insurance business, and would issue an insurance policy upon all dams in the United States, charging a premium commensurate with the risk, it might well insure Mr. Ford's

corporation against loss for a reasonable fee. But the insurance business is based upon the theory that the insurance company will take a large number of risks of a similar kind. No corporation would issue only one policy unless, indeed, it charged an enormous premium for it. The theory of all insurance is a promiscuous number of risks located in different sections, and it is based upon the theory that while loss will always occur somewhere, it will not come everywhere at the same time, and therefore the loss on one risk will be made up by the profits on many other similar risks.

But the proposition of Mr. Ford is that the Government shall go into the insurance business and confine the issuing of its policies to these two dams in the same locality owned by the Ford corporation. During the entire discussion no one has ever given a reasonable excuse for this provision contained in Mr. Ford's bid, and it is safe to say that no one ever can, because it is not based upon any business consideration or upon any fair consideration of the subject. It is simply a proposition that binds the Government to guarantee the profits of this corporation through 100 years, after it has practically donated the property in the first place.

THE FERTILIZER QUESTION

Mr. Ford's bid provides that he will operate nitrate plant No. 2 to its full capacity in the manufacture of fertilizer. This fact has been used over the country to induce the farmers to back Mr. Ford's proposition and to demand favorable action at the hands of Congress. In all fairness, however, this part of Mr. Ford's bid is not entitled to be considered as one of the considerations for the transfer of the property or the leasing of the dams. It is expressly stipulated in the bid that the corporation shall be entitled to make a profit of 8 per cent on its fertilizer operations.

The farmers of the country have been led to believe that Mr. Ford will cut the price of fertilizer in two. There is no such guaranty in his bid. He is under no such obligation. The corporation is only bound to produce 40,000 tons of nitrogen per annum, and it is entitled to make a profit on that of 8 per cent. It is not stipulated that he shall cut the price of fertilizer one-half. It ought to be small satisfaction to the farmers of the country to realize that while they will toil early and late in the fields to give this corporation an 8 per cent profit, they will likewise bend their backs in toil to pay their portion of the taxes on the money that will be loaned to this great corporation on 100 years' time, at less than 3 per cent.

It is my belief that the extraction of nitrogen from the air will be cheapened. Until the price is cheapened it will not be possible to use the nitrogen thus extracted in the manufacture of fertilizer and to sell the product at less than the present market price, unless power for its manufacture can be obtained at practically nothing, and I assert without fear of successful contradiction that until this price is cheapened neither Mr. Ford nor the Government nor anybody else will be able to manufacture fertilizer from nitrogen extracted from the air at Muscle Shoals, if a profit of 8 per cent is added to the business, at a price that will materially reduce the cost to the farmer.

As a matter of fact, Mr. Ford's bid holds no hope whatever for the reduction of the price of fertilizer to the farmer. His success in this respect is the same as that of anyone else. It depends entirely upon improvements and the cheapening of the method of extraction. The scientific men of the entire country, led by the Bureau of Chemistry of the Government, have been working diligently ever since the war to cheapen this process. They have met with a very fair amount of success, and it is believed now by these experts that they have discovered a way of very materially cheapening the method of extracting nitrogen from the atmosphere. They have done this as Government officials working in Government laboratories. Neither Mr. Ford nor any of his employees or assistants are entitled to any credit whatever for this improvement. If he secures Muscle Shoals he would be entitled to use whatever improvement the Government had invented, but this would likewise be true of everybody else. It would be true of the Government if it operated the nitrate plants. Such improvement does not depend upon selling or leasing this property to the Ford corporation.

The investment of the Government at Muscle Shoals was originally a war proposition. It is important, it seems to me, that the Government should retain this property. If a war should come in which we should be engaged, we would need all the property that we now have there. We can compare Muscle Shoals to a battleship, the only difference being that the nitrate plants have a peace-time use while the battleship has only a war-time use. There is no more reason for giving away Muscle Shoals to this Ford corporation than there would be to making him a present of a battleship.

It is extremely important that the manufacture of fertilizer should be cheapened, and the people of the country are to be congratulated on what promises to be a wonderful development and improvement by way of cheapening the process of extracting nitrogen from the atmosphere. Such improvement can best be brought about and the benefits thereof be given to the public at large, by the retention of Muscle Shoals by the Government and the use of the improved methods therein invented and discovered by our own public servants, and thus

supply one important ingredient of fertilizer to the farmers of the country, not at a profit of 8 per cent, but at absolute cost.

Since the Government will need this property in time of war, and since it is absolutely necessary in time of war, it is just as essential that it keep it in repair and in stand-by condition in time of peace as it is that we should keep our fortifications in good shape and our Navy in fighting condition.

THE RECAPTURE CLAUSE

Mr. Ford's followers make considerable capital out of the fact that his bid provides that the Government can take over this property from his corporation in time of war. This is another provision in the bid that has no basis of merit except as a foundation for propaganda. Every child knows that in time of war the Government can take over any property it sees fit to take. If Mr. Ford's bid provided that the Government should take over this property at the price he pays for it, then there would be some merit in his contention, but under his bid, if we take it over, we would have to pay—not what he paid—but its full value. Not only this but his bid specifically provides that when we take it over we shall pay damages if there be any obligations or contracts that are in existence at that time.

THE DONATION OF ANOTHER STEAM PLANT

It would seem that these enormous gifts from the Government to the Ford corporation ought to fill the heart of Mr. Ford with overflowing thankfulness. To be the beneficiary of such a national gift as Muscle Shoals ought to move his great heart to charitable activity. But the bill which is now pending in the Senate and which recently passed the House thrusts into the lap of this Ford corporation another specimen of kindly beneficence that would move a heart of stone to shed tears of gratitude. There is one provision of this wonderful piece of proposed legislation that will guarantee Mr. Ford's corporation against any possible distress or poverty. It is provided in this bill that the Secretary of War shall condemn a suitable site for a steam plant somewhere on the Black Warrior River, and that he will construct at Government expense on this property, at the mouth of a coal mine, a steam power plant capable of producing 40,000 horsepower, and in order that Mr. Ford's corporation may receive this wonderful gift without trouble or expense this bill further provides that the Secretary of War shall purchase a right of way from the site so selected to Muscle Shoals and construct thereon a transmission line, and that after all this is done it shall be turned over free of cost to the Ford corporation by absolute warranty deed. This ought to make Mr. Ford feel happy and compensate him for any worry that may have come to him on account of the delay in Congress that some misguided Members of the House and Senate have caused to the acceptance of his wonderful bid.

No one has ever given a reason for this additional donation that has any foundation for its basis. The only excuse given for it that I have heard is that several months ago the Secretary of War sold to the Alabama Power Co. an undivided interest in a power plant located at Gorgas, and from which power plant the Government obtained power when it commenced the construction operations at Muscle Shoals. It was in no way connected with Muscle Shoals. It had no relation to Muscle Shoals after the Government had built its own steam plant, and was in no way either directly or indirectly involved in the operation of the governmental activities at Muscle Shoals.

There is no more reason for the Government building this additional steam plant and giving it to Mr. Ford's corporation because power was once secured from the Gorgas plant to supply building operations at Muscle Shoals, than there would be in buying an automobile factory and giving it to Mr. Ford because in the beginning of operations at Muscle Shoals automobiles or trucks from that factory had been used in the development operations.

If Congress passes a bill containing such a provision it certainly ought to apologize for complaining of the action of recent governmental officials in giving away valuable oil lands belonging to the Government. In 100 years from now Teapot Dome and the naval oil reserves in California will be dry and barren waste, of no value whatever, but Dams Nos. 2 and 3, at Muscle Shoals, having been kept in repair for the benefit of a private corporation, by funds from the Treasury of the United States, will be much more valuable then than now. During the years that shall intervene the waters of the Tennessee will still be tumbling over the rapids, turning the wheels of toil for the benefit of this much-beloved corporation. The cilia of the earth in the meantime will have become extinct. Water power will have increased in value. The exhaustion of oil will increase the value of electricity; oil lands will eventually become valueless, and as they decrease water power will increase in value in the same ratio. If we give the oil away the beneficiary has received the full utilization of the gift when he has used or sold the oil; but if we give away all right to use our navigable streams for hydroelectric energy, the gift becomes more valuable with use.

PROPAGANDA

I doubt if in the history of the Nation there has ever been an instance where such wonderful propaganda has been inaugurated as has existed in favor of the acceptance of Mr. Ford's proposition. In the vicinity of Muscle Shoals all the land within a radius of quite a number of miles has been purchased by speculators. Much of this land has been laid out in lots and real-estate speculators have covered the country with their activities in favor of Mr. Ford. Expensive offices are maintained in New York, Washington, Chicago, Detroit, and, as I am reliably informed, in quite a number of the other large cities of the country. The most deceptive and alluring literature possible has been circulated. Canvassers and agents are on the road for the purpose of inducing all kinds of people to invest in Muscle Shoals.

The name of Mr. Ford is linked with every one of these great advertising schemes. There is no doubt but that many people in the vicinity of Muscle Shoals have been made to believe that if Muscle Shoals is given to Mr. Ford there will be a city springing up there that will make New York look like a country village. They have organized the colored people; they have organized the school children; they have organized the bankers; they have gotten control of boards of trade and all kinds of commercial organizations. I do not know how many of these are financially interested in the lots that are offered for sale, or how many are really deceived by the wonderful literature that is being circulated. They have sold an enormous amount of this real estate to purchasers scattered all over the United States, and every purchaser becomes a booster for Mr. Ford's proposition. Having sold a lot to an individual these real-estate sharks send literature to the purchaser describing in colored and illustrated pamphlets the wonderful profit that will come to the investors if Ford is given Muscle Shoals. They are induced, many of them with perfectly honorable intentions, to write to their Congressmen and their Senators urging them to vote for the Ford offer.

This propaganda has been particularly active among the farmers of the country. They have used different methods for the farmer. He is made to believe that if Mr. Ford gets Muscle Shoals he will be able to buy fertilizer for a song. He is told, and falsely told, that Ford has agreed to cut the price of fertilizer in two at least. These schemers have gotten control of many of the heads of farm organizations. Members of Congress have in many instances pledged their votes in advance to organizations of farmers, making the pledge even before they understood the proposition and assuming that the information on which these farm organizations and leaders had acted was reliable. Many of them have discovered since that it is a wonderful propaganda of hypocrisy and that it would be a monumental national sin to turn over this valuable property to a corporation without consideration.

The greatest farm organization in America pays its representative and his office assistants in Washington very liberal salaries. This representative is supposed to be here looking after the legislative program as it pertains or relates to the agricultural situation. As a matter of fact, he is devoting practically all his time to the Ford proposition and has sent out misleading but carefully worded literature to the farmers comprising his organization, thus continuing the deceitful practice of those who are engaged in this wonderful propaganda.

The State organization of a farmers' union in one of the Western States some time ago passed a resolution in favor of accepting the Ford proposition. I recently learned that this organization was induced to take this action mainly by a woman who ostensibly was working for the benefit of agriculture but who, as a matter of fact, was the owner of 5,000 acres of land in the vicinity of Muscle Shoals.

In some localities the churches have even been organized. I am in receipt of a telegram signed by several ministers of the gospel, in which they say that "the Muscle Shoals Independent Holiness Association pledge themselves to earnestly pray that Almighty God may defeat any opposition to the Ford offer," so that the Ford proposition is taken to the throne of God Himself. I do not know to what extent these prayers may be influenced by financial consideration, but there is no doubt but that some of these minister leaders have worked their followers into a frenzy on the subject.

One of the things that is difficult to understand is how the people of the South, including all classes, have to a great extent been organized into enthusiastic supporters of the Ford proposition. I have in my possession a copy of a letter written by the chamber of commerce of a southern city to its members notifying them that each member has been assessed for the purpose of raising money to put the Ford proposition across in Congress. This city is located within 100 miles of Muscle Shoals, and in the letter to its members its officers state that other cities of the South, naming them, have raised large sums of money. It seems from this letter that these cities are each assessed a certain sum. Each locality was given a quota the same as was done during the war when we were selling Liberty bonds, and from the letter it is learned that this is not the first quota that has been

assessed. The amount to be raised in this particular city was \$5,000, and reference is made to a former quota not only of that city but of all the others. There is no doubt but that hundreds of thousands of dollars have been raised in these cities, and that a propaganda is on right now to raise a vast sum of money. I do not myself see how it can be legitimately used, and I can not understand the viewpoint of many of these southern organizations. I know from my correspondence that many of the business men and farmers even of the South have had their eyes opened and are beginning to see that after all this is a propaganda based upon misrepresentation and that an analysis of the Ford offer means nothing except profit to the Ford corporation.

There is no doubt if Mr. Ford gets Muscle Shoals that a manufacturing city of reasonable size will eventually be built in the vicinity of Muscle Shoals. This is on the truthful theory that Mr. Ford will use all the hydroelectric energy developed at Muscle Shoals except what is necessary to operate the nitrate plant for manufacturing purposes established by himself or his corporation. That means, and it is undoubtedly true, that the Ford corporation will not sell a kilowatt of this electricity. Even the city that will be brought into being has no guaranty that either its streets or its homes will be supplied by electricity developed at Muscle Shoals. Mr. Ford will need it all for manufacturing purposes, and under his bid he has a right to keep it all. It would follow that these cities that are so generously pouring out their funds to have the Government make this wonderful gift to Mr. Ford will be completely outdistanced in all manufacturing enterprises by the cheap power that this corporation will own. Nashville, Memphis, Knoxville, Birmingham, Mobile, New Orleans, and even the cities of Arkansas; in fact, practically all the cities of the South ought to be benefited by the electricity that will eventually be developed at Muscle Shoals. But if Mr. Ford's offer is accepted not one of them will get a kilowatt. On the other hand, there will spring up in their midst a city that will have such advantages over all the others by reason of cheap power that instead of a benefit they will find themselves compelled to compete with an impossible opposition.

The modern method of conveying electricity has clearly demonstrated that to get the maximum benefit of any hydroelectric development the various power possibilities should all be tied together in one grand plan. This would enable people to use hydroelectric power when they were located a thousand miles away from some of the points of generation. This property that belongs to all the people in the way of electricity that will eventually be developed at Muscle Shoals ought to be supplied to the cities and homes of the South at absolute cost, but a large number of these honest and well-meaning people are crying themselves hoarse for the benefit of a corporation that will never do them a particle of good and will never turn a single wheel except for the benefit and the profit of Mr. Ford's corporation. I do not mean that there will be enough electricity developed at Muscle Shoals to supply the entire South, but I do mean that it is the largest one instance of such development, and that when tied in with other developments that can be utilized in various places of the South there would be a system of hydroelectric energy that would bring direct benefit to practically all the towns and the farms of the South. Any other development, especially at public expense, is an injury and a fraud to the people of the country, and particularly to the people of the Southern States. If the people of the South were alive to their own interests and to their own happiness, they would stand up and condemn in one voice any Congress that enacts a law accepting the Ford offer. The time will come, and it will be at no distant day, when the truth will gradually percolate through the minds of the southern people and cause them to realize the economic crime involved in the Ford proposition. The politicians and the political bosses through all that section who are capitalizing this deception that is being practiced upon the people will eventually reap a reward of humiliation and defeat which is involved in this unholy propaganda. If Congress is clubbed into submission by this campaign of misrepresentation, the people will waken within a few years to the enormity of the offense by which the inheritances of unborn generations have been frittered away and our descendants compelled to pay financial tribute to the soulless corporation whose tentacles will be fastened for 100 years into the rightful inheritance of a misguided people.

Some of the literature that has been sent out by a Washington representative of a great farm organization in favor of the Ford proposition dwells upon the necessity of using electricity developed from our public streams for the benefit of all the people, and in this literature it is stated that the woman at the washtub should be able to secure current to assist her in her occupation. It almost brings tears to the eyes of the sympathetic person who reads this literature to see the smile of satisfaction that shall come to the washerwomen of the South when electric washing machines can save the aching backs of these poor women. But this literature does not explain that the acceptance of Mr. Ford's offer means no such thing. It gives the people to understand that farmers and laboring classes are going to get electricity so cheap that they will not take the time

to turn off the current, and yet those who send out such literature know that under Mr. Ford's proposition such a condition is an absolute misrepresentation. The washerwoman, washing the clothes and bed linen of the officers of this corporation, will not be able to get a single kilowatt of power from the mighty torrent within hearing while she thus labors. All this power will go to the one corporation. It is under no obligation whatever to give a particle of it to the farmer, to the washerwoman, or to the homes that are to spring up as if by magic when Ford is given title to this valuable property. In the name of the poor, in the name of those who toil, these real-estate speculators, assisted by others who expect to gain a financial or a political advantage, are practicing a deception upon the honest people of the country that deserves and will eventually receive the condemnation of all fair-minded people.

It is difficult to harmonize the idea of Mr. Ford's philanthropy and his fairness when we note his silence while his name is coupled with and used in this propaganda of exaggeration and deception. The country has been led to believe that without any improvement in the extraction of nitrogen from the air he will reduce the cost of fertilizer by at least one-half. He has made no such offer and has entered into no such guaranty. The people of the country by this false propaganda have been induced to believe that he pays 4 per cent interest to the Government for the use of this money. He pays nothing of the kind. It is claimed in behalf of his offer that he repays to the Government the entire amount of its investment. He does not return one penny. The propaganda in his behalf claims that he will reduce the price of electricity to a large portion of the South. He has made no such claim, and no such claim can be truthfully made in his behalf. The country has been told by the advocates of his proposal that the property which is deeded to him is paid for by his corporation on a basis of its fair value. Nothing is further from the truth. He gets it for practically nothing. In fact, connected with the gift of water-power possibilities and the possibilities of his selling that which is of no use in the operation of any manufacturing establishment which he may build, he is not only getting the property for nothing but he is given a premium of enormous financial value to get him to take it.

THE DISTRIBUTION OF ELECTRICITY GENERATED FROM PUBLIC STREAMS

There are two theories in the distribution of electricity that is manufactured from navigable streams. One theory believes that this privilege should be turned over to one person or to one corporation, and that such corporation should absolutely own all the electricity so developed. The theory is that if such a corporation is thus enabled to manufacture its product at a cheap price, the buying public will get the benefit of its reduction. As a matter of practice everybody knows that human nature is practically the same everywhere and that such a corporation is in business solely for the purpose of making money, and as a matter of practice he lowers his price only sufficiently to undersell his competitor. He sells his product at as high a price as possible and lowers it only to drive out competition, and when competition is thus driven out he can raise his price, and the fact that he is able to lower it prevents anyone from going into a competitive business. This principle is well illustrated by the Ford proposition. This corporation will be under no obligation whatever to sell power to towns, cities, and municipalities, and would not be subject to regulation in any way. It would be the only instance in the country where a corporation is allowed to develop electricity from a public stream without having the sale and the use of such electricity regulated by law.

On the other hand, the other school believes that electricity developed from such streams shall be used for the benefit of all the people; that municipalities, counties, States, and districts shall have such electricity at cost; and that if it is sold either to municipalities or to individuals, the price shall be regulated by law.

When the great power of the Tennessee is fully developed it ought to mean that every man, woman, and child within a radius of several hundred miles should receive some of the benefits of the electricity developed on a stream belonging to all the people.

THE CONTEST OVER THE PRESERVATION OF PUBLIC WATER-POWER RESOURCES

For many years there was waged a bitter contest between those who wanted to preserve the water-power resources of the country for the benefit of the people and those who desired to turn over these resources to private corporations for their own benefit and gain.

Those who contended for the preservation of these resources were trying to preserve these rights not only for the people of to-day but for those who shall follow us as well, and to protect future generations from extortion and monopoly. This contest finally culminated in the passage by Congress of a general water power act that should apply to all alike. One of the conclusions reached in this law was that no grant of water-power privilege should extend beyond a period of 50 years. It was likewise established in the law that there should be a small rental paid for the use of the privilege. Another principle thus established was that there should be control by law, either on the part of the Federal Government or of the States, of the rates charged to the consumers and a regulation or control over the service

that should be rendered by the lessee. It was also set forth in this statute that the rates for this service should also be fair and reasonable. It is provided also in the law that the lessee must construct the dam with his own money, and it is likewise provided that he shall take all the risk of destruction and accident. The Government in no way insures his investment, and in no way is bound to contribute anything toward maintaining it and keeping it in repair. It is also provided that excess profits, if any, should be paid into the Public Treasury.

The Ford proposal unblushingly violates every one of these propositions. There is no pretense of any obligation to keep the property in repair. The 50-year limit is violated. There is no limit on the profits that the corporation can make by virtue of having this public donation. The improvements are not made by money belonging to the corporation, but they are made by public funds contributed by the taxpayers of the country upon which interest is paid at a rate less than 3 per cent. The corporation not only does not agree to keep the dam in repair, but under its bid it is entitled to a guaranty of repair and protection for the space of 100 years. The acceptance of the Ford offer is a repeal of the laws of the land so far as they apply to Mr. Ford. These laws shall apply to every other individual and every other corporation except to this one institution that he shall organize. The acceptance of this offer means the losing of the fight carried on for years by public-spirited citizens for the protection of the people's rights. The fight for the preservation of the natural resources of our country is to a great extent lost, and we give by this one act the greatest monopoly to one corporation that has ever been given in the history of mankind. The resources that by an all-wise Creator have been given to all the people are ruthlessly taken from them and turned over without limit and without regulation and without price to one corporation.

It is no defense to say that Mr. Ford is a good man, or that he has in the past dealt fairly with his employees. No man is truly good when he asks the people to capitalize his virtues by donating to him inalienable rights that God has given to His people. No human being can be so great or so good that he has a moral right to ask his fellow citizens to set him up on a pedestal and give him privileges that the law permits no one else to receive. In fact, when such a person asks that an exception be made in his favor, he is admitting that his goodness, his kindness, and his greatness are after all only selfish pretenses, used to give him a special privilege denied to other men.

Mr. NORRIS obtained the floor.

Mr. BRUCE. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Nebraska yield to the Senator from Maryland?

Mr. NORRIS. I yield.

Mr. BRUCE. Is the pending substitute offered by the committee open to amendment at this time?

The PRESIDENT pro tempore. We have here two propositions. The amendment of the committee is the equivalent of a motion to strike out and insert, and either the original text or the substitute offered by the committee is open to amendment at any time.

Mr. BRUCE. That is what I supposed. Then I ask permission to offer my amendment to the amendment.

The PRESIDENT pro tempore. Does the Senator from Nebraska yield for that purpose?

Mr. NORRIS. I have no objection to having the amendment read for the information of the Senate, but I do not want to take it up now. The Senator from Maryland can offer it when the proper time comes. I have no objection to having it read.

The PRESIDENT pro tempore. The Clerk will read the proposed amendment to the amendment of the committee.

The READING CLERK. Strike out section 6 in the substitute reported by the committee, and in lieu insert:

In the appointment of officials and in the promotion of any such officials no political test or qualifications shall be permitted or given consideration, but all such appointments and promotions shall be given and made on the basis of merit and efficiency; and in the selection of employees for said corporation and in the promotion of any such employees all selections shall be made in accordance with the provisions of the Federal statutes relating to the Federal classified civil service and the powers and authority of the President and the United States Civil Service Commission with respect thereto. The board shall keep a record of all requests, oral and written, made to any member thereof, coming from any source, asking for any favor in behalf of any person or the promotion of any employee, which record shall be open to the public inspection. Any member of said board who permits the use of political or partisan influence in the selection of any employee, or in the promotion of any such employee of said corporation, or who gives any consideration to political consideration in the official action

of said board, or who, knowing that such political influence has been or is attempted, does not record the same in said record shall be deemed guilty of a misdemeanor and, upon conviction thereof, shall be fined in a sum not exceeding \$1,000 or be imprisoned not to exceed six months, or both such fine and imprisonment, and the conviction of any member of said board of the offense herein defined shall have the effect of removing such member from office.

Mr. NORRIS. Mr. President, since the adjournment of the last session of the present Congress Mr. Ford, who was one of the bidders for the Muscle Shoals proposition, in fact the only bidder who was given any consideration and for the acceptance of whose bid the House bill had been passed, has withdrawn his offer; and I take it that there will be no serious contention on the part of anyone in the Senate to consider the Ford offer. In my discussion, therefore, I am not going to refer to that particular bid.

The Senate committee in its report on the Muscle Shoals measure has recommended that the entire House bill, after the enacting clause, be stricken out and that a new bill, which is a part of their report, be inserted. That is the bill which the majority of the committee favors and is the bill which I also favor.

Mr. President, the question presented in the Muscle Shoals problem is one that we have inherited from the Great War. Primarily, it is a question of national defense. It became evident during the progress of the World War, even before we entered it, that modern warfare required the manufacture of explosives in such large quantities that the life of our Nation might be put in jeopardy because of our inability to supply such explosives in sufficient quantities to carry on a modern war. We were dependent to a great extent upon the importation of nitrates to keep our Army and our Navy supplied with a sufficient amount of explosives to defend our country and preserve the life of the Nation in times of great emergency.

Nitrogen is one of the ingredients of the air, and an inexhaustible supply exists everywhere, but the question of extracting it from the air was a very difficult and not fully understood proposition. Several processes for this extraction have been known for years in the scientific world, but all of these processes were expensive and required an immense amount of cheap power in order to accomplish results with any degree of economy. It was primarily to solve this question that the Government engaged in its activities at Muscle Shoals, Ala.

We have expended of public funds in the neighborhood of \$125,000,000, and by the time the contemplated work is completed we will have expended over \$150,000,000. We built nitrate plant No. 2, with a capacity of 40,000 tons annually of atmospheric nitrogen. This plant is designed to utilize what is known in the scientific world as the cyanamide process. It is a well-established and well-understood process, but it was known when the plant was constructed that this system was expensive and required a large amount of power. As a war proposition the expense of securing the explosives, while an important consideration, is nevertheless secondary in importance to certainty in production. This plant is not excelled by any other plant using the cyanamide process in the world. It is capable of producing 40,000 tons of fixed atmospheric nitrogen per annum.

Knowing the expensive nature of this process, the Government officials also constructed at Muscle Shoals another nitrate plant of much smaller capacity, which was designed to extract nitrogen from the air by what is known as the Haber process. It was known that this was more or less an experiment, although the experts believed then, as they do now, that the Haber process was the one which presented a greater field for improving the method and cheapening the production.

Nitrate plant No. 1 was never a success. The experience, however, that was obtained from this more or less experimental plant has resulted in improved methods, and it is known now that this plant, by the installation of new machinery, can extract nitrogen from the air more cheaply than can be done at nitrate plant No. 2, equipped for such work by the cyanamide process.

The Government constructed a steam-power plant at nitrate plant No. 2 capable of producing 120,000 horsepower. There were installed at this steam plant units amounting to 50,000 horsepower. The additional unit is provided for in the construction of the building, and it only remains to install additional boiler capacity in order to increase the present power facilities to the original design. There was installed a steam plant likewise at plant No. 1, with a capacity of 5,000 horsepower. These steam plants are modern in every way and are not surpassed to the extent of their capacity by any other steam plants in the world.

FERTILIZER

There is a definite connection and relation existing between the production of explosives for war purposes and the production of fertilizer for use in agriculture. Nitrogen is one of the ingredients of every fertilizer product, and therefore this question presents a peace-time problem as well as one of war and national defense. It is extremely desirous that the machinery and the investment used for the production of explosives in time of war should be used for the purpose of increasing and cheapening fertilizer products in time of peace, and when we consider the fertilizer problem we are at once faced with the question of cheapening the product. It is advisable, of course, to cheapen it in time of war, but this is a secondary consideration. In time of peace, for fertilizer, the question of economy is a paramount one, and these great plants can not be used for the production of fertilizer unless the process can be cheapened to a price that will at least not exceed the cost of fertilizer by other methods. The question of fertilizer will be discussed more in detail later on.

WATER POWER

At the same time the Government constructed these plants it planned the construction of two dams on the Tennessee River at Muscle Shoals. One of these dams, known as Dam No. 2, is now nearing completion, and it is estimated that it will be completed and ready to produce hydroelectric energy by the 1st of July, 1925. It will take from three to five years to complete Dam No. 3.

POSSIBILITIES OF POWER AT DAM NO. 2

The weakest point in the development of hydroelectric energy, especially in the South, is the great difference between high and low water flow of the rivers. The flow of the Tennessee River at the location of Dam No. 2 is sometimes sufficiently high to produce nearly, if not quite, a million horsepower if the entire flow could be utilized, while in case of extreme drought at very short intervals the minimum flow would produce a little less than 100,000 horsepower. Gauge readings of the river have been carefully taken for a period of 50 years, and these readings show that at Dam No. 2 there will be developed horsepower as follows:

	Horsepower
99.4 per cent of the time.....	87,300
97 per cent of the time.....	100,000
88.3 per cent of the time, or about 10 months.....	141,000
66 per cent of the time, or about 8 months.....	205,000
50 per cent of the time, or about 6 months.....	306,500
20 per cent of the time, or about 2½ months.....	600,000
7 per cent of the time, or a little less than 1 month.....	1,000,000

DAM NO. 3

The amount of power that will be developed at Dam No. 3 can be readily understood when it is known that the power possibilities of that dam are 40 per cent of the power possibilities at Dam No. 2. The difference between high and low water, and therefore the difference between primary and secondary power, is practically the same at Dam No. 3 as it is at Dam No. 2.

PRIMARY AND SECONDARY POWER

Primary power is the power that can be utilized every hour in the day and every hour in the year. Secondary power is that which is only developed a portion of the year. In the use of power it can readily be seen that there is a great difference between primary and secondary power. For most purposes primary power is required, and therefore its value is much greater than secondary power. Moreover, there are various degrees in value to secondary power. Secondary power, for instance, that can be utilized for 11 months in the year is much more valuable than secondary power that can be developed for only one month in the year. By the use of an auxiliary steam plant, or by the construction of a storage dam that would equalize the flow of the river, much secondary power can be converted into primary power, and wherever this can be accomplished there is more economy and great gain in power. Secondary power, sometimes almost valueless, can by one or both of these means be converted into primary power at very little additional expense.

TWO PROPOSITIONS AT MUSCLE SHOALS

It can readily be seen, therefore, that there are two definite and distinct propositions presented for consideration, and they have no very definite connection with each other—the question of power and the question of explosives and of fertilizer material.

POWER PRODUCTION

The production of power at Muscle Shoals is comparatively a simple question. All the elements involved in it are well

understood and well known. It is assumed that everybody is in favor of cheapening the cost of hydroelectric energy as much as possible, and that in a general way this power should be distributed over as wide an area as possible in order that the greatest number of our citizens may receive benefits from such production.

It must be remembered the power at Muscle Shoals is developed from a navigable stream over which the Federal Government has jurisdiction. The power thus produced from a waterway belonging to all of the people should not be given away to any private individual or corporation for his or its personal financial benefit. We should adopt a method that will give the benefits of electricity to just as many of our citizens as possible. Modern methods of transmission of electric current have revolutionized the possibilities of such distribution. It can readily be seen that one of the necessities in economic power development and distribution depends to a great extent upon the conversion of secondary power into primary power. It is likewise apparent that to develop the maximum amount of hydroelectric energy the entire stream and all its tributaries should be considered as a whole. Every dam site should be selected with reference to all other dam sites, keeping always in view the question of navigation. In addition to this, it is important that in order to regulate the flow in any stream and keep it as nearly uniform as possible we should construct storage dams where large amounts of flood waters can be stored and let out at times of low water, thus decreasing the maximum and increasing the minimum flow.

It should be borne in mind that the maximum flow is often as damaging to the production of hydroelectric energy as the minimum flow. The amount of hydroelectric energy that can be developed at any given time is often very materially decreased by too large a flow of the stream, which has a tendency to back the water up below the dam and thus decrease the fall of water over the dam, which in turn materially decreases the amount of hydroelectric energy produced. It is therefore seen that the storage of flood waters not only increases the amount of hydroelectric energy upon the dams on the stream during low water but likewise increases it during high water by holding the water back when it would do damage rather than good.

The construction of storage dams has also another important feature. It is a very important element in flood control and holds back floods that would do damage, while it increases the electric current that can be produced both at high and low water and likewise regulates the stream so as to make navigation possible at all times.

STEAM AUXILIARY PLANTS

Another method of converting secondary into primary power is by the construction of steam auxiliary plants. Such plants would not be able to produce electricity as cheaply as water power; but if they can be used for portions of the year when the water is low, and thus bridge over the gap of such portion of the year, they convert into primary power what would ordinarily go to waste and be absolutely of no value.

GIANT POWER

But after we have constructed flood reservoirs and steam auxiliary plants we have not yet completely converted all secondary power into primary power. There will be seasons and perhaps times in every season when the watershed supplying the stream with water is deficient in rainfall, and, notwithstanding the help of storage dams and auxiliary steam plants, there is still a large amount of secondary power going to waste.

When one stream has a period or even a season of low water some other stream on the other side of a mountain or a different watershed may have an oversupply—indeed, it may have so much as to seriously interfere with the production of the maximum amount of electric current. Modern methods of the transmission of electricity require that these different systems be hooked up together with transmission lines, and when one system is short of water and another system has too much water a transfer of electricity from one system to another can be brought about by simply pushing a button—and thus on a larger scale do we utilize all the electricity developed in both of the systems.

It is now possible to transmit electricity direct from 250 to 300 miles without material loss, but the same effect of transmitting electric power from one system to another can be brought about by what is known as a relay of power from one system to another system, and in this way the same practical effect can be had as though electricity could be carried direct indefinite distances. There is no limit to which power can be thus relayed.

This was well illustrated a few years ago in relieving a condition that existed in the State of North Carolina. North Carolina has a system of electric distribution that covers a quite large portion of the State, but in the year 1921 the rainfall in North Carolina was very deficient. It was evident that the requirements for power were so great that the system could not be supplied on account of the decrease brought about by the drying up of the streams, and had there been no way of relief it would have been necessary for many of North Carolina's industries to shut down and some of her residences would have had to go back to kerosene lamps, and in many ways great damage and inconvenience would have resulted to millions of people and many industries.

Between North Carolina and the Government's great steam plant at nitrate plant No. 2 at Muscle Shoals there is a distance of 600 miles. The power company in North Carolina secured power from companies in South Carolina, but the companies in South Carolina could not have supplied this had they not been able to get a supply of power from companies in Georgia, and the Georgia power companies had no power to spare and could not have supplied this extra energy had it not been possible for them to get power from the Alabama Power Co. in Alabama. The Alabama Power Co. had no power to spare, but they had leased the steam plant owned by the Government at nitrate plant No. 2, and they supplied the Georgia company with some of their power and in turn made up the deficiency by starting up this great governmental steam plant, which poured the electricity into their system from the western side, and thus the effect was to transfer electricity from the Government steam plant at Muscle Shoals to the factories and homes in North Carolina, 600 miles away.

The Alabama Power Co. is now building storage reservoirs and power dams on the Tallapoosa River in that State. It seems that this river possesses wonderful capacity for storage water. It has likewise a certain definitely known power possibility. Dam No. 2 at Muscle Shoals has likewise a known power capacity. If these two systems were hooked up together with a transmission line, it would be possible, by using the two together and trading power back and forth, to increase the output by more than 100,000 horsepower above the combined estimate of the Tallapoosa system and Muscle Shoals put together.

It can be seen, therefore, that the economic way of securing all the benefit possible from the flow of our streams is to combine them into systems, with interchangeable transmission lines, so that the maximum amount of power can be developed and the maximum amount of secondary power be converted into primary power.

The State of Virginia has potential power possibilities of 450,000 horsepower. The State of Kentucky has potential power of 77,000 horsepower. The State of Tennessee has a potential power possibility of 432,000 horsepower. Arkansas has potential power of 125,000 horsepower. This is in all cases primary power. There would be about an equal amount of valuable secondary power. It is conceivable and reasonable that within a few years these power possibilities will be developed either by the States and municipalities or by private persons or corporations. They should be connected with Muscle Shoals, which in turn would connect them up with all the other hydroelectric companies of the South. The Senate has passed a bill recently providing for the utilization of the power possibilities of the Potomac River. If the House passes the bill and that improvement is made, there will be twice as much power produced as can be utilized by the District of Columbia. It in turn could be connected up with the Virginia power development and thus become a feeder in a great system of power production that would extend from the Potomac River to the Gulf of Mexico, and from the Atlantic Ocean to the municipalities and the farms of Mississippi and Louisiana. But this would not necessarily be the limit. The great State of Pennsylvania is already making a survey with the idea of utilizing her streams and many of her coal mines in the organization of a giant power proposition. It is reasonable to assume that in the next 10 or 20 years all water power east of the Mississippi River, together with numerous auxiliary steam plants located at the mouth of coal mines, will be united into one giant power scheme in which the maximum amount of electricity will be developed and distributed to the maximum number of people at the lowest possible cost. This electricity will be developed to a great extent by the flow of the streams, which as a matter of fact belong to all of the people, and it is therefore but fair that the greatest number of people possible should secure the benefits of such development.

DANGER OF MONOPOLY

To me there is one possible danger in such a scheme, and that is the danger of monopoly. With a network of wires

spread over the country carrying light, power, and heat to all the people, it is absolutely incumbent upon governmental authority to provide by proper regulation that such a great plant shall not be utilized for the financial benefit of individuals or corporations and that those controlling such a system should not in any way be permitted to utilize the great power in their hands unrestrained and unregulated. Practically all the States have commissions that regulate not only the price of electricity but the service as well, but in addition to such regulation the most effective help to save the people from such a monopoly would be to have the Federal Government own at least some of the power-producing elements that enter into such a system.

It is therefore important that the Government should retain the ownership and management of Muscle Shoals. In the system that I have outlined, Muscle Shoals, if properly developed and improved by the construction of storage dams on the Tennessee River and its tributaries, will be the greatest one unit in the entire system. It will be, as it were, a partner in this great plan. It will have a direct voice in the management and control of the entire system. It can therefore more directly control any tendency toward monopoly than can be done by State commissions, however valuable their service may be.

No one can tell just what the future will bring forth. Improvement in the production and the transmission of electricity are constantly taking place. In my opinion the time will come at no distant date when the Government will have to take a still greater part in the regulating, the generating, and the distribution of electricity. Present indications are that electricity is going to be demanded in every home and on every farm for light and power purposes at least, and it ought to be one of the duties of Government, both Federal and State, to see that the one danger to what will be the happiness and comfort of all the people is prevented from exercising any monopolistic control.

The consummation of giant power systems will be to stop the present tendency that has been going on ever since the economic use of steam has been in use, which, because the power thus generated was used in the immediate vicinity of its generation, turned the tide from the country, the village, and the small city into the great population centers. The sending of electricity over a wire throughout the country will divert the tide of manufacturing enterprises from the congested centers into localities where the raw product is produced. The generation of power from steam can be most economically produced in very large units, and under conditions of the past years such economy in the production of steam power necessarily brought manufacturing establishments and the millions of employees and other people together into congested centers. The small manufacturer was driven out of business. The economy of large steam plants increased the population of manufacturing centers, to the detriment of the country and the smaller cities. The new electric age which is just dawning will change this tide. It will make it possible for the small manufacturer located in the vicinity of the production of his raw material to economically produce a finished product and successfully compete with the larger concerns.

With this great economic change going on in our country it would be almost criminal to permit any person or any corporation to utilize all of the electric power at Muscle Shoals for one concern and for the benefit and profit of one corporation. It is not contended, of course, that there will be sufficient power developed at Muscle Shoals to supply the entire South, but it is the key to the entire problem. It will be the dominating influence in the system that will grow up, and an examination of the map will show that Muscle Shoals is practically in the northwest corner of existing systems of production covering several Southern States. Tennessee, immediately to the north, has but partially developed her power. Mississippi and Louisiana, to the immediate west and south, sought to receive the benefit of proper distribution of this power. Arkansas is within transmission distance, and she possesses a large amount of potential water power. There is no reason why these States should not be covered with a network of transmission lines, of which Muscle Shoals would be the one most important distributive point. Moreover, if Muscle Shoals is turned over to one corporation, particularly if that corporation is given a governmental subsidy in the way of cheap money, on a basis of 100 years' time, and then the corporation permitted to use all of this cheap power in its own manufacturing business, it would in effect be giving to such corporation a governmental subsidy running over a period of years, which would give it an undue advantage—an advantage backed up by money of the taxpayers of the country—over every other manufacturing establishment of a similar nature in the entire South.

If we turn over this valuable property for 100 years to one corporation and then give it money at an extremely low rate of

interest, it would be using the taxpayers' money and the taxpayers' property to give an advantage to a favored corporation, which would be able to put manufacturers of similar products entirely out of business; and once having put them out of business, such a favored corporation would be able to fix its own price and levy tribute upon the people at will. And if such a corporation were given such a franchise that ran over a period of 100 years, it would be no defense that the present organizer of such a corporation would be moved by the highest kind of philanthropic motives. It would be but a few years until by the operation of nature itself those now living would pass away and such a corporation would be as cold and as clammy as any trust or monopoly that has ever existed in the history of civilization.

INVESTIGATION OF THE COMMITTEE

The committee has given months of study to the questions involved at Muscle Shoals. It held extensive hearings, and it has made the most minute and elaborate study of the questions involved ever undertaken by any committee of Congress and perhaps by any investigating body in the country. We have had before us various bids and propositions made by individuals and corporations.

THE HEARINGS

These bidders, with one exception, have furnished the committee much valuable information. A great amount of it was, from its very nature, quite technical. The intricate problems connected with the extraction of nitrogen from the air and kindred subjects were discussed in great detail by experts representing these various bidders. They placed themselves at the disposition of the committee and frankly and courteously answered all questions propounded to them relating to their various bids, and in every way showed a fair and honorable disposition to assist the committee in every way possible in the solution of this difficult problem.

THE IMPORTANCE OF CHEAP FERTILIZER

The importance of the fertilizer question can not be overestimated. It is a vital consideration in the maintaining of our civilization. The preservation of agriculture upon a proper basis demands not only a greater amount of fertilizer but a cheaper fertilizer. It is worthy of the best effort and the best thought of all honest citizens. Agriculture is admittedly the fundamental industry. The preservation upon a high standard, including a reasonable profit to the farmer, is absolutely necessary for the happiness and the comfort of the human race. We are justified in the expenditure of public funds in a reasonable endeavor to cheapen its manufacture. Nitrogen is one of the necessary ingredients of the ordinary fertilizer used by the farmers, and any process that will cheapen the extraction of nitrogen from the atmosphere will to that same degree cheapen the cost of fertilizer to the farmer. Ever since the acquisition of Muscle Shoals by the Government our officials in the Bureau of Soils and in the Fixed Nitrogen Research Laboratory have been making extraordinary efforts in the development of improved methods in the production of fertilizer.

It is gratifying to know that we have within that time made more progress than in many years of similar work before the war. It is likewise gratifying to know that our own Government officials have taken the lead in the country, and perhaps in the world, in bringing about these improved methods. It is believed that the extraction of nitrogen from the air can be cheapened by one-half the prior cost, and it is worthy of note that all the bidders for Muscle Shoals have taken advantage of the information secured from our own fixed nitrogen research laboratory, and all the specialists and scientists representing the bidders who appeared before the committee paid tribute to the efficiency of this laboratory. The work of this laboratory is public. Its discoveries are given to the public, and it is believed that the best advancement can be made in the cheapening of fertilizer by giving to our governmental specialists who have been so successful in the last few years a wider scope and a greater field such as can be thrown open to them at the Muscle Shoals nitrate plants.

But we ought not to deceive the people, and the truth is that notwithstanding the improvement that has been made, such improvement has not yet gone far enough to demonstrate that the cost of fertilizer can be very much reduced by these improved methods. Practically every scientific man engaged in the study of the question, expressed the belief that additional improvement will be made, and that fertilizer eventually will be given to the farmer at a very much lower cost than at present. Present discoveries warrant the statement that the price can be somewhat reduced by the application of recent discoveries, but

the goal has not yet been reached. The present factory cost of the nitrogen contained in a ton of completed 2-8-2 fertilizer, is about \$4.80.

Mr. STERLING. Will the Senator explain what the expression "2-8-2" means?

Mr. NORRIS. I will say to the Senator that the formula "2-8-2" is the formula applied to the ordinary commercial fertilizer. It means two parts of nitrogen, eight parts of phosphorus, and two parts of potash, by weight. Different soils require different kinds of fertilizer, and there are changes made depending upon the soil, but the ordinary fertilizer on the market, almost universally used, is what is known as "2-8-2."

The cost of the nitrogen in a ton of ordinary fertilizer of that grade is \$1.80. If the cost of nitrogen were reduced one-half, it would therefore only reduce the completed fertilizer \$2.40 per ton. And if the nitrogen cost absolutely nothing, the completed fertilizer would still be higher than it ought to be and much higher than I believe it will be within the next few years. I have great hopes that the investigations which have been made and that are now being continued, will eventually put a completed fertilizer in the hands of the farmer at half, or even less, than the present cost, but it must be stated that that time has not yet been reached.

One of the greatest items of expense in fertilizer is that in its completed form it contains over 80 per cent of inert material possessing no fertilizer quality whatever, but simply used as a necessary carrier. The necessary ingredient of the fertilizer as it is used by the farmer, possessing any value as fertilizer, is less than 20 per cent of the material which he handles. Scientists have so far been unable to devise a combination of fertilizer ingredients without putting with them a lot of unnecessary material which must be used as a carrier of the fertilizer ingredients; and the ultimate cost to the consumer consists mostly in the mixing, the handling, and the freight cost of this material having no fertilizer value. The fertilizer ingredients are mixed at the fertilizer factory, and the consumer has to pay for this mixing. He has to pay for freight upon all this useless material. He has to pay for the extra sacks thus made necessary. He has to haul from his station to his farm material less than 20 per cent of which has any fertilizer value, and in this operation he has been compelled to pay a cost that is greater than the intrinsic value of all the fertilizer contained in the finished product. Our scientists have been working on the proposition of trying to avoid this mixture of fertilizer with the useless material. This will mean a large saving in labor, a saving in mixing, a very large saving in freight, and a saving in the cost of sacks and in its application to the soil. If a concentrated fertilizer can be brought about, this of itself, without any cheapening of the fertilizer ingredients, should reduce the cost to the farmer about one-third.

The chemists who have appeared before the committee have been to a great extent in harmony in holding the opinion that from present indications of the investigations this desired condition will eventually be brought about. In the judgment of the committee, this can be soonest achieved by putting the nitrate plants at Muscle Shoals under the control of the experts of the Agricultural Department, who have so far done more than any other set of experts in the solving of this difficult problem so far as it has been solved. The indications are that every improvement of the process will consume less power. In one process that possesses great possibilities of improvement and development, known as the coal process, now used in Germany, and in which nitrate plant No. 1 can be used, it would require comparatively little power. Under the bill that we have reported we have given authority to the Agricultural Department to experiment on all these processes or any other process that may later be invented or developed. The use by the Agricultural Department of nitrate plant No. 1 will give to that department an opportunity to test out all these experiments on a scale much larger than any laboratory test that has ever been made. It will become in fact the largest and best field for the study of fertilizer questions anywhere in the world.

THERE ARE NO SECRETS IN FERTILIZER MANUFACTURE

It can safely be said without any fear of contradiction that there are no essential secrets unknown to scientific men or others who choose to study the question in the manufacture of fertilizer ingredients or in the mixing of such ingredients. Since the greatest development in these improvements have been made by our own officials, it seems but fair that they should be given an opportunity to continue their investigations and experiments, and whatever improvements are made through such experiments will become open to the world, and

thus bring about the competition that is necessary not only to increase the product but to enable the farmer to get it at a fair price.

We believe from our investigation that it is not possible to produce the ingredients of fertilizer at nitrate plant No. 2 through the method installed in that plant at a price that would reduce the cost of fertilizer to the farmer below present market price. However, in the bill which we have reported we have given authority to the Secretary of Agriculture to lease nitrate plant No. 2 to any person or corporation for the manufacture of fertilizer ingredients, and have provided that the Federal power corporation shall supply such lessee with power to operate the plant. If any of the bidders or any other person or corporation can produce fertilizer ingredients at nitrate plant No. 2 at a price that will reduce the cost to the consumer, they will be able through the bill which we report to lease this plant from the Secretary of Agriculture and go into the business. The Secretary of Agriculture under the terms of the bill would have authority to make such a lease, even without charging any rent for the same. This leaves the way open for anyone to enter the fertilizer field on terms much more favorable than it is claimed by any of the bidders so far they desire to secure. If the production of cheap fertilizer for the farmer has animated or moved any of these bidders, here is an opportunity for them to carry out their plans under the most favorable conditions possible.

Mr. President, the bill which the committee has reported carries out, we think, the provisions that I have thus briefly outlined. We separate the two propositions at Muscle Shoals—power and fertilizer. We provide in the bill for a governmental corporation that shall have authority to handle the power proposition the same as an individual would have it. They shall have power to build transmission lines. They shall have power to sell the current, giving preference to States, municipalities, and public corporations of that kind. They can enter into partnership with such municipalities in the construction of transmission lines. They can connect the system up with existing transmission lines of existing power concerns or with other concerns that may develop new fields of electricity. In other words, we have tried to give to them every power and every authority that an individual would have if he was the owner of the plant.

It is a little different from original governmental ownership propositions. If we had invested no Government money at Muscle Shoals, if we had taken no steps there to bring about the great development that has taken place, then an objection to governmental operation and retention of this great power might have some force, at least with those who are opposed to governmental operation of such concerns. But it must be remembered the Government is already there: the Government has expended nearly \$200,000,000 of the taxpayers' money there. We have done it on the theory, first, that it was necessary as a matter of national defense; and, second, that in time of peace this great improvement might be used to benefit the condition of agriculture.

We found—and I say it without any fear of successful contradiction—that under the present state of the art, under the present scientific knowledge of the civilized world, it is necessary for a great many more experiments and investigations to be made before we can make fertilizer at a price that will materially reduce it from its present market price. I have referred to some of those difficulties. One of the objections, and one of the big items in fertilizer, is freight. That interferes very materially with the distribution of fertilizer, because the farther it is carried the higher the freight charge must be. We believe it is unnecessary to say that we must use all of the power produced there in the production of fertilizer, because the scientific people of the world know now that it would be useless. There is no use in producing a whole lot of nitrogen unless it can be of some use after it is produced or will cheapen the production of fertilizer.

Although I dislike to say it, although I would much prefer to be able to say that we have reached the goal now, yet to be fair with the Senate and fair with the people of the United States it seems to me we must say that the goal has not been reached. We can not say, of course, positively that it ever will be reached. I am one of those who believe that it will soon be here.

I am one of those who believe—and I do not believe anybody can successfully contradict it—that experts in the laboratory of research have done more to cheapen fertilizer in the last few years than has ever been done by any set of men in a similar length of time anywhere in the world, at least in this country. All bidders who came to try to get the plant down there, without exception, have been to this labora-

tory before they made any bids, and have consulted with Doctor Cottrell, the head of the laboratory, and got all the information they could. Of course, I am glad he gave them the information. I am speaking in no complaining sense of that. I would be glad to have the same information go everywhere to the world and let them utilize what we know and invent something new and improved if they can by the use of that information.

Mr. REED of Pennsylvania. Mr. President, will the Senator permit a question?

Mr. NORRIS. Certainly.

Mr. REED of Pennsylvania. What is the state of the art in Germany? Have they used their nitrogen plants to make fertilizer? Are they farther ahead than we are?

Mr. NORRIS. Yes. I asked one of the experts who had been to Germany, as several of our experts have been over there and investigated, and I reached this conclusion from his reply. In Germany they are using to a great extent what I referred to a while ago as the coal process. The main reason why they make it much cheaper than we do is because everything is much cheaper there than it is here. I think our experts know practically what all the German experts know. I was impressed at least with some of them who said they were given every opportunity when they went there to investigate and look into everything.

Of course, as a war proposition—

Mr. BROOKHART. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Nebraska yield to the Senator from Iowa?

Mr. NORRIS. I yield.

Mr. BROOKHART. With reference to that proposition, I will state that I investigated the nitrate plant at Syracuse, N. Y., which has been developed since the war. They use there the Haber process. They claim that they can make it by a cheaper method than any of the German methods at this time. Mr. H. S. Loud is in charge of it there, and I got a great deal of information to that effect from him.

Mr. NORRIS. I am glad the Senator called my attention to that matter. There is a factory at Syracuse, N. Y., using a modification of the Haber process. That has come, as a matter of fact, out of the governmental experiments at Muscle Shoals. During the war no one here knew just how to get nitrogen from the air by what is known as the Haber process. They thought they knew, and they built nitrate plant No. 1 on a small scale because they had some doubt about it, using that process. The men who built it now know what is necessary to make that plant a success. It is a failure. All of the machinery will have to be scrapped. It is a failure as it is built. The Syracuse plant came about, as a matter of fact, out of what was learned by the scientific world when we constructed nitrate plant No. 1. I do not know whether they would admit it or not, and yet I suppose they would admit it even themselves.

Mr. BROOKHART. I think he said the same men who designed the Syracuse plant designed the plant at Muscle Shoals, and the big improvement is in the reduction of the pressure. They can work at a much less pressure in Syracuse than they do in Germany.

Mr. NORRIS. They use much less than in Germany?

Mr. BROOKHART. Yes.

Mr. HARRELD. Mr. President—

The PRESIDING OFFICER (Mr. Fess in the chair). Does the Senator from Nebraska yield to the Senator from Oklahoma?

Mr. NORRIS. I yield.

Mr. HARRELD. The main trouble with nitrate plant No. 1 was that they failed to put in machinery that would stand the excessive heat. Was it not due to a miscalculation on the part of the engineers really that caused that plant to be a failure? Does not the plant itself show now that the vats, tanks, and so forth, have been melted by the extreme heat turned on to use it?

Mr. NORRIS. I do not want to be understood as criticizing our Government officials, but in the construction of nitrate plant No. 1, which was constructed during the war, they did the best they knew how. Everybody admits that it was a failure, as experiments often are.

Mr. BROOKHART. Mr. President—

Mr. NORRIS. But the benefit they got out of it was the knowledge that let scientific men know what caused the failure and enabled them, for instance, to build the Syracuse plant. I yield to the Senator from Iowa.

Mr. BROOKHART. I did not understand that it was a failure. I understood it was not completed when the war closed.

Mr. NORRIS. I think we will have to say it is a failure. Our governmental experts say that there is practically no machinery in it which can be used.

Mr. BROOKHART. Mr. Loud estimated to me that for a million dollars it could be changed to a successful process.

Mr. NORRIS. They vary on that. Most of the experts with whom I have talked have put it as high as \$2,000,000 and some at \$3,000,000.

Mr. BROOKHART. I would not be certain about that.

Mr. NORRIS. It is perfectly fair to say that to a greater or less extent it is in an experimental stage. We spent a good many million dollars down there in nitrate plant No. 1, that small plant, and that money, in my judgment, has not been absolutely thrown away. It was a costly experiment and everyone connected with the construction of that plant could build it over again and make a success of it, and still even with all we know now they would not be able to reduce the cost very materially. As I said, it is not so much a question of the cost of nitrogen that we must reduce to make cheaper fertilizer. If we got the nitrogen for nothing, if it did not cost anything, our fertilizer would still be too expensive.

Mr. FLETCHER. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Florida?

Mr. NORRIS. I yield.

Mr. FLETCHER. I am a little surprised to hear the Senator state that nitrate plant No. 1 was a failure. If that is the case, then one of the strong points in the bill in favor of providing for turning over nitrate plant No. 1 to the Department of Agriculture would not seem to be very valuable. What is the use of turning nitrate plant No. 1 over to the Department of Agriculture?

Mr. NORRIS. We turn nitrate plant No. 2 over to the Department of Agriculture also. That never was a failure. That did just what they said it was going to do before they started the foundation. That complied with every estimate and filled the bill 100 per cent. We turn all of the fertilizer proposition over because we think someone ought to have it who will be able, through the use of Government funds, because it is something that will redound to the benefit of all the people, to experiment with it and get out of it a successful method of making fertilizer at cheaper prices.

Mr. FLETCHER. Then there is something of value in nitrate plant No. 1. The Senator said in his report and in his remarks this morning that the use by the Agricultural Department of nitrate plant No. 1 would give to that department an opportunity to test the process; so there is something there worth preserving.

Mr. NORRIS. Exactly, and the bill contains an appropriation for \$1,500,000. That amount was put in, as I remember it, at the suggestion of Doctor Cottrell, the head of the laboratory research department, and we do not need to tear down nitrate plant No. 1 all at once and scrap all the machinery, because it is realized that if we built it now, according to their present knowledge, they still would have something that to a certain extent would be experimental, as far as getting cheaper fertilizer is concerned. They could get cheaper nitrate and help out the explosive proposition, but still they do not know just how they will be able to reduce the cost of fertilizer. It is generally conceded by all that the present indications are that improved methods will take less and less power as they proceed with them.

Mr. GEORGE. Mr. President—

Mr. NORRIS. In just a moment. I would like, before the Senator interrupts me, because I thought of it when I spoke of the power connected with it, to refer to the President's message. He seems to go on the theory, and I think the Senator from Alabama [Mr. UNDERWOOD] goes on the same theory in his bill, that if we want to make cheaper fertilizer the way to do it is to put a whole lot of power to work. But the scientific men of the day say and these laboratory men say that if we want to cheapen the product we do not need to use all this vast amount of power. The President's message said that from time to time the power used in commerce now shall be diverted over into the fertilizer field. The probabilities are that the trend will be just in the other direction; that it will require less and less power than is now necessary under the known methods to extract nitrogen and the other parts of the fertilizer from the air. Practically every new invention lessens the amount of power which it is necessary to use. The cyanamide process, which is used in plant No. 2, requires a vast amount of power. The plants in Norway, where they have the cheapest power in the world, used enormous quantities of power. The improvements through all the years have tended

in the direction of using less and less power; that is the tendency. The Haber process reduces the power requirement very materially, and is a better process than is the cyanamide process.

Mr. EDGE addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Nebraska yield?

Mr. NORRIS. I yield first to the Senator from Georgia.

Mr. GEORGE. Mr. President, I merely wish to ask the Senator from Nebraska a question in reference to his use of the figures in the formula which he has quoted. For instance, he referred to the formula for fertilizer as being 2-8-2. It sounds better to me to say 8-2-2; that is, 8 per cent of acid, 2 per cent of ammonia, and 2 per cent of potash.

Mr. NORRIS. I did not hear the Senator's first suggestion.

Mr. GEORGE. I say that the Senator from Nebraska used the 8-2-2 formula as an illustration of the possibilities of manufacturing commercial fertilizer. I wish to direct the Senator's attention merely to one fact, for I know he deals with the question with an absolutely open mind. The Senator in his illustration is taking the lowest grade of fertilizer; he is now taking a grade of fertilizer which is not much used, although it is the basic formula, and I understand the Senator is using it merely for the purposes of illustration. Fertilizer now runs much higher in ammonia and much higher in nitrogen than formerly; in other words, the more depleted the soil becomes the more necessary it becomes to increase the amount of ammonia and nitrogen in the fertilizer. The prevailing fertilizer now used, for instance, in my section of the South is manufactured on a formula of 8-4-4 instead of 8-2-2, and 9-3-3, at least, is the lowest grade used.

There are two points involved in the suggestion which I wish to bring to the Senator's attention, for two reasons: First, as the amount of ammonia in a fertilizer increases, the price of the fertilizer, of course, is relatively increased, because ammonia is the expensive material in the manufacture of a fertilizer. Second, as the grade of the fertilizer is increased, more and more is the filler or waste, to which the Senator from Nebraska has referred, done away with. For instance, in the manufacture of fertilizer, say, on the formula of 8-5½-4, from properly selected materials, there will be no filler, but there will be an actual tonnage of fertilizer, whereas a fertilizer of 8-2-2 carries a filler of, say, 675 pounds; so that freight has to be paid on practically one-third of tonnage that is absolutely worthless for the purpose of building up plants.

I merely wish to direct the Senator's attention to the fact that he has selected a fertilizer carrying the lowest grade of nitrogen or ammonia. Therefore, of course, the figures he has quoted need some slight modification. When the amount of ammonia in a fertilizer is increased the degree of wastage, or what the fertilizer people call "tonnage," is decreased.

As I have just stated, it is possible to so select the materials and combine the elements as to do away with filler in the manufacture of fertilizer, but, as a matter of fact, what the Senator calls 2-8-2 goods and what I call 8-2-2 goods carry about one-third of filler.

Mr. NORRIS. Mr. President, I am very glad to have had the suggestions which have been made by the Senator from Georgia. He, of course, comes from a section of the country where an immense amount of fertilizer is used. What he says and what I briefly tried to say, that different kinds of soils need different kinds of fertilizers, of course, is true. The formula which I have mentioned is the one that is very commonly used, and, indeed, it was almost universally used by the experts who testified before our committee. The particular figures which I have used were verified by the experts of the department before I used them.

Mr. GEORGE. I understand that to be the basic formula, and formerly it was the formula which was almost universally used; but on soils which have become depleted in nitrogen we have constantly used an increased amount of ammonia.

Mr. NORRIS. There are soils which, for instance, require no potash, and for those soils a fertilizer manufactured according to the 2-8-0 formula is used. That means no potash. There are other soils that require less nitrogen; others that require less phosphorus. My understanding has been—and I obtained that understanding from an immense amount of testimony which has been adduced at different times not only on this question but in relation to other matters—that the formula 2-8-2 was the one most commonly used.

Mr. EDGE. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from New Jersey?

Mr. NORRIS. I yield to the Senator.

Mr. EDGE. I was very much interested in the statement made by the Senator a few moments ago to the effect that at Syracuse a private concern, as I understand, had, through the knowledge gained from the governmental experiments, been able to develop a plant which produced nitrates even cheaper than those produced by Germany, where, it is generally understood, they are produced very cheaply.

Mr. NORRIS. I would not say that; I did not intend to say that.

Mr. EDGE. Perhaps I misunderstood the Senator.

Mr. NORRIS. I did not intend to say that they were produced there cheaper than they were in Germany. Of course, I have no knowledge except my recollection of the testimony; I have not had an opportunity personally to investigate German production. I should like to have had such an opportunity, for it would, perhaps, have enabled me to understand the question much better than I do now. But the experts who testified and who knew about Germany and who had been there were asked that question, and, as I remember the testimony, they said that Germany produced nitrates at a much lower cost. However, there was no secret about it that our experts did not understand or that they were not willing to explain; and the principal reason why they produced nitrates so much cheaper was that the cost of everything in Germany was very much cheaper. They produce the nitrates without the use of water power; they use coal for what little steam they need—and they do not use much steam.

Mr. EDGE. The thought that impressed me was this: If I understood the Senator correctly, plant No. 1 must be practically reconstructed, and, in the light of the experience of the private concern in Syracuse, even though it may not manufacture the product cheaper than similar products are produced in Germany, certainly it has developed the production of a cheap commodity. So why would it not be better, inasmuch as the Government must practically begin all over again, as I understand, plant No. 1 being practically useless, to encourage the turning over plant No. 1 to private interests, with the probability of having the same result as apparently the Syracuse firm has demonstrated?

Mr. NORRIS. I think it is just the other way. The Syracuse plant would probably never have been constructed if it had not been for the governmental experiments. They are there and they are enabled to be there because they secured the information from the experiments made by the Government. I should like to have similar plants constructed all over the United States. Let the Government keep on making the product cheaper and cheaper, and I would welcome any private concern going into the business so as to have all the competition possible.

Mr. EDGE. I recognize the missionary work performed by the Government and attempted to give credit for it. It enabled the Syracuse firm to develop what they have apparently developed. But my point is this: That the fact that that plant has been developed does not prevent the Government from continuing experiments. Here is a great big plant that cost millions of dollars, and apparently if it could be turned over to private capital, having the benefit of the Government's investigations which have been properly made and unquestionably have been of great benefit to the industry, it would seem to me to be a business proposition to encourage the private producer.

Mr. NORRIS. The way to encourage the private producer is to do that which has already encouraged the private producer, only do more of it. The private producer was enabled to construct the Syracuse plant, I believe, by virtue of the experiments conducted by the Government of the United States. If those experiments have led to that plant being built, why is it not reasonable to suppose if we will make more and more experiments and keep on the job the same men who have been doing the work so well that we will have more and more Syracuse plants all over the country? Incidentally let me say further—

Mr. COPELAND. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from New York?

Mr. NORRIS. I will yield in just a moment.

Incidentally there is one thing the Senator has not mentioned. If the Syracuse plant has improved somewhat upon what they got from the Government plant, the chances are a thousand to one they have a patent on it right now. They may have gone beyond what they learned from the Government experiments. When the Government conducts these experiments it makes public the results; they are open to the

world and there can be no monopoly; nobody is able to maintain one; and in the end that means cheaper fertilizer to the farmer.

I wanted to go to Syracuse and inspect the plant there. I never did that because I could hardly get away from here, but I did write to the officials of the Syracuse plant and asked them to come before the committee. I have forgotten now just what their reply was, but, at least, we never succeeded in getting anybody here from that plant. I wanted to get the benefit, if there was any benefit, of their investigation and their work and be able to lay it before the Senate in due time, but I have not been able to do that.

Mr. HARRISON. Mr. President—

Mr. NORRIS. I yield first to the Senator from New York, who first interrupted me.

Mr. COPELAND. I merely wanted to suggest probably what the Senator from Nebraska has in mind that the laboratory work—the research work—might go on; and that by keeping plant No. 1 under the department it would be a sort of glorified laboratory where the investigations could continue and where practical application could be made of the experiments, so that the American people would have the benefit of the increased knowledge obtained in connection with the development of fertilizer.

Mr. NORRIS. We want to give the experts of the Agricultural Department an opportunity to investigate and to experiment and develop on a larger scale and in a broader field than they have heretofore done. We think there is an opportunity to do that, but we want to know just what every step costs. We do not want to say, "You can have this water power if you will make fertilizer at such prices," because it would be of no benefit in the end if a man made fertilizer at a loss and recouped what he lost out of what he made from the disposition of the water power. That, in the end, will not do any good, because we are not going to make fertilizer enough at Muscle Shoals to supply the farmers of the United States; it will not be a drop in the bucket, after all. What we want to do is to develop the art there, so that everybody everywhere can have the benefit of the knowledge thereby gained and go into the fertilizer business if they want to. I now yield to the Senator from Mississippi.

Mr. HARRISON. Reverting to the controversy between the Senator from Nebraska and the Senator from New Jersey, relative to the turning over of plant No. 1 to private individuals, I merely desire to say for the benefit of the Record that, as the Senator will recall, in January, 1919, I think it was, Mr. Glasgow was appointed director and placed in charge of operations there. He subsequently made a report to Congress, sometime early in 1920, that he had failed to interest private industry in operating the nitrate plant. Although he offered them the opportunity to make 9 per cent on any investment of their own before the Government should have any return on its investment he was unable to find anyone to take it under those apparently very advantageous conditions. It was upon the recommendation of Mr. Glasgow that in 1920 the War Department recommended that a bill be passed, which was known as the Kahn-Wadsworth bill, which was introduced in the Senate by my friend from New York [Mr. WADSWORTH], who after he introduced it did not see fit to vote for it. I merely state that for the benefit of the Record.

Mr. NORRIS. Mr. President, I rather think the suggestion made bears out the theory that I have and that I think the majority of the committee has. We must develop fertilizer manufacture more before we shall be able to reduce materially the cost of fertilizer to the ultimate consumer.

Mr. President, it is a thing for which we can well appropriate public funds. I come from a section of the country which, up to the present time at least, has not been particularly interested in the fertilizer question. I think, however, that the fertilizer question is even broader than our own country. It reaches out into the civilized world, wherever there is a civilized human being. It is not the farmer only that is interested in fertilizer. Every consumer in Christendom is interested in it. Every citizen of every other nation is interested in it, and we are getting more interested in it every day. We must face the proposition of a cheaper fertilizer in agriculture not only to help the farmer but to help everybody who eats food. We are all interested in it. It is something that comes into every home, everywhere, in every country and in every community. We can not escape it.

We ought to face this problem, it seems to me, like men. If we find in it something that does not look right, that is not pleasing, as we do when we look into it, let us admit it. Let us say so. Let us go before the people and say, "This is necessary even for the human race, and we are justified in the expend-

ture of public money for any experiment, any investigation, that offers any reasonable prospect of a reduction in the price of fertilizer."

That is what the committee bill tries to do. We will know when we get through just what all these experiments cost. We will know absolutely what fertilizer costs through any new invention that may be made; and it is the theory that we will appropriate money from year to year for carrying on these investigations, as we always have in the past to a certain degree; but now we have that plant, nitrate plant No. 1. That is not large enough to go into the fertilizer business as a manufacturing proposition; and we feel that we ought to take public money, put our experts in charge, give them practically a free hand, let them delve into the subject and do the best they can, and all pray to God that they will be successful.

The bill provides that nitrate plant No. 2 shall remain intact. We know just how much nitrogen we can get in a year by the cyanamide process in nitrate plant No. 2, and we know that it will cost us too much to use it for fertilizer purposes. We provide by the bill that it shall remain intact until a new process is discovered and installed in large enough capacity to produce as much nitrogen as nitrate plant No. 2 will produce. We do that as a matter of national defense. We do that to hold the nitrate plant there in readiness so that it can be started up on an hour's notice. We know just what it can do. We can make explosives there, and we want it to remain just that way until we have a different system, because if unfortunately we should get into another war we would need nitrate plant No. 2. We would need it right away, and we would need it every day, and we could not afford to wait to build another one. So the bill provides that it must remain intact as it is, looked after, and kept in repair; and when these investigations proceed to such an extent that a new process has been invented and installed to a capacity equal to that of nitrate plant No. 2, then we can dismantle No. 2.

It may be, of course—I can not say—that the invention may come in the improvement of the cyanamide process and that nitrate plant No. 2 may eventually be the place where we will extract nitrogen at the lowest price in the world. The indications are that that is not true, but I can not say with any certainty. No scientific man has been able to tell me with any certainty. They all agree, however, that the indications of improvement, of cheapening the process, all lie through some other process than the cyanamide process—most of them say in some modified form of the Haber process, for which nitrate plant No. 1 was originally designed.

Mr. President, it is going to cost some money from year to year to carry on these experiments. It will cost some money to remodel nitrate plant No. 1. As I take it, Doctor Cottrell, if he were placed in charge to-day, would not dismantle the entire machinery at once. He would not fix up that machinery just as he would fix it if he were going to make a nitrate plant to extract nitrogen from the air by the Haber process. He would not do what he would do if we were faced with a war and immediately had to get as much nitrogen as possible. In that event he could fix up that plant at a cost of a million or perhaps two million dollars, and it could run to its full capacity under the Haber process; but he wants to cheapen even the Haber process. So it is not the purpose to install a whole lot of machinery to do it as cheaply as we can now to the capacity of the plant, but to use whatever parts of it may be necessary as an experimental proposition; and under our bill they are not confined to the Haber process. They can take any process. We have tried to leave them perfectly free. They can follow any clue that they get anywhere in the world.

Mr. President, I think that is what we ought to do with Muscle Shoals. I have heard some criticism of our bill because we provide in the bill that the governmental corporation shall supply the power to the Agricultural Department for their experiments at the lowest price that anybody is charged for similar power. When these experiments go on, it is very likely that they will not use very much primary power for experimental purposes, so they will not need to use the most valuable part of it; and there is a limitation put in the bill that the Agricultural Department can not call upon this governmental corporation for primary power exceeding 25,000 horsepower or 75,000 secondary horsepower. That has been criticized. I want to tell the Senate why it was put in. It was not in my bill originally. I have not any particular pride about it now, but there is a reason for putting it in which I think will appeal to reasonable business men.

We provide in the bill that the Secretary of Agriculture can lease all of these plants, all of this machinery or any part of

it. That was not in my bill originally. If I had my way about it, I would not have that in the bill.

I would keep our agricultural experts at work. I think they are better than any others. I have been impressed all through the hearings with the fact that everybody paid tribute to these men who are working for the Government at almost nominal salaries. All these chemists have paid tribute to them, and said that they were leading the world in their particular lines. Now, if the Secretary of Agriculture did lease that plant to a private concern, suppose it was somebody who, directly or indirectly, did not want this power distributed, but wanted to cripple the governmental power possibilities. If he could get all he demanded he would demand at once 100,000 primary horsepower, about all they had at Dam No. 2. He would not need it, but he would demand it in order to keep that power off the market, in order to prevent it from going into competition with the power companies that are already doing business in the South; in order, if you please, to be more specific, to prevent it from competing with the Alabama Power Co. in that field. That is the power company that is in the immediate vicinity. With that provision in the bill, allowing the Secretary of Agriculture to make that lease, we thought, as a safeguard to the Government itself, that we ought to limit the amount of power they had a right to demand. The bill does not limit the amount of power they can get. They can deal with this governmental corporation and get all the power, and the price is to be always the lowest that is charged to anybody; but they are not bound to give them more than 25,000 primary horsepower or more than 75,000 secondary horsepower. We felt that was more than they would ever use. If our officials are going to use this power, if you are willing to take the lease provision out of this bill, then I am willing to strike out all limitations, because I have faith enough in the Government officials to believe that they never would demand any more power than they needed, and I would give them all they need. I want to be liberal with them.

Mr. President, later on, when the Senator from Alabama [Mr. UNDERWOOD] offers his substitute, I expect to have something to say in regard to the substitute. Unless there are some questions from Senators, which I shall be glad to answer if I am able to do so, I think I am through.

Mr. BROOKHART. Mr. President—

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Iowa?

Mr. NORRIS. I yield to the Senator; yes.

Mr. BROOKHART. There is one fact there that is not straightened out in my mind. When I visited plant No. 1, the explanation was given to me that it never had been completed and never had been used. The reason given for it was that this improved process had been discovered in the meantime, and it was not considered worth while to go ahead and complete the plant on the old lines. I should like to know whether or not that is correct.

Mr. NORRIS. I will say to the Senator that I do not believe that is correct. I think the plant was all completed.

Mr. BROOKHART. As I went through the plant they pointed out to me units of it that were not completed.

Mr. NORRIS. There might have been some such units.

Mr. BROOKHART. And I think none of it had been used.

Mr. NORRIS. No; it failed to do the work.

Mr. WADSWORTH. Mr. President, perhaps the Senator from Nebraska will permit me an observation at that point. My recollection of the testimony—and I paid a great deal of attention to it at the time; it was testimony brought to us at least four years ago—is that plant No. 1, being a Haber-process plant, failed because there was not at that time anyone in the United States who really knew how to operate the Haber process. They came as close as possible to it, but there were certain things lacking of a very technical nature, which, not being present in that plant, or the knowledge of using them not being present in the minds of the men who were trying to operate it, caused the thing to fail. It came within an ace of success, but it did fail.

Mr. BROOKHART. Did they actually complete and try to operate some units of it?

Mr. WADSWORTH. Yes; they did. It was not surprising that they failed. When we started to build that plant there was no American alive, as I understand, who had ever built and installed and operated the Haber process.

Mr. KENDRICK. Mr. President—

Mr. NORRIS. Mr. President, I will yield in just a moment. This plant was constructed at a time when we had no access, of course, to German plants, which were then operating suc-

cessfully under the Haber process. Our people had no way of knowing just how to do it. They knew there was such a process; our scientific men knew a great deal about it; and they undertook to construct there a plant to use that process. You will see from the size of the plant that they realized that they did not know for a certainty that it was going to be a success.

Just think of the difference. Here is one plant, the cyanamide plant, that they knew would work—they knew all about that—with a capacity of 40,000 tons of nitrogen annually. This other plant, while it is a large building and has connected with it a steam plant of 5,000 horsepower would have been built on the same large scale as the cyanamide plant if they had known for a certainty that it would work. In fact, if they had known for a certainty that it would work they probably would not have built the cyanamide plant. It was a question of getting explosives there, and getting them quickly.

Mr. WADSWORTH. Mr. President, it may be observed also that at that time there was only one concern in all America that had ever built and operated a cyanamide plant, and the Government had to use the services of that concern to go to Muscle Shoals and build this new cyanamide plant. That concern, knowing how to do it, having had experience of its own, built it, and it was promptly a success, but the process is now somewhat out of date.

Mr. NORRIS. Mr. President, I think it is not unfair to say that when it was built, even, scientific men regarded it as just a little out of date. They would not have built the other plant if they had not. I now yield to the Senator from Wyoming.

Mr. KENDRICK. If I am not mistaken, there was testimony given to our committee which indicated very clearly that when the original formula was furnished to our officials in the building and construction of the plant they were misled through the failure to furnish at least a part of the formula for a deliberate reason. I think something of that kind will be found somewhere in the testimony.

I wanted to ask the Senator from Nebraska if, in his very inclusive discussion of this question, he has touched upon the fact that running through almost all the hearing there was testimony indicating that there was to be a cheapening of this process, and that the final process would almost result in the entire elimination of power as one of the essential factors in the production of nitrogen?

Mr. NORRIS. I did refer to that; but I am very glad to have the Senator's approval of it, because it can not be emphasized too often that that is the present state of the art.

Mr. KENDRICK. As it seems to me, in connection with the final disposition of this question we should not overlook that important fact. There is every reason to believe from the testimony that we are to cheapen the process and that we are finally to produce nitrates without the employment of very much power, which ought to have a sort of a determining effect with us in trying to pass upon this question for a period of 25 or even 50 years.

Mr. NORRIS. Mr. President, by his very valuable suggestion the Senator from Wyoming reminds me of something I ought to mention, something we ought to bear in mind, and which the committee has in view in reporting this bill. The Senator from Wyoming is one of the men who helped to frame the bill.

We were impressed with the idea that probably less and less power would be used in the manufacture of fertilizer. We can not guarantee that. We only know that the indications of the scientific world point in that direction. You may say to us that they may take a turn and go the other way. That may be true. Then it is said, "What have you done to take care of that contingency if in a few years that shall happen?"

Let me answer that suggestion, which I have made myself, and which perhaps will be used as an argument against the committee bill, that we will have this corporation handle the electricity generated under this plan, and will have leased it out for a number of years, and some new invention for fertilizer may come along and demand new power.

Let us see. The committee provides for the complete development of the Tennessee River, and is the only measure before Congress that does make provision for the most economic development of hydroelectric energy on the Tennessee River in the maximum quantity.

Anyone who will study this water-power question will not controvert what I am about to say, and what, in a brief way, I said earlier in my remarks. The way to get electricity from water power in the maximum quantity for the minimum cost is to develop a system as a whole. This bill provides for the development of every horsepower on the Tennessee River and

any of its tributaries. The Secretary of War is directed to survey the entire Tennessee and its tributaries for the purpose of ascertaining the best places for the location of other dams, storage reservoirs and power dams, or both combined in one. When that shall have been done, we will at Dam No. 2 have converted our secondary power, or a large proportion of it, into primary power. In other words, instead of being able to sell practically 100,000 horsepower every hour in the year at this great dam, they will be able to sell five, six, or seven times that amount; and when you at once develop the power and multiply its capacity by seven without any material addition to the cost, thereby you divide the cost to the consumer by seven. That is the way to get the cheapest electricity. That is the way to get the most of it, and that is what we have provided in this bill.

When these dams are completed there will be more power at Dam No. 2, there will be more power at Dam No. 3, and this governmental corporation which the committee bill sets up is given the handling and the control of all this additional power; and if, within the next 5 years, the next 10 years, and again in the next 15 years, such a condition should come about that the economic manufacture of fertilizer should require more power, they would have it. When this great system shall be inaugurated they will have power being developed from year to year as the development takes place. We will build another dam somewhere up the Tennessee River, for instance. Suppose it has a capacity of 50,000 primary horsepower. From the very fact that you build it and store the water you increase the primary power at Dam No. 2 and Dam No. 3.

Mr. FLETCHER. Has the disposition of the Gorgas plant interfered with the general scheme and plan which the Senator has in mind?

Mr. NORRIS. No; the disposition of the Gorgas plant has had nothing to do with it. The committee bill provides that this governmental corporation shall take the money paid by the Alabama Power Co. for the Gorgas plant, to wit, three million, seven hundred and some thousand dollars, and that the Secretary of War shall sell the useless material the Government owns down there, which will amount perhaps to a million more, and that money shall be turned over to this corporation, that that will be its capital, and that it may retain its income until its capital reaches \$25,000,000, and that thereafter all the profits shall be turned over to the Treasury of the United States.

It will take a good many years to develop a system of that kind. If anything is worth doing at all, Mr. President, it is worth doing right. In round numbers, we will have practically 100,000 primary horsepower at Dam No. 2. When the improvement of the Tennessee River is completed, and the other dams constructed to carry out the system outlined in the committee bill, instead of there being 100,000 primary horsepower there, there will probably be four or five hundred thousand primary horsepower at that dam. So if we pass the committee bill we will increase the power developed on the Tennessee River. It will be the only river in the United States that will be scientifically developed. Every horsepower there will be taken for the benefit of humanity, and every time we increase it we will cheapen the cost of all of it.

There is another thing I should mention. If the plan contemplated by the committee bill is carried out, the Tennessee River will be made navigable practically to its source. The completion of Dam No. 2 will make the Tennessee River navigable up to Dam No. 3, about 12 or 14 miles upstream, and when Dam No. 3 shall be built it will make the Tennessee River navigable for 75 miles more. So when we carry out the plan we have outlined and build the other dams we will make the Tennessee River navigable practically to its source.

We have provided for another thing. When we shall have carried out this plan set forth in the committee bill we will have stored all the flood waters of the Tennessee system. Thus, as far as the Tennessee River has anything to do with the overflowing and the damage by flood waters of the Mississippi, it will be absolutely under control, as far as man can put it under control.

That is not all. These things all dovetail into each other. The great steam plant, when completed, will generate 120,000 horsepower. The other steam plant, at nitrate plant No. 1, has a capacity of 5,000 horsepower. They must use coal which they have to ship in by railroad. When the Tennessee River is made navigable, as it will be if the committee bill passes, instead of those steam plants being compelled to pay freight to the railroad for hauling their coal they will be put practically side by side with the coal mines which exist farther up on the Tennessee River, and the coal will come down by barges. It will more than cut in two the cost of coal for

the operation of those plants. So there is another reduction. All these things work together to make more electricity and reduce the cost.

I myself can not understand how, if we are going to build a dam at all—and we have already built one—we should not follow it up to the final and logical conclusion. If we are to maintain Dam No. 2—and nobody denies that we are to keep it—which cost over \$45,000,000, why should we not do everything to increase the power of Dam No. 2? Why should we not do everything to convert this almost useless power, known as secondary power, into primary power, that will be good every minute in the hour and every hour in the day and every day in the year? That is the only scientific way to construct power plants on the navigable streams of the country.

We would make the river navigable in addition. We would control the flood waters of the Mississippi River to the extent of the water that is in the Tennessee River. We would produce more electricity with the plan carried out than can be produced in any other way.

We provide that if any private person or corporation above shall build a dam on the Tennessee River, and the Government build a storage dam farther up, the private party or corporation shall be required to pay its proportionate share of the storage dam built above its dam, because every storage dam in the system anywhere converts secondary into primary power at every dam below the storage dam.

I have no interest of my own in this thing. My people have no particular direct interest in it. I went into this question absolutely unprejudiced, as far as I know, and God is my judge in saying that I am unprejudiced now, as far as I know. I do not want to do anything except for the benefit of the people, and I want to get the most benefit for the most people at the least cost possible.

It happens that in this case the people of the South will be most benefited. Eventually it will be the people of the East, and I think years after I have gone it will be the people of the West, too, because the time is coming when this whole country will be under one giant power scheme. The development of such a scheme would be the economic way to get all the power possible at the minimum cost from our great streams, and if we are wise, we will not do anything that will interfere with the extension of this giant power scheme, which as time progresses and things develop will more and more hook one system into another, so that we can turn the power of the Tennessee River into the State of California some day by the pushing of a button. You can do it now all through the South.

I am just as earnest in advocating the building of a great dam out here beyond Washington. Almost within the sight of this Capitol there is a little Niagara. The weak point in it is the same weak point that is found in the development on the Tennessee River—there is so much difference between the high and the low water. That means there is so much secondary power. But under the plan of the bill which passed the House, there will be twice as much primary produced as can be used in the District of Columbia. In Virginia, just below, with her streams, power is going to waste, hundreds of thousands of horsepower going to waste every day, which ought to be turning the wheels of machinery, which ought to be relieving man from toil, which ought to be going into the homes of all of the people, giving them light and power.

We ought to connect that up, and if the House shall pass that bill, if Virginia will develop her streams, in a short time that will be connected with Muscle Shoals. We can transfer this power to Florida. We can transfer it to Arkansas. We can transfer it absolutely almost without limit by the relay system known now to scientific men. Every day we are increasing the distance to which we can carry electricity. Every hour, almost, our scientific men are extending the distance to which we can carry electrical current without perceptible loss. We have no reason to doubt that work will be continued. The man who will invent a practical storage battery will revolutionize it all. He will store up the secondary power. Instead of storing the water he will store the power and use it where it is needed and when it is needed.

Mr. President, we are only entering a great electric age. We ought not to make a mistake. We ought not to turn this great property over to private interests. We ought to realize that sooner or later, no matter what we do, this giant power scheme is coming, because it is the economy of human nature.

It is God's own way of giving man the benefit of the power that is going to waste in our flowing streams. Every stream that trickles down the mountain side is going to be worth its weight in gold. I want to enact such laws that no drop of it will ever have to pay a tribute for the benefit of private interests or private corporations. Let all the people have the bene-

fit of it. We are taking the first step here by the committee bill. We are developing a stream and its tributaries as no other stream has ever been developed and as nobody has ever proposed to develop it. It means the maximum amount of electricity for the minimum cost to the greatest number of people. That is the reason why I believe the committee bill ought to be enacted into law.

Mr. UNDERWOOD obtained the floor.

Mr. BROUSSARD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Clerk will call the roll.

The principal legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	McKellar	Shipstead
Bayard	Frazier	McKinley	Shortridge
Brookhart	George	McLean	Simmons
Broussard	Gooding	McNary	Smith
Bruce	Greene	Mayfield	Smoot
Bursum	Hale	Means	Spencer
Butler	Harrell	Metcalf	Stanfield
Capper	Harris	Neely	Sterling
Caraway	Harrison	Norris	Underwood
Copeland	Hefflin	Oddie	Wadsworth
Couzens	Howell	Overman	Walsh, Mass.
Curtis	Johnson, Minn.	Pepper	Warren
Dial	Jones, N. Mex.	Phelps	Weller
Dill	Jones, Wash.	Ralston	Wheeler
Edge	Kendrick	Reed, Pa.	Willis
Ferris	Keyes	Robinson	
Fess	Ladd	Sheppard	

Mr. BROUSSARD. I desire to announce that my colleague [Mr. RANDALL] is ill and for that reason is absent.

The PRESIDING OFFICER. Sixty-six Senators have answered to their names. There is a quorum present.

Mr. UNDERWOOD. Mr. President, the questions involved at Muscle Shoals on the Tennessee River date back to the early years in the last century. There is not a precipitate fall at Muscle Shoals, but there are a series of rapids that fall something like 100 feet in 14 miles of the river. That impeded navigation in the very early history of the settlement of Tennessee and Alabama. As far back as 1828 an effort was made to improve the navigation on the Tennessee River, and the State of Alabama was granted by the Federal Government 400,000 acres of land as a grant or gift to aid the State in accomplishing that purpose. From that time to this at various intervals the problem involved at Muscle Shoals on the Tennessee River has been before the Congress of the United States. In 1871 an act was passed by the Congress to build a dam around the shoals for the transportation of river steamers. A small dam was ultimately built under that act. It was always inadequate. The work was never fully completed and it did not serve a very useful purpose for that reason.

At one time, I think in 1899, just after the Spanish war, a law was enacted by Congress authorizing the building of a dam to secure navigation and for power purposes, but the grantee of that right never utilized it and it lapsed. That law was enacted without much contest at the time as the issues involved in water-power development had then not arisen in Congress.

Later on, about 1910 or 1911, the Government authorized a survey of the entire project looking to the development of water power and the improvement of navigation. That survey was made about 15 years ago, if I recollect rightly, and was approved by the Government, but the Congress failed to take action directly for its development. It was only just before the beginning of the Great War, when those who were studying the question, both in the Government and outside of it, realized our entire shortage of a supply of nitrogen for war purposes and also realized the inadequacy of the supply of nitrogen for fertilizer purposes, that in the national defence act of 1916 an amendment was added in the Senate authorizing the President of the United States to select a dam site and build an air nitrogen plant somewhere in the United States for the purpose of making air nitrogen for national defense in time of war and to be utilized for the manufacture of fertilizer in time of peace. That act carried an appropriation of \$20,000,000, an appropriation that seemed large at the time, but which since that time we have realized was entirely inadequate.

Under that act the President of the United States finally selected Muscle Shoals as the site for the building of the nitrate plant and for the building of a plant to furnish power both to manufacture nitrogen for war purposes and to manufacture fertilizers in time of peace. Carrying out the purposes of that act, the President, out of the appropriation that had been made by Congress during the war which was subject to his personal disposition, allocated to this national defense proposal, as set forth by Congress, a large amount of money for the building of this great nitrate plant No. 2, and also a portion of the

money for the building of nitrate plant No. 1, and ultimately, after the war was over, some portion of that money was allocated for the commencement of the building of Dam No. 2 in the Tennessee River.

Mr. President, I make this statement of facts in order that the Record may show how long the Government has been considering the development of navigation and the creation of power on the Tennessee River at this point. Now we are coming down to the last chapter—the final showing. No matter what others may say—and I shall discuss the subject more at length before I conclude—as to whether or not we have equipped plants, and whether or not we now have plants at Muscle Shoals which are prepared to serve the national defense of this country, we have invested altogether at Muscle Shoals in the neighborhood of \$80,000,000 outside of Dam No. 2, and I am informed that when completed next July, Dam No. 2 will have cost \$45,000,000. So we have a vast expenditure of money which has been appropriated and which has been utilized by Government officers under the direct authority of the Congress of the United States in order to accomplish two things: One is to supply nitrogen for national defense, and the other is in time of peace to furnish a supply of nitrogen to be converted into fertilizers and to aid the agricultural classes of America in that way.

The question now before Congress, and particularly before the Senate at this hour, is whether or not after the expenditure of that vast sum of money we are going to change our minds and use this development for other purposes than those for which the law of the land has already provided, or whether we are going to carry out the original plans of the Government; in other words, shall this great expenditure, these great plants that are already built, continue to be used for the national defense of America and for the upbuilding of the soil of America, not only to benefit the farming classes but to produce cheaper food for the masses of American people; or, on the other hand, are we going to change our plan and develop a great superpower system, a system of concentration of electrical power for the upbuilding of the great manufactories of America?

I am not contending that it is not wise, where it can be done, that the electrical power of the United States should be massed and that industry should not get the benefit of it. I say that far too much water runs down the streams of America that is not harnessed and made ready to work for industry, but I say we have made a dedication of this project; it is not something that we are to do to-day, but it is something that has been done. That dedication is to patriotism, to the life of the Nation, to the power of the Government, and to the upbuilding of the toiling masses of American people who are engaged in agricultural endeavor. The problem which confronts us to-day is as to whether we shall follow my good friend, the Senator from Nebraska [Mr. Norris] in providing the splendid superpower system which he has outlined to the Senate to-day in an interesting speech, and vote for his proposed substitute, which primarily is a power substitute and not a fertilizer or a national-defense substitute, or whether the Senate of the United States shall maintain the original purpose of the legislation which was enacted in 1916 and utilize these great plants for national defense and for the production of fertilizer.

Mr. President, it has been said by an ancient philosopher, and it has been repeated many times since, that there are only two great forces that destroy national life; one is an invading army and the other is the depletion of the soil. That is true. Invading armies may wipe out civilization and peoples, but depletion of the soil makes it impossible for nations and peoples to sustain life in their habitat, and they move on, as the people of Greece moved in times gone by, to the more fertile lands of southern Italy, which came to be called Magna Græcia.

Now, let us look at this question from the standpoint of national defense, for that is the first problem that should confront a Senator of the United States. We may have our interests and our desires; our people may plead for their own interests; but, in the last analysis, the Senators of the United States are here first to secure national defense in order that our Government and our people may continue to exist and may not be driven from the earth.

I realize that there has been a vast deal of testimony given by so-called experts. Some of them were really experts, and some of them called themselves experts; but a vast deal of testimony has drifted into the documents and the hearings of Congress in the last 10 years on this subject. There are, however, certain facts that stand out that no expert can deny and which must be admitted. When we went to war in 1917 we thought we were prepared to a certain extent, but we found

ourselves lacking preparation all along the line. We hear theories advanced as to what the future holds for us in new ideals and new experimentation. If I remember rightly, I read in the testimony in this case that an Army officer who was called before the Agricultural Committee testified that if the amount of nitrogen which is being made in the by-products coke ovens of America continued to increase as it had since the Great War in 20 years we would not need to bring any nitrogen into this country for national defense. Can that officer or anybody else guarantee to the people of America that we shall not be involved in a war within 20 years? Are we to sit down here idly with our hands tied and wait until some scientific gentleman informs us of a better way to make nitrogen for war defense than that which has already been devised and which is available at the great plant that has already been built by the Government?

When we went to war our allies, France and Great Britain, informed us that they could not furnish us with a powder supply; that the only powder supply they had was that which must be available for their own armies. One of the reasons why this great plant at Muscle Shoals was built was because we had to have a nitrogen supply. It is true that the navies of Great Britain and Japan had cleared the seas of the German scout cruisers, that commerce could move with safety, and that our ships proceeded to bring our supplies of nitrogen from Chile. Let me visualize to Senators for just a moment what that meant and how dire was our need. Senators will recall that when the war broke we commandeered every available merchant-marine ship that was on the seas; we secured the Austrian ships that were interned in Pearl Harbor; we took every available merchantman that could be found to carry our troops to the front line, to supply them with food and munitions of war, and to move the commerce of the United States; yet in that dire necessity one-third of the entire merchant marine of America was engaged throughout the war in moving Chilean nitrates to the ports of America in order to supply the raw materials from which powder should be made so as to supply our men on the front line with the explosives which were needed to carry on the war.

People talk about our having an adequate supply of powder, and about these scientific men waking up overnight and furnishing us with a new way of producing explosives to defend our country. It reminds me a good deal of our preparedness at the time the late war broke out. I do not say this in criticism of the General Staff, because I think during the war they rendered great, efficient, and splendid service; but I can tell you of an incident that shows the necessity of being prepared beforehand.

The General Staff was organized when Theodore Roosevelt was President of the United States. It was composed of the very ablest of our men in the Army. When the war broke out the General Staff came before a committee of which I was a member to ask for appropriations for war supplies, which, as you know, were granted without hesitation by the Congress; but among other things they asked for was this: They said they wanted a large appropriation for camps in which to drill and prepare the soldiers for war. I asked a member of the Staff where those camps were to be located, and he said they had not yet been selected.

Mr. President, it seems to me that if there is one thing that any man would visualize who was contemplating a future war, it is that you might some day have to muster your men to arms, and if they were to be mustered to arms you would have to have a field in which you could muster them. A camp is of great importance, because you must know that it is healthy and that the terrain is good for the movement of troops. Yet, we are not prepared in that respect; and as you know, General Wood was detailed to pick out sites for camps. Although we had hundreds of thousands of men drafted, we waited from April until late in September before we were prepared to move a drafted man into camp. So, although I give great credit to the scientific men of the Government, I am not ready to surrender every question of national defense to their consideration.

Look at this question yourselves. In the year 1912 the importations of Chilean nitrates, largely for fertilizer, amounted to 589,000 tons. In 1918 we had deprived the farmer of the use of nitrogen entirely. We cut him out of it, and for war purposes alone we imported into this country 1,607,000 tons of nitrogen—1,607,000 tons of nitrogen for war purposes from Chile.

I have heard it argued here, and it has been said time and time again, that there are other sources of a nitrogen supply for national defense besides Chilean nitrates. There is one other source, and only one, and that is if it is taken out of

the air. Why do I say that? I know that ammonium nitrate is made in the by-product furnaces, and I know that that supply was something less than 200,000 tons before the Great War, and by reason of war stimulation—the very appropriations that we made in Congress to stimulate its production—it has increased to nearly 600,000 tons; but I also know that the larger portion of that production is used in refrigeration, and there is no better supply of nitrogen for refrigeration than the ammonia from coke-oven furnaces.

Now, just imagine a General Staff or a Congress or a President of the United States moving the ammonia that is used for refrigeration out of the refrigeration tanks and using it on the battle lines to kill the enemy! Refrigeration means the moving of the Nation's food supply. You no longer buy your meat from the butcher who is in your neighborhood. You buy your meat from Chicago or Kansas City or some other western city. You bring your perishable foods from Florida or other points on the southern coast line. If you should take the refrigeration ammonia away from the purposes for which it is used in times of peace, you would destroy more lives by reason of decayed and putrid food than you probably would destroy on the battle front. You could not feed an army without moving their beef supply; and to tell me that men who are honestly at heart for the protection of their country say that you can call on supplies of ammonia of that kind for the defense of your country in time of war is not to question the patriotism or the intelligence of such men, but it is merely to say that the vision of some men is absorbed by their own desires.

What does that mean? I know of no other supply of nitrogen that is at all commensurate with a war supply outside of the by-product ammonium. We have a few experimental plants, it is true. I hope they may grow larger. I hope they may develop. I hope the day may come when private enterprise in America will build and develop the plants that will supply the country's needs in time of war; but it did not come adequately in the Great War, though some advance was made. It did not come under the needs of a great war. It is coming less to-day than it did then, and we have no right to expect that it will come in the immediate future.

What does this plant mean? Forty thousand tons of concentrated nitrogen is its capacity. If it makes all it can, running day and night, 365 days in the year, 40,000 tons is all it can make. What does 40,000 tons mean? Forty thousand tons of fixed nitrogen is equal to 250,000 tons of Chilean saltpeter. That is agreed to by all those who are in the business and who have testified on the subject. Two hundred and fifty thousand tons of Chilean saltpeter is only about one-seventh of the amount we imported for war purposes in the year 1918—only about one-seventh of the war supply. Now, Senators of the United States—you who are disposed to treat this proposition as a mere industrial one, or as merely a question of a combat between certain great institutions that desire power and certain others that desire the use of these plants for agricultural purposes—visualize for a moment, before you drive this problem away from you, what is going to happen to your country if the supply of Chilean nitrate stops.

You know what a war supply is. You know that war to-day is not merely a matter of men. The chief item in the war of a hundred years ago was the personnel, the men. In the sixties it became the question of small arms. To-day it is the question of explosives. I have been told that in one of the great battles in the World War, which lasted some days, more explosives were exhausted in those few days' fighting than the entire amount of explosives that were fired in the Civil War. War to-day is the massing on the front of the greatest possible amount of explosives in the way of a barrage, of gun fire, of every other thing that can use nitrogen in the shape of powder and explosives; and the peace and safety of your Nation depends on massing it.

Visualize what will happen if in the near future, or at any time before we are prepared, we go to war with some power that can take command of the seas, that can prevent our merchant fleets from going to Chile. How long will your sons—yea, and I may say your daughters, because the women served in the Great War on the battle fronts—how long will your sons and daughters last before the gunfire of an enemy when you have no powder supply at your command? That is the material problem that faces you; and the hour that communication is cut off with Chile an adequate supply is gone.

But you do not have to lose command of the seas, even, to lose that supply. Suppose the Chilean Government felt friendly to another power with which we engaged in war and should do as we did in 1914; suppose their Government

should issue a proclamation of neutrality and amity and say that no munitions of war should leave their shores. In time of war nitrogen is a munition of war; and if Chile issued a proclamation prohibiting the export of nitrogen from her shores, you would be on your bended knee asking for terms from an enemy at your doors.

Mr. HARRIS. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Georgia?

Mr. UNDERWOOD. I yield.

Mr. HARRIS. I want to remind the Senator that during the last war Germany threatened Chile and tried to prevent her from letting us have nitrate.

Mr. UNDERWOOD. Certainly; the Senator is right. The first naval battle of the war took place off the shores of Chile; and although Germany, when the war broke out, had a greater supply of Chilean saltpeter stored up than any other nation in the world, the first battle took place off the shores of Chile, the British and Japanese gunboats driving away the German fleet and preventing her merchantmen from coming out with their cargoes of Chilean saltpeter; and if it had not been that Germany had been wise enough in her day and generation to see the handwriting on the wall, knowing that it was probable that she could not maintain her line of communication, and if she in advance had not partially provided for a supply of nitrogen from the air, her colors would have been furled at the end of the first year of the war. But with the supply of Chilean nitrate she had on hand, and with a partial preparation for producing nitrogen from the air, she was enabled to carry on for the first year, and then went in every direction possible to increase her supply of nitrogen, which she finally raised to a point that carried her through the war.

Senators say that because Germany has gone into the Haber process that is the only available process; that that is the last word in producing nitrogen from the air. It is not the last word; it is not the first word. Germany went into the Haber process because she has no water powers, and under the Haber process they use less electricity than under any other process; they use practically none. It was cheaper for her, not having water power, to manufacture with the Haber process than it was to burn up her coal supply and make electricity out of coal. But she used the cyanamide process; she used the Haber process; she developed her by-product ammonia to the greatest degree possible. The result is that although before the war Germany was a great purchaser of Chilean nitrates, to-day she does not purchase any. She has an adequate supply of nitrogen coming out of her war plants to serve her farmers in time of peace, holding it in reserve for the possible danger of a future war.

More than that, there is not a great nation in this world, except ours, that has not waked up to the realization of what nitrogen means for national defense. Germany has her supply, as I have indicated. France has her supply, and part of it is made by the cyanamide process. England has made a supply, and so has Japan. Japan might cut the communications between ourselves and Chile, and seriously injure us, but if we should cut the communications between Chile and Japan, Japan would still have, maybe not a fully adequate, but a partially adequate, supply of nitrogen drawn from the air.

Senators, it may be that no great enemy, even if we did not have an adequate supply of nitrogen, could come as far as North Alabama, where this plant is located, or to Arkansas, or the mountains of Tennessee, but I will ask you how much you would charge to insure the great buildings in New York or San Francisco from attack and destruction by an enemy the hour that your supply of nitrogen gave out?

It seems to me it is perfectly apparent that this problem is just as much a matter of national defense for the people of America as is the problem of building battleships. You do not hesitate, when a naval supply bill comes before you, to appropriate \$40,000,000 to build a modern battleship. You think it is in the day's work. But when somebody asks you to appropriate something like \$40,000,000 to insure a powder supply for national defense, because of your confidence in yourselves and the theories you have been fed by certain professional theorists, you think it is wasting money to provide the powder necessary to enable that battleship to speak. Senators know that. You spend two or three hundred million dollars every year to maintain a great navy, to keep it in commission, and yet you hesitate to provide a supply of powder, and you think it is more valuable to convert the power at one small dam into a superpower system for the advancement of industry than you do to hold it charged and dedicated to the national defense of your country. That is the problem that confronts you and you can not avoid it.

You may say that you do not want to make it at Muscle Shoals. For national defense you can make it where you please, but you have already spent in the neighborhood of \$150,000,000 to make it at Muscle Shoals. Why not go on with your job? Why abandon what you have started to do because somebody wants to buy cheaper power for industrial purposes?

Before I sit down I shall analyze the two proposals pending before you, the proposal of the Committee on Agriculture and Forestry, as presented by the Senator from Nebraska [Mr. Norris], and a bill which I have introduced and which I propose to offer as a substitute in the event the Senate refuses to accept the proposal of the Senator from Nebraska. But before I come to the analysis of those two measures I want to discuss a little two problems; first, why these great dams and works have been built.

I hardly think it is necessary for me to go further in the discussion of the question of national defense, except to say this, that there are some people who say, "It is all right; we have a plant at Muscle Shoals that will make 40,000 tons of fixed nitrogen; let it stay there; oil its machinery and paint its roof; if we get into war we will use it; meantime let us get this power for other purposes; the farmer does not need the nitrogen; he can get it from Chile; and we do not need it for powder in time of peace."

Do you say that of your battleship? Every man in whose face I am looking now, time in and time out, votes for the maintenance of great battleships in commission, and you will so vote in the weeks ahead of you. You vote to put the men aboard, to train them, to recruit them, to supply them with food, to put munitions aboard the ships, and you say that that ship is ready for national defense when, on the order of the captain, she can steam to sea and protect your harbors or your fleets.

Would you call it national defense, Senators, if you built a \$40,000,000 battleship and carried it into what you thought was a safe harbor, anchored it, greased its machinery, and painted its roof? That is the suggestion we have in reference to a powder plant.

Do you not know that you have to have key men aboard your battleship—men who are prepared when the order comes to move on the hour's notice—or your battleship is no defense? Do you not equally know that you have to have key men to operate a great nitrogen works, which contains more complicated machinery than is found on a battleship? They have to be prepared to produce results and produce them on an hour's notice, or it is no longer national defense.

To say that we should give this property away or that we should dedicate it for some other purpose after spending hundreds of millions of dollars on it is merely to say that private enterprise and private business has a stronger voice in the ear of the United States Senate than a call to public duty.

Mr. NORRIS. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Nebraska?

Mr. UNDERWOOD. I do.

Mr. NORRIS. May I ask the Senator if he is in favor of operating plant No. 2 all the time to manufacture explosives and store material? Is that the idea he wants to convey to us?

Mr. UNDERWOOD. If the Senator had read my bill he would have seen that that is not my idea.

Mr. NORRIS. I thought it was not; but the Senator's speech indicates that he wants us to do that.

Mr. UNDERWOOD. If the Senator will allow me to answer him—

Mr. NORRIS. Certainly.

Mr. UNDERWOOD. I am in favor of the Government of the United States or a private lessee, if we can obtain one, producing 40,000 tons of fixed nitrogen a year, and when it is produced, I desire to have it used in the manufacture of fertilizer in time of peace. But if we could not find any use for it, if it could not be used in the manufacture of fertilizer—as it can be—I would say that we had no adequate defense if we did not produce it and throw it into the river after it was produced. That is practically what we do with the money we put aboard a battleship.

Mr. NORRIS. What does the Senator propose to do with it? I would judge from what the Senator has been saying, that he thinks we ought to operate this plant as a matter of national defense, and I suppose he would have us store up the explosives, then?

Mr. UNDERWOOD. I am sorry the Senator from Nebraska has not learned more than he has about this subject in the months he has been studying it.

Mr. NORRIS. I thought perhaps I could learn something from the Senator, but I ascertain from his answer to a simple question that I can not.

Mr. UNDERWOOD. I am delighted to inform the Senator. The Senator knows that every witness who came before his committee who was in favor of the operation of this plant or plants sought to have them operated for the purpose of producing fertilizer in time of peace, so that that supply would be available in time of war for national defense; and that is exactly what the proposal I have introduced asks the Congress to do.

Mr. NORRIS. If the Senator will permit me, I judged from listening to the able argument he was making that he was trying to impress the Senate with the proposition as a matter of national defense, not as a fertilizer proposition; that we should continue to the full capacity of the plant to make nitrogen in time of peace even. I do not know what the Senator would do with the nitrogen unless it was with the idea, and it may be a proper thing, of storing it and having it ready in time of war, because all we could make in time of war would not be sufficient to keep us going. I wanted to know whether that was the Senator's idea. Then I wanted to ask, if that be true, if he does not know that we could make our explosives cheaper now in other ways than by operation of that plant.

Mr. UNDERWOOD. I do not know that, and I do not think anybody knows it except a witness who is testifying from selfish interest because he does not want competition. That is my judgment about it. I do not think we can make explosives cheaper. I do not think the testimony taken in the last decade in the consideration of this plan bears out that point.

What I said a moment ago I did not say in criticism of the Senator, but if the Senator had read the proposal I have made he would know that it is perfectly apparent on its face that it dedicates these great works first to national defense and the making of nitrogen for national defense as a supply source in time of war, and the very next paragraph provides that the nitrogen shall be used in time of peace for the production of fertilizer.

Of course, the Senator has not waited until I finished my speech. He said that I am only talking about national defense and he thinks from that that I must want a mass of 40,000 tons of fixed nitrogen made only to be thrown away in time of peace. The Senator should have waited, because I am coming to the other branch of the subject. I have said what I wish to say in regard to national defense. I say again that one can not justify keeping a battleship in stand-by condition and at a loss of money, for it is a loss and there is no return from it, unless we are going to supply it with explosives for operation.

The same principle that justifies keeping a battleship in stand-by condition with the necessary explosives aboard justifies us in operating this plant, whether we make any money out of it or not. We have to have some nitrogen. It may not be an adequate supply of nitrogen, but we have to have some supply of nitrogen if our line of communication between here and Chile should be broken.

Now, on the other hand, I said when I started this argument that a great philosopher had once said that nations were destroyed mainly by two causes, one an invading army and the other depletion of the soil. For national life the one is nearly as important as the other. War may be more imminent at times, but it is no more destructive of national life than the cutting off of the food supply. More than 100 years ago we knew of fertilizing of the soil only by means of grazing flocks and herds upon it. Then we found certain artificial fertilizers. In the early times of Greece they knew of no artificial fertilizer and they had not then found the way by which they could take the grass seed from the valleys and wet places and transplant it to the hills in order to graze the cattle there. So the depletion of the soils of Greece finally spelled the overthrow of that great empire and her citizens moved westward along the shores of the Mediterranean. Some years ago I recall sailing into the harbor that is adjacent to the capital of Athens in Greece. I found a charming beautiful national city in the midst of her great historic ruins, but that was not the thing that impressed me most. As boys we read in Homer of the fertile hills of Greece, and her flocks and herds as they roamed the hills. We read it in song and in story. Now we enter her ports and see those barren brown hills with every bit of life and vegetation washed away, the depletion of the soil having made it impossible for the growth of crops of grasses, the rains have washed the soil into the

sea and the fertility of the soil of Greece was gone and the empire fell.

This is no theoretical question. We are a young country, a very young country compared with Greece or Rome, but we have already realized that our soils become depleted. Take a trip a few miles into Maryland between here and Leonardtown and see the soil that grew great tobacco crops 300 years ago. Note the condition of that soil to-day as compared to the fertile fields of Iowa or Minnesota or the Dakotas.

Three hundred years of continual farming has depleted the soil of Maryland, and unless it can be renewed it is not in a position to compete with the rich fields of the Western States. Yet the West is not immune. I can remember when as a boy I lived on the prairies of Minnesota, and saw the great Dalrymple farm, with its wheat waving in the breezes as if it was an inland sea. In those days it produced 50 to 60 bushels of wheat to the acre. To-day the production has come down to 20 or 25, or even a lesser number of bushels to the acre. Why? Because the fertility of that soil has been depleted and drawn out by the hand of man in growing his crops.

The President of the United States, in his message on this subject, called your attention to a very interesting fact. He said:

It is estimated that soil exhaustion each year is represented by about 9,000,000 tons and replenishment by 5,450,000 tons. The deficit of 3,550,000 tons is reported to represent the impairment of 118,000,000 acres of farm lands each year.

Not to continue for a great length of time, but the depletion of 118,000,000 acres of farm lands each year; and then we say we will not take a definite position in regard to the replenishment of this lack of fertility. One hundred and eighteen million acres traveling away from civilization, from furnishing food to the masses and employment to many thousands of people. Yet in 1916 we dedicated this proposition that we have under consideration to-day to national defense in war and to fertilizers in time of peace, and the Committee on Agriculture and Forestry reports to the Senate of the United States a superpower bill. It is an excellent superpower bill. If my only object at this time was to develop the navigation of the Tennessee River and produce power, I would vote for the bill of my friend the Senator from Nebraska. If we did not have this other obligation on us, or if it were not our duty to provide for national defense and the fertilization of our soil, I should be very glad to give the Senator my support.

I admit that he has the only superpower bill that is before the Congress as presented at present. I do not know what may be presented before the debate is concluded. His bill, if enacted into law, would develop the navigation of the Tennessee River just as he said it would. It would develop a great power, vastly more than anything that is contemplated in my substitute measure, and it would be of great benefit to those people.

But this dam and these plants were dedicated by the Government of the United States to national defense and fertilizers, and I have introduced a bill to hold them there and use them for that purpose. The distinction between what the Senator is recommending and what I am recommending is perfectly plain. There can not be any doubt about it. I listened with great care to the splendid speech the Senator made this morning on the question of the necessity of the development of power. I would have no criticism about it if it were not that he is taking away in his superpower plan the very backbone of national defense and fertilization of the soil.

Mr. NORRIS. Mr. President, will the Senator yield?

Mr. UNDERWOOD. I yield.

Mr. NORRIS. I do not like to permit the statement of the Senator to go unchallenged, because acquiescence in it might be presumed by my silence.

Mr. UNDERWOOD. I am delighted to have the Senator correct me if I do not understand his bill correctly.

Mr. NORRIS. If the Senator from Alabama will yield, I desire to ask him to point out wherein the bill which the committee has reported takes away any element of national defense? If power at Dam No. 2 is good for the national defense, would not power at a dozen dams, with Dam No. 2 more than doubled in capacity, be still better for national defense?

Mr. UNDERWOOD. Yes; if national defense were provided by power dams, but it is not.

Mr. NORRIS. If national defense is not provided by power dams, what, then, becomes of the Senator's argument when he complains that my proposition is to develop power, but insists that he wishes to get power for purposes of national defense?

Mr. UNDERWOOD. I will explain to the Senator. National defense is not provided by power dams alone. National

defense is provided by the coordination of power dams with certain manufacturing works. It is when power is combined with a nitrogen plant that national defense is served.

Mr. NORRIS. Then, if that be true, under that statement would it not assist to have the power cheapened at Dam No. 2 and to have more dams? So the Senator, according to his theory, ought to go further and provide for the development of all the power on the Tennessee River, the same as I propose to do. That would cheapen the cost of national defense.

Mr. UNDERWOOD. I will say to the Senator as to the development of the power on the Tennessee River and making that river navigable, if we can do that and Congress is willing to undertake it without a conflict with what I think is our solemn duty to provide for the national defense, I shall very cheerfully cooperate. If he fails to get his bill through now for that purpose and will introduce another bill, he will certainly have my vote to increase the amount of power developed. I think it would be a wise thing to do, but I am not willing to have the Congress drawn away from a consideration of national defense in order to build up a great power system for the manufacturing enterprises of America.

Mr. NORRIS. If one dam on the Tennessee River would be good for national defense, as the Senator from Alabama seems to contend, and we could build more than one dam, and increase the power even at the one dam, would it not be still better for the national defense?

Mr. UNDERWOOD. But the Senator—and I admit that most people in considering this subject seem to have the same viewpoint—still visualizes national defense as power. National defense is not power. When the Great War broke we had any quantity of hydroelectrical power in this country which we could have commandeered on an hour's notice, but it was not coordinated with machinery adapted to make nitrogen. Here is an effort in which the Government has spent years to coordinate power and the machinery for the purpose of defense, and the Senator's bill would break it up; it would not carry out that purpose.

Mr. NORRIS. On the other hand, I should like to say to the Senator, if he will permit me—

Mr. UNDERWOOD. I know the Senator from Nebraska does not agree with me; but I will discuss the question more fully later, and I will read the details of his bill.

Mr. NORRIS. Very well.

Mr. UNDERWOOD. I wish the Senator from Nebraska would understand that what I am saying is not critical of himself, but I am criticizing a piece of legislation which the Senator has brought in for criticism.

Mr. NORRIS. I am not objecting to that; but I have been trying to have the Senator from Alabama make plain why, if he feels that the power developed at Dam No. 2 is so sacred and must all be used, whether we need it or not, in the manufacture of explosives, it would not make it even more sacred and still more holy if we built some storage and other dams by which the power even at Dam No. 2 would be not only increased but cheapened, so that under the Senator's own theory we would get more power than we had before?

Mr. UNDERWOOD. I want to discuss that as I come to it, but I have not quite said the last word I wish to say on the subject of fertilizer. As soon as I shall have done so, I will come to the other matter to which the Senator refers.

I wish to say to the Senator that as to Dam No. 2, which he proposes to put in a great power system, while it is not necessary for the Government of the United States or its lessees to own or control all of that great power system in order to produce the nitrogen we want, yet we wish to keep it segregated from that power system, so that we can utilize it where it is coordinated with a nitrogen plant. I say the Senator's bill does not do that. I will come to the discussion of his bill in a moment.

On the question of fertilizer I desire to say I know that Senators who are facing me understand this problem just as well as I do, but, for the sake of the record, I wish to call the attention of the country to the fact that in the last 25 years we have paid a fertilizer bill to Chile of a billion dollars. Every bit of fertilizer which comes out of Chile is taxed \$12.53 a ton. We have paid to Chile in taxes over \$200,000,000. Why should we continue to do that? Germany is not doing it. Germany is making her nitrogen out of the air; she has prepared herself for national defense; she is furnishing her own farmers the fertility for their soil without going out of the continental confines of Germany. But it seems that we are afraid to do so; that we are afraid to engage in the business of manufacturing fertilizers in this country lest we may interfere with somebody's business interests. That is all there is in this proposition; that is the thing which is involved.

I am not going into the question of how much cheaper we can furnish fertilizers to the farmers if this plan shall be carried out, but I wish to call the attention of Senators, in passing, to the fact that some of the greatest chemists and the greatest agricultural experts in the world have stated that if we shall adopt methods along the line that is proposed here we can reduce the cost of fertilizers to the farmers of America, some say one-half and some say one-third. Most able and noted chemists have said in the hearings that we can bring the cost of nitrogen to 5 cents a pound. Senators may exclude that if they wish to; I am not a chemist nor a scientist; but that statement is staring us in the face. So long as we have to maintain the national defense anyhow, if we are going to do our patriotic duty, I think the farmers of America are entitled to have us try a small experiment in their behalf and see what we can do with these plants which have already been builded.

I know that the capacity of the plant at Muscle Shoals is not adequate either for the national defense or for the production of fertilizers. We imported something over 500,000 tons of fertilizer in 1912 and about the same amount in 1913; but this year, 1924, we have imported over 900,000 tons of Chilean saltpeter for fertilizer. I am making the estimate based on the number of tons that have been imported during 10 months of the year. If the present rate of importation continues, the total will be over 900,000 tons. There has been an increase in by-product ammonia, and yet our importation of Chilean nitrates within the last year amounts to nearly double what it did before the Great War. What does it mean? It means the demand for fertilizer in this country has vastly increased—a demand that is registered in cash. It is not theoretical because we are not using this nitrogen that is now coming in from Chile as a war measure; we are using it only for one purpose, and that is for fertilization.

Can a man walk the streets of a great city and know that this problem is not confronting him? Twenty years ago the streets were filled with horses and vehicles that were used in the cities and kept in livery stables. The truck farmer who carried on intensive farming and needed a high degree of fertilization for his land came to town with his wagon load of vegetables and, after disposing of them, drove around to the livery stables and loaded up his wagon with manure, which he took back to his farm for fertilizer; but to-day we do not find the horse in the streets; he has gone; there may be some horses on the farms, but they have gone from the city streets. The truck farmer still must have fertilization for his patch, or he can not produce the food to feed the great cities. That is one reason for the increasing demand for Chilean saltpeter.

The condition is here at our doors, and yet because our action may affect somebody's business interests we can not do anything. I am not in favor of interfering with private business, but when private business will not function to the needs of the Government, then there is nothing else for the Government to do but to take action itself. It is the only way in which the Government can act.

Mr. President, I have already trespassed on the time of the Senate longer than I had intended, but now, if my friend from Nebraska will bear with me—

Mr. NORRIS. Mr. President, may I interrupt the Senator?

Mr. UNDERWOOD. I yield.

Mr. NORRIS. I take it from what the Senator has said that he has not finished, in fact has not nearly finished. Would he like to discontinue now and go on in the morning?

Mr. UNDERWOOD. No; I will conclude in half an hour.

Mr. NORRIS. I should be glad to move that the Senate take a recess if the Senator would prefer to go on in the morning.

Mr. UNDERWOOD. I thank my friend from Nebraska for his courtesy, but I prefer to close what I have to say.

I now come to the problem that really confronts the Senate, and that is the proposals in regard to this bill. As everybody knows, four years ago, when the war was over, a bill was prepared by the Ordnance Bureau of the War Department providing for a corporation to operate the nitrate plants at Muscle Shoals and the dam when it should be completed for the purpose of making powder in time of war and fertilizers in time of peace. That bill was passed by the Senate. It went to the House of Representatives and failed of passage. That bill was followed by another making an appropriation of \$10,000,000 to carry on the work of building Dam No. 2 at Muscle Shoals. That bill passed the Senate, but the House refused to accept it, and after a long fight the appropriation went into conference.

At that time it was said on this floor that we had spent \$17,000,000 in the Tennessee River, and we had wasted it; it had been thrown away. Subsequently, a few years ago, Con-

gress changed its mind, and we got the appropriation and practically finished Dam No. 2. It will be finished in July. That is, the dam will be finished and eight of the hydroelectric power machines will be prepared for use, and emplacements are there for eight more.

I am informed by the Secretary of War that that dam complete will cost about \$45,000,000. I want to say to the Congress that we have not wasted any money. I am not in favor of selling this power to a private corporation as a power proposition, because I think we have a Government duty to perform; but it has been stated to me by the responsible officers of a great power corporation that if we will eliminate fertilizer and eliminate powder and national defense, and lease to them for 50 years the power in this dam, they will maintain the dam in good condition and pay the Government 5 per cent a year on the total cost of the dam—5 per cent a year. Government taxed money is worth only 4 per cent; Government untaxed money, $3\frac{1}{2}$ per cent. Counting Government money as worth 4 per cent, the other 1 per cent between 5 and 4 would amortize this dam and pay back in 50 years every dollar that the Government has expended; so that this dam is a 100 per cent investment.

We have not wasted any money in the river. It can all be utilized, and it is fair to say to the Congress that it can. You can get your money back if that is all you are after. You do not have to go into a superpower proposition to get that back. You can dispose of this dam itself for 50 years. You could dispose of it for eternity if you wanted to and divorce it from any national defense. You do not have to go into a superpower system to get rid of this dam if all you want is to get your money back. You can sell it as it stands; and not only did I have that offer, but the Secretary of War told me that he had had an offer of $5\frac{1}{2}$ per cent on the cost of the dam for the power. So that you have, as far as the dam is concerned, a live investment.

Now let me take just a few minutes to call to your attention why I do not agree with the substitute offered by the Senator from Nebraska [Mr. Norris].

I shall not discuss the Ford bill. The bill pending before the Senate is the Ford proposition. I want to say in passing that from the beginning I have been for the Ford bill. I think Mr. Ford made the greatest offer that was ever made by a private citizen to a government. In other words, he proposed at his own cost and with his own endeavor to supply us with 40,000 tons of fixed nitrogen every year, and to have it ready for the defense of the country, and it was not going to cost us a nickel. It was free of cost—an amount of nitrogen equal to 250,000 tons of Chilean nitrate. I regret that Mr. Ford has withdrawn that offer.

When this bill was reported to the Senate last June I asked the Senate to pause and give the Ford offer consideration before adjournment. They did not do so, and I voted against the adjournment. In the meantime, however, Henry Ford has withdrawn his offer. I am not critical of his action, because the Government of the United States invited him to make that offer, and he made it in good faith, and you kicked it around the Halls of Congress for two and a half years as if it were a dirty football on a common field—a man offering to provide you with a portion, at least, of your national defense! That is gone, however. He is out. He has withdrawn his offer, and it would only be occupying the time of the Senate unnecessarily to discuss it. I want, however, to discuss and call to your attention the proposal of the Committee on Agriculture and Forestry on the one side, and the substitute bill I have offered on the other side.

I shall not read the substitute offered by the Senator from Nebraska, because I think I can state its provisions correctly, and if I do not I hope the Senator will interrupt me and correct me. He provides for the completion of Dam No. 2. He provides for the establishing of great reservoir dams in the upper waters of the Tennessee River. In other words, he provides for the development of this hydroelectric power in the Tennessee River to the maximum. There is not any question about that. The Senator's bill is a good bill if what you want is only hydroelectric power. If that is what you want, then it is a far better bill than the one I have proposed, because I am only attending to what is taking place at Muscle Shoals and Dam No. 2. I hope some day the Congress may see its way clear to follow the Senator from Nebraska on the development of the Tennessee River. I should like to be able to do it now, but I do not want to load a bill with these proposals that I fear might endanger its passage.

Most of the pages of the bill provide in one way or another for the development of this great superpower project. The Senator from Nebraska very ably defended that proposal in

his speech to-day. He divides the subject into two parts. There are two parts to it. The question is whether you want to divide it or whether you want to combine it. There is the power proposition on the Tennessee River, which may be combined with the other water powers in the South and make a great proposition, or one dam on it may be confined to a particular use. The other proposition is the question of making nitrogen for powder in war and fertilizer in peace.

The Senator creates a Government corporation to operate this great superpower system, and he sets that off to one side. That is power. I do not mean to say that the other people can not borrow power from it or can not get it, but that is a corporation set on one side. Then he turns over to the Agricultural Department the proposition of making nitrogen for national defense and fertilizer in time of peace. He turns that over to a bureau of one of the departments here in Washington. If the Senator's bill passes, I am sure we will have a large increase of power down in our country, and I hope it will bring many of the cotton mills from New England down there. We should like to have them. We should like to see their spindles working on Alabama power. Here, however, is what the Senator says about making nitrogen:

The Secretary of Agriculture is hereby authorized to provide for the operation of one or both of said plants—

That is, nitrate plants 1 and 2 at Muscle Shoals—

through the fixed nitrogen research laboratory, or through such other means as he may deem advisable, and he is hereby authorized, if in his judgment better results can be obtained, to enter into a contract or contracts with private persons or corporations for the operation, either in whole or in part, of said nitrate plants, or other property or parts thereof and to likewise, through the instrumentalities aforesaid, provide for experimentation, study, and research in any other manner that he may deem advisable for the cheapening of the manufacture and sale of fertilizer or other products.

Then the Senator goes along in the same vein for a couple of pages on the theory of the possibility of developing nitrogen through an agricultural department or a research station.

We tried that once. When the \$20,000,000 was made available in the national defense act and we wanted to find out how we could make nitrogen for powder in war and fertilizer in peace, the President of the United States appointed one of the ablest commissions whose names I have ever read, judging from the titles they had. They were great chemists, and they were the heads of their professions in every line; and it seemed as if they were the men we wanted to carry out a practical thing and tell us how we could make nitrogen to defend us in time of war. The result, however, was that they did not do anything. Each man thought he would find a better method than anybody else ever found to make nitrogen out of the air and to make fertilizer, and they spent considerable money and 18 months of time in working out theories, and finally did nothing. Eventually President Wilson had to send for a practical man—as the Senator himself said to-day, the only practical man in America who knew how to make air nitrogen—and told him to go down there and build this plant in a year for national defense.

This bill of the Agricultural Committee, if it passes, is a bill to let experts, scientists, roam around this country for the next dozen or half dozen years, as long as you pay their bills, and no result will be accomplished. We do know that we have one plant down there. It is said to be the biggest of its kind in the world, but it is a small proposition as compared to the amount of nitrogen we need. We know it is there. We know it has the power, and it is a practical proposition to operate it. By the committee bill pending before the Senate you propose to divorce power from nitrogen, and you would turn the operation of a business proposition over to some theorists in a Government bureau, the very last place you can expect to get a business result that will be efficient.

Now I want to call attention to the substitute I have offered. There is a good deal in it, but I can explain it in a very few minutes.

The first paragraph dedicates all the property at Muscle Shoals to the national defense and to the production of fertilizer; it dedicates it to national defense in time of war and the production of fertilizer in time of peace.

The second paragraph provides that whenever in the national defense the United States shall require all or any part of the operating facilities or properties or renewals or additions hitherto described and enumerated in this act, then they may take it over on five days' notice. No matter whether a lessee has it or a Government corporation has it, on five days' notice

in time of war the Government can put its hand on it and take it back.

Mr. NORRIS. Mr. President, may I ask the Senator a question on that proposition?

Mr. UNDERWOOD. Certainly.

Mr. NORRIS. Suppose it shall be leased; the Senator does not provide at what figure it shall be taken back?

Mr. UNDERWOOD. No; I do not.

Mr. NORRIS. Even without that provision in his bill, would not the Government have the same right to take it anyway? They would have to pay, of course, whatever was proper, but they would have to do that under the Senator's bill.

Mr. UNDERWOOD. They would have the power to take it back by condemnation proceedings, but this provides for only five days' notice.

Mr. NORRIS. They could take it in one day if that provision were not in the measure. If there were nothing said in the bill about it, they would not have to wait five days.

Mr. UNDERWOOD. I do not think the Senator is correct, because the provisions for condemnation proceedings in force during the war have been repealed and they would have to be enacted again. This provides for taking the plant without condemnation proceedings. I take it for granted that if a man whose property is taken suffers any loss, the loss will be made good by the Government. I will explain in a moment that these provisions to which I am referring apply whether the plant is leased or whether it is operated by a Government corporation. I am coming to that in a moment. This bill would authorize the Government to take the property back at once and take any patents that may be found there and use them for national defense.

The third paragraph of the bill provides for the production of 40,000 tons of fixed nitrogen. It does not say it must be produced in plant No. 2. It does not say by what process it shall be produced. There is a live plant there now which can produce 40,000 tons, but if conditions changed, and a lessee or a Government corporation found it more advisable to adopt some other method, they could adopt another method than that used in plant No. 2, and make the nitrogen in the other way. The obligation in this paragraph is to make 40,000 tons of fixed nitrogen a year.

Mr. RALSTON. Mr. President, may I ask the Senator a question in that connection?

Mr. UNDERWOOD. I yield.

Mr. RALSTON. Is the Senator going on the theory that all the power which can be generated by this proposed plant will be required to make 40,000 tons of nitrogen?

Mr. UNDERWOOD. No; I do not think so. It may be used in other ways. I am coming to the question of the power, if the Senator will let me call attention to the fourth paragraph.

Mr. HARRISON. Before the Senator gets to that, I want to ask him a question in connection with the second paragraph. There seems to be a difference of opinion between the Senator from Nebraska and the Senator from Alabama as to whether or not, if the Government should take over the plant in case of war, the Government would pay the lessee something. I can understand why they need not pay anything, but I just wanted to get the idea of the Senator as to whether he intended the lessee would be paid in the event we take the plant over for war purposes?

Mr. UNDERWOOD. The question of the Senator from Mississippi and the question of the Senator from Nebraska are very natural questions. Of course, I am only fixing certain fundamental provisions in this first paragraph, which you might say is the charter of our legislation, and I provide in a later paragraph that the Secretary of War may make a lease, for not longer than 50 years, and on certain terms, within these provisions. Of course, when he and the lessee sit at the table it will be within their power to fix in the lease the terms on which the plant shall be taken back, except that it may be taken back on five days' notice.

There are a great many provisions which would go into a lease which are not mentioned in my bill. They would be in the determination of the Secretary of War and the lessee if he can find one. I take it if we knew the lessee was to be Mr. Ford we would know the terms on which he wanted to lease it. The Union Carbide people have been making proposals. If they should sit at the table of the Secretary of War, they might want certain terms in their lease that would not be objectionable to the Government. On the other hand, the Hooker-Atterbury people have a proposal here, and if they should sit at the Secretary's table they might want other terms in the lease. I am referring to the minor terms.

I am not trying in this bill to fix all of the terms, by any means, and I do not think it would be wise to attempt to do that, because the minor terms must be sufficiently liquid to meet the wishes of a lessee when he comes to deal with the Secretary of War. But I do fix certain fundamental terms within this measure which I think are essential, and the first is that these plants shall be dedicated to the defense of the Nation. The next is that we can take them back when we want them. The third is that they shall produce 40,000 tons of fixed nitrogen every year.

Mr. WADSWORTH. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from New York?

Mr. UNDERWOOD. I yield.

Mr. WADSWORTH. I assume the Senator from Alabama intends—and I put it in the form of an assumption—that the 40,000 tons of fixed nitrogen shall be produced each year whether or not it is produced at a loss?

Mr. UNDERWOOD. I do. I do not think there is any question about that. I hope it will not be produced at a loss, and I do not think it will. I am sure it will not be produced at a loss if we lease the plant, because the lessee will think he is not going to produce it at a loss.

Mr. WADSWORTH. Is it not fair to assume from the testimony we have had thus far that the nitrogen will be produced at a loss for some few years to come; and that that loss, if it is to be absorbed at all, must be absorbed by the profits from the water-power distribution?

Mr. UNDERWOOD. That may be. I do not think, though, that it is to be assumed that it is to be made at a loss. The cyanamide plants in Germany are not running at a loss. There is one plant running in Canada that is not being operated at a loss. I talked with the president of it within a week, and he says he is making a profit on it. That is not quite so large a plant as this, but they are the men who built this plant.

Mr. NORRIS. May I interrupt the Senator there?

Mr. UNDERWOOD. Certainly.

Mr. NORRIS. Did the Senator find out whether this man in Canada, who is running under the cyanamide process and not producing at a loss, was making fertilizer at a profit?

Mr. UNDERWOOD. He said he was selling part of the raw material for fertilizer and part of it was being purchased to produce sulphate of ammonia.

Mr. NORRIS. Of course, those people who are producing nitrogen at Syracuse, for instance, I assume are making money, but they are not making a profit through the manufacture of fertilizer.

Mr. WADSWORTH. It is fair to say they make a great many different things. There are many chemical by-products being produced there which are of immense importance.

Mr. BROOKHART. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Iowa?

Mr. UNDERWOOD. I yield.

Mr. BROOKHART. I would like to ask if the Senator's amendment contemplates the operation of a cyanamide plant. Does it require that that plant shall be operated?

Mr. UNDERWOOD. No; my amendment provides that if a lease shall be made, or if a Government corporation shall run this plant, they must produce 40,000 tons of fixed nitrogen a year.

Mr. BROOKHART. It is indefinite as to the process?

Mr. UNDERWOOD. Absolutely. Why should we tie their hands?

Mr. BROOKHART. There is no difference between that and the other bill.

Mr. UNDERWOOD. The other bill turns this proposition over to a research bureau of the Government of the United States here in Washington to experiment with it.

Mr. BROOKHART. It is the Agricultural Department, is it not?

Mr. UNDERWOOD. It is a research station of the Agricultural Department. There is nothing practical in it. It does not produce any fertilizer.

Here is a mandate. I am in favor of a mandate. If the Senate of the United States is not in favor of a mandate for national defense and for the production of fertilizer, of course, it ought to vote against my proposal.

Mr. NORRIS. Mr. President, may I ask the Senator, while he is giving his mandate, why does he not carry it clearly through? The Senator proposes a mandate requiring them to produce 40,000 tons of nitrogen a year. Why does he not carry it through and compel them to produce 40,000 tons of nitrogen a year, say, at a cent a pound, or something of that

kind? If he can perform a miracle by a mandate, why not make a good one while he is at it?

Mr. UNDERWOOD. I know now the theory of my friend's bill. I had not discovered it before. I see on what theory it is written.

Mr. NORRIS. There is no mandate of that kind in it.

Mr. UNDERWOOD. The Senator's bill is a theoretical bill, but I am trying to write a practical one. I want these lessees to make money on this proposition if they can, a reasonable amount of money—there is a limitation on it—because I believe if they can take it over and make money on it, a number of nitrate plants will be developed in America, and ultimately we will have an adequate amount of nitrogen for national defense and an adequate amount of nitrogen for fertilization. I do not want to destroy their opportunity. I know the Senator from New York looked surprised when I said that here is a Government plant, and that whether they can make money on it or not, I would force them to make 40,000 tons of nitrogen a year. I was not looking in that direction and I do not know whether the Senator was in his seat when I was discussing the question of national defense, but when the Senator brings in a supply bill to buy some new land for a camp or a maneuvering ground he does not stop to question whether the Government of the United States will ever get any return on the money. He knows it will lose the money. He does not expect any return when we appropriate money here every year and send it out to provide for drilling troops for national defense. He knows the money will be gone, but we will have a return in the defense of the Nation. I think it is idle to say that if nitrogen is needed for national defense, if the supply from Chile were cut off, we should not produce it at a loss, if necessary, rather than not have it.

Mr. WADSWORTH. Mr. President, I agree thoroughly with the observation the Senator has just made.

Mr. UNDERWOOD. I am sure the Senator agrees with me about that.

Mr. WADSWORTH. I asked my question in view not only of the mandate, so called, contained in section 3, but of the supplementary mandate contained in section 4, to the effect that when not required by the national defense—and I assume that means in peace times—this same nitrogen shall be used for the manufacture of commercial fertilizer.

Mr. UNDERWOOD. I will say to my friend very candidly—

Mr. WADSWORTH. Apparently, the Senator's reply is that it shall be used in the manufacture of commercial fertilizer to the extent of 40,000 tons a year, whether it is used at a loss or not.

Mr. UNDERWOOD. I had not gotten to the next paragraph, but I will come to it now. I will be perfectly candid with the Senator and the Senate. As I said, whichever angle we take of the bill, the lessee or the Government is required to make, after the fourth year, 40,000 tons a year. I step them up, beginning with 10,000 tons the first year, 20,000 tons the second year, 30,000 tons the third year, and 40,000 tons thereafter every year. Of course, if it is the lessee, it is none of our business whether he loses or not. If he makes the contract, that is his business. If it is the Government, then, are we going to refuse to have adequate national defense because it will cost a few dollars? The difference between what we can sell it for, even if we lost something on it, and what it has cost us would not equal the cost of maintenance of a battleship. Of course, if it is a lessee that does it, we have nothing to do with it. He has to make the contract to make 40,000 tons of nitrogen, and then under paragraph 4 he has to contract to convert that nitrogen into such fertilizer as will consume that much nitrogen.

Mr. WADSWORTH. Does the Senator believe we would ever get a lessee under those circumstances?

Mr. UNDERWOOD. Yes; I think so. We had one. If we had accepted his proposition last June we would have had the richest man in the United States agreeing to do that very thing.

Mr. WADSWORTH. But he did not promise to make 40,000 tons of nitrogen.

Mr. UNDERWOOD. My friend is mistaken. I know he is usually very accurate, but he is mistaken. I will tell him why he is mistaken. Paragraphs 3 and 4 of the bill are practically the Ford offer. I took the Ford offer and wrote into the bill the provision in reference to making nitrogen. Paragraph 4 of the bill, providing for the manufacture of fertilizer, is the Ford offer practically word for word, except that Ford's proposed contract said he had to make the 40,000 tons of fertilizer the first year, and I propose to give the lessee

or the Government four years to build up to that amount. So we would have had the name of the richest man in the world signed to that contract, but the Government did not drop the lid and keep him in the coop whilst they had the chance.

Mr. WADSWORTH. I am no longer a member of the Committee on Agriculture and Forestry, but I have not yet found a member of that committee who could find in Mr. Ford's offer the guarantee of 40,000 tons of production annually.

Mr. UNDERWOOD. The Senator challenges me on this point. The Senator told me a moment ago that I had put into the bill a guarantee of 40,000 tons of fertilizer.

Mr. WADSWORTH. I see it in the bill, but I never saw it in the Ford offer.

Mr. UNDERWOOD. If the Senator will take section 15 of the Ford offer and compare it with section 4 of my bill he will find them practically identical. There is no question about that.

If the lessee agrees to make the 40,000 tons of fertilizer, it is off our hands and we have no complaint to make about it. It is his business whether he loses money or not. But suppose the other section of the bill becomes the law and the Government corporation takes it over and the Government has to do it through that corporation. Let us look at it as a practical proposition. Everybody knows that I belong to the old-fashioned school of democracy and that I do not believe in Government ownership in the general acceptance of the term. But, of course, we all believe in Government ownership in certain national-defense lines. We believe in the Government owning the Navy. We believe in the Government owning the forts for the Army. We even go so far as to believe in the Government making powder—not all of it—but we pass appropriation bills every year for certain powder plants that we hold for national defense, and on some of them we do not make money. If this proposition is not made from the viewpoint of the Nation's defense and we do not have to make 40,000 tons to have something like an adequate national defense; if we do not agree to it, but feel that we had better just take our chances and scrap the plant and let it lie idle and become obsolescent as time goes by, then we ought not to vote for it; but if we agree that we ought to have 40,000 tons of fixed nitrogen for the national defense, I ask if we ought not to get it as cheaply as we can? Should we throw it in the river at the end of every year, or should we convert it into fertilizer and sell it at the best price we can get for it as a Government proposition?

After the artillery horses get lame we do not take them out and kill them. We save as much as we can. We sell the horses to somebody else. We had better sell this fertilizer in that way. I do not think for a minute that the Government is going to fail to make fertilizer at a profit if it has to come to it. But if it makes a loss it will not be as big a loss as if we poured that fixed nitrogen into the river when we had to have fixed nitrogen for national defense. It is merely a business proposition and the only trouble about it is that unfortunately we happen to be stepping on some business men's toes and they do not like it. I am not criticizing them for not liking it. I probably would not like it either, but nevertheless they have not functioned in the way that gives us national defense and the Government itself has to do it.

As I said, the fertilizer section of my bill is identical with the Ford proposal. Then I provide in the bill that the Secretary of War within the terms of the contract can make a lease to a private individual of these properties at a rental of not less than 4 per cent on the cost of Dam No. 2. I said a while ago that we could lease the dam for the production of fertilizer and powder at 5 per cent, and I concede that I am giving the Secretary of War the right to sell the power at 1 per cent cheaper than we probably could sell it for. I do not believe in subsidizing people, nor do I believe in a great deal of the legislation that is proposed that is going to advance agriculture, because I do not think it is practical. But I know that we fix a high tariff wall to help business, we enact a great deal of legislation to help the great business interests of the country, and I am not averse—in fact, if it is incident to national defense I am in favor of trying to build up a system of fertilization in this country that will enrich the land, aid the farmer, and make more food for the toiling masses of the American people. If we were going to make a gift it would be one thing, but when we can do that in connection with and as a necessity for national defense, it is another thing. I provide then that he must make a lease and the minor terms of the lease left to him and the lessee to arrange and agree upon.

But if the Secretary can not make the lease by the 1st day of July next, then I provide for the organization of the

Government corporation, every share of the stock to be in the name of the President of the United States. With that stock the President will elect five directors.

Those five directors will run the corporation like we run any private corporation, like the United States Steel Corporation or the Potomac Electric Power Co. is run. The President of the United States merely elects or selects five directors, and then we have a business corporation organized. There are a great many terms in the section which involve merely the powers that are necessary for the corporation to do business, but it does provide that if the corporation is organized it must comply with the first four sections of the act. The property must be maintained for national defense, they must make 40,000 tons of fixed nitrogen a year, and they must produce the fertilizer that will be commensurate with 40,000 tons of fixed nitrogen.

Mr. HARRELD. Mr. President, will the Senator yield?

Mr. UNDERWOOD. In just a moment I will yield. Forty thousand tons of fixed nitrogen is equal to 250,000 tons of Chilean saltpeter, and 250,000 tons of Chilean saltpeter would be equal to something over 2,000,000 tons of ordinary 2-8-2 fertilizer. That is the comparison. So that the farmer would get some fertilizer out of the proposition. I now yield to the Senator from Oklahoma.

Mr. HARRELD. Do I understand that the Senator's bill limits to 40,000 tons the amount of nitrate that must be furnished to the Government?

Mr. UNDERWOOD. Oh, no.

Mr. HARRELD. That is the limit the contractors must furnish to the Government, is it not?

Mr. UNDERWOOD. Not at all. It is just the other way. It is the minimum that they must make. It is not furnished to the Government. They must have their plant prepared so that if the Government needs it in time of war it can get 40,000 tons of nitrogen. The lessee can go to the sky. There is no limitation on what he can produce, but he must produce this amount.

Mr. HARRELD. In other words, the Government can not call on him to deliver to it in times of peace more than 40,000 tons?

Mr. UNDERWOOD. No; because that is the capacity of the plant.

Mr. HARRELD. We had experts before the Committee on Agriculture and Forestry who made calculations and testified that 40,000 tons of nitrate would not make fertilizer enough to supply one-half the State of Alabama. Where does the farmer come in on a proposition of that kind?

Mr. UNDERWOOD. I believe the Senator just entered the Chamber.

Mr. HARRELD. No; I did not. I have been here for some time.

Mr. UNDERWOOD. If he had been here some time ago, he would have heard me discuss that question, but I am glad to tell him. I said in the beginning that this was not an adequate supply, but that 40,000 tons is the capacity of the plant. If the lessee can make it profitably, I have no doubt he will increase that amount, but if he makes the lease he is required to make that much. That 40,000 tons of nitrogen, converted into 2-8-2 fertilizer, will equal 2,000,000 tons of fertilizer as ordinarily sold to the farmer, and that is considerably more than the people of Alabama use each year.

Mr. HOWELL. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Alabama yield to the Senator from Nebraska?

Mr. UNDERWOOD. I yield.

Mr. HOWELL. Is there any objection to cutting out the leasing feature from the Senator's proposal and allowing the Government to perform the service?

Mr. UNDERWOOD. There would not be any objection so far as some people are concerned, but I have an objection. I will say to my friend from Nebraska that my status is very well fixed. I may say that I was one of the strong advocates, if not the leader, in the fight that passed a Government operation bill through the Senate four years ago. It was a bill prepared by the Government and introduced by my friend from New York, and he did not push the bill, having changed his mind about it, but I did, and with the help of others like the Senator from Nebraska [Mr. Norris], or with his lead, whichever it was, we passed it, though it died in the House. Then the Government took the position that they did not want Government operation. They wanted private operation and wanted the leasing. They called Mr. Ford in and he made a bid. I heartily favored the Ford proposal. I regret that it is not here now, because I think it is the best proposal that has ever been made to the Government. However, it is not here.

The Senator can see that I am not opposed to the Government operating a plant which is necessary for defense in time of war. I am not a Government-ownership man in the sense that I would vote for Government ownership of railroads, but for a war endeavor, of course, I think it is within the power of the Government, and, if it can not be done otherwise, it is the duty of the Government to exercise that power. It is a war power.

However, I recognize that it always costs the Government more to operate than it costs a private individual; the Government's losses are usually greater. So if we can get a lessee that will guarantee our national defense and the product can be converted into fertilizer to the extent of the ability of that plant, I prefer that a private lessee shall take that burden rather than to put it on a Government corporation. I provide in my substitute that, if we can not get a private lessee who is willing to take the burden, after the 1st of July we shall have a capable organized corporation to take up the burden and go ahead with it. Do I make myself clear to the Senator from Nebraska?

Mr. HOWELL. Yes, sir. As I understand, to produce 40,000 tons of fixed nitrogen will require in the neighborhood of 80,000 or 90,000 horsepower?

Mr. UNDERWOOD. I will tell the Senator where I got a part of my information. I obtained it from Col. Hugh Cook, who is the consulting engineer on this dam, who is the engineer who built the Keokuk Dam, and who is one of the ablest hydroelectrical engineers in America. He was in my office some days ago, and I asked him that question. He replied that it would require 500,000 kilowatt hours. I asked him to translate that into horsepower and he stated it would be equivalent to 100,000 horsepower a year.

Mr. HOWELL. In other words, to produce 40,000 tons a year would require all of the primary power capable of production by dam No. 2?

Mr. UNDERWOOD. I did not figure it in that way.

Mr. HOWELL. I am now speaking of primary power.

Mr. UNDERWOOD. Of course, that depends upon what one calls "primary power."

Mr. HOWELL. That is the power that is available the year around.

Mr. UNDERWOOD. I understand that. There was an estimate made by the engineers some time ago which was quoted in an article by Francis E. Frothingham in one of the Boston newspapers. It was an official estimate, and set forth that the dam will have what is called "firm" power of 70,000 horsepower available 98½ per cent of the time; 125,000 horsepower available 75 per cent of the time, or nine months in the year; 195,000 horsepower available seven months in the year, or 60 per cent. There is 60,000 or 80,000 horsepower available therefrom in steam plants. Ninety-eight and one-half per cent means that all the time, on the lowest flow of water that has occurred in 40 years, that dam would be running all the time except five days in the year. Practically speaking, however, it will run those five days anyway, because the computation is based on the lowest water during the 40-year period. So, for practical purposes, there is 125,000 horsepower there in the ordinary run of the year. To make up the difference to 200,000 horsepower would require the operation of the steam plants for three months in the year. So with the operation of the steam plant for three months in the year, with the power that is available there now—I mean with all that is in commission—we have 200,000 primary horsepower.

There is 125,000 horsepower that is there all the time, practically speaking, and the balance is there for nine months of the year. So with working the steam plants for three months—and this does not take in Dam No. 3—according to my estimate, we have 200,000 available primary horsepower; that is, horsepower that can be used every day in the year.

It will take 100,000 of that horsepower to operate the cyanamide plant No. 2 if that method is employed. On the other hand, if we are going to make fertilizer by the newest and best method we have got to put acid phosphate in as well. The phosphate rock was treated in the old days by pouring the acid on it and letting it disintegrate. In that way the phosphorus was obtained for fertilizer; but the new method—and it is in operation as a practical proposition now in Anniston, Ala.—is to grind up the rock, put it through an electrical furnace, and by eliminating the refuse a very high grade of phosphorus is obtained. I forget its chemical name, but the phosphorous compound is very high. Then it is mixed in the fertilizer. If it is proposed to use that process also in the manufacture of fertilizer—and I presume it will be—there will be consumed a great deal more of the power. So I do not think there will be so much surplus power if present methods be

applied. The last word in making the phosphorous element of the fertilizer is an electrical furnace, and most of the power will be consumed if that process shall be employed.

I provide in my substitute that if there be any surplus power either the lessee or the Government may sell it, and I also provide that they shall sell it subject to the laws, rules, and regulations of the State in which it may be used.

I do not know how other Senators may feel; some prefer Government regulation; but I think the people of the State of Alabama through their legislature are better capable of regulating the way they want their power plants run and the prices at which they want power sold than is the Congress of the United States.

Mr. HOWELL. This is the thought that came to my mind: If we lease this property, then it puts a period to the further development of water power on that watershed to transform secondary power into primary power, because if the Government—and I assume that the Government alone would do so—should undertake the development of the storage reservoirs it would do it at its own expense. The lessees of this dam then would enjoy the advantage of having their secondary power transformed into primary power, and there is no provision made that they shall pay any part of such expense.

Mr. UNDERWOOD. The Senator is right if he does not go any further than that. Of course, as I have said, my bill does not provide all the terms which the Secretary of War may impose in the lease. The Secretary of War may put in the lease, if he wants to, a provision that for the storage reservoirs so built by the Government the lessee should pay for the additional power or pay so much of a contribution, or the Secretary may neglect to include such terms. But the question of the building of storage dams is so remote that I did not want to involve in a direct question of national defense and fertilizer production that is before us here something that may not occur in 50 years on the upper Tennessee River. I have no objection to what the Senator says; his idea is an excellent one; but I did not want to encumber the bill with it, inasmuch as the Secretary of War can look after the details himself; and I assume he will do so.

Mr. HOWELL. Will the Senator pardon me if I call his attention to another matter?

Mr. UNDERWOOD. Certainly.

Mr. HOWELL. I notice that the Senator's substitute provides for a 4 per cent return on the cost of Dam No. 2. As I understand, that would be 4 per cent of about \$45,000,000?

Mr. UNDERWOOD. That is right.

Mr. HOWELL. But it involves all of that property, which has cost something over \$100,000,000.

Mr. UNDERWOOD. Yes; that is true. It is a pretty cheap rental for the individual who wants to go into the fertilizer business.

Mr. HOWELL. Yes. Furthermore, a part of that property is highly depreciable property.

Mr. UNDERWOOD. The contract, though, provides for replacement.

Mr. HOWELL. It provides for maintenance, but not for replacement.

Mr. UNDERWOOD. Yes; for maintenance; that is what I meant.

Mr. HOWELL. The word "replace" is not used. Of course, there can be a deferred maintenance that takes a very large amount in a great plant. So we will say when the end of the 50 years comes the lessee might turn this plant back to the Government, having paid 4 per cent, with no fund for depreciation accumulated. As a consequence, we would have a shell, and all we would have gotten would be 4 per cent.

Mr. UNDERWOOD. The Senator is right about that unless the Secretary of War wishes to raise the price, because the bill provides that the rate shall be not less than 4 per cent. Of course, if the Secretary of War wanted to charge 5 per cent, or if he wanted to charge a rental on the other property, he could do so; but he must get at least 4 per cent. I fix that as the minimum, as the Senator understands.

Mr. HOWELL. Would it not be a good idea to incorporate a provision that, in addition to the 4 per cent, there should be accumulated for the purpose of replacements a depreciation fund that should be ample to cover the Government's interest, because there will be electrical and other machinery there; and then there will be depreciation in the case of the dam, irrespective of all of the improvements?

Mr. UNDERWOOD. That will not amount to much.

Mr. HOWELL. That will not be so much, but there will be some depreciation.

Mr. UNDERWOOD. I will say to the Senator that some hold to the theory that that ought to be done. Probably, if we

were dealing as two business men, we would require it. I deliberately have not required it, and I will tell the Senator why. Of course, I recognize the factor of depreciation. The bill provides for maintenance. If the work shall be done by a Government corporation it will not make any difference, because the profits will come back into the Government Treasury. So I will merely discuss it from the standpoint of leasing, for it does not make any difference if in the case of the Government it takes money out of one pocket and puts it in another. But assuming that we lease it, I have provided in the bill for maintenance, but I have not provided for replacement. Every bit of that property will have to be replaced within 50 years; it can not last 50 years.

Mr. HOWELL. No; it may be replaced twice within that period; but the last replacement might come at such a time and they might so arrange it that it would not be made until the property was turned back.

Mr. UNDERWOOD. Certainly; but let us consider the question for a moment. It has certainly got to be replaced once. Now, the lessee is under a contract to provide a certain amount of nitrogen irrespective of the property. He does not have to provide it from any one plant, but he has got to do it from that property; and if he can not do it from existing plants he has got to build another plant in order to do it. In any event, he has got to produce a definite quantity of fertilizer, regardless of the plant. Before the 50 years has elapsed he will have to replace it anyhow.

If the Government had it, we would have to pay the bill for replacement, but as the lessee has it he has to pay the bill for replacement. It will wear out. That is not true of the dam. I think the cost of maintenance of the dam in 50 years will be very little, hardly anything.

There is another proposition, however. I am not trying to make the use of this property in time of peace any more expensive than I have to. I really want to provide for the manufacture of cheap fertilizer. I do not think we ought to give this property to the farmers for the purpose of making fertilizer, but I think we should be as reasonable as possible about it. Every burden that I write into this bill about replacement or raising rentals, if there is a lessee, has to be reflected back into the cost, because this bill provides that the lessee may make a profit of 8 per cent; and we want him to do so, because if he can make a profit of 8 per cent somebody else may go into it.

Mr. HOWELL. Does the 8 per cent profit on the fertilizer include whatever profit he shall make from the power that he sells?

Mr. UNDERWOOD. Oh, no.

Mr. HOWELL. Or is he going to have that profit in addition?

Mr. UNDERWOOD. It means his net profit. The terms that I use here are just what were in the Ford offer. It is exactly the same thing.

Mr. HOWELL. I mean is it net profit upon the fertilizer, or in figuring the net profit do they take in the profit from the power that is sold?

Mr. UNDERWOOD. I do not understand that at all. It says the net profit on the fertilizer. Of course, if Senators think I am providing for having this lease granted too cheaply and that we ought to put more burdens on the man who is going to make this fertilizer, then they ought to offer amendments to that effect. I admit that instead of trying to put the burden on the lessee, as he is limited to 8 per cent profit on his production of fertilizer, I prefer to make it reasonably cheap for him to make the fertilizer to serve a great field of replenishment of soil depletion.

I thank Senators very much for their attention to what I have said.

Mr. McKELLAR. Mr. President, before the Senator closes I want to ask him a question. I was out of the Chamber just a few moments ago, and perhaps the Senator has already explained the matter. How much of this power would be required to manufacture the 40,000 tons of fixed nitrogen?

Mr. UNDERWOOD. While the Senator was out I said that I had asked Colonel Cooper, the consulting engineer, and he said 500,000 kilowatt hours. I asked him to translate that into horsepower, and he said about 100,000 horsepower.

Mr. McKELLAR. That is about the extent of the primary power, is it not?

Mr. UNDERWOOD. I think the primary power will be made practically 200,000 horsepower by supplementing it for three months in the year with a steam plant. It is not what would be called primary power, strictly speaking, but it results in the same thing.

Mr. McKELLAR. The present capacity of the steam plant is about 90,000 horsepower, as I understand.

Mr. UNDERWOOD. I do not think it is quite that much, but I think 98½ per cent of the time the primary power runs up to 125,000 horsepower; but, of course, if they are going to make fertilizer by the last method, and manufacture the phosphorus by an electrical process, it is going to take a good deal more; so there is not very much surplus power there, anyhow.

I have explained to the Senate now what I think is the distinction between these bills. The bill of the Senator from Nebraska is a power bill. Of course it relates to nitrogen and defense and fertilizer, but it is an experimental proposition. The substitute that I have proposed here is to lease it under the binding terms that were in the Ford offer as to nitrogen and fertilizer if we can get a lessee; and if we can not do it by the 1st of July, it provides for the creation of a Government corporation, the President to select five directors, and for the Government corporation to run the plant under the terms of the Ford offer. That is the proposal and the distinction between the two bills.

I thank the Senate.

REPORT OF THE CIVIL SERVICE COMMISSION

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read and referred to the Committee on Civil Service:

To the Congress of the United States:

As required by the act of Congress to regulate and improve the civil service of the United States, approved January 16, 1883, I transmit herewith the Forty-first Annual Report of the United States Civil Service Commission for the fiscal year ended June 30, 1924.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 4, 1924.

REPORT OF AMERICAN BATTLE MONUMENTS COMMISSION

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read and referred to the Committee on Military Affairs:

To the Congress of the United States:

I transmit herewith, for the information of the Congress, the annual report of the American Battle Monuments Commission for the fiscal year ended June 30, 1924.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 4, 1924.

REPORT OF THE COUNCIL OF NATIONAL DEFENSE (S. DOC. NO. 170)

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, referred to the Committee on Military Affairs, and, with the accompanying paper, ordered to be printed:

To the Congress of the United States:

In compliance with paragraph 5, section 2, of the Army appropriation act, approved August 29, 1916, I transmit herewith the Eighth Annual Report of the Council of National Defense for the fiscal year ended June 30, 1924.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 4, 1924.

FUNDING OF THE LITHUANIAN DEBT (S. DOC. NO. 168)

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, referred to the Committee on Finance, and, with the accompanying papers, ordered to be printed:

To the Congress of the United States:

I am submitting herewith for your consideration a copy of the report of the World War Foreign Debt Commission, dated September 22, 1924, together with a copy of the agreement referred to therein, providing for the settlement of the indebtedness of the Government of the Republic of Lithuania to the Government of the United States of America. The agreement was executed on September 22, 1924, and was approved by me on that day, subject to the approval of Congress pursuant to authority conferred by act of Congress approved February 9, 1922, as amended by act of Congress approved February 28, 1923.

I recommend the approval of this agreement.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 4, 1924.

FUNDING OF THE POLISH DEBT (S. DOC. NO. 169)

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, referred to the Committee on Finance, and, with the accompanying papers, ordered to be printed:

To the Congress of the United States:

I am submitting herewith for your consideration a copy of the report of the World War Foreign Debt Commission dated

November 14, 1924, together with a copy of the agreement referred to therein, providing for the settlement of the indebtedness of the Government of the Republic of Poland to the Government of the United States of America. The agreement was executed on November 14, 1924, and was approved by me on that day, subject to the approval of Congress pursuant to authority conferred by act of Congress approved February 9, 1922, as amended by act of Congress approved February 28, 1923.

I recommend the approval of this agreement.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 4, 1924.

ORGANIZATION OF THE CUSTOMS SERVICE (S. DOC. NO. 167)

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, referred to the Committee on Finance, and ordered to be printed:

To the Congress of the United States:

The sundry civil act approved August 1, 1914, contains the following provisions, viz:

The President is authorized from time to time, as the exigencies of the service may require, to rearrange, by consolidation or otherwise, the several customs collection districts and to discontinue ports of entry by abolishing the same or establishing others in their stead: *Provided*, That the whole number of customs collection districts, ports of entry, or either of them, shall at no time be made to exceed those now established and authorized except as the same may hereafter be provided by law: *Provided further*, That hereafter, the collector of customs of each customs collection district shall be officially designated by the number of the district for which he is appointed and not by the name of the port where the headquarters are situated and the President is authorized from time to time to change the location of the headquarters in any customs collection district as the needs of the service may require: *And provided further*, That the President shall, at the beginning of each regular session, submit to Congress a statement of all acts, if any, done hereunder and the reasons therefor.

Pursuant to the requirements of the third proviso to the said provision, I have to state that the following is the only change in the organization of the customs service made by Executive order since the last report:

By Executive order dated October 28, 1924, Empire, Oreg., was abolished as a port of entry in customs-collection district No. 29 (Oregon) and Marshfield, Oreg., was created a port of entry in the said customs-collection district, with headquarters at Portland, Oreg., effective November 15, 1924.

The above change was dictated by considerations of economy and efficiency in the administration of customs and other statutes with the enforcement of which the customs service is charged, as well as the necessities and convenience of commerce generally.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 4, 1924.

CLAIMS OF THE COWLITZ TRIBE OF INDIANS

The PRESIDENT pro tempore. The Chair lays before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 71) authorizing the Cowlitz Tribe of Indians, residing in the State of Washington, to submit claims to the Court of Claims and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. HARRELD. I move that the Senate insist on its amendments and agree to the conference asked by the House and that the Chair appoint the conferees on the part of the Senate.

The PRESIDENT pro tempore. It is understood that this is done by unanimous consent. Is there objection? The Chair hears none. The question is upon agreeing to the motion of the Senator from Oklahoma.

The motion was agreed to, and the President pro tempore appointed Mr. HARRELD, Mr. CURTIS, and Mr. KENDRICK conferees on the part of the Senate.

PROPOSED INVESTIGATION OF NAVAL ESTABLISHMENT

Mr. JONES of New Mexico. At the request of the Senator from Utah [Mr. KING] I offer a resolution which I ask to have printed and lie on the table.

The PRESIDENT pro tempore. If there be no objection, it is so ordered.

The resolution (S. Res. 272) was ordered to lie on the table, as follows:

Whereas Congress in the last 10 years has appropriated and there has been expended more than \$150,000,000 for the construction of submarines for the Naval Establishment, and there have been delivered within that time 124 submarines of various types, none of which have

proven satisfactory or effective for the purposes for which they were projected and for which such expenditures were authorized; and

Whereas said submarines, with about 20 exceptions, were constructed under contract by the Lake Submarine Co., of Bridgeport, and the Submarine Boat Co., of New London, Conn., after designs made by said corporations and according to patents claimed to be owned by them, as a result of which said corporations have taken many million dollars of profits and have failed to deliver submarines which meet the requirements of the Government or are effective or serviceable as a part of the Naval Establishment; and

Whereas the Navy Department has projects for the construction of 22 cruisers and other craft which will require 220,000 tons of steel and has in contemplation further projects for the construction of 100,000 tons of airplane carriers to bring the naval fleet up to the standard allowed by the Washington treaty for the limitation of naval armaments; and

Whereas the estimated cost of said cruisers is \$1,000 per ton, the cost of armor plate is \$525 per ton, and the Navy Department has recently sold more than 300,000 tons of steel at the mere nominal price of about \$5 per ton, which material would have been adequate for the construction of the new cruiser fleet and four modern airplane carriers to complete our quota under said treaty, which new construction is necessary to put the Naval Establishment upon a proper footing with respect to the other powers which are parties to the Washington treaty for the limitation of naval armament; and

Whereas the Government has a large investment in an armor-plate plant and in navy yards and their appurtenant docks, shipways, machine shops, furnaces, foundries, and forges maintained for the construction and repair of naval craft, and also maintains a highly skilled mechanical personnel and official organization to direct and operate such yards; and

Whereas it has been charged that the policy of the Navy Department with respect to naval construction, and particularly with respect to the use of navy yards and naval personnel for naval construction, has been affected by various corporate, foreign, and pacifist propaganda; and

Whereas the Government is not obtaining proper and adequate results from the expenditures of the money appropriated by Congress for the construction of naval craft and the extension of the Naval Establishment; and

Whereas it is claimed that there is a feeling of dissatisfaction and repressed uneasiness among the personnel of the Naval Establishment; and

Whereas it is necessary that the Naval Establishment be self-contained and independent, and not subject to extraneous interference or propaganda, and not dependent upon private corporations for the construction of new naval craft or the repair of existing naval craft as required for the proper maintenance of the Naval Establishment: Now therefore be it

Resolved, That the Naval Affairs Committee is authorized and directed to investigate the matters and things in the premises set forth and to report to the Senate their findings and recommendations as to the future use of navy yards and personnel in naval construction for the maintenance of the Naval Establishment of the United States.

Such committee as a whole or by subcommittee is authorized to hold hearings, to sit during the sessions or recesses of the Sixty-eighth Congress at such times and places, to employ such experts and accountants, and clerical and other stenographic assistants as it may deem advisable. The committee is further authorized to send for persons and papers; to require by subpoena or otherwise the attendance of witnesses, the production of books, papers, and documents; to administer oaths and to take testimony, as it may deem advisable. The cost of stenographic service to report such hearings shall not be in excess of 25 cents per hundred words. Subpoenas for witnesses shall be issued under the signature of the chairman of the committee or subcommittee thereof. Every person who, having been summoned as a witness by authority of said committee or any subcommittee thereof, willfully makes default or who, having appeared, refuses to answer any question pertinent to the investigation heretofore authorized shall be liable to the penalties provided by section 102 of the Revised Statutes of the United States.

RATIO OF NAVAL STRENGTH

Mr. McKELLAR. I ask unanimous consent to have printed in the RECORD, for the information of Senators and others, a statement by the Navy League of the United States with regard to the report of the Secretary of the Navy for 1924.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

The statement referred to is as follows:

STATEMENT BY THE NAVY LEAGUE OF THE UNITED STATES REGARDING THE REPORT OF THE SECRETARY OF THE NAVY FOR 1924

Perhaps the most constructive statement in the report of the Secretary of the Navy for 1924 is the following:

"Recommendations for the increase of the Navy and for appropriations to maintain the Navy at the full treaty ratio pro-

vided by the treaty for the limitation of naval armament, not only with reference to the type of vessels covered by that treaty but with reference to other types of vessels not so limited, are made."

Before discussing here the principal steps necessary to bring the Navy up to the treaty ratio in every essential respect, the matter of maintaining the present fleet in fit condition seems to call for immediate attention.

The report of the Secretary of the Navy for 1922 said:

"The money for repairs to ships has been very carefully handled and drastic restrictions have been placed upon alterations. Repairs to ships have been limited to those necessary to military efficiency and the health and safety of the personnel. There is, however, a deferred maintenance in the ships which must be cleared up at a future date."

Now, two years later, the report of the Secretary of the Navy for 1924 says:

"Due to inadequacy of funds wherewith to meet all upkeep needs, the material condition of the fleet has not improved during the past year.

"The state of the material condition of the fleet is now not satisfactory.

"Although the available funds for the present fiscal year remain about the same as for last year, retrogression is apparent because the ships are older and the maintenance costs are increasing accordingly. Efficient operation is becoming impaired and casualties to machinery are frequent."

"The six older battleships must be modernized if the reliance on them as ships of the first line of battle is to continue and our ratio of naval strength is to be maintained."

This means that while the naval treaty allows the United States 18 battleships as the backbone of our first line of defense, only 12 of them might be considered as approximately fit for such service. But in point of fact there are only 5 battleships out of the 18 allowed the United States that are in fairly fit condition for real service. For 13, including the 6 cripples above mentioned, need to be modernized against torpedo and aerial attacks and to have their main guns elevated, while 6 of these should be changed from wasteful coal burners to oil burners.

The report of the Secretary of the Navy points out that a bill authorizing \$18,360,000 for such modernization (exclusive of gun elevation) passed the House and Senate last spring, but that a last-minute motion to reconsider the vote in the Senate held up final action. His report expresses the hope that this bill will be passed immediately, so that the long-delayed work of modernizing these ships can proceed forthwith.

When it is realized that 13 out of the 18 battleships allowed the United States are in a seriously unsafe and inefficient condition for real service for lack of a total of about \$18,000,000, it would hardly seem to be expecting too much of Congress to make this appropriation immediately available.

But the guns of these 13 American battleships are not sufficiently elevated to fire as far as do those of other powers. So the value of 13 out of our 18 battleships is open to serious question, even if "modernized," unless their guns are elevated. This would cost an additional \$6,500,000 and is a matter for which an appropriation should be made immediately—if it is the intention of the administration and of Congress to bring the American capital fleet up toward approximate equality to the British capital fleet and to five-thirds the strength of the Japanese capital fleet.

The report of the Chief of Naval Operations says:

"At the present time every ship in the Navy has a long list of outstanding (repair) work far greater than the financial naval resources permit of accomplishment."

As deterioration has been accumulating for years until the conditions above suggested have come about, it would hardly seem to be asking too much of Congress for sufficient maintenance funds to end "deferred maintenance" and the generally "unsatisfactory" material condition of the fleet as a whole and to put all naval vessels that are in active service in proper material condition to perform their duties without such casualties to machinery as have occurred of late years.

But it is not enough to stop the deterioration of our present fleet and to put all its present vessels that are in commission in really fit material condition for active service.

The report of the Secretary of the Navy recommends, in effect, that the Navy be increased and maintained "at the full treaty ratio provided by the treaty for the limitation of naval armament, not only with reference to the types of vessels covered by that treaty (capital ships and aircraft carriers), but with reference to other types of vessels not so limited . . ."

In short, if we are to live up to the spirit of the naval balance contemplated by the naval treaty, the United States Navy should be the equal of the British Navy and five-thirds as strong as the Japanese Navy in every essential respect.

CRUISERS

As the naval treaty limits the numbers and aggregate tonnages only of capital ships and of aircraft carriers, all powers that are party to the treaty may build and operate as many cruisers and submarines as they choose. As was to be expected, the limiting of capital ships made other classes of vessels more important than they had been, with the following results:

In 1916 the United States authorized 10 light cruisers and began building all of them before the Washington conference was convened in 1921. Nine of them are now in commission, the tenth is about to be commissioned, and together they aggregate 75,000 tons. The United States has no other modern light cruisers and has not authorized and made appropriations for any more since the conference.

The British Empire has 47 light cruisers, aggregating 223,530 tons that have been built since 1912. It is building eight more that aggregate 74,850 tons, five of these of 10,000 tons each having been authorized since the conference; and Australia has recently authorized the building of two more of 10,000 tons each. This will give the British Empire a modern light cruiser force of 57 vessels, aggregating 318,380 tons, of which 7, totalling 70,000 tons, have been authorized since the conference. It should be realized, however, that several of the smaller British light cruisers will soon be 15 years old and consequently obsolete. So it is fair to put the British light cruiser force at about 54 vessels that total a little more than 300,000 tons. It should be added, however, that further increases are immediately contemplated.

The Japanese Empire has 18 light cruisers, aggregating 91,440 tons, that have been built since 1912. Since the conference it has authorized and made appropriations for the building of 10 more that amount to 79,565 tons; and it had authorized a much greater tonnage of light cruisers the building of which has been postponed because of rehabilitation costs after the earthquake. But upon completion merely of the 10 cruisers now in hand the Japanese Empire will have a modern light cruiser force of 28 vessels, totalling 171,005 tons.

In short, the immediate prospect is that whereas the United States has only 10 modern light cruisers, totalling only 75,000 tons, the British Empire will have a force of about 54, aggregating over 300,000 tons, while the Japanese Empire will have a similar force of 28 vessels, amounting to 171,000 tons.

As the British will have an excess of over 225,000 tons of modern light cruisers over the United States, it follows that if the United States is to maintain the treaty ratio of equality with the British Empire we should forthwith build twenty-two 10,000-ton light cruisers. Evidently the proposal before Congress last spring to build merely eight such cruisers—which the Secretary of the Navy recommends be passed by the present session—would provide little more than one-third of the new cruiser tonnage necessary to equal the British in light-cruiser tonnage.

As the Japanese light cruisers amount to 171,000 tons, the ratio of five-thirds would call for 285,000 tons, and as that is an excess of 210,000 tons over the 75,000 tons of light cruisers that the United States has, it follows that if the United States is to maintain the treaty ratio of five-thirds the strength of the Japanese Empire in light-cruiser tonnage we should forthwith build twenty-one 10,000-ton light cruisers.

So whether we aim to maintain five-thirds the strength of the Japanese in light cruisers or to maintain equality with the British in this respect, we should have not less than 21 or 22 new light cruisers.

FOREIGN TRADE

At this point it may be well to say a few words about foreign trade, for not a few Americans seem to accept without reconsideration the British doctrine that the volume and extent of England's world-wide sea-borne trade with all parts of the world makes absolutely necessary the maintenance of a predominant British cruiser force wherewith to protect their sea-borne trade and far-flung lines of communication.

This British point of view naturally overlooks the fact that the United States maintains trade with every part of the world with which England trades and that, consequently, our trade is as extended and our lines of overseas communication are as world-wide and as far-flung as those that center in England. So if the length of England's lines of communication is what requires a cruiser fleet of about 300,000 tons for their defense it is difficult to see why America's equally extended lines of overseas trade should not be accorded an equal measure of cruiser protection.

But even if it is admitted that American overseas lines of trade are geographically as extended as England's, those who have the British point of view seem to think that the overseas trade of the United States is utterly inconsiderable compared with that of the British Isles.

In point of fact, between 85 and 90 per cent of the foreign trade of the United States is overseas trade. In 1920 it amounted to about \$13,500,000,000, of which about \$8,000,000,000 were American exports and was much greater than the total external trade of the British Isles has ever been. To be sure, in the world-wide slump of 1921 the total of American foreign trade fell considerably below \$8,000,000,000. But ever since it has been recovering until now it is virtually as great as

the total external trade of the British Isles, which amounts to less than \$10,000,000,000 a year; and our present rate of exports exceeds that of the British Isles.

If the extendedness and the volume of British trade requires the protection of about 300,000 tons of cruisers, it is difficult to see why American overseas trade should not be accorded a like measure of protection, as it is virtually as extended and of as great value as the trade of the British Isles and promises to become much more so.

While we are on this subject a word about the direction and trend of our oversea trade may not be out of place.

Twenty-five years ago nearly three-quarters of our oversea trade was with Europe and consisted mostly of exports of foodstuffs and raw materials for Europe's industrial machine, our imports from Europe amounting to only about a third of our exports to Europe and consisting largely of manufactured luxuries.

To-day our trans-Atlantic trade is only about half of our oversea trade, whereas our oversea trade with Latin America and our trans-Pacific trade are each about a quarter of our total; each is now about a third greater than was our trans-Atlantic trade of 25 years ago; to Latin America and Asia we sell most of our manufactured exports and import from them almost all the tropical products on which we are dependent; and to Latin America we sell about ten times as much per capita as we do across the Pacific, which suggests that our greatest future market is with the 900,000,000 people across the Pacific rather than with the 85,000,000 of Latin America.

And in turn this suggests that if the British need 300,000 tons of cruisers for the protection of their oversea trade, we need five-thirds the strength of the Japanese in cruisers for the protection of our trade—or twenty-one 10,000-ton cruisers in addition to the 10 light cruisers we now have.

SUBMARINES

Under present-day conditions of transoceanic strategy, the most important types of submarines to consider are those of over a thousand tons in size and of comparatively long radius and high speed. Of these the United States has three, aggregating 3,318 tons, that are out of commission because their engines were failures. In addition to these we are building four that have a total tonnage of about 8,500 tons, giving us a total of seven vessels that aggregate close to 12,000 tons. All of these were originally authorized long before the Washington Conference, although the initial appropriation for one was made only last spring.

The British Empire has eight such submarines completed that total 18,460 tons and is building one more of 1,480 tons, authorized since the conference, which makes a total of nine large vessels aggregating 17,940 tons or a volume about 6,000 tons greater than that of the large American submarines.

The Japanese Empire is said to have only one such submarine of 1,400 tons completed. But it is building, or has authorized and made appropriations for the building of at least 22 such submarines, aggregating 34,310 tons, since the Washington conference. Thus in the near future the Japanese Empire will have 23 large submarines totaling about 36,000 tons, all but one of which are postconference authorizations.

As five-thirds of 36,000 tons would be 60,000 tons and as the United States will have only about 12,000 tons of large submarines, it follows that if we are to maintain the treaty ratio in this very important respect, we should build forthwith about 48,000 tons more of large, high-speed, long-radius submarines in order to keep up with the pace the Japanese have set in this respect since the conference.

And it should be added that, while the above refers only to submarines of over 1,000 tons in size, a somewhat similar though much less critical situation exists with respect to submarines of between 700 and 1,000 tons in size.

NAVAL AIR FORCE, PERSONNEL AND BASES

The building of light cruisers and large submarines that the British Empire and the Japanese Empire have inaugurated since the Washington conference makes the commensurate development of American light cruisers and large submarines of the utmost importance—if we intend that our Navy shall be really the equal of the British Navy and five-thirds as strong as the Japanese Navy, rather than a third-rate navy. But it is almost as important that the completion of the quota of airplane carriers allowed the United States by the naval treaty be hastened and that our Navy's other aerial forces be developed to a much greater extent than has been possible with the meager appropriations Congress has allowed for these purposes.

As to personnel, space here makes it impossible to say more than that the enlisted personnel in the Japanese Navy has been increased by over 7,000 men during the past year. In order to maintain the treaty ratios in this respect the United States Navy should have 3,882 more officers and 23,093 more enlisted men, for during the last three years the Navy has been so underofficered and undermanned that proper maintenance and operation on a peace basis have been quite impossible. The Secretary of the Navy's recommendation that appointments to Annapolis be increased from three to five, with a view to correcting

ultimately the present dearth of officers, is a modest suggestion under the circumstances. But the most pressing need is for an increase in the enlisted personnel.

As to bases, here it can only be said that two years ago the Navy League pointed out that \$186,000,000 were required to develop our requirements ashore according to a comprehensively worked-out plan then earnestly recommended. Virtually nothing has since been done in this respect by Congress.

CONCLUSION

With such glaring deficiencies as have been pointed out, it is hardly necessary to add that the list could be extended almost indefinitely in lesser matters. But here it is desired to lay the emphasis on the fact that we should forthwith build 22 more light cruisers, aggregating 220,000 tons, and about 48,000 tons more of large submarines if we are to maintain our position and live up to the treaty ratios.

Since the conference the British have inaugurated the building of 70,000 tons of light cruisers and of one large submarine of 1,480 tons.

Since the conference the Japanese have inaugurated the building of very nearly 80,000 tons of light cruisers and of 22 large submarines amounting to over 34,000 tons.

Since the conference the United States in these respects has inaugurated only the initial appropriation for one submarine that was authorized in 1916.

These facts have destroyed the balance assumed for the treaty for the limitation of naval armaments. When agreement was reached at the Washington conference America accepted the assurance that the treaty ended absolutely competition in naval armament and also left the relative security of the great naval powers unimpaired.

The post-conference construction and programs of other powers must end our belief in one of these two bases of security. We may abstain from competition, but if we do our relative security necessarily remains impaired. We may restore our relative security but only by new construction.

The proper choice is stated in the quotation from the Secretary of the Navy's recommendation at the outset of this statement. The extent of construction necessary to restore our relative security is to be measured by the immediate building of 22 light cruisers aggregating 220,000 tons and large submarines amounting to 48,000 tons.

Then when we have at last evidently started to reestablish ourselves on the treaty ratio of equality with the British and five-thirds the strength of the Japanese, we might succeed in bringing about a further limitation of naval armament at an "auxiliary" conference.

NAVY LEAGUE OF THE UNITED STATES.
R. W. KELLEY, President.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After three minutes spent in executive session the doors were reopened.

RECESS

Mr. CURTIS. I move that the Senate take a recess until to-morrow at 12 o'clock noon.

The motion was agreed to; and (at 4 o'clock and 40 minutes p. m.) the Senate took a recess until to-morrow, Friday, December 5, 1924, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate December 4 (legislative day of December 3), 1924

GOVERNOR OF THE PANAMA CANAL

Col. Meriwether L. Walker, Corps of Engineers, United States Army, for appointment as Governor of the Panama Canal, provided for by the Panama Canal act, approved August 24, 1912, vice Col. Jay J. Morrow, Corps of Engineers, United States Army (retired).

PROMOTION IN THE NAVY

Medical Director Edward R. Stitt to be Surgeon General and Chief of the Bureau of Medicine and Surgery in the Department of the Navy, with the rank of rear admiral, for a term of four years from the 30th day of November, 1924.

COAST AND GEODETIC SURVEY

To be aids with relative rank of ensigns in the Navy

Carl Ingman Aslakson, of Minnesota.

Arthur Christian Zimmerman, of Minnesota.

To be junior hydrographic and geodetic engineers, with relative rank of lieutenant (junior grade) in the Navy

Jerry Hall Service, of Ohio.

Herschel East Brown, of Indiana.

George William Tatchell, of New York.

Kenneth Gleason Crosby, of Massachusetts.

CONFIRMATION

*Executive nomination confirmed by the Senate December 4
(legislative day of December 3), 1924*

SECRETARY OF AGRICULTURE

Howard M. Gore to be Secretary of Agriculture.

HOUSE OF REPRESENTATIVES

THURSDAY, December 4, 1924

The House met at 12 o'clock noon, and was called to order by the Speaker.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Most gracious God, amid all the conditions of our daily lives, give us increasing ability to hope, to believe, and to love the pure and the true. While we thank Thee for Thy manifold blessings, yet make us worthier to receive them. This day open our minds to Thy truth and our hearts to Thy love. Thy providence has directed the good fortunes of our country. Do Thou help us to ever honor it for its principles and ideals. May our best dreams for its present and future greatness be realized and let Thy saving health be known among all nations. In the name of Jesus. Amen.

The Journal of the proceedings of yesterday was read and approved.

ORDER OF BUSINESS

Mr. GARRETT of Tennessee. Mr. Speaker, I ask unanimous consent that the gentleman from Ohio [Mr. LONGWORTH] or I myself may have the floor for a minute. I want the attention of the gentleman from Ohio for half a minute, if I may have it.

The SPEAKER. The gentleman is recognized.

Mr. GARRETT of Tennessee. Mr. Speaker, to-morrow, I believe, is pension day under the general rules of the House. As I understand it, the pension committees have no business that they desire to bring to the attention of the House on to-morrow. But next Friday will be claims day, or Private Calendar day, as I now recall, under the general rules of the House. During this Congress claims have not come up in the regular order. Of course we have had several Private Calendar days, but they have always been to consider bills unobjected to. Now, there are a number of bills on the Private Calendar, reported from the Committee on Claims, and perhaps from other committees, which have been objected to, although the authors of them believe they are entitled to have the House act upon them. I would like to ask the gentleman from Ohio if he can give the House any idea now as to what the disposition will be next Friday toward letting the general rules prevail and having claims considered without any limitation on the consideration?

Mr. LONGWORTH. Mr. Speaker, I am glad the gentleman from Tennessee asked me that question, because I think that it is none too early now to arrive at some general understanding about what we shall do from now until the Christmas holidays. I feel that it is our duty under existing conditions to clear the decks, so far as possible, for the passage of the appropriation bills. I am informed by the chairman of the Committee on Appropriations that there are two bills now ready in addition to the bill we are considering to-day—the Agricultural bill and the Treasury Department bill; and the Post Office appropriation bill, I believe, is practically completed. At any rate I am very confident that the Committee on Appropriations will have bills ready for us to take up one after the other, and there will be no reason why we shall not be able to pass all the appropriation bills within a very reasonable time. Certainly it will not be the fault of the Committee on Appropriations if we do not.

At the same time I realize that there is other legislation in which many gentlemen are interested, and that there are certain days provided under the rules of the House for the consideration of that legislation. I, for instance, would favor, at least so far as I can now foresee, in advance, the proposition that the Committee on the District of Columbia shall have its day in court on the days provided under the rules. The same would be true as to the preservation of Calendar Wednesday, there being a number of very important bills on that calendar. The same, in my judgment, would be true as to the reservation of the Mondays on which motions to suspend the rules and unanimous consent shall be entertained. The same would be true in possibly lesser degree of those

days on which it is in order to consider claims. I understand that there are now a number of bills for claims which have been rather strongly contested, which could not be taken up under unanimous consent for the passage of bills to which no objection is made. And I will say specifically, answering the question of the gentleman from Tennessee [Mr. GARRETT], that I personally will be very glad, if it is the desire of the House, to preserve Friday; that is, a week from to-morrow, for the consideration of claims.

It might also be well to suggest that something might be agreed upon as to when the House desires to adjourn for the Christmas holidays. Personally I believe it will be unwise to have a recess of as much as two weeks; that is to say, a recess which would begin some days before Christmas and last until some days after New Years. We have barely got started, and if we should adjourn for two weeks at Christmas I do not think we would be doing quite our full duty with regard to the passage of the necessary legislation and the business of the country; and I propose—and I hope that the House will agree with me in this—I propose at the proper time to offer a resolution to adjourn on the 20th, which will be the Saturday before Christmas, and to reassemble on Monday after Christmas; that is the 29th. That will give gentlemen abundant opportunity to spend Christmas at their homes and come back, it is true, before New Year's, which I believe is rather unusual. But we could have an understanding that the House would adjourn over New Year's Day and observe that as a holiday, and that would give us nearly a full week additional for the transaction of business. It seems to me that under all the circumstances that would be the wise plan.

Mr. MOORE of Virginia. Mr. Speaker, may I make a suggestion to the gentleman from Ohio?

Mr. LONGWORTH. I yield to the gentleman.

Mr. MOORE of Virginia. The gentleman will remember that at the last session the Consent Calendar was taken up on several occasions at night. I know that the gentleman will recognize the importance of some consideration being given to that calendar. Will not the gentleman determine whether we may not begin the consideration of the Consent Calendar at night sessions at some reasonably early day, not perhaps before the holidays, but following the recess?

Mr. LONGWORTH. I will say to the gentleman that so far as I am concerned, I see no real reason why the first and third Mondays in each month should not be taken up in the consideration of bills on the Unanimous Consent Calendar and motions to suspend the rules.

Mr. MOORE of Virginia. Of course, if that is practicable—if the Consent Calendar can be sufficiently considered in that way, everybody, I suppose, will acquiesce; but we are all anxious, at least I am, to speed the Appropriations Committee in any way we can in completing its work and doing everything in that direction, and every other direction that is possible, to avoid an extra session. Perhaps that will make necessary night sessions.

Mr. LONGWORTH. I will say to the gentleman that possibly it would be wise to wait and cross that bridge when we come to it. But I can hardly see the use of frittering away the Mondays on which it is in order to suspend the rules and take up unanimous consents with the consideration of any legislation which everyone knows can not become a law at this session of Congress. That is my view of the situation. [Applause.]

Mr. McDUFFIE. Will the gentleman yield?

Mr. LONGWORTH. Yes.

Mr. McDUFFIE. As the gentleman knows, the Rivers and Harbors Committee has presented quite an extensive program in a bill involving a great many meritorious projects—not a great many, but 34; not so many as may have been carried in other bills. I would like to know the gentleman's attitude with reference to getting some early action on that legislation. I think the whole country is interested, and I am sure quite a number of gentlemen on that side of the aisle are interested and many on this side. And the gentleman will recall that during the closing hours of the last session of this Congress there was some suggestion that immediately, or as soon as possible, upon our return the leadership upon the Republican side would take up the question of carrying out the rivers and harbors program. I am wondering whether the gentleman has given it any serious consideration and how he feels about when we may expect some action on the bill.

Mr. LONGWORTH. Answering the gentleman's question, I will say that I personally am in favor of the passage of a rivers and harbors bill at this session. [Applause.] Of course, something would depend upon the form in which the bill was

brought into the House. I think I can say to the gentleman, though, that in my judgment a rivers and harbors bill will be brought up for the consideration of this House at an early date. But, as I say, I think our first duty is to clear the decks for the passage of the main supply bills. However, that ought not to interfere with the passage of other legislation which the country wants.

Mr. HUDDLESTON. Mr. Speaker, I ask unanimous consent that the gentleman from Ohio [Mr. LONGWORTH] may have two minutes more in which to answer a question I should like to propound to him.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. HUDDLESTON. The gentleman has expressed opposition to the frittering away of the time of the House on Unanimous Consent Mondays in considering a measure which can not possibly become a law. He obviously referred to the Howell-Barkley bill. The gentleman will remember that he caused the frittering away of the time of the House at the last session for a number of days by a persistent filibuster against that bill. If the gentleman wants to stop frittering away the time of the House will he not consider abandoning his filibuster and allow that measure to be considered on its merits and give the House a chance to say whether it should be passed or not? A clear majority was developed in favor of the bill when it was previously considered. It was only the gentleman's filibuster which prevented the measure from being considered and probably passed by the House. Will the gentleman answer whether he is going to continue his filibuster against that measure or whether he is going to let it be considered?

Mr. LONGWORTH. Mr. Speaker, if the gentleman is through asking his question, I will say, in the first place, that I deny I had anything to do with any filibuster against that bill. I do think that a bill of that importance should have had an opportunity of fair consideration by the committee which reported it. [Applause.]

Mr. HUDDLESTON. The gentleman sets his opinion against the will of the majority of the House, which said it might be brought before the House in a different manner.

Mr. LONGWORTH. Which it would have had it not been for the action largely led by the gentleman who has just addressed me.

Mr. BLANTON. Will the gentleman yield?

Mr. LONGWORTH. Yes.

Mr. BLANTON. Is it not the best judgment of the majority leader that the country wants Congress to pass the appropriation bills and go home? That is my opinion of what the country wants. [Applause.]

Mr. LONGWORTH. I think there is no question that the country wants us to pass the appropriation bills rather than that type of legislation which was repudiated by a tremendous majority in the last election. [Applause.]

Mr. HUDDLESTON. Does the gentleman think the country wants the majority to put itself in the attitude of wasting the time of Congress by filibustering against the consideration of bills? Is that what the gentleman wants us to believe—that the people did so express themselves?

Mr. MACLAFFERTY. Regular order, Mr. Speaker.

GREAT LAKES TO GULF WATERWAY

Mr. WILLIAM E. HULL. Mr. Speaker, I ask unanimous consent to extend my remarks in the Record by inserting a speech I recently made before 800 business men in my home town of Peoria, Ill., in support of H. R. 5475, a bill I introduced in the last session of Congress for the improvement of the Illinois River in order to make it the connecting link in the deep-waterway project from the Lakes to the Gulf.

President Coolidge, in his message to Congress delivered in this House yesterday, indorsed this Lakes-to-Gulf project, and I believe my speech on the subject will be of interest to the Members of the House.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks in the Record in the manner indicated. Is there objection?

There was no objection.

Mr. WILLIAM E. HULL. Mr. Speaker, under leave granted to extend my remarks I insert a speech delivered by myself at Peoria, Ill., which is as follows:

Mr. Chairman, ladies, and gentlemen, it is well for us to have great interest in deep-water navigation from the Great Lakes to the Gulf of Mexico. This can only come through large Federal appropriations. To secure such appropriations is always a difficult task.

We in the Central West have reached the point where it is unnecessary to argue that inland navigation to tide water will be of great advantage to all of those who ship products from the farm and the

factory. It is admitted that the Central West will always be at a great disadvantage unless the traffic from the Great Lakes by way of our inland rivers may reach the Gulf. The Federal Government will have to make large appropriations to bring this about. The amount of these appropriations depends entirely upon the cost of construction called for by various plans under consideration.

ABOUT LAKE FLOW

Every plan must be based upon an assumption, so far as the Illinois River is concerned, that there will be a permanent definite minimum flow of Lake Michigan water brought down the Illinois Valley.

The quantity of that water might be just enough to overcome losses by evaporation and through the operation of locks. If that minimum quantity is the basis for calculating costs, then there will have to be built, practically from Joliet to the mouth of the Illinois River, a series of dams that would hold the river into a series of large pools of practically still water. To construct such dams and locks, we are told by competent engineers, would cost many, many millions of dollars; therefore, it must be apparent that the Federal Government would not make the vast appropriations which would be required to establish these large stagnant pools. The smallest quantity of water that could be turned this way would have to be sufficient to maintain the first of these pools at a level with Lake Michigan and at the same time provide a south current.

All who discuss "waterways" speak of "volume" in the terms of cubic second-feet. It has been said that it might be possible to maintain these great pools with an assurance of 1,000 second-feet from Lake Michigan.

It is admitted that as the quantity from Lake Michigan is increased the cost of constructing dams and locks is greatly decreased.

OTHER THINGS TO CONSIDER

It is thought advisable to maintain at the low-water stages of the improved Illinois River a navigable depth of at least 9 feet, with a channel from two to three hundred feet wide.

The State of Illinois is constructing its section to afford a possible depth of 14 feet.

A 9-foot depth can be maintained, as above illustrated, with the minimum flow referred to if the Federal Government can be induced to make the enormous appropriations necessary to do the work. From a deep-waterway standpoint, considering navigation through the Illinois Valley as the sole and only object, we can attain this end if the Government is willing to supply the funds for these large "locked-in" pools.

There are other things, however, to be considered aside from appropriations.

The first is: Would the minimum of 1,000 cubic second-feet furnish sufficient water in the Mississippi River to maintain a 9-foot channel unless that river were likewise made a network of locks?

Second: The source of Chicago's water supply being Lake Michigan, the flow of 1,000 second-feet would not, it is conceded by everybody, prevent the pollution of Lake Michigan.

We are told that the sanitary district canal, some 50 miles in length, is designed to carry something over 10,000 cubic second-feet.

UNITED STATES HAS CONTROL

It is in evidence that for a short period of time the canal, having a full head, can discharge possibly 25 per cent more. Such a discharge would, of course, increase the current in the Chicago River to a point where navigation in the Chicago River, and in the canal itself, would be impractical.

The Federal Government having control, for navigation purposes, of the Chicago River, would never concede such a maximum flow there. It has been demonstrated that a flow of 10,000 cubic second-feet does not interfere with navigation in the Chicago River.

My position, as a deep-waterway advocate, is to secure the necessary governmental appropriations that will give us a practical waterway through the Illinois Valley of at least 9 feet, and maintain that depth from the junction of the Illinois and Mississippi Rivers down to the Gulf of Mexico.

Assuming that we would get the appropriation necessary to maintain such a waterway, the necessities of the people of the Sanitary District of Chicago, the rights of navigators on the Great Lakes, and of the landowners in the Illinois Valley must receive deepest consideration. Efforts must be made to reconcile their conflicting interests. Having this in mind, the bill introduced by myself in Congress affords the groundwork for protecting the rights of all these interests.

INDUCEMENT TO CONGRESS

The bill is based on the theory that the greatest possible flow from Lake Michigan means a minimum cost to the Federal Government, and is the greatest inducement that could be offered to Congress to make the needed appropriations.

This flow, the navigators of the Great Lakes tell us, reduces the lake levels.

Accepting that theory, as well as the claim that we have no right to reduce these lake levels, a fair solution of the controversy sug-

gests that the Sanitary District of Chicago should be compelled to install compensating works that would obviate any cause of complaint on the theory of reducing lake levels.

The bill under consideration so provides. With compensating works installed, there can be no complaint from navigators on the Great Lakes. There would, however, continue to be, as there now is, objection from both Niagara and Canadian water-power interests to any plan that would diminish their water-power possibilities. They urge that the withdrawal of any considerable quantity of water at Chicago from Lake Michigan is a deprivation of their claimed right to control all the water-power possibilities of the Great Lakes.

TO USE WATER POWER

They insist that the development of water power in the Illinois River through the use of Lake Michigan water is a waste; that the 10,000 cubic feet coming from Lake Michigan through the sanitary district canal can at most be used at hydroelectric stations but five times. In other words, that the slope in the river is such that by controlling that volume at five hydroelectric stations we get the maximum efficiency that may come from such volume.

Our State has appropriated \$20,000,000 to take up and use the power that can be thus developed. The State can, let us assume, use this water at five different points; the Niagara and Canadian water-power interests say that if the State of Illinois is deprived of this use and that volume is left to them that they can use it to generate seven times the power made possible in the Illinois River, or, in other words, that for 1 horsepower generated from Lake Michigan water in the State of Illinois they can generate 7 horsepower in their territory. It is their argument that they should be given this privilege.

If we give to the Canadian and Niagara power interests the full measure demanded by them, it means that there never can be a deep waterway connecting the Great Lakes with the Gulf of Mexico.

We will not here discuss treaties nor governmental policies, but only suggest the injustice of these demands. We stand firmly upon the proposition that we are entitled to all the power that can come through the use of Lake Michigan water, regardless of whether or not it cuts into the profits of Canada and Niagara Falls interests.

THAT 10,000 SECOND-FEET

It is insisted by some that it is necessary to take 10,000 second-feet from Lake Michigan to maintain unpolluted the source of Chicago's water supply.

In 1889 the State of Illinois made it possible for the Sanitary District of Chicago to organize for the protection of such water supply.

The legislature had in mind that Chicago then had a population of a million and a half. It provided in the bill that the canal between Lake Michigan and the Illinois River should provide for a continuous flow of not less than 5,000 second-feet (300,000 minute-feet) with a depth of 18 feet and a flow not to exceed 3 miles per hour, and that as the population of such district increased such flow should be increased something over 300 second-feet for every 100,000 increase in population.

The same act provided that if the Federal Government ever improved the Des Plaines and Illinois Rivers the sanitary district should make its canal sufficient in size to maintain a flow of 10,000 second-feet. Chicago has reached the point where it is safe to estimate its population at 3,000,000 people.

The Illinois law, under which this district was created, obligates the district to the use at this time of 10,000 second-feet from Lake Michigan. The same law contemplated that any flow from Chicago will damage bottom lands, and provides that such damages shall be paid for, and that the landowners may sue for them and to have the same fixed by jurors in the counties where the damaged lands are situated. The law contemplates that the Sanitary District of Chicago has the right to divert into the Illinois Valley for all time 10,000 second-feet, and the landowner is not obliged to bring successive suits, but can recover in full in one suit, on the theory of the permanency of that flow, namely, 10,000 second-feet.

Complaint has been made that the district has resisted these claims. Complaint has been made that juries have not given adequate verdicts. Complaint has been made that the sanitary district has not observed restrictions placed upon it by the War Department, and that it has exceeded the flow fixed in these governmental permits.

I offer no justification for the resistance in court by the sanitary district of these claims. The district evidently thought where it resisted that it was justified in doing so. The bill we have under consideration appreciates that the statute of limitations has already barred many landowners, and that to now sue for his damages is too late. In order to give him relief, since he has neglected his day in court, this bill can be so worded, if it is not strong enough in that regard, to take away from the sanitary district the right to plead the statute of limitations, and it can be made to compel the Sanitary District of Chicago to deposit with the Federal Government, or with some board of commissioners, the amount of money necessary to compensate landowners in the Illinois Valley for any damages they may have sustained or in the future will sustain by reason of its flow, whether or not they have instituted damage suits.

STATE HAS AUTHORITY

Some may ask how can such a thing be brought about? The answer is, by compelling the sanitary district to enter into a formal agreement to do this very thing, and to give it no rights under this bill unless it complies fully with such agreement.

Another complaint urged against the Sanitary District of Chicago is that the people of Illinois now realize that the sewage coming down the Illinois River is not sufficiently diluted to remove objections to its presence there.

Without urging the fact that Illinois has ample authority under its police powers to absolutely prevent any of the sewage of Chicago or any other city being discharged into the river where its presence endangers the health of the people, this bill is intended to compel the sanitary district to dilute its sewage so as to remove its menace.

SEWAGE-DILUTION METHODS

Let us not discuss the various scientific methods of sewage dilution, nor the success along that line of European or American cities. Those who know more about that matter than we do, who have given it deeper study, say that the proposition of properly handling the sewage of large cities is yet in its infancy. Methods which to-day are recognized as being the very best may within a very short period of time be discarded and other more effective and economical practices followed.

Assuming for the sake of argument that the methods now employed for this purpose are the very best that scientists can suggest, the installation and use thereof can only be accomplished by the expenditure of tax money.

The Sanitary District of Chicago has been declared by the courts to be a municipal corporation.

The constitution of the State limits its debt-creating ability, the same as it does every other municipality, so that it can not contract debts in excess of 5 per cent of the taxable value of the property within its limits.

This is a limitation by the constitution.

It is not one that can be changed by the State legislature, even though the municipality affected might be willing to make such change. This limitation is to-day causing great inconvenience to practically every city in the State of Illinois; loss of revenue in recent years; the demand for greater civic improvements and the advanced costs of public works have so handicapped many of the cities of this State that they are practically at a standstill for want of revenue, and are now devising ways and means to raise revenue by placing taxes and license fees upon various business undertakings.

EASY TO MAKE ACCUSATIONS

It is said that the present taxable value of the property within the Sanitary District of Chicago and its contemplated increase over the next 20 years will allow that district to spend approximately \$5,000,000 per year in the installation of these sewage-disposal plants.

Argument is, of course, made that the expenses of the sanitary district in its legal and other departments are largely in excess of what should be spent for such purposes. It may be that the Sanitary District of Chicago is extravagant. It may be that it is not being properly and economically administered. We can here indulge in no denials that this is the fact.

It is easy to make accusations, to impugn motives, and to declare misconduct. It is easy to charge wrongdoing and misconduct of public officials, and it is very easy to make the public believe such charges. In fact, in discussion of this matter before us one gentleman was so reckless in his statements as to charge I had mercenary motives in this regard, that I was serving the Sanitary District of Chicago, and that I was to be compensated for my such services. This is simply one of the slanderous charges that are so easily bandied about by those character assassins who know not whereof they speak and care not what the effect of their slanders may be.

The fact is that the Sanitary District of Chicago has shown before the committee of Congress, of which I am a member, its maximum possibilities, from a financial standpoint, to develop this sewage-disposal program.

Briefly stated, the program as outlined (and it has not been questioned by anybody) contemplates the expenditure of about a hundred million dollars during the next 20 years (from 1924 to 1945), for such purpose.

COMPELS PURIFICATION

The program of the bill provides that in 1945, regardless of its growth in population, should it exceed that number, the sewage from 4,252,000 of its population will be put through these purification processes. With such program followed, it is estimated that in 1945 the solids turned into the river will be 50 per cent less than they are to-day.

If the bill we have under consideration does nothing more than this one thing, it makes it possible from to-day on to compel a development of these purification works, so that eventually there will be but one-half of the solids in the river that are to-day to be found there.

I would prefer to continue this program of compulsory treatment of sewage by the sanitary district after 1945 by having it proceed in the development of such plants, if it were scientifically and mechanically possible, so that all of the water could be treated for the removal of solids, and that the same should be removed to the greatest possible extent known to scientific endeavor.

Complaint is made that the program of this bill carries on for only 20 years. I am willing to carry it on indefinitely.

In fact, it is urged by those who are not well advised that instead of 20 years being allowed them to make this improvement they should be limited to 5 or at the most 10 years.

Those who urge such a program evidently have not thought of the constitutional limitations placed upon the district. They have not figured out the possibilities of the taxpayers of that district, and they imagine the Legislature of the State of Illinois can increase the debt-creating ability of the Sanitary District of Chicago. Such a suggestion is preposterous, and comes through a misunderstanding of the powers of the legislature.

Objection has been urged to many features of the bill as originally drawn. I, myself, admit that it should be amended.

Nobody has ever pretended that it was a perfect measure. The only thing I claim for it is that it is a step in the right direction. It provides for maintaining the integrity of the United States in its position that it has a right to use the waters of its inland lakes for the benefit and opportunity of its citizens.

CHEAPER FREIGHT RATES

It makes possible a deep waterway from the Lakes to the Gulf.

It opens up to the Middle West the possibility of cheaper freight rates.

It invites to the Illinois Valley manufacturers and business enterprises desiring to take advantage of river facilities to turn out cheaply to the markets of the world their heavier products which are susceptible to slow movement, and cause great industrial development in this valley.

It makes possible the generation of large quantities of electricity by the State of Illinois itself, not by private enterprise, thus inviting manufacturers to locate where they can secure cheap power.

It is in the line of saving our coal deposits.

It places us in favorable position when competing with tidewater gateways.

Of course, there is a burden thrown upon the landowner. Of course, there is an objection to sewage in the river.

If anybody can suggest a program that will better protect the landowner in his damages, I will offer, and struggle for, such an amendment to this bill.

If anybody can suggest a program by which the Sanitary District of Chicago can secure money to speed up the installation of its reduction plants, I will gladly accept, and work for such an amendment.

If anybody can suggest a program humanly possible, or even apparently logical, that will continue the development of sewage-disposal plants indefinitely, until the maximum of purity of the water can be reached, I will favor such an amendment and work to have it incorporated in the bill.

I believe that the large flow is necessary for navigation purposes in the Illinois and Mississippi Rivers.

I believe without this flow there can be no deep waterway.

I believe that the contribution of the sanitary district of its millions of dollars, and many miles of deep-waterway channel, suggests at least fair consideration of the interests of that city and the health of its citizens.

This bill was considered by the Peoria Association of Commerce. It appointed a committee to consider the various phases of the bill and suggest amendments to it. That committee made its report, offering certain suggestions. Each of them, I agree, had merit.

ANOTHER OBJECTION

One of the great objections of the valley landowner is that the sanitary district does not so regulate its flow in the time of natural floods as to diminish the danger to lands adjacent to the river.

I do not know how the Sanitary District of Chicago regulates its flow. I do know that they are using certain large quantities of water for the generation of electric current, and I presume they do use the same regardless of natural conditions in the valley, and that they do generate practically the same quantity of electricity every day in the year.

Landowners seem to think—and we agree with them—that the control of the discharge from Lake Michigan should be taken out of the hands of the sanitary district and placed in the hands of the War Department of the United States. They seem to feel that the bill as introduced may not be strong enough on that point, and such is one of the suggestions of amendment by the Association of Commerce.

I am in favor of the War Department having absolute control of the discharge through the sanitary district canal, and any language that will give such department that absolute control and authority will receive my approval and support.

ASSOCIATION OF COMMERCE COMMITTEE REPORT

My interest in this matter is not political.

I am for a deep waterway, and I am for fairly treating the different interests affected. I am not seeking any political advantage to myself or political disadvantage to any other person.

The report of the committee of the Association of Commerce was adopted. It read:

"We approve H. R. bill 5475 with the following recommendations or suggestions as to amendment:

"In case the Sanitary District of Chicago have not immediately complied with any requirements, or orders, of the Chief of Engineers, then the said Chief of Engineers is hereby authorized and empowered to take charge of such locks and controlling works, and operate the same for such length of time as may be necessary to carry out the objects and purposes of this section."

"Next—We suggest that the bill be amended to provide a definite program of construction of purification works, which shall be commenced immediately, upon the passage of the bill, such program to provide that by 1945 such purification works shall be sufficient, and in operation, so that the amount of raw sewage and waste passing through the sanitary district canal into the Des Plaines and Illinois Rivers shall be at least 90 per cent less than the amount now passing into such river."

"We recommend the bill provide a period of 50 years as the time the contract or franchise between the Government and sanitary district shall run as we do not favor the granting of such rights in perpetuity."

"We further recommend that section 11 be amended to read that in case the Sanitary District of Chicago shall violate, fail, or refuse to carry out any of the provisions of this act on their part to be performed in the time and according to the terms hereof, then the Secretary of War shall have the right to immediately forfeit and annul all of the rights, powers, and privileges by this act granted to the Sanitary District of Chicago by giving to its officers written notice of such forfeitures and annulment."

OTHER SUGGESTIONS

This report was signed by all the members of that committee. It contained no other recommendations, and one of the members of that committee has seen fit to accuse me of a misconception of duty and of violating my trust, when these recommendations are the only ones that he and his associates submitted, and as to each of which I gave them my word I would introduce as amendments to this bill when the consideration comes before the waterway committee.

I have had other amendments suggested to me—some came from Mr. Sackett, who is in charge of the water-power development of this State; some from others, including Congressman RAINEY; and it is my intention, as well as Congressman RAINEY'S, to see that such amendments are put in this bill that will remove any uncertain language that may be in it, and that will make certain the rights, duties, and obligations of all concerned in the proposition.

One of my opponents—and I rather expected more from him—has gone into a frenzy because one provision of this bill reads:

"This act shall not be in force or effect until the same shall be formally accepted without reservations within 60 days after its passage by an ordinance of the board of trustees of the Sanitary District of Chicago duly passed and promulgated."

That provision is put in the bill for the purpose and with the design of compelling the sanitary district in an official way to formally accept this bill and agree to be bound by its terms and provisions and subject to its forfeiture for the violation of its terms.

SOME GUARANTIES

It is to make sure that the sanitary district officially binds itself to do the things the bill says it shall do. It calls their attention to the possible forfeitures—it calls their attention to the fact that the Chief of Engineers of the War Department is to have the control of their discharge, and is an agreement upon their part to pay the land damages, according to the terms of the bill; to install lake-level controlling works; and to carry out its guarantee with reference to the treatment of sewage, and to consent that the authority over its flow shall be in the hands of the War Department.

It should be our purpose to compel the sanitary district to accept these terms in a formal and binding way; and if it does not do so within 60 days, then so far as the bill gives the sanitary district any rights and privileges the same will not be in force and effect.

Another, learned in the law, advises that no legislation for the deep waterway should be undertaken and that the bill under consideration does not add anything to the development of a deep waterway. His theory is that because there is a dispute between the War Department and the district, which the Supreme Court will decide some time in the near future, that there is a possibility the sanitary district will have to abide by any decision of the War Department regarding the flow until such time as Congress may act in the premises.

DISTRICT MIGHT ACT ALONE

If the decision of the Supreme Court is adverse to the sanitary district, I prophesy that the War Department will never cut down the flow so as to endanger the water supply of the city of Chicago. Should I be wrong, and the War Department goes that far, then I say to you I am firmly of the opinion that the Congress would give authority to the Sanitary District of Chicago to continue to use this 10,000 second-foot, and that another bill to that end by Congressman MADDEN or one of his Chicago colleagues would get almost unanimous support in Congress.

Such a bill would have no appropriations in it for a deep waterway and contain no provisions with reference to sewage-disposal plants, and none for the maintaining of lake levels or paying land damages. The legislature that authorized the organization of the district is pictured as acting with "stupendous stupidity," and this criticism comes from one who, subsequent to the passage of the legislation, was a member of the Illinois General Assembly, and while there offered no suggestion to correct the misconduct of his "supine" predecessors.

This same gentleman says this bill is not a "waterway bill," because it takes advantage of the 65 miles of improvement to be made by the State of Illinois. How ridiculous! For that 65 miles—Lockport to Utica—no Government appropriation is needed. Illinois supplies the money, but Illinois does not agree to pay for lands overflowed nor to maintain the channel from Utica to Grafton. This gentleman advises that the State spend its \$20,000,000 before it can know how much water may be withdrawn from Lake Michigan. He advises that the State put in its hydroelectric plants and then wait for water in sufficient quantities to turn its turbines. Let us trust the State authorities have sense enough not to follow his advice.

AFFECTS WHOLE NATION

It is entirely probable the Supreme Court will hold that the limit Chicago may use from Lake Michigan shall be fixed by the War Department until Congress acts on the situation. Assume that, following such a decision, the War Department might make the limit, say, 5,000 second-foot, does anyone imagine the Supreme Court would in its decision to leave it open to the War Department to do this?

The Attorney General of the United States, who is seeking to sustain the right of the Secretary of War to issue these permits, if yesterday's press reports are true, admitted in his brief that while the law questions involved are "comparatively insignificant" that in the case are "far-reaching consequences which effect vitally the whole Nation, questions of magnitude not easily exaggerated."

He is quoted as saying:

"Chicago's problem . . . is a serious and perplexing one, in which the entire Nation should take a sympathetic interest, The solution of the question is through Congress . . . as time would be required in Chicago to adjust itself to a decreased withdrawal, . . . the Government would not object to a modification . . . of the present permit, pending action by Congress, to allow a withdrawal in excess of 4,167 second-foot, The court could provide for some such arrangement in entering its decree."

CONGRESS MUST ACT

Does anyone doubt but what the Supreme Court would do this?

Do any of us doubt that Congress will eventually have to take the first definite action?

Is it not up to us to see that in taking such action Congress will give us ample appropriations for a deep waterway, and provide for the treatment of the sewage involved, and provide for protection and damages to the valley landowner?

A gentleman in an article published in the Peoria Star just before the last election wrote:

"The people of this valley do not need any bill . . . the Supreme Court will . . . protect our rights by forcing the sanitary district to install purification plants by the enforcing of its injunctive order controlling the flow from Lake Michigan."

Strange that the Attorney General of the United States should disagree with the gentleman!

Another Peorian wrote:

"If it [this bill] is defeated, we will get the waterway anyhow, because that is already authorized . . . and the effect of the injunction to be issued within a short time, if not blocked by the Hull bill, will be to force the sanitary district to install reduction plants to care for all of its sewage."

With him, also, the United States Attorney General disagrees.

The Attorney General is of the opinion that even if the decision sustains the right of the War Department to limit the flow, that the court will restrain drastic action until Chicago can arrange to protect its water supply.

Even Congressman HENRY T. RAINEY is not spared; "he has fallen before the same blandishments" to which I succumbed.

You have heard "Mr. HULL personally has refused to consider, or accept, any amendment that would modify the viciousness of his sanitary district sewage bill."

LET US GO SOMEWHERE

That statement is, without any qualification, false, and known to be so when its author made it.

As an evidence of its untruth I agreed to propose amendments unanimously suggested by our association of commerce committee in the form of a report, to which he was a subscribing member.

Here we are like the confused members of a volunteer fire department standing arguing over the route to be taken to the fire while our neighbor's house is burning to the ground.

Let us agree to go somewhere; we may by chance find the fire in time to render some service.

This bill, like many other waterway measures, is still unconsidered in committee.

Less than four years ago the United States district engineer for the northwestern division reported to the House Rivers and Harbors Committee as follows:

"The probability that Congress will limit the increment (Lake Michigan water) to 4,167 second-foot is, in my opinion, so remote that this hypothesis may be left out of consideration."

The same report estimates an 8-foot channel, with 4,167 second-foot of increment (present dams removed), will entail a first cost of \$3,124,000, with an annual maintenance cost of \$85,800; with an increment of 7,500 second-foot, a first cost of \$1,310,000; with an annual maintenance cost of \$77,500; with an increment of 10,000 second-foot, a first cost of \$576,100, with an annual maintenance cost of \$77,500.

The report concludes:

"In my opinion, to most reasonably conform to the probable conditions of the future, an 8-foot project should now be adopted, based on a 7,500 second-foot withdrawal Then should Congress place the limit . . . at 10,000 second-foot, which I deem probable and under proper conditions advisable, that increment would of itself increase the depth to 9 feet."

The committee adopted a resolution which I offered calling upon the War Department to furnish the necessary estimates and data to show the cost of constructing a waterway through the Illinois River, at various depths, and particularly a depth of 9 feet, with "increment flows" varying from 1,000 to 10,000 second-foot.

This report is being prepared, and when it is made—and that will be before long—we will know what appropriation will be required to maintain the various depths of water with the different suggested "flows." We will then know the quantity of lake water necessary to maintain a 9-foot level in the Illinois and Mississippi.

When that report is considered I propose to offer all of these amendments and recommendations that have been suggested and do my best to have them incorporated in the bill.

RAPS THE WORD PAINTERS

I do not propose to relinquish my opposition to the demands of the Canadian and Niagara water-power interests; nor do I propose to relinquish my efforts in behalf of a pure stream and for the protection of the valley landowner.

The opponents of this bill may call the bill "a sewage bill" if they like; they may picture the beautiful stream we are said to have had here twenty and more years ago, in which we bathed and fished, over which we boated and from which we gathered pond lilies.

To-day this once beautiful stream is pictured to be "a sullen, silent menace carrying upon its once pure vibrant bosom death and destruction."

Of course, many of the older citizens will fail to recognize the stream of this beautiful word picture.

These word painters forget the fact that for many years before the sanitary district was organized, Chicago was pumping into the Illinois and Michigan Canal 6,000 cubic feet of alleged water per minute, which was so full of solids that it would hardly flow down the canal. It was visible even below Peoria, as it gently worked its way southward in the form of floating islands, while its odors filled the air from Chicago to Grafton.

None of us are so young but what we can remember when in dry seasons the wheels of the steamboats turned up river-bottom mud as they cautiously worked upstream. Neither are we too young to remember that this was a malaria-infected valley every spring.

It may be that the water of to-day, while it appears cleaner, is in fact dirtier, and it may be that the fish have been driven from the river, as they have been driven from every stream into which factory waste is turned, and it may be that adjacent lands have been flooded; and it may be that people have been damaged financially, all because of the waters of the sanitary district. All these things can be admitted, but one of the primary questions to be decided is, Shall the farmers, manufacturers, and other business interests of the great Central Western States be granted deep-water navigation from the Lakes to the Gulf?

Are we willing to keep pace with the progress of the world? Are we willing to bring about a reduction in freight rates? Are we willing to revive manufacturing? If so, we are in favor of a deep waterway.

WANTS JUSTICE FOR ALL

Just which bill may secure it—just what the exact provisions of it may be—is to me immaterial, if the main ideas which I have suggested are part of it.

The thing I am interested in is that we shall get this deep waterway, with justice to everybody, and every interest affected by it.

I submit to you that unless my activities in this matter meet with the approval of my constituents it is their duty to say so. I do not intend, though I believe in the merit of the measure, to waste time and effort trying to accomplish something that is not approved by the people of this congressional district.

I want you to read and study this bill, learn all of its provisions, consider its merits and defects, and then candidly express your opinions concerning it.

I believe I am right on the main features of the bill, and so believing will continue until convinced the majority of my constituents do not agree with me.

PRESIDENT GIVES HIS APPROVAL

President Coolidge in his recent annual message to the Congress said:

"Meantime our internal development should go on. Provision should be made for flood control of such rivers as the Mississippi and the Colorado and for the opening up of our inland waterways to commerce. Consideration is due to the project of better navigation from the Great Lakes to the Gulf. Every effort is being made to promote an agreement with Canada to build the St. Lawrence waterway. There are pending before Congress bills for further development of the Mississippi Basin, for the taking over of the Cape Cod Canal in accordance with the moral obligation which seems to have been incurred during the war, and for the improvement of the harbors on both the Pacific and the Atlantic coasts. While this last should be divested of some of its projects, and we must proceed slowly, these bills in general have my approval. Such works are productive of wealth and in the long run tend to a reduction of the tax burden."

This is considered by many of the older Members of the House to be the strongest indorsement ever given by a President to a deep-waterway project from the Great Lakes to the Gulf of Mexico, and I believe the time has arrived for the Congress to take a prompt action in favor of this legislation.

REPORT OF THE COUNCIL OF NATIONAL DEFENSE

The SPEAKER laid before the House the following message, from the President, which was read, and, with the accompanying papers, referred to the Committee on Military Affairs.

To the Congress of the United States:

In compliance with paragraph 5, section 2, of the Army appropriation act, approved August 29, 1916, I transmit herewith the Eighth Annual Report of the Council of National Defense for the fiscal year ended June 30, 1924.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 4, 1924.

REPORT OF THE UNITED STATES CIVIL SERVICE COMMISSION

The SPEAKER also laid before the House the following message from the President, which was read, and, with the accompanying papers, referred to the Committee on Civil Service:

To the Congress of the United States:

As required by the act of Congress to regulate and improve the civil service of the United States, approved January 16, 1883, I transmit herewith the Forty-first Annual Report of the United States Civil Service Commission, for the fiscal year ended June 30, 1924.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 4, 1924.

REPORT OF THE WORLD WAR FOREIGN DEBT COMMISSION—POLAND

The SPEAKER also laid before the House the following message from the President, which was read, and, with the accompanying papers, referred to the Committee on Ways and Means:

To the Congress of the United States:

I am submitting herewith for your consideration a copy of the report of the World War Foreign Debt Commission dated November 14, 1924, together with a copy of the agreement referred to therein, providing for the settlement of the indebtedness of the Government of the Republic of Poland to the Government of the United States of America. The agreement was executed on November 14, 1924, and was approved by me on that day, subject to the approval of Congress, pursuant to authority conferred by act of Congress approved February 9, 1922, as amended by act of Congress approved February 28, 1923.

I recommend the approval of this agreement.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 4, 1924.

REPORT OF WORLD WAR FOREIGN DEBT COMMISSION—LITHUANIA

The SPEAKER also laid before the House the following message from the President, which was read, and, with the accompanying papers, referred to the Committee on Ways and Means:

To the Congress of the United States:

I am submitting herewith for your consideration a copy of the report of the World War Foreign Debt Commission dated September 22, 1924, together with a copy of the agreement referred to therein, providing for the settlement of the indebtedness of the Government of the Republic of Lithuania to the Government of the United States of America. The agreement was executed on September 22, 1924, and was approved by me on that day, subject to the approval of Congress pursuant to authority conferred by act of Congress approved February 9, 1922, as amended by act of Congress approved February 28, 1923.

I recommend the approval of this agreement.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 4, 1924.

REPORT OF THE AMERICAN BATTLE MONUMENTS COMMISSION

The SPEAKER also laid before the House the following message from the President, which was read, and, with the accompanying papers, referred to the Committee on Foreign Affairs:

To the Congress of the United States:

I transmit herewith, for the information of the Congress, the annual report of the American Battle Monuments Commission for the fiscal year ended June 30, 1924.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 4, 1924.

CUSTOMS COLLECTION DISTRICTS

The SPEAKER also laid before the House the following message from the President, which was read and referred to the Committee on Ways and Means:

To the Congress of the United States:

The sundry civil act approved August 1, 1914, contains the following provisions, viz:

The President is authorized from time to time, as the exigencies of the service may require, to rearrange, by consolidation or otherwise, the several customs collection districts and to discontinue ports of entry by abolishing the same or establishing others in their stead: *Provided*, That the whole number of customs collection districts, ports of entry, or either of them, shall at no time be made to exceed those now established and authorized except as the same may hereafter be provided by law: *Provided further*, That hereafter the collector of customs of each customs collection district shall be officially designated by the number of the district for which he is appointed and not by the name of the port where the headquarters are situated, and the President is authorized from time to time to change the location of the headquarters in any customs collection district as the needs of the service may require: *And provided further*, That the President shall, at the beginning of each regular session, submit to Congress a statement of all acts, if any, done hereunder and the reasons therefor.

Pursuant to the requirements of the third proviso to the said provision, I have to state that the following is the only change in the organization of the customs service made by Executive order since the last report:

By Executive order dated October 28, 1924, Empire, Oreg., was abolished as a port of entry in customs collection district No. 29 (Oregon) and Marshfield, Oreg., was created a port of entry in the said customs collection district, with headquarters at Portland, Oreg., effective November 15, 1924.

The above change was dictated by considerations of economy and efficiency in the administration of customs and other statutes with enforcement of which the customs service is charged, as well as the necessities and convenience of commerce generally.

CALVIN COOLIDGE.

THE WHITE HOUSE, December 4, 1924.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL

Mr. ROSENBLUM, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States for his approval the following bills:

H. R. 9561. An act making additional appropriations for the fiscal year ending June 30, 1925, to enable the heads of the several departments and independent establishments to adjust the rates of compensation of civilian employees in certain of the field services;

H. R. 6426. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy,

and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors;

H. R. 9559. An act making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1924, and prior fiscal years, to provide supplemental appropriations for the fiscal year ending June 30, 1925, and for other purposes; and

H. R. 3537. An act for the relief of L. A. Scott.

MESSAGES FROM THE PRESIDENT OF THE UNITED STATES

Sundry messages, in writing, from the President of the United States, by Mr. Latta, one of his secretaries.

NATURALIZATION

Mr. RAKER. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD in explanation of a bill (H. R. 9816) on naturalization.

The SPEAKER. The gentleman from California asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. RAKER. Mr. Speaker and gentlemen of the House, on January 3, 1924, I introduced H. R. 4471 to amend the naturalization laws. There are certain important changes required, some provisions of the present laws repealed, and certain new provisions required.

To clarify the situation I have reintroduced the bill on naturalization, being H. R. 9816, on December 1, 1924. This bill has for its purpose a correction of what was intended by the provisions of H. R. 4471.

I have attempted to explain the provisions of H. R. 9816 and the reasons for and necessity of such proposed legislation, namely:

EXPLANATORY REPORT TO ACCOMPANY H. R. 9816, BY MR. RAKER, TO AMEND THE NATURALIZATION LAWS

Following the declaration of war against Germany numerous bills were introduced in Congress to so amend the naturalization statutes as to care for war-time needs and conditions. These bills were in the main eventually consolidated and enacted into law in what is known as the act of May 9, 1918 (40 Stat. L. pt. 1, p. 596).

It requires only a casual inspection of this legislation to establish that it was designed as a temporary expedient merely, and that it was never intended as permanent legislation. Nevertheless, although more than seven years have elapsed since the declaration of war, and although hostilities ceased more than six years ago, we still find this emergency legislation in force.

In certain essentials, in connection with favored classes, this act of May 9, 1918, removed practically every protecting clause of the law, while, on the other hand, certain restrictions were imposed that have no place during the time of peace. Taken all in all, the statute has outlived any war-time usefulness it may have had, and, in addition, opened the door to the grossest character of sins, against which the United States has practically no protection. For example, for a time in California aliens in great numbers who would not fight for the United States during the war and whose war records were such as to prevent their naturalization at all under the general act, resorted to the act of May 9, 1918, and secured naturalization forthwith. Conceding that there was urgent need for the enactment of this legislation during the time of war, there is even more urgent need now, in time of peace, for its repeal.

The basic naturalization act is the act of June 29, 1906 (34 Stat. L. pt. 1, p. 596). That statute, as originally enacted, consisted of 31 sections, these sections being divided into paragraphs, as the subject matter dictated. The only exception to this arrangement is found in section 4. As originally enacted this consisted of six subdivisions, each of one or more paragraphs. The war-time act of May 9, 1918, heretofore referred to, amended the act of June 29, 1906, by adding additional subdivisions to said section 4, these being numbered seventh to thirteenth, inclusive. Two additional sections were added, these being numbered sections 2 and 3, respectively, of said act of May 9, 1918.

By this bill it is proposed to repeal the subdivisions 7 to 13, inclusive, as well as one clause of section 2 of the act aforesaid. In lieu of this repealed legislation in the bill offered there has been drafted a provision designated as the said seventh subdivision of section 4 of the act of June 29, 1906, and therein an endeavor has been made to codify in unambiguous language all of the law in said subdivisions 7 to 13, inclusive, of the act of May 9, 1918, as warrant continuation in permanent legislation.

In preparing the bill here offered it has been felt that any naturalization legislation should, while fully protecting the interests of the United States, make admission to citizenship as easy as possible for those worthy of receiving same. There can be no question but that a large alien element in our population constitutes a menace to our institutions. It is highly desirable, therefore, that we make citizens of all those who desire to be naturalized and whom we can naturalize without danger to ourselves or our institutions. The process of naturalization should not be made too burdensome or irksome. The bill offered endeavors to give legislative form to the suggestions made during recent years by expert witnesses who have testified before the Committee on Immigration and Naturalization.

The proposed seventh subdivision provides in simple and easily understood language a rule governing all those aliens who have meritoriously served in any of our armed forces. There is no distinction made between service in the Army, in the Navy, or minor branches of the armed service. The United States, beginning with the Civil War, declared the national policy to be that soldiers of alien birth should be granted citizenship on easier terms than those who had not performed said service. Later the same rule was applied to veterans of the Navy. Under the act of May 9, 1918, the same privilege was extended to the National Guard, Naval Militia, Marine Corps, and Coast Guard. All of these favored classes are cared for by the proposed seventh subdivision. The bill proposed in the main closely adheres to the Civil War act, later codified as section 2166 of the Revised Statutes. For peace times I have eliminated the 1918 expedient of providing an immediate hearing on these cases.

The reasoning of the Circuit Court of Appeals for the Eighth Circuit in the case of United States v. Peterson (182 Fed. 291) amply warrants this stand, as does the fact that the immediate-hearing clause has made possible colossal fraud in applications based on the act of May 9, 1918. It should be remembered, also, that before the act of 1918, and from the time the act of 1906 went into effect, final hearings on the petitions of veterans could be heard only on stated days fixed by rule of court and of which 90 days' notice had been given. By the legislation here proposed we return to that state of affairs, so far as peace times are concerned, thereby eliminating the opportunity for fraud that has crept into naturalization under the said act of May 9, 1918. Although more than six years have now elapsed since the signing of the armistice, there are still a few veterans of the World War of alien status who have not availed themselves of the privilege of being naturalized as honorably discharged soldiers. It is reported that there are still a few Spanish-American War veterans who are in a like situation. Therefore, to care for these remaining cases, provision has been made, under proper safeguards, that they may be naturalized under the provisions of the proposed seventh subdivision, providing application is filed within one year.

The emergency act of May 9, 1918, required a petition to be filed within six months of the date of honorable discharge. This legislation was doubtless based on the premise that it is entirely possible for a man who during his military or naval service behaved as a man of good moral character to degenerate in this particular following his discharge. Candidates should no doubt be required to petition within a reasonable length of time after getting out of the service, particularly as the record of the candidate in the armed forces is to be accepted as evidence of good moral character. The period of one year, rather than six months, has been fixed in the proposed seventh subdivision to afford greater flexibility of the statute and to give every candidate the maximum freedom of action.

The last sentence of paragraph 2 of the proposed seventh subdivision contains a clause designed to care for the naturalization of our fighting forces of alien birth during time of war. At the time of the declaration of war against Germany there was no legislation of this character on the statute books. More than a year elapsed before a bill could be gotten through Congress. The bill as thus enacted was the act of May 9, 1918. As will be noted by the eleventh subdivision of said act, as a preliminary appropriation for this war-time naturalization, some \$400,000 were provided. Had there been in existence on April 6, 1917, a provision of law such as proposed here, not only would the act of May 9, 1918, have been unnecessary but all of this soldier naturalization could have been cared for by the regular naturalization force without the expenditure of other than a trifling sum. In fact, it is altogether conceivable that this work could have been cared for under the appropriate

tion that the naturalization officers were working under at that time. Certainly this proposed bill eliminates any possibility of Congress being again called upon for any such sum as \$400,000 for this work. And by enacting this legislation we have a workable statute immediately available in the time of any war and which becomes operative without any expense to the United States upon the declaration of war by Congress.

The second paragraph of this proposed subdivision lays down a workable rule to govern the naturalization status of enemy aliens during the period of war. A perusal of the reports shows what utter confusion this matter was in at the outbreak of the World War. As illustrating this, there are cited some of the decisions on which the above statement is predicated: In re Jonasson, 241 Fed. 723; In re Kreuter, 241 Fed. 981; United States v. Meyer, 241 Fed. 305; In re Nannunga, 242 Fed. 737; In re Haas, 242 Fed. 739; In re Subjects of Germany, 242 Fed. 971; ex parte Borchardt, 242 Fed. 1006; In re Duus, 245 Fed. 813; In re Lindner, 247 Fed. 138; United States v. Kamm, 247 Fed. 968; In re Welsz, 250 Fed. 1008; In re Pfeiffer, 251 Fed. 511; In re Pollock, 257 Fed. 350; and Grahl v. United States, 261 Fed. 487.

The act of May 9, 1918, made provision under certain circumstances for the naturalization during the war of enemy aliens. From what can be learned as a result of painstaking inquiry, the experiment was far from a success, and the country should be spared from going through a like experience in connection with any future war.

The last clause of this sentence provides that an American citizen who finds himself in an enemy country during the time of war may not be naturalized a citizen or subject of such enemy country. This protection he is entitled to as a matter of law to prevent his being forced through pressure to become an expatriate. This country has from the earliest times declared the right of expatriation to be inalienable. Accordingly no restriction can logically be placed upon an American citizen in a friendly or neutral country during the time of war becoming a citizen or subject of such friendly or neutral country. In fact, we pursued this identical policy during the World War in respect to subjects of the allied powers then in this country whom we naturalized as a matter of course in great numbers all during the period of the war.

The last paragraph of the proposed seventh subdivision undertakes to so codify the law dealing with alien seamen as now declared in the seventh subdivision of the act of May 9, 1918, as to more fully protect the interests of the United States, and to at the same time work no hardship on any given candidate. As drafted it is believed this purpose has been achieved. By restricting the privilege of the petitioner to the home port of the alien concerned, there is eliminated all necessity for an immediate hearing of the petition, thus giving the Government time to investigate the case, which investigation will put a stop to such frauds as now exist in these classes of cases. The petitioner also is better prepared at such home port than he is elsewhere to establish the essential facts concerning his residence and good moral character.

To permit of a critical study being made of the proposed seventh subdivision and the legislation it is proposed to replace through repeal, there is made a part of this report, set down in opposing columns, the said proposed seventh subdivision in the first column, and in the second column the seventh, eleventh, twelfth, and thirteenth subdivisions of the act of May 9, 1918, the repeal of which is provided for:

Seventh. That any alien eligible to naturalization who has enlisted, or may hereafter enlist, in any one of the regularly established armed forces of the United States, and who has been honorably discharged therefrom by reason of expiration of his term of service or because of injuries or sickness actually incurred in line of duty, may, if he petitions within one year from the date of his discharge, be naturalized without proof of residence in the United States of more than one year preceding the date of his application, and without the production of a declaration of intention, upon his compliance with the other terms of the naturalization law: *Provided*, That time spent in the Panama Canal Zone, the Philippine

Seventh. Any native-born Filipino of the age of 21 years and upward who has declared his intention to become a citizen of the United States and who has enlisted or may hereafter enlist in the United States Navy or Marine Corps or the Naval Auxiliary Service, and who, after service of not less than three years, may be honorably discharged therefrom, or who may receive an ordinary discharge with recommendation for reenlistment; or any alien, or any Porto Rican not a citizen of the United States, of the age of 21 years and upward, who has enlisted or entered or may hereafter enlist in or enter the armies of the United States, either the Regular or the Volunteer Forces, or the National Army, the Na-

Islands, or other places outside the boundaries of the United States, in service with the armed forces of the United States, may be regarded as residence within the United States in connection with petitions for naturalization filed under this provision, but may not be so regarded in connection with any other class of cases: *Provided further*, That a veteran of the World War who did not prior to November 11, 1918, refuse to be naturalized while in the service, or who did not prior to the armistice seek release from the service on the ground of alienage; or a veteran of the Spanish-American War, Philippine rebellion, or Chinese Relief Expedition may be naturalized under the terms of the foregoing provisions, provided he files his petition within one year from the date of the passage of this act: *And provided further*, That upon the declaration of war by Congress the President of the United States may during the emergency by proclamation and under such safeguarding regulations as he may promulgate, authorize designated courts to immediately naturalize those aliens who have been inducted into the armed forces of the United States; that he shall be empowered to waive court costs in such naturalizations, as well as the requirement of at least one year's United States residence; that he may direct the courts to adjourn from the regularly established places of sitting, and to hear the petitions presented to them under this provision at such places as may best suit the conveniences of the War and Navy Departments; and that the Bureau of Naturalization and its field force shall be the agency designated to handle the emergency war-time naturalization authorized by this provision.

That during the time of war no enemy alien may be naturalized nor may an American citizen expatriate himself by becoming naturalized a citizen or subject of an enemy country.

That every alien seaman, eligible to naturalization who has declared his intention to become a citizen of the United States, and who has thereafter honorably served continuously for three years upon any vessel of the United States Government, or on board of ocean-going merchant or fishing vessels of the United States, petition for naturalization at his home port, without proof of United States residence other than proof of the service here prescribed, upon compliance with all other requirements of the naturalization law: *Provided*, That petition is filed within six months from the date of last discharge: *And provided further*, That only in the case of petitions filed under this provision of law may time spent upon vessels of the United States be regarded as residence within the United States."

tional Guard or Naval Militia of any State, Territory, or the District of Columbia, or the State militia in Federal service, or in the United States Navy or Marine Corps, or in the United States Coast Guard, or who has served for three years on board of any vessel of the United States Government, or for three years on board of merchant or fishing vessels of the United States of more than 20 tons burden, and while still in the service on a reenlistment or reappointment, or within six months after an honorable discharge or separation therefrom, or while on furlough to the Army Reserve or Regular Army Reserve after honorable service, may, on presentation of the required declaration of intention petition for naturalization without proof of the required five years' residence within the United States if upon examination by the representative of the Bureau of Naturalization, in accordance with the requirements of this subdivision it is shown that such residence can not be established; any alien serving in the military or naval service of the United States during the time this country is engaged in the present war may file his petition for naturalization without making the preliminary declaration of intention and without proof of the required five years' residence within the United States; any alien declarant who has served in the United States Army or Navy, or the Philippine Constabulary, and has been honorably discharged therefrom, and has been accepted for service in either the military or naval service of the United States on the condition that he becomes a citizen of the United States, may file his petition for naturalization upon proof of continuous residence within the United States for the three years immediately preceding his petition, by two witnesses, citizens of the United States, and in these cases only residence in the Philippine Islands and the Panama Canal Zone by aliens may be considered residence within the United States, and the place of such military service shall be construed as the place of residence required to be established for purposes of naturalization; and any alien, or any person owing permanent allegiance to the United States embraced within this subdivision, may file his petition for naturalization in the most convenient court without proof of residence within its jurisdiction, notwithstanding the limitation upon the jurisdiction of the courts specified in section 3 of the act of June 29, 1906, provided he appears with his two witnesses before the appropriate representative of the Bureau of Naturalization and passes the preliminary examination hereby required before filing his petition for naturalization in the office of the clerk of the court, and in each case the record of this examination shall be offered in evi-

dence by the representative of the Government from the Bureau of Naturalization and made a part of the record at the original and any subsequent hearings; and, except as otherwise herein provided, the honorable discharge certificate of such alien, or person owing permanent allegiance to the United States, or the certificate of service showing good conduct, signed by a duly authorized officer, or by the masters of said vessels, shall be deemed prima facie evidence to satisfy all of the requirements of residence within the United States and within the State, Territory, or the District of Columbia, and good moral character required by law, when supported by the affidavits of two witnesses, citizens of the United States, identifying the applicant as the person named in the certificate or honorable discharge, and in those cases only where the alien is actually in the military or naval service of the United States, the certificate of arrival shall not be filed with the petition for naturalization in the manner prescribed; and any petition for naturalization filed under the provisions of this subdivision may be heard immediately, notwithstanding the law prohibits the hearing of a petition for naturalization during 30 days preceding any election in the jurisdiction of the court. Any alien who, at the time of the passage of this act, is in the military service of the United States, who may not be within the jurisdiction of any court authorized to naturalize aliens, may file his petition for naturalization without appearing in person in the office of the clerk of the court and shall not be required to take the prescribed oath of allegiance in open court. The petition shall be verified by the affidavits of at least two credible witnesses who are citizens of the United States, and who shall prove in their affidavits the portion of the residence that they have personally known the applicant to have resided within the United States. The time of military service may be established by the affidavits of at least two other citizens of the United States, which together with the oath of allegiance may be taken in accordance with the terms of section 1750 of the Revised Statutes of the United States after notice from and under regulations of the Bureau of Naturalization. Such affidavits and oath of allegiance shall be admitted in evidence in any original or appellate naturalization proceeding without proof of the genuineness of the seal or signature or of the official character of the officer before whom the affidavits and oath of allegiance were taken, and shall be filed by the representative of the Government from the Bureau of Naturalization at the hearing as provided by section 11 of the act of June 29, 1906. Members of the Naturalization Bureau and

service may be designated by the Secretary of Labor to administer oaths relating to the administration of the naturalization law; and the requirement of section 10 of notice to take depositions to the United States attorneys is repealed, and the duty they perform under section 15 of the act of June 29, 1906 (34 Stat. L. pt. 1, p. 506), may also be performed by the commissioner or deputy commissioner of naturalization: *Provided*, That it shall not be lawful to make a declaration of intention before the clerk of any court on election day or during the period of 30 days preceding the day of holding any election in the jurisdiction of the court: *Provided further*, That service by aliens upon vessels other than of American registry, whether continuous or broken, shall not be considered as residence for naturalization purposes within the jurisdiction of the United States, and such aliens can not secure residence for naturalization purposes during service upon vessels of foreign registry.

During the time when the United States is at war no clerk of a United States court shall charge or collect a naturalization fee from an alien in the military service of the United States for filing his petition or issuing the certificate of naturalization upon admission to citizenship, and no clerk of any State court shall charge or collect any fee for this service unless the laws of the State require such charge to be made, in which case nothing more than the portion of the fee required to be paid to the State shall be charged or collected. A full accounting for all of these transactions shall be made to the Bureau of Naturalization in the manner provided by section 13 of the act of June 29, 1906.

Eleventh. No alien who is a native, citizen, subject, or denizen of any country, state, or sovereignty with which the United States is at war shall be admitted to become a citizen of the United States unless he made his declaration of intention not less than two nor more than seven years prior to the existence of the state of war, or was at that time entitled to become a citizen of the United States, without making a declaration of intention, or unless his petition for naturalization shall then be pending and is otherwise entitled to admission, notwithstanding he shall be an alien enemy at the time and in the manner prescribed by the laws passed upon that subject: *Provided*, That no alien embraced within this subdivision shall have his petition for naturalization called for a hearing, or heard, except after 90 days' notice given by the clerk of the court to the Commissioner or Deputy Commissioner of Naturalization to be present, and the petition shall be given no final hearing except in open court and after such notice to the representative of the Government from

the Bureau of Naturalization, whose objection shall cause the petition to be continued from time to time for so long as the Government may require: *Provided, however*, That nothing herein contained shall be taken or construed to interfere with or prevent the apprehension and removal, agreeably to law, of any alien enemy at any time previous to the actual naturalization of such alien; and section 2171 of the Revised Statutes of the United States is hereby repealed: *Provided further*, That the President of the United States may, in his discretion, upon investigation and report by the Department of Justice fully establishing the loyalty of any alien enemy not included in the foregoing exemption, except such alien enemy from the classification of alien enemy, and thereupon he shall have the privilege of applying for naturalization; and for the purposes of carrying into effect the provisions of this section, including personal services in the District of Columbia, the sum of \$400,000 is hereby appropriated, to be available until June 30, 1919, including travel expenses for members of the Bureau of Naturalization and its field service only, and the provisions of section 3679 of the Revised Statutes shall not be applicable in any way to this appropriation.

Twelfth. That any person who, while a citizen of the United States and during the existing war in Europe, entered the military or naval service of any country at war with a country with which the United States is now at war, who shall be deemed to have lost his citizenship by reason of any oath or obligation taken by him for the purpose of entering such service, may resume his citizenship by taking the oath of allegiance to the United States prescribed by the naturalization law and regulations, and such oath may be taken before any court of the United States or of any State authorized by law to naturalize aliens or before any consul of the United States, and certified copies thereof shall be sent by such court or consul to the Department of State and the Bureau of Naturalization, and the act (Public, 55, 65th Cong.) approved October 5, 1917, is hereby repealed.

Thirteenth. That any person who is serving in the military or naval forces of the United States at the termination of the existing war, and any person who before the termination of the existing war may have been honorably discharged from the military or naval services of the United States on account of disability incurred in line of duty, shall, if he applies to the proper court for admission as a citizen of the United States, be relieved from the necessity of proving that immediately preceding the date of his application he has resided continuously within the United States the time required by law of other aliens, or within the

State, Territory, or the District of Columbia for the year immediately preceding the date of his petition for naturalization, but his petition for naturalization shall be supported by the affidavits of two credible witnesses, citizens of the United States, identifying the petitioner as the person named in the certificate of honorable discharge, which said certificate may be accepted as evidence of good moral character required by law, and he shall comply with the other requirements of the naturalization law.

No attempt has been made to recodify subdivisions 8, 9, and 10 of the act of May 9, 1918. New subdivisions here proposed begin with the eleventh.

By the proposed eleventh subdivision it is attempted by statute to fix an educational test that candidates must meet to entitle them to naturalization. This provision follows almost word for word resolutions adopted on this subject by the 1923 California State American Legion convention and the National American Legion convention held during the same year.

At present there is nothing in the statute governing this subject. It is true that as a part of the oath of allegiance the petitioner declares that he will support and defend the Constitution of the United States. It is equally true that a man can not be attached to something with which he is not acquainted. Therefore it is a practice of certain courts to impose an educational qualification. There is, however, up to the present time no statutory requirement governing this matter, and as a consequence there is no uniformity of practice. In one court there may be a rigid test, in another none at all. The need of such a test as is here proposed is graphically portrayed by an article appearing in a recent issue of the San Francisco Examiner, one of the great Pacific coast newspapers. In reporting the proceedings in a Federal court of California this newspaper quoted the judge verbatim as disposing of a case on the following questions and responses:

"Have you ever heard of George Washington?"

"No."

"Do you know who Abraham Lincoln was?"

"No; but I have five children."

"I guess that really counts for more in good citizenship," the judge replied, as he admitted him.

The Government was, of course, without right or remedy in this or any other like case, and was, of course, helpless in so far as objecting to the naturalization of this candidate on the showing made by such candidate. The provisions of the law proposed are designed to give the people of the United States something to say on the subject through appropriate legislation prescribing reasonable educational tests.

The second paragraph of the proposed eleventh subdivision is likewise based upon resolutions of the American Legion convention above referred to. The need of this legislation is made very clear by the court decisions, some of which declare ineligible for naturalization those who, because of their alien status, would not fight in the war against Germany, while other tribunals hold that a refusal to fight does not in any way affect the eligibility of a petitioner to become naturalized. Some courts hold that a man who refused to fight in time of war can never be naturalized; others that such exemption claims bar naturalization only for a period of years. These conflicting decisions in themselves warrant this proposed legislation, particularly when we stop to consider that by law the rule of naturalization shall be uniform. The cases favoring denial of those who will not fight follow:

In re Gustavson (300 Fed. 251); In re Bevelacqua (295 Fed. 862); In re Pitto (293 Fed. 200); In re Linder (292 Fed. 1001); In re D— (290 Fed. 863); Petition of Escher (279 Fed. 792); In re Shanin (278 Fed. 739); Hauge v. United States (276 Fed. 113); In re Roepner (274 Fed. 490); In re Rubin (272 Fed. 697); In re Trachel (271 Fed. 779); In re Tomarchio (269 Fed. 400); In re Silberschutz (269 Fed. 779); and In re Loen (262 Fed. 166).

Those holding that refusal to fight does not constitute an objection to naturalization are:

United States v. Slem, C. C. A. (299 Fed. 582); In re Slem (284 Fed. 838); In re Levy (278 Fed. 621); and In re Miegel (272 Fed. 688).

By referring to the first decision, which is an appellate court decision, it will be noted that the court ruled in this as it did for the reason that there is no statute specifically governing the subject, which further emphasizes the urgent need of the legislation here proposed.

The last paragraph of the proposed said eleventh subdivision is likewise based upon legislation urged by the American Legion in its 1923 convention. It enables those of the public who have any real ground for objecting to the naturalization of a given applicant to appear in court in such a status as to insure them a hearing.

The first paragraph of the proposed twelfth subdivision is made necessary by this condition. The Supreme Court of the United States has declared members of certain races ineligible to citizenship. So far as the naturalization statute is concerned, however, there is nothing to prevent members of any of the races above referred to from at will declaring their intention to become citizens of the United States. This situation requires correction, and correction can only be accomplished through specific legislation.

The second paragraph of this proposed amendment is legislation most urgently needed. Since immigration has been restricted it is a matter of common knowledge that aliens have streamed across the Canadian and Mexican borders in vast hordes in utter disregard of the immigration laws and without compliance therewith. One of the first steps likely to be taken by such a person is to file his declaration of intention, this with a view to fighting deportation in the event of apprehension. Aliens thus illegally in this country should be deprived of the privilege of declaring their intention so long as their status as illegal-entry men continues. This proposed legislation accomplishes this purpose and likewise provides a means for the Department of Labor to locate aliens illegally in the United States under the immigration laws.

The third paragraph of the proposed amendment likewise represents a need so far as permanent legislation is concerned. While there are a few court decisions declaring a candidate must be 21 years of age, and while this may be the accepted practice, yet there is nothing to prohibit a court from departing from such practice and from naturalizing a minor.

The need of the last paragraph of the proposed twelfth subdivision is emphasized by the litigation that has grown out of the fact that there is now nothing in the statute specifically defining the jurisdiction of the State courts in naturalization causes. The weight of judicial authority is as defined in the proposed legislation. (United States v. Koopmans, 290 Fed. 545; petition of Briese, 267 Fed. 600; United States v. Johnson, 181 Fed. 429; United States v. Wayer, 163 Fed. 650; and United States v. Schurr, 163 Fed. 648.) Once in a while, however, a court refuses to follow this ruling. (United States v. Stoller, 180 Fed. 910.) The reason why the jurisdiction should be restricted as above provided is well stated in the Johnson case, *supra*, in the following language:

The clear import, it seems to me, of the provision of the naturalization act, "that the naturalization jurisdiction of all courts herein specified—State, Territorial, and Federal—shall extend only to aliens resident within the respective judicial districts of such courts," is that the alien applicant shall reside in the county where the district court acting on the application is held. This view best accords with the remedial policy of the present law that for purposes of inspection by the Bureau of Immigration and Naturalization into the grant of certificates of naturalization the record thereof may point to the residence of the party as of the county where the certificate has been granted and where the public and parties interested may be expected to take notice of the records of the district court having jurisdiction over the person as well as the subject matter.

Respecting the proposed thirteenth subdivision, it may be stated that at practically every session of Congress since the act of 1906 became law it has been urged that provision be made for the taking of depositions to establish residence in the State in which the candidate files his application. In far Western States, where distances are vast and where seasonal occupations prevail, there are great numbers of men who of necessity must move about within the State. As the law now stands they can not resort to cumulative proof, and this precludes them from procuring naturalization.

They can not take the depositions of the witnesses at their various places of residence, nor can they bring these witnesses into court to orally testify. They are restricted to two witnesses who must possess knowledge of the candidate's residence and character for the whole of the five years that precede the date of making their applications. Had they lived in States other than the one in which it was desired to petition, this

residence at points other than their homes could be established by depositions. The legislation proposed follows established Federal practice in deposition-testimony matters and fully protects the interests of the United States.

The first paragraph of the proposed fourteenth subdivision is self-explanatory. It provides that an alien who fraudulently enters the United States through evasion of the immigration laws shall not be confirmed in his right to remain in the United States through his being made a citizen by naturalization. This is a reasonable supplement to the immigration laws.

The second paragraph of the proposed amendment is suggested by the provision in the new immigration bill which places the burden of proof upon the alien concerned. The cases that most readily fall within this provision are cases like the United States v. Wursterbarth, 249 Fed. 395; Schurmann v. United States, 264 Fed. 917, 42 S. Ct. 185, 257 U. S. 621, and United States v. Herberger, 272 Fed. 278. Likewise, cases such as United States v. Sweiglin, 254 Fed. 884; United States v. Stuppiello, 200 Fed. 483; and United States v. Olsen, 272 Fed. 706, are directly in point.

But after all is said and done, these decisions represent judge-made law, and the rule therein declared can ordinarily only be enforced during the time of war fervor. This is well illustrated by United States v. Woerndle, 288 Fed. 47, in which a naturalized German permitted a German spy to use his American citizenship papers in the furtherance of the said spy's hostile activities.

The proposed legislation therefore merely gives legislative form to what the overwhelming number of courts have declared should be the law. This proposed provision will also care for cases where aliens of the most vicious type, such as pimps and bawdyhouse keepers, procure naturalization, and who under present conditions can only be stripped thereof at a great expenditure of money and time by the United States. Decisions such as United States v. Raverat (222 Fed. 1018), United States v. Lelles (236 Fed. 784), and United States v. Milder (289 Fed. 572) have a direct bearing on the situation under discussion. By making specific statutory provision for cases of this kind any doubt as to the Government's right to revoke naturalization will be set at rest and will make much easier the task of the United States in confining citizenship to naturalized aliens who are unquestionably men of good moral character.

The third paragraph of the proposed fourteenth subdivision deals with aliens who abandon their families abroad and who conceal facts relating thereto and who appear among those who seek naturalization. Once admitted to citizenship it is difficult indeed for the Government to recall the grants of naturalization conferred. Cases such as United States v. Albertini (206 Fed. 136) and United States v. Kichin (276 Fed. 818) illustrate this situation. The legislation proposed is amply warranted by the experience of the past.

The proposed fourth paragraph is essential to make effective the preceding paragraphs of the section.

Paragraph 1 of the fifteenth subdivision calls for certificates of arrival in naturalization cases to contain the personal description of the alien named therein. Without this personal description there is no opportunity afforded the courts of naturalization to really identify the petitioner with the record of landing adduced. A provision such as here proposed will eliminate the last possible avenue of fraud through appearing under the record of another.

The second paragraph of the proposed fifteenth subdivision is offered as a result of the situation portrayed in United States v. Janke, 183 Fed. 277. In that case a woman who had been dead for some four years petitioned for naturalization. Her application was verified by two citizens, who identified her as the person named in the petition. Later on hearing was had on this petition in open court, so far as the records show, and the petitioner and witnesses appeared and were examined in open court as to their qualifications. Following this there was an order of the court entered naturalizing this deceased woman, and a certificate of naturalization was actually issued in her name.

Later the Government, undertaking to punish this fraud through criminal prosecution, was defeated on the ground that the witnesses did not understand English and therefore could not be held to personal responsibility for their acts in signing the fraudulent petition made up in this case and their subsequent acts. The situation where ignorance of what is going on in a naturalization case can be successfully pleaded as a bar to conviction for crime should be corrected. A rule requiring the naturalization to occur within the sight and hearing of his witnesses and that these witnesses shall be able to speak and understand English will accomplish this. Thereby the standard

of citizenship will be greatly raised. Fraud will also be all but done away with, or where not done away with the Government will be able to successfully prosecute.

Section 2 of this proposed bill is designed to deal with the following situation. In the seventh subdivision of the emergency act of May 9, 1918, it is provided as follows:

That it shall not be lawful to make a declaration of intention before the clerk of any court on election day or during the period of 30 days preceding the day of holding any election in the jurisdiction of the court.

Whatever war-time purpose this legislation was intended to serve is not known. The situation is, however, that naturalization court clerks have for years overlooked this provision of law, as a result of which great numbers of declarations have been issued in violation thereof. This is true in my own congressional district, and I understand is true generally throughout the United States.

The legislation is legislation that should be repealed, and the declarations issued in violation thereof should be validated, and this is the intent of the proposed section 2.

By section 3 of this proposed bill repeal of four portions of the acts is provided for. The first of these has to do with legislation designed to care for Civil and Spanish-American War veterans. So many years have elapsed since the Civil War that it is inconceivable that there are many more veterans of that war of alien birth who have not been naturalized on their soldier record. The Spanish-American War veterans are cared for by the proposed seventh subdivision. In fact, that subdivision goes further and cares for all of those who saw war service prior to the World War, this through inclusion of the Philippine rebellion and the Boxer uprising. The second portion of law which it is sought to repeal deals with the Naval Reserve. Members of this reserve are provided for in the aforesaid proposed seventh subdivision.

The third provision of law to be repealed deals with the status of neutral aliens who during the war evaded military service by claiming alienage. Their cases are dealt with by paragraph 2 of the proposed eleventh subdivision.

The last provision of law, the repeal of which is sought, extended the provisions of the seventh subdivision of the act of May 9, 1918, for one year after all of our troops returned from abroad. This provision has lapsed by expiration of time and should be repealed.

Section 4 undertakes to deal with a general situation, which is that clerks of the courts in large centers, through lack of clerical force, are unable to give the public the service that should be provided in accepting the filing of declarations of intention and petitions for naturalizations. The present law only allows a clerk to retain \$3,000 during any fiscal year. After he has earned this sum, he has to turn all of the remaining fees collected over to the United States. Should clerks be allowed to retain one-half of all the fees they collect there would be no loss by the Government, as a greater volume of business would be done, which would mean a greater collection of fees. As said fees would be ample to provide all of the clerical assistance needed, such assistants would be employed, could these fees be so retained. The Government at no cost to itself would thus be relieved of all burdens in providing clerical aid in the larger courts, and at the same time the public would receive vastly improved service.

By paragraph 2 of this proposed section the filing fee for declarations of intention is raised from \$1 to \$4. There are a great many more aliens who annually declare their intention to become citizens than who actually seek naturalization. This is due to the laws of various States and municipalities that require those employed on public works to either be citizens or to have declared their intention to become such. These declarants file their applications for no other purpose than to secure employment that by law is confined to American citizens or those who in good faith intend to become such. The fee of \$1, now fixed, does not pay the clerical cost of preparing a declaration, and the thousands of aliens who every year declare their intention with no thought of becoming naturalized thereon, should no longer be accorded the privilege of securing these papers at a financial loss to the taxpayers, as the taxpayers must make up the difference between the cost of the issuance of any given declaration of intention and the fee paid for execution of such instrument.

All of which is respectfully submitted.

The bill (H. R. 9816) reads as follows:

A bill (H. R. 9816) to amend the act of June 29, 1906 (34 Stat. L. pt. 1, p. 596), as amended in sections 16, 17, and 19 by the act of Congress approved March 4, 1909 (35 Stat. L. pt. 1, p. 830); by

the act of Congress approved March 4, 1913 (37 Stat. L. pt. 1, p. 736), creating the Department of Labor; by the act of Congress approved May 9, 1918 (Public. No. 144, 65th Cong., 2d sess.); and by the act of Congress approved September 22, 1922 (U. S. Stats. pt. 1, chap. 411, p. 1921, 67th Cong., 2d sess.)

Be it enacted, etc., That the seventh, eleventh, twelfth, and thirteenth subdivisions of section 4 of the act of June 29, 1906 (34 Stat. L. pt. 1, p. 596), as amended, are repealed, and in lieu thereof the following provisions are substituted:

"Seventh. That any alien eligible to naturalization who has enlisted, or may hereafter enlist, in any one of the regularly established armed forces of the United States, and who has been honorably discharged therefrom by reason of expiration of his term of service or because of injuries or sickness actually incurred in line of duty, may, if he petitions within one year from the date of his discharge, be naturalized without proof of residence in the United States of more than one year preceding the date of his application, and without the production of a declaration of intention, upon his compliance with the other terms of the naturalization law: *Provided*, That time spent in the Panama Canal Zone, the Philippine Islands, or other places outside the boundaries of the United States in service with the armed forces of the United States may be regarded as residence within the United States in connection with petitions for naturalization filed under this provision, but may not be so regarded in connection with any other class of cases: *Provided further*, That a veteran of the World War who did not prior to November 11, 1918, refuse to be naturalized while in the service or who did not prior to the armistice seek release from the service on the ground of alienage, or a veteran of the Spanish-American War, Philippine rebellion, or Chinese relief expedition, may be naturalized under the terms of the foregoing provision provided he files his petition within one year from the date of the passage of this act: *And provided further*, That upon the declaration of war by Congress the President of the United States may during the emergency, by proclamation and under such safeguarding regulations as he may promulgate, authorize designated courts to immediately naturalize those aliens who have been inducted into the armed forces of the United States; that he shall be empowered to waive court costs in such naturalizations, as well as the requirement of at least one year's United States residence; and that the Bureau of Naturalization and its field force shall be the agency designated to handle the emergency war-time naturalization authorized by this provision.

"That during the time of war no enemy alien may be naturalized, nor may an American citizen expatriate himself by becoming naturalized a citizen or subject of an enemy country.

"That every alien seaman eligible to naturalization who has declared his intention to become a citizen of the United States, and who has thereafter honorably served continuously for three years upon any vessel of the United States Government, or on board of ocean-going merchant or fishing vessels of the United States, petition for naturalization at his home port, without proof of United States residence other than proof of the service here prescribed, upon compliance with all other requirements of the naturalization law: *Provided*, That petition is filed within six months from the date of last discharge: *And provided further*, That only in the case of petitions filed under this provision of law may time spent upon vessels of the United States be regarded as residence within the United States.

"Eleventh. That no alien may be naturalized who does not establish at the final hearing on his petition in open court, to the satisfaction of the court and the United States, that he proficiently reads and writes English, and that he possesses a true comprehension of the Declaration of Independence and the Constitution of the United States, and a knowledge of civics and American history: *Provided*, That naturalization procured or conferred without compliance with the foregoing requirement shall be deemed illegally secured.

"That no person who has asked for or sought exemption from military service in the United States armed forces in any wars in which this country has been (or may hereafter be) engaged, on the grounds of his conscientious objection or enemy or neutral alienage, shall be naturalized.

"That examiners of the Bureau of Naturalization may, in their appearance before the courts in naturalization causes as the representatives of the United States, associate with them members of any patriotic organization under such regulations as the Secretary of Labor may prescribe.

"Twelfth. That hereafter no alien who is not a free white person or of African nativity or descent may file a declaration of intention to become a citizen of the United States.

"That no alien may file a declaration of intention until he has established that his admission into the United States was in

accordance with the immigration laws, and for the purpose of permanent residence therein. The Secretary of Labor shall make such regulations as may be necessary for the enforcement of this provision.

"That no alien may petition for naturalization until after having attained the age of 21 years.

"That the jurisdiction of State courts in the filing of declarations of intention and petitions for naturalization shall be limited to bona fide residents of the county or municipality in which the court concerned sits.

"Thirteenth. That any alien who, by reason of his residence at widely separated points within the State in which he seeks naturalization, is unable to produce two witnesses competent from observation and personal contact to testify to his residence and good moral character for the five years continuously and immediately preceding his application shall be given the benefits of section 10 of the act of June 29, 1906: *Provided*, That he has resided within the county or municipality in which he applies for naturalization for not less than one year continuously immediately preceding the filing of his petition: *And provided further*, That the State residence remaining to be covered by deposition testimony represents residence at a place or places 100 miles or more distant from the court in which naturalization is sought.

"Fourteenth. That no alien may be naturalized who has not entered the United States at a regularly established port of entry, for the purpose of permanent residence, and who has not at the time of such entry fully complied with the immigration laws.

"That the burden of proof shall be upon every alien seeking naturalization, and his witnesses, to fully establish that such alien has met all requirements of the naturalization laws and that said applicant is in every respect entitled to naturalization; that it shall be the duty of each such alien and witness to disclose to the United States every matter that may in any way bear upon said alien's eligibility to naturalization; and that the admission to citizenship of every alien shall be conditioned on his continued loyalty to the United States, law-abiding conduct, and behavior as a person of good moral character.

"That no alien may be naturalized who has abandoned his wife and minor child or children, or wife, or child or children, in the old country, or who has prior to his petitioning for naturalization failed or neglected to bring to the United States his wife and minor child or children, or wife, or child or children.

"That the United States may, by suit in equity, revoke any naturalization secured, or held, where such naturalization was so secured, or is held, in breach of any of the foregoing provisions.

"Fifteenth. That every certificate of arrival issued for naturalization purposes shall, in addition to the information now required to be recited therein, contain the personal description of the alien concerned as shown by the immigration records made at the port of entry at the time of the admission of such alien to the United States for the purpose of permanent residence therein, and any petition for naturalization not supported at the time of its filing by such a certificate shall be void.

"That every petition for naturalization shall be signed by the applicant and verifying witnesses in the presence of each other; that the examination of the applicant and his witnesses in open court at the time of the final hearing on any petition for naturalization shall be in the presence of and within the hearing of each other; that the verifying witnesses on a naturalization application shall be able to speak and to read and write English; and that at least one verifying witness on each petition for naturalization shall be a native-born citizen of the United States."

SEC. 2. All declarations of intention issued since May 9, 1918, by clerks of courts of competent naturalization jurisdiction within the period of 30 days preceding the holding of any election in the jurisdiction of the court are hereby declared valid in so far as the issuance of such declarations of intention within the prohibited period is concerned, but shall not by this act be further validated or legalized.

SEC. 3. That the portion of section 2 of the act of May 9, 1918 (Public No. 144, 65th Cong.), reading:

"That as to all aliens who, prior to January 1, 1900, served in the Armies of the United States and were honorably discharged therefrom, section 2166 of the Revised Statutes of the United States shall be and remain in full force and effect, anything in this act to the contrary notwithstanding."

is repealed.

The act of May 22, 1917 (Public Laws, 65th Cong., 1st sess., 1917, p. 84), providing for the separate naturalization of members of the Naval Reserve Force, is repealed.

So much of the act of July 9, 1918 (40 Stat. L. pt. 1, p. 885), as reads:

"*Provided*, That a citizen or subject of a country neutral in the present war who has declared his intention to become a citizen of

the United States shall be relieved from liability to military service upon his making a declaration, in accordance with such regulations as the President may prescribe, withdrawing his intention to become a citizen of the United States, which shall operate and he held to cancel his declaration of intention to become an American citizen, and he shall forever be debarred from becoming a citizen of the United States,"

is repealed.

So much of the act of July 19, 1919 (41 Stat. L. pt. 1, p. 222), as reads:

"Any person of foreign birth who served in the military or naval forces of the United States during the present war, after final examination and acceptance by the said military or naval authorities, and shall have been honorably discharged after such acceptance and service, shall have the benefits of the seventh subdivision of section 4 of the act of June 29, 1906 (34 Stat. L. pt. 1, p. 596), as amended, and shall not be required to pay any fee therefor; and this provision shall continue for the period of one year after all of the American troops are returned to the United States,"

is repealed.

SEC. 4. Clerks of State courts exercising naturalization jurisdiction shall retain one-half of all naturalization fees collected by them, and such fees shall be full compensation for services performed by them in the exercise of naturalization jurisdiction by their courts. So much of section 13 of the act of June 29, 1906, as amended, as is inconsistent with this provision is repealed. The provision of the act of June 12, 1917 (40 Stat. L. pt. 1, p. 171), relating to section 13 of the act of June 29, 1906, as amended June 25, 1910, is repealed.

That from and after 30 days from the passage of this act the fee for filing a declaration of intention shall be \$4.

DEPARTMENT OF INTERIOR APPROPRIATION BILL

Mr. CRAMTON. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 10020, making appropriations for the Department of the Interior for the fiscal year ending June 30, 1926, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. SANDERS of Indiana in the chair.

Mr. CHINDBLOM. Mr. Chairman, may I ask how much time remains for general debate?

The CHAIRMAN. The gentleman from Michigan has 1 hour and 24 minutes and the gentleman from Oklahoma has 1 hour and 45 minutes remaining.

Mr. CARTER. Mr. Chairman, I yield 15 minutes to the gentleman from Washington [Mr. HILL].

Mr. HILL of Washington. Mr. Chairman, I want to consume the time allotted to me in explaining an item which I think should be included in the appropriation bill now under consideration. It has reference to the claim of Stevens and Ferry Counties, in the State of Washington, for one hundred and fifteen thousand and some dollars in lieu of taxes on Indian allotments in the north half of the Colville Indian Reservation located partly in these two counties.

By Executive order, made in 1872, the Colville Indian Reservation located in the Territory, now the State of Washington, was established. In 1890 a commission was sent out to the various Indian reservations in the country, including the Colville Reservation, for the purpose of negotiating with these Indians, to the end that certain of the lands might be restored to the public domain. This was known as the Fullerton Commission. That commission visited the Colville Reservation in that year and reported back the result of their efforts with reference to that particular reservation. Based on that report and on the recommendation of the Secretary of the Interior, an act was passed July 1, 1892, restoring to the public domain what is known as the north half of the Colville Indian Reservation.

I am going to read to you a part of that act that you may get the particular wording applying to this particular restoration. I am quoting in reading this from the report of the Secretary of the Interior under the date of May 16, 1921, to the chairman of the Committee on Indian Affairs of the House.

I quote from the report as follows:

The claims of Stevens and Ferry Counties are based on the act of July 1, 1892 (27 Stat. L. 62), which act provided that the net proceeds arising from the sale of the north half of the Colville Reservation, in these counties, containing approximately 1,500,000 acres of land, ceded by the Indians and restored to the public domain, should be—

"SEC. 2. * * * set apart in the Treasury of the United States, for the time being but subject to such further appropriation for public

use as Congress may make, and that until so otherwise appropriated may be subject to expenditure by the Secretary of the Interior from time to time in such amounts as he shall deem best, in the building of schoolhouses, the maintenance of schools for such Indians, for the payment of such part of the local taxation as may be properly applied to the lands allotted to such Indians as he shall think fit, so long as such allotted lands shall be held in trust and exempt from taxation, and in such other ways as he may deem proper for the promotion of education, civilization, and self-support among said Indians."

That, gentlemen of the committee, is the particular section of the act upon which this claim is based. I want to call your attention to this distinctive feature of that particular section, distinguishing it from the wording of other acts applying to the restoration to the public domain of other Indian lands. We are all agreed that it is not customary that Indian lands should be taxed, and this matter, strictly speaking, is not a tax on Indian land, but it provides for the payment by the Government to these counties in lieu of taxes on Indian land. It is based on the statute, and I want to read it so that you may get the distinction:

for the payment of such part of the local taxation as may be properly applied to the lands allotted to such Indians as he shall think fit.

You will not find this language in any other act restoring Indian lands to the public domain.

I call attention to that fact because in the report of this committee the committee have said in their report, page 3:

An item of \$115,767.07 estimated for payment of taxes to certain counties in the State of Washington is not recommended, as a precedent would be established by such payment that might hereafter be held to justify many millions in similar payments in many States.

They seem to think it might establish a precedent, and I can sympathize with that attitude, provided the conditions exist upon which to base such a statement. I am inclined to think the committee did not have full information or they would not have made the statement that it would establish a precedent, because I say that you can not find the language about payment of taxes contained in the act of 1892, referred to, in any other act restoring Indian lands to the public domain. So it can only apply in the case of the restoration to the public domain of lands in the north half of the Colville Indian Reservation.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. HILL of Washington. Yes.

Mr. CARTER. As I understand this proposition, or as it was explained to the committee, there was some kind of an understanding with the Indians by which a certain amount of money, the result of the sales of their lands, which they had ceded, would be used for their support and civilization and for the payment of taxes. That is true, is it not?

Mr. HILL of Washington. Yes.

Mr. CARTER. Then, I understand that all that money was used for the support and civilization of the Indians.

Mr. HILL of Washington. I do not so understand.

Mr. CARTER. And that there is now none of that money in the Treasury. Furthermore, that this item calls for a direct appropriation from the Treasury to pay taxes for Indian lands which have been exempted. If the gentleman's case is on a different basis from the cases of Indian lands in other States, it may be entitled to some consideration, but if it is on the same basis as Indian lands in other States, then I say to him that if it were adopted we would be entering upon a policy here, setting a precedent, which, if we would follow it, would cost this Government not less than \$100,000,000 annually in the payment of taxes on Indian lands that have been exempted in all the different States of the country. Take, for instance, Arizona and New Mexico. Some of the counties in those States have practically no taxable lands on account of the land in them being Indian lands and exempt from taxation. Take the State of South Dakota. That State has counties in it which can not be organized, which have no officials on account of the lands being nontaxable, being Indian lands. In Oklahoma it would cost not less than \$50,000,000 annually to carry out this policy of taking care of the taxes on the Indian lands which are exempted. As I say, if the gentleman's case is upon a different basis from those which I have in mind, then it ought to have consideration, but if it is on the same basis as lands in other States, and if this money is to be taken directly from the Treasury without any reimbursement from the Indian funds, then certainly we would be embarking upon a policy about which we ought to hesitate before giving it our sanction.

Mr. HILL of Washington. It is not the gentleman's understanding that there are any similar provisions as to these other reservation lands providing for the payment of local taxation, is it? The gentleman does not understand that there is a similar provision to this in respect to other Indian lands which have been restored to the public domain, providing for local taxation on Indian allotments?

Mr. CARTER. I understand the gentleman's proposition to be that these lands were exempt from taxation, as all Indian lands are, and that afterwards the Indians ceded a part of their reservation, one of the conditions being that the money for which those lands were sold to the white settlers should be used for the support and civilization of the Indians and for the payment of taxes on lands that have been exempted to those counties, but that all of the money that was collected for the sale of these lands has been expended, that the fund has been exhausted in the support and civilization of the Indians, and that there is now no money in that fund, and that this calls for a direct appropriation from the Treasury.

Mr. HILL of Washington. Yes; it calls for a direct appropriation from the Treasury.

Mr. CARTER. If that is true, that would place them upon the same basis exactly as all other Indian lands in the different States.

Mr. HILL of Washington. I shall be glad to direct my attention to that phase; but let me repeat that this is the only act in which language is used providing for the payment of taxes on Indian lands by the Government—that is, by the money from this special fund.

Mr. CARTER. Does the gentleman know whether this fund has been exhausted?

Mr. HILL of Washington. I am coming to that. It will take a little time to explain it. There were a million and a half acres ceded to the Government, or restored to the public domain, from the north half of the Colville, and that was land remaining after the Indians had selected their allotment. The homesteaders were permitted to go in there and take this land, and upon the payment of the usual land-office fee, plus a dollar and a half an acre, the land was homesteaded, and with the usual residence of five years the homesteader could secure a patent. The net proceeds of the sales of these lands went into a special fund set apart for the purpose to which I have referred here; that is, the net proceeds of sales were put into a special fund and out of that fund the Secretary of the Interior from time to time was authorized to pay for the building of schoolhouses, the maintenance of schools for the Indians, and for the payment of such part of the local taxation as may be properly applied to lands of such Indians. That was in a special fund, set apart in the Treasury of the United States for the time being, but subject to such further appropriation for public use as Congress may make. The gentleman is following me?

Mr. CARTER. Yes.

Mr. HILL of Washington. It is set apart in this special fund for the use to which I have referred. It is to stay in that fund until Congress shall otherwise appropriate it. There was accumulated in that fund from 1900, when the Indian reservation was opened by proclamation of the President, until some time about the year 1915, a little less than \$400,000. A part of that money was spent in building schoolhouses and maintaining schools for Indians, and no part was spent for local taxation or for the building of roads or any improvements that went to the civilization of these Indians. It stayed in that fund, and Congress never appropriated it for any other purpose, but the Comptroller of the Treasury, without any act of Congress, covered it into the General Treasury of the United States and it went into the reclamation fund, as the proceeds of the sales of all lands of the public domain in that State go, and that, too, without any authorization from Congress. In other words, the special fund, so far as any act of Congress is concerned appropriating it otherwise, still exists, but in fact it has been covered into the General Treasury and it is no longer available. For that reason we had to come to Congress and get this act authorizing the payment by the Government of that money. Had it not been for the fact that this money was diverted from that special fund, without any act of Congress but simply through the erroneous act of the Comptroller of the Treasury, I contend, then the Secretary of the Interior would have the money to pay these claims and would not require anything of Congress to authorize him to do it.

Mr. CARTER. Now, is the gentleman sure this money has been diverted or is not this the fact: There were two different purposes for which the money could be used under the understanding with the Indians, to wit, in general terms, support and civilization and payment of taxes. Now, is it not a fact

that all the money has been consumed in support and civilization rather than some having been diverted?

Mr. HILL of Washington. No; it is not.

Mr. CARTER. Can the gentleman tell the House how much—

Mr. HILL of Washington. I can not tell how much, but I will tell the gentleman this: In 1903 instead of these homesteads being on a sale basis they were made free homesteads. In 1906 the Government bought outright a million and a half acres of land involved in the previous transaction at an agreed price of a million and a half dollars, and that was paid to the Indians, and out of that money was reserved the unexpended balance of the moneys in this special fund.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HILL of Washington. Can the gentleman from Oklahoma yield me five more minutes?

Mr. CARTER. I yield the gentleman five additional minutes.

Mr. HILL of Washington. So the fund was not exhausted, but they deducted it from the million and a half dollars that constituted the purchase price for this land, and it is in the Treasury of the United States Government; it was not expended. There is an abundance of money there to pay this claim. It should be made available for that purpose. Now, I want to say in the short time remaining that this claim has been thoroughly investigated by various committees. In February, 1920, the Indian appropriation bill carried a provision that the Secretary of the Interior should make an investigation of this claim in the field, and he sent one of his very best men to make the investigation, and he investigated and reported back that this claim should be paid, and the Secretary of the Interior embraced that in his report, and it was reported to the House and Senate Indian Affairs Committees, and upon that report were based bills for the payment of these moneys.

The matter has been twice investigated by the Senate Committee on Indian Affairs and reported favorably. It has been twice passed by the Senate. It has been investigated by the House Committee on Indian Affairs. The bill was laid last session before the subcommittee, and that committee unanimously reported it favorably, and the whole committee favorably reported in a unanimous report made to this House. It was passed; it has been approved by three Secretaries of the Interior; it has been passed by the Director of the Budget; and it comes here to this House with all of this approval back of it. And I ask the favorable consideration of the item at this time in this bill. I take it that the committee considering this bill did not have the time to investigate this item or did not have the data upon which to base approval of this item, or else they would not have found contrary to the reports of all these other investigating officials who had the same matter in charge. It can not become a precedent, because there is no other act relating to a similar subject that carries the wording of the statute upon which this claim is based. Hence you will not be confronted with the millions of dollars of claims which seems to be so greatly feared. I know we are all interested in economy. That was the strong theme of the President's address, but he said that the United States Government should pay its debts; and that is what we want now, that a debt of the United States Government be paid, and that the item in question be included in this bill. I shall not try to enter into the details of this matter, especially in the limited time allotted to me, to show you why the peculiar language as to payment of taxes was included in the act of 1892 and not in other similar acts. There is a peculiar condition obtaining in the north half of the Colville Reservation, which made it necessary to offer special inducement to settlers to go into that country. It has been extremely difficult to get settlers to go into that rugged country. Take Ferry County. To-day that county has only 14 per cent of its land on the tax rolls, and 86 per cent of the land is in Indian allotments, in forest reserves, and public domain. So, you see, the conditions were peculiar that gave a reason for this diversion from the usual and ordinary procedure in the matter of restoring Indian-reservation lands to the public domain.

I wish I had more time to go into that feature of it. I simply touched upon it in order to call your attention to the fact that there was a reason why this exception was made as to these lands.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. MURPHY. Mr. Chairman, I yield one hour to the gentleman from Ohio [Mr. BURTON].

The CHAIRMAN. The gentleman from Ohio is recognized for one hour.

Mr. BURTON. Mr. Chairman and gentlemen of the committee, under the latitude of general debate it is my desire to speak upon some lessons to be derived from the recent election.

Such a review will be helpful because we can thus interpret the will of the voters, whose Representatives we are, and recognize beacon lights to guide us in the future.

What, then, are some of the lessons of the recent election? In the first place, it is evident that the people of the United States are not disposed to adopt radical changes hastily. A sane conservatism survives. They still adhere to those fundamental principles contained in the Constitution and wrought in the structure of this Government. One fundamental principle should never be forgotten. It is to the effect that, while the will of the people must prevail and we must have faith that ultimately their judgment will be right, it is equally essential that the will of the people should be deliberately expressed after mature and careful consideration.

The avoidance of hasty action resulting from superficial consideration or under the influence of passion or prejudice is secured by the Federal Constitution in many ways, as, for example, by the creation of two legislative bodies, a Senate and a House. At the time of the Constitutional Convention of 1787 no less a person than Benjamin Franklin advocated only one. But his suggestion was rejected. Again, deliberate action is promoted by the veto power of the President and by a tenure of Cabinet officers not subject to termination by adverse votes of the legislative branch. In this last regard our system differs very materially from that of the governments of Europe. In the adoption of constitutional amendments there is required for submission a two-thirds vote of both Houses and then ratification by three-fourths of the States. Incidentally, in the negotiation of treaties there is a requirement that there shall be ratification by a two-thirds vote of the Members of the Senate who are present. Most important of all in securing the objects desired is the Supreme Court, intrusted with the power to determine the limits and boundary lines of executive and legislative authority and to pass upon the validity of laws enacted by Congress and the State legislatures.

It is well to remember that this Government of ours is not an advanced or radical democracy. It is rather a Republic in which the law-making power is vested in representatives. The stability of the Republic is fortified by checks and balances and by safeguards alike against overthrow by revolution or oppression by the tyranny of fleeting majorities.

The framers of the Constitution were reluctant to grant arbitrary power or the final determination of legal questions to either executive or legislative bodies. They were strongly impressed by the words of Montesquieu in his work, "The Spirit of the Laws": "There is no liberty if the power of judging be not separate from the legislative and executive powers." Thus the ideal was established of a government of laws and not of men. The one distinctive feature of our political system is a Supreme Court to act as a restraint, a mentor it may be called, upon both executives and legislators.

Another motive which aided in the notable victory of November last was a desire for stability both in the maintenance of existing institutions and of conditions in our industrial and social life. It was the thought of the people that, whatever may have been the faults of the present administration in either branch, it was unsafe to tread the path of experiment. Changes in control were not regarded as desirable unless there was an assurance of improvement, and neither of the two contending parties gave promise of such improvement. Again the present administration submitted its claims to the people with a record of achievement in matters both foreign and domestic which may well challenge comparison with any preceding administration.

Another lesson is to be found in the overwhelming victory of President Coolidge. The electorate are always prone to visualize in some prominent personality the embodiment of their ideals and aspirations. They have standards for leadership and thus they are often more interested in the individual candidate than in the principles set forth in party platforms. Such a personality was found in Calvin Coolidge. His courage, his conscientious regard for public duty, his plain but abundant common sense, all appealed to the men and women of the country. The arrows of slander and detraction fell harmless at his feet. His almost unprecedented vote was a tribute of popular confidence rarely vouchsafed to any political leader.

A most encouraging lesson can be derived from the support of President Coolidge in that, while blocs and minorities can threaten, and selfish and local interests may regard important national issues as subservient to personal advantage, a Presi-

dent who stands four-square for the general welfare is sustained when a myriad of votes are cast. In nothing is there greater danger to the body politic than in the power of persistent and well-organized groups to secure the enactment of measures which are contrary to the interest of the aggregate body of our citizenship. This is made possible by the fact that the united and vigorous support of a comparatively small number often seems to render more efficient aid to one seeking office than that of the inert and rarely aroused majority who take less interest in public affairs. The present disposition to secure such advantages is manifested by the great mass of propaganda much of which is calculated to mislead rather than to give accurate information, by the fact that Washington is filled with organizations of lobbyists who seek to overawe Congress for such objects as special privilege or favors, bonuses, larger salaries, and matters of individual or local concern. The late election with its 15,000,000 votes, approximately, for the successful candidate against 12,000,000 for all others, is a proof that the country still has supreme regard for courage and common honesty. [Applause.]

In this connection it may be said that a severe criticism can be made upon the political platforms of parties in the past in that they have been marked by a strenuous endeavor to include an almost infinite variety of views and interests. Thus, they promote the formation of groups and blocs. The result is a neglect of weighty problems of general concern which should stand out as high spots in the aims of all patriotic citizens. Among reforms which may be considered desirable both for convenience and salutary accomplishment, none would be more commendable than to lay emphasis upon a limited number of issues of grave importance with brevity in their statement.

The autumn of 1924 was not a favorable season for the muckraker or professional pessimist. The voters were not disposed to give much attention to numerous charges against public officials as the real issues of the campaign. This was not due to any lack of insistence upon honesty or absence of interest in the punishment of the guilty. It must be especially emphasized that dishonesty or failure of duty on the part of those in the public service, whether their station be high or low, must be relentlessly prosecuted and severely punished. There was a general belief that many of these accusations were made for political capital, and as the people were confident that President Coolidge would strenuously insist upon rectitude in official positions, they resented the baseless accusation that their Government was steeped in corruption. Any wholesale indictment of their public servants was regarded as an unjust reflection upon the American name and, in effect, an indictment of themselves. The judicious deplored the spread of scandals, which were circulated here and abroad. It is to be hoped that hereafter no anxiety for success in an election will afford an excuse for reckless assertions such as were made in the late campaign. A candidate for high office declared that the United States Government would lose more than a billion of dollars by the Tea Pot Dome lease. Some things which were done in connection with this transaction were apparently most reprehensible and deserving of condign punishment, but such a preposterous statement is worthy of the severest condemnation. I speak of this matter guardedly, because the question is now before the courts.

References to a so-called slush fund were futile, partly because they were exaggerated or incorrect and partly because they were accepted as the lament of some of those in minor political organizations who would have been glad to have raised and expended as much themselves, and only had ground for criticism because they were less successful in securing financial support. [Laughter.]

The recent management of the Republican campaign was clean; was characterized by an absence of extravagant expenditures and by the avoidance of a deficit. It was conducted in accordance with lawful and correct methods by Chairman Butler and his associates.

In view of the difficulty in arousing voters to go to the polls and in placing the issues clearly before them, a fund of four millions, or even more—which is not much in excess of 13 cents for each voter—does not seem exorbitant. The amount is very small in comparison with the billions of dollars annually expended for advertising. At the same time large expenditures in campaigns are to be regretted, and in an ideal Republic every voter should be alert to perform his duty and give such attention to the consideration of public questions as to vote intelligently. If such conditions could be attained, expenses would be reduced to a minimum, but it is not a political party or the candidate for office who is chiefly responsible; it is rather that inactive mass of voters who only

go to the polls when urged and whose study of the problems of the time is so superficial that their conclusions are likely to be erroneous.

The result of the election is a decisive proof that the more thoughtful refused to listen to stock arguments and false accusation, so common in the recent campaign, viz, that financial and business interests control the action of Congress at Washington and have ready access to the White House. A considerable number of agitators have gained prominence by shouting in the voice of a crushed tragedian, "Wall Street! Wall Street!" as if it were like a personal devil, always present at everybody's side. There is enough to criticize in the methods and transactions of Wall Street.

The love of money, the root of all evil, is only too manifest there; but any claim that this financial center of the country is a consolidated or united force, is a myth. There is represented there a very marked contrariety of interests. First, the never-ending fight between the "bulls" and "bears," one desiring increase in the prices of stocks and securities and the other a decrease. There is a large number of institutions which will be benefited by an increase in the rate of interest; others by a lowering of those rates. There are financial houses interested in foreign loans, while there are others who would prefer to see the funds of the country restricted to investment in domestic loans. Some would expect benefit from the highest rates of tariff and others from the lowest. Then there are Republicans and Democrats, each contributing of their means, and giving their support to the respective parties. And I think it may be said without fear of contradiction that if any delegation or any individual came before a committee of this House or an individual Member, saying, "I am a representative of Wall Street," his arguments would be received with great caution.

The history of legislation in past years affords to any dispassionate observer a complete refutation of this groundless charge of undue influence by corporations or financial interests. An appeal on this ground could only be made to those who have not given careful or intelligent study to the subject. As this outcry, however, has not yet been entirely quelled and still has very considerable acceptance, it is well to give a clear statement of the facts. What has been the action of Congress and of Executives in recent years? A summary of that which has occurred since 1887 shows there has been a constantly progressive movement in the restraint of corporate power and the curbing of the privileges which attach themselves to great wealth or large business enterprises.

Let us survey some of the legislation and executive action of the last 40 years.

Beginning in February, 1887, the interstate commerce act was passed. At first this was only a partial solution of problems then pending, for great railway corporations even threatened to overshadow the State. A leading railroad president at one time expressed himself, "the public be damned," and this, unfortunately, was the attitude of some railway magnates. But this act, with amendments passed in 1903, 1906, 1910, and other years, gives absolute control to the Interstate Commerce Commission of rail rates, both freight and passenger. The only real limit upon the rulings of the commission is confiscation of the property involved. The action of the commission has been constantly exerted for the protection of shippers and the various communities of the country. True, rates have been raised—beginning in 1918, when under Government control—but this has been in response to the far higher cost of wages, materials, and taxes. During recent years the average return of railway investments has been less than upon most other forms of property, and reductions have recently been made aggregating \$200,000,000 per annum in freight rates especially benefiting the farmers of the West. Has Wall Street or financial interests approved of all this? By no means.

Then in 1890 the antitrust act was passed, which has been enforced with a great deal of severity. During the life of the present administration many corporations have been brought to book and suits are pending against some of the most powerful business organizations in the country with every prospect of a successful outcome. The act was drastically limited in its application to workmen and associations of farmers by the Clayton Act and by prohibitions in appropriation bills so as to afford them practical exemption from the operations of the antitrust statute.

Next, the Federal Trade Commission was established, which has been very aggressive in detecting and preventing illegal practices on the part of manufacturers and traders. It is needless to say that none of this legislation or regulations in pursuance thereof has been favored by great financial interests.

The income tax amendment was presented to the States by a two-thirds vote in both Houses of Congress and ratified by three-fourths of the States. It had been most confidently asserted that it was impossible to secure the necessary majority either in Congress or among the States, because this amendment to the Constitution would arouse the united opposition of the aggregate wealth of the country. But the necessary majority was obtained in Congress and there was ratification by three-fourths of the States. Under acts passed in pursuance of this amendment rates have been as high as 65 per cent in surtaxes, which, with the normal taxes, absorbed for the Government three-fourths of incomes in the higher brackets. In comparison with other nations, exemptions are much larger for those of smaller incomes. Earned incomes for a very considerable amount are favored and have lower rates. Surtaxes up to 40 per cent are now levied—a rate which, it is true, is too high to be effective, especially in view of the fact that there is a refuge for those who invest in tax-free securities. Then there is an inheritance tax as high as 40 per cent on the largest fortunes, and still later in this present Congress an equal rate on gifts has been imposed. Income, Federal, and State inheritance taxes will presumably prevent the accumulation of fortunes so large as those which now exist or have existed in the past.

An especial appeal has been made for the farmers. Time would fail me to enumerate the very considerable number of laws enacted for the benefit of the farmers of this country. It is sufficient to say that no less a person than Mr. William Jennings Bryan said that the first Congress of the Harding administration accomplished more for the farmers than any Congress for 50 years. It is true he maintained that no political party was entitled to the credit, but nevertheless the action of the last Congress shows the trend of the times. In a recent statement Mr. Gompers has said that no legislation opposed by labor has recently been passed, while numerous acts which are favorable to the interests of the working class have been enacted. Contemporaneously with the legislation above described there has been an ever-widening activity in the passage of humanitarian laws for the protection and benefit of workers. The welfare of women and children has by no means been neglected. Political parties have vied with each other in the enactment of humane and progressive legislation.

In the dealings of the executive departments with great corporations and with employers of labor there have been notable instances of the keenest regard for better conditions for the workingman, though against the will of many, if not most of the great employing corporations. It may be said without the slightest fear of contradiction that those who perform manual labor in this country are far more fortunate and enjoy far better opportunities than in any country in the world, and better than in our own country in any previous era of our industrial life.

During the life of President Harding he brought pressure to bear on the United States Steel Corporation to abolish the seven-day week and long hours. In this he was successful and these harsh conditions were abolished a few days before the day of his death.

A report from the Federal Trade Commission, which had been long delayed, favored the abolition of the Pittsburgh-plus plan, and the United States Steel Corporation, which, like all other organizations, is subject to influences of popular opinion, voluntarily abolished it. This undoubtedly will benefit the users of iron and steel products in many portions of the country.

It is a baseless slander upon Congress and the Executive, and upon both the leading political parties, to assert that any favoritism has been shown to the moneyed interests of the country. In fact, under present conditions at Washington, the great financial interests must come and plead, if they dare to come at all, and must be confronted with a manifest disposition to curb their power.

The accusation has been made that the Supreme Court is reactionary or unduly conservative, especially in questions pertaining to the rights of labor. Such accusation is conclusively disproved by a decision rendered in October in which, reversing the judgment of both the district and circuit courts and contrary to a generally accepted opinion of the law, it was decided that those arrested for violation of an order of the court forbidding an act which constitutes a criminal offense, are entitled to a trial by jury unless the violation or contempt is committed in the presence of the court, or is in a proceeding instituted by the Government.

The so-called Clayton Act was sustained. According to this decision, in case there is violence or riot in which thousands participate, the remedy by injunction is nugatory, because each

and all are entitled to trial by jury, unless the strong arm of the Federal Government is invoked, as was done by President Cleveland in the railway strike of 1894.

The question of tariff did not awaken the interest which was anticipated, in the discussions last autumn. It was confidently predicted by opponents of the tariff act of September, 1922, that the rates were so high that foreign trade would be seriously impaired. Some even said it would be practically destroyed. The logic of facts shows how groundless were these criticisms. A computation of the imports in the 21 months succeeding the passage of the law showed an increase in comparison with the 21 months preceding of \$1,881,000,000 in value, or of 40 per cent; also an increase in exports. If comparison is made with other countries, the improvement in foreign trade was much more noticeable in the United States than anywhere else.

Another argument employed was that the cost of living had been increased in such a way as to involve an additional expense of three or four billions per annum.

A comparison of wholesale prices does not sustain this untenable position. The reported index number for prices of all commodities in August, 1922, was 155; in October, 1923, 153.1; in September, 1924, 148.8; in October, 1924, 151.9. In fact, the marvelous producing capacity of the country has so manifested itself that larger production has kept down most prices. Most of such increases as have occurred have been in agricultural products, and in view of the depressed condition which has rested upon the farming industry, we should be willing to face such an increase.

The principal reason which makes for higher cost of living is to be found in the wide gap between the producer and the consumer. The retailer or final distributor is not so much to blame, because he has to pay a higher rent and higher salaries, keep a greater variety in his stock, maintain pace with the fashions, and each year a considerable share of the goods which he purchases is left over as a loss. The great abundance of gold and the readiness with which credit can be obtained are other causes of an inflation of prices. And then again, we must face this fact, which is in part psychological, that the demand of all classes of our people in this time is for higher profits and higher wages. It is largely due to the aftermath of the Great War, when prices were expanded and everyone was expecting a larger return.

If there was any prophet of calamity, his predictions have been conclusively disproved by the widespread and almost universal impetus given to business since the election on November 4. Confidence, one of the mainsprings of prosperity, has been wonderfully enhanced. The quoted prices of stocks have displayed an increase so phenomenal as to raise a doubt whether the movement is natural or wholesome, but the improvement has been very marked all along the line and in almost every branch of endeavor. This improvement has found a reflection in the increase of employment.

There are numerous conjectures as to the future of the so-called third party in this election. Every political movement, in order that it may survive, must have a basis in principles which promise universal benefits. Its platform must be such as to displace pending issues. It must sedulously avoid such agitation as will arouse class antagonism. In considering this question we must realize that for orderly government in any country one beneficial object to be sought is the existence of only two contending parties. If new political creeds or outside movements are advocated, one or the other party organization can adopt such portions as seem to be for the public weal, but the existence of more than two political organizations makes for inefficiency and the distractions of faction. It promotes special interests and the formation of blocs and obscures the supreme importance of decisions upon settled principles upon which the future welfare of the country must depend. Again, there is danger of fads and delusions which, however attractive they may be, can only result in confusion and disaster. The failure of divers governments on the Continent of Europe to secure the best results has been clearly due to factional divisions resulting from a considerable number of parties. These are unanswerable arguments for the American people against a division into party groups. There is very naturally an alternation in control wherever there are two political parties. When one fails to meet the demands of the time the other takes its place.

It is a notable feature of our American political life that periodically certain financial delusions sweep over the land, sometimes even when the country is most prosperous, at other times when there is depression; for instance, depression from the ravages of the grasshopper or drought or from an abnormally low range of prices. At such times great numbers accept palpably erroneous ideas and adhere to them with fanatical

enthusiasm. Among these we may enumerate the greenback craze in the seventies. We have had an object lesson from experiences in Europe very recently of the evils of irredeemable paper currency, and there is no policy in finance more damaging to each and to all than this idea of using the printing press under the stamp of the government or in any other way for the issuance of currency which can not be exchanged for gold or something of permanent value, and exchanged not only ultimately but immediately. Who would support the greenback theory now? Yet it numbered among its devotees hundreds of thousands, and it was a leading factor in elections in several States. Then came in 1896 the unspeakable fallacy of 16 to 1. People soon came to learn the unsoundness of the theory of tying two metals together, metals which had an independent use beside that for coinage, and which as such were quoted in the markets of the world. In view of the fact that the leading nations of the earth had adopted the gold standard, the idea of the free and unlimited coinage of silver was a chimera. Who will defend it now? But for a period of six or eight years it had the advocacy of a very large mass of the voters of this country.

I might mention other delusions. But only one, perhaps, is necessary. That is the idea of the guaranty of bank deposits, which was advocated in 1908, a proposition not without merit if under proper limitation and management, but as then proposed, altogether objectionable. Yet it swept through the country, and when orators asked in meetings, "How many are in favor of a guaranty of bank deposits?" in an audience of thousands every hand would go up. Who believes in that now in the form in which it was advocated? And is it not only most probable but reasonably certain that some of the ideas which have been widely scattered in this recent campaign, after their overwhelming rejection by the vote of the people, will go into the dust heap as delusions which ought never to have received support?

The Republican majority in this House will fail to meet the expectations of the people unless in essentials there is unity of purpose and of action. Opinions which are advocated by individual Members must always receive careful consideration, but in final conclusions upon important questions of policy these should yield to the predominant sentiment of the majority. In no other way can those results be attained which are worthy of a party intrusted with the direction of affairs by the solemn mandate of the people.

The recent victory should not be celebrated by mere notes of triumph but with an abiding sense of responsibility. It is not a time for retrogressive conservatism. The Republican Party, in the future as well as in its splendid past, must still be an organization which keeps step with the progress of the age. There are imperfections to be removed and reforms to be adopted which must evoke constant attention and deliberate but decisive action. The accepted program should be fairness to all, special privilege to none [applause], harmony between the President and Congress, with a breadth of vision which shall afford comprehension of every perplexing problem, always realizing that more than the material progress, of which we are so proud, the development of the moral and intellectual forces which make for the betterment of all humanity will be the chiefest glory of the American name. It is with such aims and not merely for a party that we should labor, however important its control may be. We shall hope to aid in securing the permanence of this Republic and the preservation of its institutions so happily founded, and to do our part in a manner worthy of the future of the greatest of nations, the most prosperous and fortunate of peoples. [Applause.]

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The gentleman from Ohio yields back 15 minutes.

Mr. TAYLOR of Colorado. Mr. Chairman, I yield 10 minutes to the gentleman from Oklahoma [Mr. McKeown].

The CHAIRMAN. The gentleman from Oklahoma is recognized for 10 minutes. [Applause.]

Mr. McKEOWN. Mr. Chairman and gentlemen of the House, I do not rise in my place to make any remarks touching the questions discussed by the distinguished gentleman from Ohio [Mr. BURTON] who has so ably expressed his views touching the results of the late election. I am disappointed in that he did not discuss one of the vital issues upon which the campaign turned, so that in the future those of us who had such sad experiences with that question might be able to avoid it. I heard no reference to the effects of the Klan or the anti-Klan in this late campaign, and that is one of the things about which I was very much interested to hear. [Laughter.]

The distinguished gentleman discussed the question of bank guaranty of deposits. I take it, however, that a great many American citizens are still of the opinion some guaranty should be given in certain events, such as provided by Martin Van Buren while Governor of the State of New York, when he had the Legislature of New York place upon the statute books of that Empire State a provision that the earnings of laborers and the savings of the poor should be guaranteed by the banks of that Commonwealth. I am one who is still of the same opinion, be they National or State banks, that the savings of the workingman and of the poor ought to be guaranteed against loss. [Applause.]

Now, so much for that. I rise to talk about the Budget provision with reference to the improvement of the streets of Washington, the paving of the streets of Washington. I hope the Committee on Appropriations will hold up that item just long enough to give this Congress time in which to pass some traffic laws to regulate traffic in the District of Columbia and provide a chain gang for some of the drivers here, and we can then pave the streets with the chain gang without having to expend Uncle Sam's money.

You take it in the District of Columbia, where people come from every part of this country to visit the Capital, when a man crosses the borders of the District of Columbia he takes his life in his hands. Instead of paving these streets we ought to tear up some of the pavements that are already down, because those are the only kind of streets on which a pedestrian can walk across safely, the ones which are not paved, because the cars can not run so fast on those, and a man can save himself a little when he goes across.

Why, gentlemen, there are men in this House who have risen here and called the attention of the Congress time after time to the destruction of human life in the District of Columbia, but nothing has resulted. There was a case which occurred here that was very flagrant. A poor old colored charwoman, who used to work in the House Office Building, was ruthlessly killed in the very shadow of this Capitol, and yet that fellow, I am informed, has never been brought to trial in the District of Columbia. Is human life so cheap in this District that men full of corn liquor, running and operating cars, probably without permits or licenses, can go unchecked?

The city of Washington ought to have the best traffic arrangements of any city in the United States. It ought to have its proper lights, proper signals, and sufficient men to enforce the law. It needs mounted men who can go out and bring these fellows to justice.

We sit here oblivious to what is going on, although every morning, when you pick up your newspaper, somebody else was killed last night, somebody else was maimed and crippled. It would be a horrible sight for this Congress to sit by and see pass in procession the maimed and crippled in the District of Columbia for the lack of facilities and enforcement of the laws.

You need laws which will enable those who have the enforcement of the laws to have an opportunity to put a real punishment on these fellows. They put up a little deposit, and then they go their way and they do not come back. Of course, they will forfeit the little deposit they put up. You need a law in the District of Columbia making a jail sentence imperative and making it a felony to operate an automobile while under the influence of liquor. You need a law in the District of Columbia which will put these fellows out here in a chain gang and make them help build these streets. The humiliation of it will restrain such violations of the law.

Why, gentlemen, there is no greater menace to life anywhere than to let a fellow get a quart of this corn liquor under his belt, get in a high-powered machine, and operate it in the city of Washington. It is a most deadly machine, and I do not understand why the War Department and the Navy Department do not adopt it for war purposes if they want a heartless, death-dealing instrument for destruction of human life and limb.

Now, gentlemen, I am serious when I tell you that the lives of the people of Washington are in danger. Where is the man who can send his little child, his little girl or little boy, on a little errand out to the little corner store or over to a neighbor's house who does not sit with fear until that little child returns? It ought not to be, gentlemen, and we ought not to sit here day in and day out passing legislation—of course, that is important—and let this matter go without attention. I say we owe speedy action to the people of this District.

Mr. BLANTON. Will the gentleman yield?

Mr. McKEOWN. Yes.

Mr. BLANTON. If the gentleman will investigate he will find that the taxicabs which shoot around corners at about 50 miles an hour are responsible for 90 per cent of the danger. Just watch these Black and White taxicabs, if you please, when you try to cross a street, even when you have the right of way, and you will find that they will shoot by you at 50 miles an hour, whether there is danger of overturning you or not. They ought to be denied the privileges of the streets of Washington until they instruct their drivers to pay greater attention to the traffic laws. [Applause.]

Mr. McKEOWN. Well, I take it, gentlemen, that the taxi driver is put on a commission on what he can make; he is probably working on a per cent basis, and that is what impels him to drive rapidly, because he is trying to get around and get as many returns as possible. But we ought to regulate that, as suggested by the gentleman from Texas [Mr. BLANTON].

Now, the police themselves have no protection in this city. They have no protection themselves. A man could beat up a policeman here and get away with a small fine. A policeman has no protection. We have no law here making it a felony, and it is the only city on earth where a policeman has to take his life in his hands and take what is coming to him when he goes out to enforce the law.

If some business man goes down town and violates the traffic rules and the policeman arrests him or undertakes to arrest him, the business man will say to him, "Give me your name and your number; I am going to see a Congressman and get your job." They also say, I do not know how true it is, that some Members of Congress sometimes get fretted and say they are going to get the policeman's job, who is simply trying to enforce the law.

I say now that we ought to at once pass a proper traffic law and give them some law to govern conditions, and let them fix proper penalties, and we should also provide for men in this city to protect the inhabitants and your constituents when they come here. Gentlemen, your constituents at least have the right to come to Washington to see the Capital, and a man ought not to be required to endanger his life and forfeit his life insurance simply because he wants to come here and see the Capital of the Nation. [Applause.]

Mr. TAYLOR of Colorado. Mr. Chairman, I yield five minutes to the gentleman from Louisiana [Mr. O'CONNOR]. [Applause.]

Mr. O'CONNOR of Louisiana. Mr. Chairman and members of the committee, our colleague, Congressman RILEY WILSON of Louisiana, will in the near future introduce a bill providing for a survey of spillway sites on the Mississippi River above New Orleans. I understand that General Harry Taylor heartily approves the purpose of the proposed bill. As you know, General Taylor is the Chief of the Army Engineers. The lamented Ben Humphreys was for many years looked upon by the House of Representatives as the outstanding authority on the Mississippi River flood problem and its solution or the control of the floods which annually menace the people of the country lying for miles on both sides of the great river. But Ben is gone to the bourne from whence no traveler has ever returned. Since his departure Mr. WILSON has become the recognized authority upon flood control. He has probably given the subject as much thought as has been given to it by any other man in the country, and his remarks upon the Mississippi River are always worth hearing and recording. Congressman WILSON lives in north Louisiana, and his first concern naturally is the protection of his section and the property and lives of his constituents from the terrific floods that annually endanger them by the erection, construction, and building of immense levees that are going up higher and higher from time to time. But in addition to his own immediate congressional interest in his constituency he is also tremendously interested, not only as a Louisianian but as a far-sighted, broad-visioned American statesman, in the flood perils that yearly threaten the city of New Orleans. Those who are competent to express an opinion believe, as a result of our enormous expenditures in levees or embankments, that we of the city are safe from inundation, overflow, or catastrophe through a break in the levee system which virtually surrounds New Orleans and which our people have endeavored to make as strong as walls of steel. But we desire to make assurance doubly sure and out of an abundance of precaution provide against any possible calamity which might cost millions of money and perhaps the lives of thousands of people. One thing we are sure of: We can not build our levees any higher in and around New Orleans nor in the lower reaches of the great river. We have reached the limit.

The foundation will not support any superstructure higher than we have there now. Hence our desire for something in addition to the levees we have. What is that something or

things? Spillways, by-passes, waste weirs, and the like will give us the protection we need in the event that the Ohio, upper Mississippi, and the Missouri rise in flood at the same time. It was a similar natural condition or contingency as that just predicated—that is, a flood combination—that caused the great Paris flood a little over 12 years ago. Eternal vigilance is the price we must pay not only for liberty but for flood protection, and through that control the protection of perhaps millions of lives. It is said that the dwellers along the slopes of Vesuvius, Aetna, and other volcanoes always straggle back to their old homes when they can find them after every terrific volcanic outburst of fire and lava and then immediately apparently forget the trials, suffering, and vicissitudes they endured when they had to flee from their fields and homes. They do not even build the roads which would make easy an escape from the next eruption. Men employed in the great steel mills of the country and structural-iron workers become so familiar with the hazards and dangers of their occupation as to treat carelessly and indifferently risks that terrify those not engaged in these occupations. Visitors who first look at our great levees above New Orleans wonder at the courage of those who dwell behind them. Fittingly altered, the lines by Pope in regard to the change that comes over one's viewpoint of life as he daily has to witness vice and its operations, first shuddering at it and finally embracing it, might be given an appropriate application to the attitude of people who have become used to and familiar with some great danger. Carelessness will come unless the danger be constantly stressed and never lost sight of. As a result of a lack of care in providing for a proper dam across the South Fork, a small branch of the Connemaugh River, there was a flood which the American people will not soon forget. Ten millions of property was destroyed and twenty-two hundred and five lives were lost. In Grand View Cemetery sleep 777 of the unidentified dead of that awful horror. In the mad rush of waters as a result of a broken dam, houses were overturned, then caught fire, and as a consequence could not even be used as rafts.

May 31, 1889, will always be regarded in that section of the country as a day of horror. It will so be regarded in all parts of the country by those who happen to have their memories revived on the subject. It was a lack of preparedness by Galveston to meet a West Indian hurricane which swept over the island city on September 8, 1900, that caused the loss of 6,000 lives and \$17,000,000 of property, sending a chill of horror to the hearts of the people of the whole country, and one which Texas, near the coast, will not forget for generations to come.

Inasmuch as we of New Orleans know the terrible consequences of a lack of preparedness and what might happen if we fail to keep watchmen on the towers night and day, we have gone the limit in spending our money for the purpose of protecting the lives and property of those intrusted to our care. We are now convinced that we need something more than the old levee system. The fox must sleep sometimes and the wild deer must rest, but we of the Crescent City and its environments can not sleep, can not rest, until we know that we have relief measures such as I have already enumerated. We are entitled to it; that is, to the relief we seek. Louisiana bears the brunt of the now uncontrolled flood drainage of some 27 States which drain into the Mississippi River. It is just as much a moral responsibility of the Federal Government to protect Louisiana from damage and concern caused by the flood drainage of other States as it would be to protect Louisiana from armed invasion from other States or another nation. Keep this in mind, Members of Congress: Every drop of water that falls from heaven in the way of rain and dew between the summit of the Alleghenies and that of the Rockies and every drop of water that springs from the ground in the great Mississippi Valley must pass the city of New Orleans on its way to the Gulf of Mexico, where it becomes a part of the great eternal inland sea. And not a drop of the gentle rain that falls from the heavens or the springs that gush from the ground in Louisiana but finds its way into the Gulf of Mexico through lakes, streams, and rivers which are not in any way tributary to the Mississippi. Our danger comes from the waters that rush down upon us from other lands than those of our own State.

I can not repeat too often: Relief works in Louisiana, such as spillways, by-passes, weirs, and the like supplementing the levees and bank revetments unquestionably can be made to protect Louisiana from the flood run-off of the drainage basin of the Mississippi River. I hope that the bill will be speedily passed and that the engineers charged with the study of making the surveys in accordance with the letter of the act will draw to their aid all available sources of information and make a comprehensive study of the entire local problem of flood control in Louisiana. This study should cover the Atchafalaya as a controlled outlet of the Mississippi, including the creation

of supplemental channel capacity for the relief of the Atchafalaya Basin with a cut-off to fully safeguard the Morgan City territory. It should include means by which silt-laden flood waters might be diverted under complete control to the plantations and to the marsh land, fertilizing and irrigating the one and filling the other. It should include small as well as large spillways, by-passes, and waste weirs. The water from many small relief works can be made to render a valuable service in addition to reducing flood levels in times of need. All of this, of course, has relation only to local relief works in Louisiana and under no circumstances should be confused with or involved by the larger problems of source-stream control and the utilization of now wasted waters for stream-flow regulation, for waterway improvement, for irrigation, and, incidentally, for power development, nor the related problems and projects of reforestation and the checking of soil erosion.

These larger problems may be met and solved by the passage of S. 3328, introduced by Senator RANDELL. The bill is entitled and has for its purposes "the development of water resources, for electric power, agriculture, flood control, irrigation, and other purposes," and will, according to O. C. Merrill, the executive secretary of the Federal Water Power Commission, enable that commission with the authorization that it has presently to do all that might have been accomplished in this great direction through the Newlands bill. In the event that it be found that Mr. Merrill is mistaken about what can be accomplished by the Federal Water Power Commission in the way of solving our major problems when and after the Ransdell bill is passed, we will by sheer force of necessity and to permanently meet a situation which must inevitably be settled right move for the reenactment of the Newland bill.

I am sure that the National Flood Prevention and River Regulation Commission will gladly cooperate with Mr. WITSON and will stand squarely behind the engineers if the matter be approached and handled in a complete way. I do not want any frightful calamity to compel America to focus her attention on the necessity for a complete system of flood protection. We want her to awaken to the fact that it is folly almost inconceivable and a supidity unparalleled to allow, permit, and even hasten the flow of waters through the affluents, tributaries, and the Father of Waters itself within a relatively brief period thereby endangering the lives and property interests of hundreds of thousands of people. It is so clear that it is an utterly ruinous policy that permits the flood waters to run their way to the sea in less than six weeks' time instead of holding them in check and permitting the flow to gradually wind its way to the sea through more than 10 months of the year as to be beyond discussion. What disastrous consequences flow from the present lack of a scientific river policy? Great loss annually through destroyed property interests and great suffering by the people whose homes are menaced, if not actually ruined. I will not, my friends, permit myself to fall into the terrible rumination of what might happen, in view of a lack of proper dams and checks in the source streams, in the event that the Ohio, upper Mississippi River, and the Missouri were to rise at one and the same time, creating a flood condition that might spell a disaster which would stagger mankind for generations to come. We must reach the heart and brain of America through our engineering talent, the Safe River Committee of New Orleans, the Mississippi Valley Association, and kindred associations and show the wisdom of a system of dams and checks that will make for a conservation of our water in the Mississippi Valley and the wonderful navigation and commerce which would flow therefrom. Yes; I know America will, when the case is presented to her, understand that we must put folly behind us, open our eyes to the truth of a situation that stares us frankly in the face, and correct by the proper relief works, which can and will be secured through a reenactment of the Newlands bill if necessary, the terrible waste of water and the danger that results from such waste, changing what is presently a liability so ghastly as to be a nightmare into an asset so rich and bountiful as to make easy the efforts of our people to create an empire of wealth in the Mississippi Valley. [Applause.]

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

Mr. TAYLOR of Colorado. Mr. Chairman, that closes the time on my side.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

OFFICE OF THE SECRETARY
SALARIES

Secretary of the Interior, \$12,000; First Assistant Secretary, Assistant Secretary, and other personal services in the District of Columbia in accordance with "the classification act of 1923,"

\$302,835; In all, \$314,835: *Provided*, That in expending appropriations or portions of appropriations, contained in this act, for the payment for personal services in the District of Columbia in accordance with "the classification act of 1923," the average of the salaries of the total number of persons under any grade in any bureau, office, or other appropriation unit shall not at any time exceed the average of the compensation rates specified for the grade by such act, and in grades in which only one position is allocated the salary of such position shall not exceed the average of the compensation rates for the grade: *Provided*, That this restriction shall not apply (1) to grades 1, 2, 3, and 4 of the clerical-mechanical service, or (2) to require the reduction in salary of any person whose compensation was fixed, as of July 1, 1924, in accordance with the rules of section 6 of such act, (3) to require the reduction in salary of any person who is transferred from one position to another position in the same or different grade in the same or a different bureau, office, or other appropriation unit, or (4) to prevent the payment of a salary under any grade at a rate higher than the maximum rate of the grade when such higher rate is permitted by "the classification act of 1923," and is specifically authorized by other law.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, this is the first appropriation bill of this second session. When the attempt was first made in the last session to provide lump-sum appropriations in the appropriation bills for the present fiscal year I raised the question with the chairman of the Committee on Appropriations as to whether or not that was going to cease with the session that adjourned last June, and whether or not we could expect in succeeding years a return to the wise policy of having appropriations specified in particular in these bills. The gentleman indicated that it was necessary last year because the new classification had not been worked out. That excuse does not exist now. There is no excuse whatever for a continuation of the lump-sum policy, and it ought not to be permitted to exist any longer.

The 400 Members of Congress not on the Appropriations Committee ought to cause this to stop, and it ought not to be permitted to continue any longer. We have given wide powers to these 35 brethren of ours who compose the Appropriations Committee, and they owe it to us; they owe it to the membership of Congress; they owe it to the people of the country to specify the various amounts of expenses, so that the people may know how the money is being expended, where it goes, and into whose pockets it finally lodges. May I ask the distinguished gentleman from Michigan how much longer are we to expect this lump-sum practice to continue. In my experience in Congress for eight years I have heard several very distinguished members of the Appropriations Committee—and we have had some of the smartest men in the Nation on same—vigorously denounce lump-sum appropriations. If they denounce it and others denounce it, why should we allow it to continue? May I ask why we could not stop that now and specify in detail these various items?

Mr. CRAMTON. I shall be glad to make a statement if the gentleman will allow me. The gentleman from Texas has manifestly an erroneous impression of what was said last year by the chairman of the committee, Mr. MADDEN. I do not know the statement the gentleman from Texas refers to, but I do know that the gentleman from Illinois [Mr. MADDEN] could not have said anything that would have justified, properly construed, the impression which the gentleman from Texas has. The gentleman asks how long the present policy with reference to appropriations, which he erroneously termed lump-sum appropriations—how long it will continue. In my judgment it will necessarily continue until Congress abolishes the present reclassification law. It is a necessary adjunct, a necessary effect, of the reclassification act.

What was termed in years past as the lump-sum system is entirely different from that illustrated in the provisions of this bill. Under the law formerly there were two ways of fixing a salary. One was that termed the statutory roll which named the position and named the salary in the law, an absolutely inelastic situation. That took no account of merit or efficiency, made no provision whatever for promotion, and so forth, but one that most of us preferred because when we gave discretion to the head of the department it was nearly always abused.

The other system was the lump-sum appropriation. That is to say, Congress would appropriate \$10,000 or \$100,000 for a salary roll in a certain office, and it was entirely in the discretion of the head of that bureau or organization to fix the salaries in his discretion; unless, as sometimes we did, we put a limitation that no salary could be over a certain amount. But it was placing a lump sum of money at the disposal of the

department to be used in his discretion as a salary roll. As I said, we generally found favoritism. After many years it came to be a situation that the persons employed in bureaus that were getting their salary roll by the statutory roll were getting much less money for the same service than did similar people under the lump-sum appropriation doing the same character of work.

Mr. CARTER. Will the gentleman yield?

Mr. CRAMTON. I yield to my colleague.

Mr. CARTER. As a matter of fact, the reclassification act classifies all salaries?

Mr. CRAMTON. Yes; I was just coming to that. That was the two plans, the statutory roll and the lump-sum appropriation, and many of us had criticized the lump-sum appropriation in former years. Now, the reclassification act had two outstanding purposes; one was to give some opportunity for recognition and promotion in the light of experience. A man in the second year on a job is worth more than a man in the first year. It gives some opportunity for a promotion. Also, it equalizes the pay through the Government service, so that a man in the Pension Office doing a certain kind of work may, as he ought to have, the same pay that a man in the Veterans' Bureau has, doing the same kind of work.

Under the classification act a board has been set up to readjust the salaries so established. Now, when that comes to us, if in this bill we should do as the gentleman from Texas says he thinks we ought to do—that is, fix the salaries all the way through the bill—you would entirely nullify the reclassification act. As a matter of fact, the lump-sum system in the old days prevailed to the extent of 90 per cent of the positions. In the present system, although the gentleman gets the impression that this is a lump sum, still, as a matter of fact, it is not left to the discretion of the head of a bureau how the money shall be used and is not a lump sum in the sense the term was formerly used.

In this item, for instance, of \$302,000 the Secretary of the Interior can not spend the money at his own sweet will, as was formerly the case with lump sums, but he must spend it in accordance with the terms of the classification act; and that act was not framed by the Committee on Appropriations, but by Congress, and it came from a legislative committee. Therefore we, as the servants of the House, are simply following the law.

Mr. BLANTON. Does the gentleman from Michigan mean to convey the impression that the Secretary, under this bill and under the classification act, has not the power to slide some pet employee from one class to another class, whereby the salary would be very materially raised, or to slide some other employee downward, where the salary would be lowered?

Mr. CRAMTON. I say that his expenditure of the money must be in accordance with the terms of the classification act.

Mr. BLANTON. But he does have the power that I have mentioned?

Mr. CRAMTON. The Personnel Classification Board passes on these matters, and his transfers, promotions, and increases, within the amount of money provided, are regulated by the terms of that law. If the gentleman from Texas thinks that gives too much discretion, then he should advocate an amendment of the law.

Mr. BLANTON. Then the gentleman from Michigan is no longer in favor of specific appropriations as against lump-sum appropriations?

Mr. CRAMTON. If my committee had come in here with this bill so drawn that each salary in it was named in the law, we would have displaced the classification act as to this department. In other words, we would then have overturned the existing law.

Mr. BLANTON. And henceforth, if I understand the gentleman, we may expect only just such lump-sum appropriations as are contained in this bill?

Mr. CRAMTON. So long as the House—

Mr. BLANTON. And the country stand for it?

Mr. CRAMTON. So long as the House and its committee follows the classification act. But, understand, they are not lump-sum appropriations, expendable at the discretion of the head of the bureau. They are expendable in accordance with the provisions of the law. The Budget carries an analysis of the roll, which the gentleman, of course, would have before him, the number of positions, each salary, and so forth.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. CARTER. As a matter of fact, is not this the situation: Prior to the classification act we put in the bill so many clerks at \$2,250, so many clerks at \$2,000, so many clerks at \$1,800, and so on.

Mr. CRAMTON. In some cases.

Mr. CARTER. In most cases. That is what the gentleman from Texas [Mr. BLANTON] is distinguishing as not being lump-sum appropriations. The reason for this change, as the gentleman from Texas ought to know if he would examine the law, is that the law already provides for that, and he would be only repeating the law if we put it in the bill.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. WINGO. Mr. Chairman, I think my friend from Texas [Mr. BLANTON] is not as mentally alert as usual. He asks why this method of appropriation, and protests against it, and asks how long it is going to continue. It is rather difficult to answer his questions, and while I had intended at some later date to make a few observations on the situation, I believe I shall ramble around for a few moments now, and perhaps from what I shall have to say he can catch the explanation and the answer to his question.

We are living under that beautiful and perfectly ideal system of government called a bureaucratic budget government. Everybody is for the Budget, of course, just as everybody is for tax reduction. The question is the method to be used. That is where the disputes come in. As the gentleman from Michigan [Mr. CRAMTON] has explained, the classification act provides for these different groups, different grades, and different employees. While the gentleman from Texas [Mr. BLANTON] was down in Texas, and while I was down in Arkansas, and the rest were at home, the ordinary duties that Congress was intended to perform, contemplated by the founders of the Government, were being performed by the Budget Bureau. I am not attacking the Budget Bureau; I have great respect for it; I understand they are very efficient; but they were doing what Congress was supposed to do. They were holding hearings as in the old days Congress used to hold them, to ascertain the needs of the Government, and decide how much the people would expend on their governmental activities. Of course, that relieves Congress of not only the privilege but the burden of discharging that duty. The result is that you see very few Members present here today. This is a great bill carrying a very large appropriation. The gentleman from Michigan [Mr. CRAMTON] has given the only reason he can give. He says to the gentleman from Texas [Mr. BLANTON], "Go and look at the Budget estimates; you have it before you, and it will tell you."

Mr. Chairman, we legislative birds, sitting in the legislative nest, just open our mouths and we must take whatever worm of appropriation is thrust down our throats, and after having set up this Budget Bureau, after having waived our rights, it ill becomes us to make any complaint. We can not kick against the pricks, because we deliberately set up the Budget. Then we went further. We so framed the rules of this House that it is practically beyond the power of any individual Member to get the judgment of the House on any particular proposal, unless it has been first passed on by the lords of the Budget. The people are back of that plan. Do not fool yourself by thinking that they are not.

There are two conflicting theories of government abroad in the land, not the old theory that was established originally. You have one group that cries, "We want to curb the courts," and in the last campaign a great many people were scared to death because they were afraid that if LA FOLLETTE were elected he would abolish the Supreme Court overnight, and that we would have this Congress here passing upon and reviewing every case that the Supreme Court decided. Then the people had been told by deliberate propaganda for years that Congress does not have enough capacity to do what a parliamentary body is supposed to do in a system of government like ours, namely, attend to the public business and appropriate the public money, and that we had to set up an organization to tell us how to do it. The public naturally recoiled at the mere suggestion of such a body reviewing judicial decisions. Then there is another group, and I think so far as the perpetuity of our free institutions is concerned they are the more vicious. They continually fill the papers each day, and public speakers each day reiterate them, with contemptuous references to Congress. Every little whipper-snapper, who licks the feet of privilege, continuously snarls and snaps and speaks contemptuously of Congress, and they have convinced the American people, or the great majority of them, that 434 out of 435 Members of this House are incompetent and inefficient and can not discharge the duties for which this House was established under the Constitution.

They believe that each one of their individual Congressmen is all right, but they believe the Congress as a whole is in-

competent, and to-day when it is suggested it may be necessary to have a special session of the Congress people hold up their hands and say, "My God, have we got to be afflicted with that evil?" Why do they do that? Because of this propaganda that seeks to destroy parliamentary government, this propaganda that applies itself to the dislodging of the keystone of Anglo-Saxon government—

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. WINGO. I ask to continue for five minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. WINGO. Why, this propaganda that knocks out the keystone of Anglo-Saxon government—that is, that Congress shall control the purse strings—and leads the American people to believe that a bureaucratic government is more efficient, that it is better for the public welfare, that we must put up with the Congress because, forsooth, it is a constitutional body—that we are elected, and hence you can not get rid of us; but let us put up with it as little as we can. The gentleman from Texas asks how long it is to continue. If the gentleman will read the history of this body he will find that one appropriation committee during one period of this Nation was bitterly denounced as being vicious, and it was heralded as a great reform when we adopted the present system of distributing the powers to several appropriating committees. But now you have swung away from that which was once heralded as a great evil when abolished and you have brought back to-day an evil of that day as a virtue of the present day. Sooner or later the American people will swing back to constitutional government.

They will hold the Members of the House of Representatives responsible, they will believe that we are capable of determining how much of their money shall be expended for the Interior Department, for the Agricultural Department, and other activities of the Government. But, gentlemen, do not flatter yourself that the people of this country believe that at this time. They think that the safety and the economic administration of governmental affairs require this House to surrender its constitutional privileges; and gentlemen who are trained, and very well trained, the Budget Bureau, must go through the arduous task of having hearings to determine how much we shall spend, and the "King comes down to the Commons," as he did the other day, and says, "I submit to you the Budget; keep within that. I have told you how much, now keep within it." Does the Congress hold the purse strings? That power in practice is nothing but a tradition to-day, and I say to the gentleman from Texas that he might just as well exercise a little more patience, save a little more of his valuable time, and console himself with the Biblical injunction not to kick against the pricks. The people believe in a dictatorial bureaucratic government at the present time, I will say to my friend, and they are not going to insist this year or next year on a return to the old constitutional system of government of three separate and coordinate branches. The legislative branch is at a low ebb in the estimation and confidence of the American people at this time. When the gentleman asks for an itemized appropriation bill it is not left to his judgment or to mine.

In a few months you are going to pass two or three or four billions of dollars' worth of appropriations. The only hope for economy that the taxpayer has is that the Budget has done its duty well. And God pity the poor devil who lays his sacrilegious hand upon that Budget! The public will feel like laying its crushing hand on him at this hour. I repeat to the gentleman from Texas the Biblical injunction not to kick against the pricks. [Applause.]

Mr. BLANTON. Mr. Chairman, I move to strike out the pro forma amendment.

The CHAIRMAN. The pro forma amendment has been withdrawn.

Mr. BLANTON. I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed for five minutes. Is there objection? There was no objection.

Mr. BLANTON. Mr. Chairman, the gentleman from Michigan [Mr. Cramton] can not dismiss this issue with a wave of his hand. This is an important question, this matter of spending \$4,000,000,000 a year of the people's money in lump-sum appropriations. In this bill we are turning over to the Secretary of the Interior \$238,240,926. That is a big sum of money. Why should you specify his salary in detail at \$12,000 a year and then put practically all the balance of this enormous amount in lump sums?

Mr. CRAMTON. I will answer the gentleman. This is a statutory salary.

Mr. BLANTON. The others ought to be statutory, too.

Mr. CRAMTON. That has a limit.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. CARTER. Did the gentleman vote for the classification act?

Mr. BLANTON. I did not. I remember that I fought numerous features of it.

Mr. CARTER. I thought the gentleman did vote for it. Now he is asking this committee to violate it.

Mr. BLANTON. I did not vote for it. But I voted for the Budget and supported it heartily. I am for the Budget. With very few exceptions, I have never voted to enlarge items recommended by the Budget. You can look back into the record and see that "the gentleman from Texas" has supported the Budget and supported the committee on practically every item in the appropriation bills; that is, as to keeping them within the limit of the Budget.

But, for instance, take the General Land Office in this bill. This bill permits the Commissioner of the General Land Office to spend \$805,000 and gives it to him in a lump sum. We ought to direct that commissioner just exactly how to spend that \$805,000. And the Congress of the Nation ought to direct the Secretary of the Interior just how he should spend this enormous sum of \$238,000,000, if you please.

Now, I know that these positions are provided for in a general way under the classification act, but I also know, as the gentleman from Michigan knows and as every one of these 35 members of the Committee on Appropriations knows, that every head of a department has the right and has the power of sliding these employees up or down. He can slide pets upward and increase their salaries, or he can slide them downward at will and decrease their salaries. We ought not to give him that power. There are pets in many departments; there are pets in the bureaus. There are pets among the personnel of employees in the commissions of Government. We, the Representatives of the people, ought to specify in every one of these bills just how much money shall be spent for each particular purpose stated in the bill. We ought to give a certain sum of money for the support of a department and then specify how that sum shall be expended. As it is, they can expend the money for all the purposes described in the bill or for only a few of them, or they could expend all, if they saw fit, for one particular item enumerated under the lump sum.

I am not strong enough in this Congress to stop that lump-sum policy of appropriations, or I would do it. The friends of mine who believe as I do on this question, and who believe it ought to be stopped, are not strong enough to stop it. Otherwise they would do it. This is the most important question that the Congress has to deal with, I will say to my colleague from Arkansas [Mr. Wingo], for it is the main avenue through which waste is incurred and public money dissipated, and it ought to be stopped.

Mr. BYRNS of Tennessee. Mr. Chairman, I have always listened to the gentleman from Arkansas with great pleasure and interest, and usually I agree with him; but I must take sharp issue with him in his statement that in adopting the Budget system Congress has surrendered some of its functions. The gentlemen present who were here before the Budget bill was enacted will recall the slipshod, haphazard manner in which estimates were always sent to Congress. Rarely did anyone in the various departments give them any serious or careful consideration. During those years it was the custom of bureau chiefs and others who were at the head of various activities of the Government to ask Congress for really more than they expected to receive, for really more than many of them, as I happen to know, felt that they needed, on the theory that if they did not ask for a large amount they might not get what they actually needed.

I think the country is to be congratulated upon the fact that we now have an orderly system in submitting estimates to the Congress. I think the country is to be congratulated upon the fact that the Director of the Budget holds hearings upon these estimates before they are sent to Congress, and endeavors to ascertain whether or not the estimates submitted for our consideration represent what is needed by the departments and no more than is needed by the departments. That does not prevent Congress from taking such action as it pleases upon the estimates after they are submitted; and I submit this volume of hearings on this particular bill as evidence of the fact that Congress and the Committee on Appropriations have not abandoned their former practice of very closely investigating these estimates after they come forward.

These are the hearings conducted by the subcommittee presided over by the gentleman from Michigan [Mr. CRAMTON], and they consist, as the gentleman from Colorado [Mr. TAYLOR], himself a member of the subcommittee, suggests, of a thousand pages which shows that the Committee on Appropriations is just as diligent to-day in its effort to ascertain any incorrectness that may exist with respect to the estimates as it was before the Budget system was adopted.

I think, gentlemen, we took a very long step, not only toward economy but toward orderly procedure, when the Budget law was passed, and it is a mystery to me that years ago this great Government of ours spending, as it has for the last 10 or 15 years, more than \$1,000,000,000 per year, and spending to-day between \$3,000,000,000 and \$4,000,000,000 a year, did not adopt this system, which has been the practice of all up-to-date and prosperous business concerns during all these years.

As a fact tending to show that the Budget system is approved by the people of this country, every progressive State in this Union has adopted a budget system, and the same is true of almost every municipality of any size or of any importance in this country. It is saving the people of this country millions of dollars. Appropriations are now made in a more business-like way and with some regard to the amount of income.

I was unwilling to keep my seat after the statement by the gentleman from Arkansas [Mr. WINGO] that in the adoption of this Budget system Congress had abandoned some of its prerogatives or any of its privileges. You have the right to increase the estimates any time you please, and if a majority of this House feels that the estimates are not large enough for any particular purpose, there is nothing to prevent a majority of this House from so saying and from providing a greater appropriation; neither is there anything to prevent a majority of this House from reducing any estimate that may be submitted by the Budget or that may be recommended by the Committee on Appropriations.

Now, in so far as lump-sum appropriations are concerned, let me say this, very briefly—

The CHAIRMAN. The time of the gentleman has expired.

Mr. BYRNS of Tennessee. Mr. Chairman, may I have three minutes more?

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent to proceed for three additional minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. BYRNS of Tennessee. Let me say this: I have always opposed lump-sum appropriations. I have always felt that if we could believe—and I am not bringing any wholesale indictment—that the head of every bureau and every governmental activity would act with the same diligence and economy with respect to public appropriations as the heads of private concerns would do, then, possibly, it would be to the best interests of the Government and the taxpayers to have lump-sum appropriations. But, just as the gentleman from Texas [Mr. BLANTON] has said, we know perfectly well that frequently, in view of influences brought to bear and frequently for reasons which do not subject those at the head of bureaus to particular criticism, there is favoritism practiced, and for that reason I have always felt we ought not to have lump-sum appropriations. But, gentlemen, Congress passed the reclassification act a year or two ago. I did not vote for it. I opposed it upon the floor of this House, following the leadership of the gentleman from Indiana [Mr. WOOD], who was opposing it at that time. But Congress passed the reclassification act and provided in that act that there should be a rating of efficiency twice a year, in November and in May, and that those who had made a sufficient efficiency rating to pass from one class to another should receive a higher salary. Now, in view of the fact that Congress, in its judgment, by an overwhelming majority, passed that reclassification act, if you do not appropriate lump sums, as we appropriate them here, then you can not possibly carry out that law, because we make this appropriation to begin next July.

The money which we appropriate now will not be expended until after next July, and the result is that if in November or in the following May of that fiscal year clerks in the departments here are given higher ratings and are therefore entitled under the law as passed by Congress to an increase in salary of \$60 or \$100, they can not get such increase unless we give some leeway.

The committee has proposed—and I dare say the gentleman from Michigan [Mr. CRAMTON] has discussed them or will do so—some limitations with reference to the amounts of salaries and promotions that may be made. In other words, we have endeavored to hedge this around in every way we possibly could in order to prevent the display of such favoritism as has

been shown in the past year in increasing those who are higher up to the maximum and then saying to the clerks, "We have not enough money to give you the promotions to which you are justly and legally entitled." This was what I anticipated when the act was passed, as I took occasion to say at that time. [Applause.]

The CHAIRMAN. The time of the gentleman has again expired.

Mr. HASTINGS. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent that debate on this paragraph close in five minutes.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent that debate on this paragraph close in five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. STENGLE. Mr. Chairman, reserving the right to object, if it is not too late to be recognized—I looked that way, but the Chair was busily engaged.

The CHAIRMAN. If the gentleman was trying to object and was on his feet, the Chair will recognize him for that purpose.

Mr. STENGLE. I only want to ask that the time be made 10 minutes instead of 5.

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent that the previous order be vacated and that the time be made 10 minutes.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent that the previous order be vacated and the time be made 10 minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. HASTINGS. Mr. Chairman, inasmuch as this is the first appropriation bill we have had up for consideration and inasmuch as the discussion has taken a rather wide range, emphasizing the necessity of economy in public expenditures, I thought it might be well for me to invite attention to a constitutional amendment which I have introduced and which is pending before the Judiciary Committee, an amendment which I think would greatly aid economy in making appropriations.

I am in favor of the budget system and I voted for it. I made a speech in favor of it when the first bill was up for consideration. After the adoption of the system I was one of the 14 new Members added to the Committee on Appropriations. I am not sufficiently familiar with the details of the reclassification act to say whether I favor it in its entirety or not, but in view of the fact that it has passed and has already become a law, I do not see the evils in lump-sum appropriations which I formerly entertained. This act fixes the salaries of employees in the various classes, and no economy would result in having them reenumerated in each appropriation bill.

But I want to discuss a constitutional amendment which I have proposed pending before the Judiciary Committee. In brief, it gives the President of the United States the right to veto separate items in appropriation bills.

I introduced a similar amendment some three or four years ago. I was diligent enough to send it to the governors of every State in the United States for constructive criticism and report. I do not now recall an adverse criticism. I believe that the replies received from some three-fourths, or, perhaps, a larger percentage of the governors of the various States, all favored it.

In almost every new constitution that has been adopted in the last 10 or 15 years by the various States a similar provision has been embodied. We have such a provision in the constitution of the State of Oklahoma. If such a provision is wise in a State constitution, why not adopt it as an amendment to the Constitution of the United States?

What would have been the practical effect if the President had had that constitutional power when the second deficiency appropriation bill came up for consideration on June 7 last?

Instead of its being held up, to force the incorporation of certain objectionable amendments, it could have been permitted to pass both Houses. It would have gone to the President of the United States. He would have exercised his constitutional right and could have vetoed any item of that appropriation bill that he thought ought not to have been incorporated in it. This would have saved the meritorious items and the Government from much embarrassment.

I have never heard of any legitimate objection raised to this proposed amendment. None was presented in any reply, as I said a moment ago, from the governors of any of the

States of the Union. The only objection I have ever heard from any Member is on account of a reluctance to amend the Constitution. If it is a good amendment, if it is a wholesome amendment, if it is one that is looking toward economy in the expenditure of public funds, I do not regard that as any valid objection at all.

Mr. DENISON. Will the gentleman yield?

Mr. HASTINGS. I yield.

Mr. DENISON. It has been the custom here for some time to put legislative riders upon appropriation bills. Under the gentleman's proposed amendment, would the President be given an opportunity to veto such riders?

Mr. HASTINGS. If it embodied an appropriation, yes.

Mr. DENISON. Then does not the gentleman think it ought to be broader than that?

Mr. HASTINGS. I am perfectly willing to have it broadened if necessary to cover separate independent items which may be added as amendments, but under the provisions of the bill as drawn it would only apply to appropriation bills or to separate items on appropriation bills. A former governor of my State suggested that the power to reduce any appropriation be given the President by vetoing the excess.

Mr. CARTER. And the gentleman would not have it apply to anything but appropriation bills.

Mr. HASTINGS. It would apply only to appropriation bills. It would be in the interest of economy and would prevent the log rolling so severely criticised by the chairman of the subcommittee.

The proposed amendment is as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following amendment to the Constitution be, and hereby is, proposed to the States, to become valid as a part of the Constitution when ratified by the legislatures of the several States, as provided by the Constitution:

Amend section 7, Article I, of the Constitution of the United States by adding the following paragraph at the end of said section:

"Every bill which shall have passed the House of Representatives and the Senate making appropriations of money embracing distinct items shall before it becomes a law be presented to the President of the United States: If he approves, he shall sign it, but if he disapproves the bill or any item or appropriation therein contained, he shall communicate such disapproval, with his reasons therefor, to the House in which the bill shall have originated. All items not disapproved shall have the force and effect of law according to the original provision of the bill. Any item or items so disapproved shall be void, unless repassed by a two-thirds vote, according to the rules and limitations prescribed in section 7, Article I, in reference to other bills."

From a careful reading of the proposed amendment you will observe it gives the President the power to disapprove the bill or any item or appropriation therein contained. If the word "item" is not broad enough to include a legislative rider on an appropriation bill, the power should be given. The veto power should not extend to separate items of legislative bills for the obvious reason that by the use of it vetoing and striking out certain provisions or sections the entire meaning and intent of the bill might be changed.

In my judgment the adoption of this amendment would be a long step in the right direction to enable the President to check extravagance in appropriations. Many doubtful items in the closing hours of Congress find their way upon general appropriation bills and can not be eliminated without vetoing the entire bill and necessitating the reconvening of Congress. No President would want to take the responsibility of doing this. There is no reason why the President should not be given the authority to veto any separate piece of legislation on appropriation bills. If such authority were given him the vicious practice of placing legislative riders on appropriation bills would be stopped. The President can not add any item. He can not increase the sum appropriated, and it would necessarily result in reducing public expenditures. If any item were increased above that submitted in the Budget, or a new item added, it would be closely scrutinized, and if not justified would be subject to a veto, and the power given to veto separate items would have a wholesome effect in discouraging the offering of questionable amendments in making appropriations for local purposes.

Everyone is interested in tax reduction and the surest way to reduce taxes is to see to it that only appropriations are made for the necessary and legitimate expenses of the Government. [Applause.]

Mr. STENGLE. I rise, Mr. Chairman, for the purpose of asking a few questions in order that I may obtain some infor-

mation. This is the first appropriation bill that we have had before us this session, and I take it that the words I find here, like the last session, will appear in every bill that we have for every department this year, and I refer especially to those words on page 3, at the latter end of this first paragraph, "when such higher rate is permitted by the classification act of 1923."

Last year when we had these bills before us I suppose I became what, in some opinions, might be called a human nuisance by interfering and injecting questions on the great problem of reclassification. I did not do it to embarrass the Members of the House. I did not do it because I wanted to interfere with the orderly procedure of committee work having to do with the appropriations in this House, but because I knew then, as I am firmly convinced now, that the matter was being handled by some people who did not know what real, honest-to-goodness reclassification meant, or they were being misled by those who are not fools but rather knaves in an endeavor to fatten and feast the higher-ups at the expense of the lower-downs—the rank and file of the public service.

I asked then if we were to be asked from time to time to vote these large lump-sum appropriations to departments and permit the distribution of these large sums without regard to any particular procedure, and I pointed out that in New York, a city as large as we have in this country, at the beginning of the year—yes, six months before that—every cent of every dollar that is to be spent has to be in black and white and every individual knows exactly where the money goes. I was told then that that was only because it was a hurry-up job for that year; it was a new law and we did not have time. We come back this year and we find the same old bugaboo—lump-sum appropriations.

I would like to ask some one of that committee, Are we to have no direct code lines for appropriations in this year's Budget? Are we to continue to "lump sum" by the millions and permit the heads of bureaus, as has been the case in this city, to obtain as high as 50 to 75 per cent increases and the poor man or woman in the lower ranks of clerical service to get nothing out of the lump sum? If that is the case, I am against the bill. If you are going to be square with the under dog I will go along with you. [Applause.]

The CHAIRMAN. The time of the gentleman from New York has expired. All time has expired, and the Clerk will read.

The Clerk read as follows:

CONTINGENT EXPENSES, DEPARTMENT OF THE INTERIOR

For contingent expenses of the office of the Secretary and the bureaus, offices, and buildings of the department; furniture, carpets, ice, lumber, hardware, dry goods, advertising, telegraphing, telephone service, street car fares not exceeding \$250, and expressage; examination of estimates for appropriations in the field for any bureau, office, or service of the department; not exceeding \$500 shall be available for the payment of damages caused to private property by department motor vehicles, exclusive of those operated by the Government fuel yards; purchase and exchange of motor trucks, motor cycles, and bicycles, maintenance, repair, and operation of motor-propelled passenger-carrying vehicles and motor trucks, motor cycles, and bicycles, to be used only for official purposes; diagrams, drawings, filing and labor-saving devices; constructing model and other cases and furniture; postage stamps to prepay postage on matter addressed to Postal Union countries and for special-delivery stamps for use in the United States; expense of taking testimony and preparing the same, in connection with disbarment proceedings instituted against persons charged with improper practices before the department, its bureaus and offices; not exceeding \$450 for the purchase of newspapers, notwithstanding the provisions of section 192 of the Revised Statutes of the United States; and other absolutely necessary expenses not hereinbefore provided for, including traveling expenses, fuel and lights, typewriting and labor-saving machines, \$76,000.

Mr. BLACK of Texas. Mr. Chairman, I want to say just a few words about this lump-sum appropriation matter. The gentleman from Tennessee [Mr. BYRNE] has correctly interpreted the situation, and that is that all Government employees under the civil service now have their salaries fixed by law, and a department head can not under a lump-sum appropriation fix any salary that might suit his fancy or his whim.

I have listened several times to the able gentleman from New York [Mr. STENGLE], and I do not agree that he has brought to the attention of the House any unusual situation. When we had the reclassification bill up for enactment, the gentleman from New York was not here, I am sorry to say. I took occasion to point out at that time that the salary schedules applying to the professional service were much higher in proportion than those applying to the clerical grades and department em-

ployees generally, and I offered a series of amendments to bring about a better equality in this situation, and they were adopted by the House but not accepted by the Senate.

The fault is not with the Reclassification Commission—at least that is my opinion. Whatever fault there is is in the law. Now, in further illustration of this lump-sum controversy, let us take the postal appropriation bill at the last session, and I merely refer to the one of the last session of Congress because it is the most recent one; it appropriates, for example, for letter carriers in the City Delivery Service \$87,398,000. That is all it says about it. According to the argument made by the gentleman from Texas [Mr. BLANTON] and the gentleman from New York [Mr. STENGLE], we have left open an avenue there for waste and extravagance. We have turned over to the Post Office Department nearly a hundred million dollars, according to their statement, to spend as they please. However, such an assumption is entirely incorrect. Every employee in the City Delivery Service has his salary fixed by law, and it is beyond the power of the Postmaster General, it is beyond the power of the First Assistant Postmaster General, to increase or reduce these salaries.

Mr. STENGLE. Will the gentleman yield?

Mr. BLACK of Texas. Certainly.

Mr. STENGLE. Is it the contention of the gentleman from Texas that the classification act of 1923 covers the letter carriers' service?

Mr. BLACK of Texas. The gentleman from New York must know that I make no such contention. I was citing this illustration merely because every employee in the Postal Service is covered by the postal reclassification act of 1920. That is a separate act, but no different in principle from the classification act of 1923. If the gentleman from New York has any fault to find, let him find it with the act, because these officials, while they are clothed with an administrative discretion in making promotions to grades, according to a certain standard of efficiency, they are absolutely bound as to salaries by the letter of the law. Of course, if the gentleman from New York, or any other Member of Congress, knows of any acts of maladministration of the reclassification act by department heads, it is perfectly proper to cite them and criticize them. But the method of the committee in making the appropriation is in harmony with the law, and it was to that point that I have intended to direct my remarks.

The pro forma amendment was withdrawn.

The Clerk read as follows:

The office of surveyor general is hereby abolished, effective July 1, 1925, and the administration of all activities theretofore in charge of surveyors general, including the necessary personnel, all records, furniture, and other equipment, and all supplies of their respective offices, are hereby transferred to and consolidated with the Field Surveying Service, under the jurisdiction of the United States Supervisor of Surveys, who shall hereafter administer same in association with the surveying operations in his charge and under such regulations as the Secretary of the Interior may provide.

Mr. RAKER. Mr. Chairman, I move to strike out the last word. I would like to ask the gentleman from Michigan if he is going to move to strike out this paragraph?

Mr. CRAMTON. What paragraph does the gentleman refer to?

Mr. RAKER. The paragraph at the bottom of page 9 and the top of page 10 with reference to the abolition of the office of surveyor general. It was stricken out last year, and I did not know but that the gentleman would move to strike it out this year.

Mr. CRAMTON. The provision for the surveyor general has been carried many years. This particular provision has not been carried before, but the committee is very much in favor of it, and I would not care to have it stricken out.

Mr. RAKER. I was wondering whether the gentlemen from States where the surveyors general are located would not make some move.

Mr. CRAMTON. I do not know how much the gentleman from California agrees with us, but the committee has troubles enough without going outside to look for any. [Laughter.]

Mr. RAKER. There is a good deal in that.

Mr. LEATHERWOOD. Mr. Chairman, I would like to inquire of the gentleman in charge of the bill as to the practical effect if this provision should be adopted by the Congress; in case of surveys for mining patents where will the business be transacted if you abolish the office of surveyor general?

Mr. CRAMTON. The purpose of the department in making the recommendation for the abolition of the office of surveyor general is not to make any change in the transaction of the work that has been heretofore carried on under the office, ex-

cept to consolidate it with the field service. The effect of the paragraph that has just been read would be to abolish certain positions of a political nature, but the work carried on by them, in so far as they have any duties remaining, would be merely transferred to the field survey service, carried on in an office in the same town where it is now carried on, but a unified consolidated service with increased efficiency and greater economy.

Mr. LEATHERWOOD. Would the office have a head that could sign a plat after the survey had been completed?

Mr. CRAMTON. The duty would be transferred to the office of the field service survey, and I assume the man in charge of that office would have the authority which the gentleman from Utah speaks of.

Mr. LEATHERWOOD. Does it contemplate the transfer of the present officers to other points?

Mr. CRAMTON. It does not. Mr. Bond, chief clerk of the Land Office, and Governor Spry, Commissioner General of the Land Office, assured us that there was no transfer of that kind contemplated—certainly no intention of bringing them to Washington. Nearly every town, and possibly every place where there is a surveyor general located, there are headquarters maintained for field service. That duplication is to be eliminated. All the details are to be passed upon by the Secretary of the Interior, but that has not been done yet.

Mr. LEATHERWOOD. Does the Commissioner of the Land Office recommend the passage of this paragraph in the bill?

Mr. CRAMTON. Yes; it originated in the Land Office.

Mr. SMITH. Will the gentleman yield?

Mr. CRAMTON. I will.

Mr. SMITH. Under existing law certain duties are imposed on the surveyor general, but you make no provision in the bill for the transfer of those specific duties to any other officer.

Mr. CRAMTON. I assume that the General Land Office is familiar with all of these technical points, and we have accepted their judgment with reference to it. When the office was created the survey of public lands was entirely a matter of contract, and the only representative in the field with reference to the subject was the surveyor general.

Since 1910 we are doing the work ourselves, and none of it through contract, and since 1910, therefore, most of the importance of the position of surveyor general has been done away with. We have been developing and expanding the field surveying service. As to the technical point as to just what authority the field surveying service has as to some particular matters, I have no knowledge, and I have accepted the judgment of the Land Office with reference to that.

The Clerk read as follows:

Registers: For salaries and commissions of registers of district land offices, at not exceeding \$3,000 per annum each, \$125,000: *Provided*, That the offices of register and receiver of such of the following land offices as may now have two officials shall be consolidated, effective July 1, 1925, and the applicable provisions of the act approved October 28, 1921, shall be followed in effecting such consolidations: Montgomery, Ala.; Anchorage, Fairbanks, and Nome, Alaska; Phoenix, Ariz.; Little Rock, Ark.; Los Angeles, Sacramento, San Francisco, and Visalia, Calif.; Denver, Glenwood Springs, Montrose, and Pueblo, Colo.; Gainesville, Fla.; Boise and Lewiston, Idaho; Baton Rouge, La.; Marquette, Mich.; Cass Lake, Minn.; Havre, Helena, Miles City, and Missoula, Mont.; Lincoln, Nebr.; Carson City, Nev.; Las Cruces, Roswell, and Santa Fe, N. Mex.; Bismarck, N. Dak.; Guthrie, Okla.; Lakeview, Portland, Roseburg, The Dalles, and Vale, Oreg.; Pierre and Rapid City, S. Dak.; Salt Lake City, Utah; Seattle and Spokane, Wash.; and Buffalo, Douglas, Evanston, and Lander, Wyo.: *Provided further*, That the following land offices are hereby abolished, effective July 1, 1925: Harrison, Ark.; El Centro, Eureka, Independence, and Susanville, Calif.; Del Norte, Durango, Lamar, Leadville, and Sterling, Colo.; Blackfoot, Coeur d'Alene, and Hailey, Idaho; Topeka, Kans.; Crookston and Duluth, Minn.; Jackson, Miss.; Billings, Bozeman, Glasgow, Great Falls, Kalspell, and Lewistown, Mont.; Alliance, Nebr.; Elko, Nev.; Clayton and Fort Sumner, N. Mex.; Dickinson, N. Dak.; Burns and La Grande, Oreg.; Bellefourche, S. Dak.; Vernal, Utah; Vancouver, Walla Walla, Waterville, and Yakima, Wash.; Wausau, Wis.; Cheyenne and Newcastle, Wyo., and their necessary personnel, together with such records, furniture, and supplies as may be necessary, shall be transferred to such of the land offices enumerated above and not abolished by this act as the Secretary of the Interior may direct, except that the records of the Topeka, Kans.; Jackson, Miss., and Wausau, Wis., land offices shall be disposed of in accordance with existing law.

Mr. SINNOTT, Mr. CRAMTON, and others rose.

Mr. RAKER. Mr. Chairman, I reserve the point of order on the paragraph.

Mr. CRAMTON. Mr. Chairman, I rise to ask unanimous consent that debate upon this may be limited to such time as seems only necessary.

Mr. SINNOTT. Mr. Chairman, I have an amendment that I desire to offer.

The CHAIRMAN. The gentleman from California reserves the point of order.

Mr. CARTER. Let us first settle the point of order.

Mr. CRAMTON. We would like to have that settled.

Mr. BLANTON. Mr. Chairman, I ask for the regular order.

The CHAIRMAN. The gentleman from California must make the point of order.

Mr. RAKER. Mr. Chairman, the point of order is that that part of the paragraph commencing on line 10, page 12, with the words "provided further," down to the end of line 4 on page 13 is new legislation on an appropriation bill and therefore is subject to the point of order.

Mr. CRAMTON. Mr. Chairman, if the Chair desires to hear me on that, the paragraph is a retrenchment, a reduction of expenditures of something over \$160,000, as becomes apparent, and is therefore justified under the Holman rule.

Mr. BLANTON. And, Mr. Chairman, the point of order is not well taken for the further reason that we have just recently passed a provision in the bill which abolishes the office of surveyor general, and this follows that provision. That provision having been passed in the bill without objection, without the point of order being made against it, without a motion to strike it out, then this is in accordance with the bill, and, as stated by the gentleman from Michigan [Mr. CRAMTON], it would come within the Holman rule. Even if it were legislation, it is not subject to the point of order because it is a retrenchment of expenditures. Certainly the abolishment of offices and the consolidation of other offices ought to be held to be a retrenchment of expenditures.

Mr. RAKER. Mr. Chairman, of course the suggestion of the gentleman from Texas [Mr. BLANTON] that we have passed an item that might have been stricken by a point of order, is quite out of place. He does not argue that seriously. As to the other point, there are some close decisions.

Is it possible that the Committee on Appropriations can abolish all public offices by a provision put on an appropriation bill, without an opportunity to be heard before a committee or otherwise, under what is claimed to be the Holman rule, because there is retrenchment of expenditures? It does not seem to me that that is the intention of that rule, especially after we have now the stringent provision adopted two years ago that no legislation even from the Senate can be placed on an appropriation bill without an opportunity on the part of the House to be heard. Can we simply abolish these offices now and have the work go to some other office to be done there, it may be, at a cost of two or three times as much? Clearly one must not forget the general provision that we can not have new legislation on an appropriation bill by a wholesale act abolishing the offices, and if you can abolish these offices and what the gentleman is contending be upheld, then you can abolish every office for which the committee might appropriate, without any opportunity for any of us to be heard before the committee or in any other way. Clearly this is not a case where there is some obvious reduction. There is nothing there to show but that the expenditures will be twice as much as they are now, and sometimes they will be as much as that. It seems to me that the Holman rule ought not to be enforced in a case of this kind.

Mr. CRAMTON. Mr. Chairman, the paragraph about which a question has been raised as compared with existing law does away with several offices, with the receivers of the land offices, first. Heretofore, at each land office, or most of them, there has been authorized a receiver and a register, and the current appropriation carries money for the receivers as well as the registers. The item before us appropriates alone for registers, and that is the first retrenchment. In the next place, the item proposes certain consolidations which are enumerated, but which I think are not involved in this point of order. As I understand it, the point of order is especially directed to the last proviso, that certain named offices are hereby abolished, beginning July 1, 1925, which is the beginning of the next fiscal year. In the current appropriation for this item there was carried a sum, based on the salaries of the officers provided for, of \$315,000. There was an item with reference to the contingent fund for care and other expenses, and that in the current year amounted to \$415,000.

Those were the only paragraphs in the bill that carried expenditures for these land offices. The pending paragraph

reduces the appropriation to pay the salaries from \$315,000 to \$125,000. In the next paragraph an economy becomes apparent. That is only possible because of this abolition, a saving of rentals, and so forth, a reduction from \$415,280 to \$350,000. Those two reductions result from this proviso. The gentleman from California [Mr. RAKER] says that it is not apparent upon the face of the bill that there is a reduction, and hence that it does not come within the Holman rule. Grant that it does not say in so many words in this paragraph that that which heretofore costs \$315,000 shall this year cost only \$125,000; yet these rules are to accomplish desired legislation rather than to hinder it, and one of the most desirable forms of legislation to-day is economy.

This question was directly raised on January 25, 1921, when in Committee of the Whole, in consideration of the agricultural appropriation bill, an amendment was offered by the gentleman from Minnesota [Mr. ANDERSON] to strike out a certain amount and insert a different amount, and then to take some action which resulted in the abolishment of a kelp plant. The gentleman from Iowa [Mr. HAUGEN] made the point of order that the proviso constituted new legislation, and the gentleman from Arkansas [Mr. WYCO] contended that the proviso did not come within the Holman rule for the reason that the sale of the plant was not mandatory, but merely lay within the discretion of the executive officer. The point that is now stressed by the gentleman from California [Mr. RAKER] was disposed of at that time by the then Chairman of the Committee of the Whole, Mr. HICKS, of New York, and his decision will be found in the third session of the Sixty-sixth Congress, Record page 2022. After stating that he is somewhat dubious about the proposition, he said that the Chair will try to answer one or two questions:

Does the proviso reduce the amount of money covered by the bill? On its face it does not. However, it appears that in the current law \$192,000 was appropriated for the maintenance of this plant. It is stated that \$150,000 was included in the present bill for a portion of the coming fiscal year, based on the prospect of selling the plant, as indicated in the proviso. If the plant is sold, it seems a logical conclusion to assume that no further appropriation will be required for it; if the proviso is not agreed to, it will be necessary to increase the appropriation to \$208,500 in order properly to maintain this plant during the next fiscal year. Therefore, while the proviso on its face does not indicate a reduction in the amount of money in the bill under consideration, yet it seems to the Chair a logical conclusion that the proviso will bring about a saving of money formerly carried in this bill and liable to be carried in the future. The Chair feels that the principle laid down by the gentleman from Tennessee [Mr. GARRETT] is sound, that an amendment or a provision in a bill reported from the Committee on Appropriations changing existing law and clearly a retrenchment within the three methods provided in the rules, may include legislation directly instrumental in accomplishing a reduction provided it is not permanent legislation—that is, legislation beyond the life of the bill under consideration.

The proviso before us in abolishing these offices of course does away with the necessity of their further maintenance. I think the Chair in supporting the ruling here cited can take judicial notice of the fact that these offices can not be maintained without paying a salary to the officer and, without certain expenditures for the conduct of the office.

Mr. CARTER. Mr. Chairman, I want to add to what the gentleman from Michigan has said. The Chair is familiar with the Holman rule, which provides that amendments may be placed on an appropriation bill in four different ways. First, that shall retrench expenditures by the reduction of the number and salary of the officers of the United States. Second, by the reduction of the compensation of any person paid out of the Treasury of the United States. Third, by the reduction of the amounts of money covered by the bill. It then provides that upon the recommendation of the committee having jurisdiction of the subject matter such amendment is germane as will retrench expenditures. Now, the Chair, I know, will take into consideration the existing conditions of the law of the land and that it is not necessary for the bill to show that such and such is a retrenchment. That is for the Chair to construe. Now, my contention is that this language proposed by the committee complies with every provision of the Holman rule, to wit, it retrenches expenditures by the reduction in the number and salary of employees; and, second, by the reduction of compensation, because it does away with the compensation of these certain employees; and, third, by the reduction of the amount of money required in the bill, because, as I recall, there are 29 offices abolished. Their salary has an average of about \$2,000. Twenty-nine times \$2,000 makes

\$58,000. So, if this amount is carried in the bill, \$58,000 additional must be carried in the bill for the payment of salaries or some other necessary work must be abandoned. I think it comes clearly under the last provisions of the Holman rule, which provide for amendments which retrench expenditures.

The CHAIRMAN. The Chair is ready to rule. This point of order is made against the proviso which apparently is new legislation. The justification for the new legislation is that it is a retrenchment of expenditures under rule 21, clause 2. The same question was decided in the citation by the gentleman from Michigan in interpreting the rule and, in addition, in the cases cited by the gentleman from Oklahoma. On February 11, 1922, page 2460, Chairman GRAHAM ruled upon a very similar point of order made by the gentleman from California who now makes the point of order. In rendering the decision in that case, the Chairman said:

This section has really three proposals in it—first, to consolidate certain offices; second, the proviso to limit the expenditure of the fund appropriated; and, third, the abolishing of certain officers in the section.

The Chair in that case, after citing a number of precedents, held it was a retrenchment of expenditures under the Holman Rule, and the present occupant of the chair will follow that ruling.

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent that all debate upon this paragraph and all amendments thereto may close—will 30 minutes accommodate all gentlemen? I ask unanimous consent that all debate upon the paragraph and all amendments thereto close in one hour.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent that debate on the paragraph and all amendments thereto close in one hour. Is there objection?

Mr. BLANTON. Reserving the right to object, I should think the gentleman from Michigan would want all the time reasonably to be divided—

Mr. CRAMTON. It must be.

Mr. BLANTON. Between those who are in favor of the committee's bill and those who are seeking to change it?

Mr. CRAMTON. The rules of the House protect it.

Mr. WILLIAMSON. I object. Will the gentleman from Michigan yield—

Mr. CRAMTON. I thought I had the floor before.

The CHAIRMAN. The gentleman from Oregon was recognized to offer an amendment.

Mr. SINNOTT. I yield to the gentleman to ask unanimous consent, not out of my time.

Mr. CRAMTON. I would like to get some understanding about this debate from the gentleman from South Dakota.

Mr. WILLIAMSON. I am willing to withdraw the objection if I have an opportunity to offer an amendment if the first one fails. And I should like to have five minutes.

Mr. CRAMTON. I am seeking progress, and in a fair way. I ask unanimous consent that debate upon this paragraph and all amendments thereto may close in one hour, during which time the gentleman from Oregon and the gentleman from Utah and the gentleman from South Dakota shall each have an opportunity to offer and discuss an amendment.

Mr. BLANTON. That is improper.

Mr. CRAMTON. If the gentleman from Texas will allow me, I think I can work this matter out.

Mr. BLANTON. I do not object, but it is against the rules of the House.

Mr. CRAMTON. I think I know something about the rules.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent that the time be limited to one hour, and that during that hour the gentleman from Oregon [Mr. SINNOTT], and the gentleman from South Dakota [Mr. WILLIAMSON], and the gentleman from Utah [Mr. LEATHERWOOD] shall be given opportunity to debate. Is there objection?

Mr. TILLMAN. I object.

The CHAIRMAN. Objection is heard. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. SINNOTT: Page 12, line 10, after the word "Wyoming" strike out all of the paragraph down to and including line 4 on page 13.

The CHAIRMAN. The gentleman from Oregon is recognized.

Mr. SINNOTT. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. The gentleman from Oregon asks unanimous consent to proceed for 10 minutes. Is there objection? There was no objection.

Mr. RAKER. Mr. Chairman, there was so much confusion that we would like to have the amendment reported again.

The CHAIRMAN. Without objection, the amendment will be reported.

The amendment was again read.

The CHAIRMAN. The gentleman from Oregon [Mr. SINNOTT] is recognized for 10 minutes.

Mr. SINNOTT. Mr. Chairman, I have offered this amendment to strike from the bill the language abolishing some 39 land offices. I offer this amendment, as much as anything, in the interest of orderly procedure, in the interest of what might be termed due process of law, in the interest of representative government, in the interest of our right to come here and be heard when our interests and districts are affected, not only before this House but before the committees of Congress [applause]; a right that we have been denied in this matter.

These land offices have been our conveniences for 50 or 60 years. They are our conveniences just the same as your post offices, your customhouses, are your conveniences, and yet they have been, without a hearing, abolished. We, the Representatives, have had no opportunity to be heard, to present the claims of our people living in vast areas like my own district, larger than any State east of the Mississippi River, yet you are abolishing two offices there.

I do not criticize the chairman of the committee; he had to get his bill in on the convening of Congress. He is the victim of a system that has grown up here, a system—a reprehensible one—often resorted to by the departments who do not resort to the ordinary channels and present their wishes and claims to a legislative committee for calm consideration, a committee like the Public Lands Committee, where these matters can be fully heard and where Members from the North, East, South, and West can present the claims of their respective districts.

I say I do not blame the chairman of the subcommittee; he had to work under pressure. Nevertheless, the whole thing has been a star chamber, a drumhead court-martial proceeding. Not a Member affected has been heard in his committee nor has had the opportunity to be heard. And yet our offices are abolished. Most of us got here at the opening of Congress.

The bill then was already written up. Our people hardly know to-day that these offices have been abolished. Yet we are receiving wires from our chambers of commerce protesting against the outrage, without a hearing of the abolishment of these offices, against this wholesale dislocation of the conveniences that we have had for 50 years in the West.

And why was it done? The Interior Department was told to cut down its estimates; and, like the dentist who was pulling out the teeth of the man who had the toothache in the back teeth pulled out the front teeth, saying "they were the handiest ones to get at," the Interior Department, when it was told to curtail its expenses, did it at the expense of the West and without consultation with a western Member. It is idle for Mr. Bond to go before the committee and say they are not needed. I know that they are needed. Two land offices in my district have been abolished, and it will require people who seek information in the land office to travel 13 hours by train in order to get that information. Mr. Bond secures this upon what I say is—and I measure my words—a disingenuous and misleading statement, as the record in the hearing shows before the committee. Listen to his language. He leaves the committee to infer—a committee that is apparently not familiar with land-office procedure, although some of its members may be from the West—that certain officers, certain officials, "land commissioners," he calls them, will take care of the interests of our constituents. We have no such thing as "land commissioners." We do have United States commissioners appointed by the Federal court, before whom some one may make a filing or an affidavit; but these commissioners have no land-office records. They are merely, as far as Federal courts are concerned, notaries public. And yet he would have this committee believe, as you will see from the testimony, that these so-called commissioners—"United States commissioners" is their proper name—can take care of the interests of the public. See how he ingeniously dodges the question. Mr. FRENCH asked him, page 127 of the hearings:

Mr. FRENCH. And under the process you contemplate will they be provided with data touching the types of land that the people will be interested in?

As a matter of fact, they are not provided with any data. Mr. FRENCH was laboring under the impression that they would be. Now, see how Mr. Bond dodges the question. Mr. Bond, who is asked about this data—whether these land commissioners are going to have the data so that the respective applicants can get the information—what does he say? He says, on page 128 of the hearings:

My judgment is that they know more about it than the Land Office does, because they are out over the ground, chasing around, doing things of that kind.

It is only the land office which has the record of each plat in each township.

This man is making a disingenuous and misleading statement, because he says:

They are out on the ground chasing around and doing this kind of thing.

Think of a land commissioner "chasing out over the ground!" There is in my district a territory nearly 250 by 300 miles in extent, practically square, an area larger than from here to the State of New York. And yet Mr. Bond would have the committee believe that that land commissioner is going to be familiar with that enormous area. Mr. Bond is the man behind this whole thing, and he says they can do without the local land office because there are not many inquiries made.

Then he was asked the question, on page 128 of the hearings, "Do you keep such a record?" meaning of the inquiries made.

On page 128 he says, "No; we have no such record."

Now, I had my office in the land office at my town all summer, a land office that is not abolished, and hourly and daily men came up there to make their inquiries. They like to see a Government official and talk with him and get his advice and not go to some notary public or some United States commissioner 150 or 200 miles from the land office.

There has been more trouble, there have been more complications—

The CHAIRMAN. The time of the gentleman has expired.

Mr. SINNOTT. Mr. Chairman, I ask unanimous consent to proceed for three more minutes.

The CHAIRMAN. The gentleman from Oregon asks unanimous consent to proceed for three additional minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. SINNOTT. There has been more grief and more land contests because of the mistaken advice of these United States commissioners than from any other source that I know of in the land office practice, and I have been in that practice all my life.

Mr. RAKER. Will the gentleman yield?

Mr. SINNOTT. Yes.

Mr. RAKER. Is it not a fact that the land commissioner would have no information and he would have to go to the county seat or State capital, 300 or 400 miles away, in order to get it?

Mr. SINNOTT. Yes; and he would charge a man for that information. Now, here is another thing: The two offices in my district which are abolished are paying propositions. One pays 25 per cent into the Government more than the expenses, and the other pays 16 per cent. That is up to the last fiscal year. But both of these offices are to be consolidated.

One was consolidated last August, and that saves \$3,000 to that office; the other office is to be consolidated on the 1st of January of next year, yet Mr. Bond, the expert, who appears before this committee, did not know that was the law. He did not know it, or somebody else misled his chief, because a few months ago the department sent to the two Oregon Senators a request for the appointment of a new register for the Burns land office, although the office had been consolidated. Yet this wisacre, who appears before this committee and overpersuades this committee in the absence of anyone from the West, was about to foist upon the Government an official at \$3,000 a year, an official whose office had been abolished.

Gentlemen, I appeal to this House in the interest of fair play and representative government, in the interest of our right to represent our districts and constituents before these committees, and to have time and opportunity to present to the proper committees our arguments against this arbitrary, wholesale inconvenience to the land-office patrons of 39 States of this Union. [Applause.]

The CHAIRMAN. The time of the gentleman has again expired.

Mr. RAKER. Mr. Chairman—

The CHAIRMAN. Does the gentleman from California rise in opposition to the amendment?

Mr. RAKER. No; I am for the amendment.

The CHAIRMAN. Does any gentleman desire recognition in opposition to the amendment?

Mr. LAGUARDIA. I desire recognition in opposition to the amendment, Mr. Chairman.

The CHAIRMAN. The gentleman from New York is recognized.

Mr. LAGUARDIA. Mr. Chairman, only yesterday there was considerable applause in this Chamber in response to the President's appeal for economy. It does seem strange that the first appeal for the President's message on economy must come from an "irregular." It was understood in my part of the country that the majority would loyally support the President in all his recommendations. This is your first opportunity. Here is a recommendation to abolish a large number of useless offices. After very careful study at the Budget Bureau and after careful consideration and deliberation on the part of the committee, and yet Members of the President's own party, after only three days of the session, on the first appropriation bill take the floor in opposition to the President, and you talk about regularity to me. [Applause.] We will go along with the President in his economy program.

Mr. WILLIAMSON. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. WILLIAMSON. Would the gentleman be willing to abolish all the fourth-class post offices in the State of New York that do not pay their way?

Mr. LAGUARDIA. That is no comparison.

Mr. WILLIAMSON. Yes; it is a very good comparison.

Mr. LAGUARDIA. But I will say that the "gentleman from New York" is willing to reduce the Federal forces in New York State 33 per cent in order to get more efficiency and better service to the public.

Mr. WATKINS. Does the gentleman refer to prohibition-enforcement officers?

Mr. LAGUARDIA. No; I would put them under the civil service. Here is a chance for you Republicans to stand by your President and put the prohibition officers under civil service. I will vote with you to do that and be "regular." I doubt very much if you will stand by the President on that. [Applause.] I do not know what connection there is between the prohibition department and the land offices, but when it comes to real economy, abolition of the spoils system, and efficient service, we will see who is regular. I do hope that the majority will stand by the President on economy and on efficiency in the departments, and here is your first opportunity.

Gentlemen, I am against the amendment, and I hope it will be voted down.

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent that all debate on the pending amendment close in 10 minutes.

Mr. COLLIER. Mr. Chairman, reserving the right to object, I desire some time.

Mr. SWING. Mr. Chairman, I object to that. The gentleman from Michigan [Mr. CRAMTON] will want five minutes of that himself.

Mr. CRAMTON. I think it would be worth while for the committee if I should take five minutes.

Mr. SWING. That would leave only five minutes for us, and I object.

The CHAIRMAN. Objection is heard.

Mr. CRAMTON. I want to be fair and find out how much time is desired. I ask unanimous consent that all debate on the pending amendment close in 30 minutes.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent that all debate on the pending amendment close in 30 minutes. Is there objection?

Mr. TILLMAN. Mr. Chairman, I object.

Mr. RAKER. Mr. Chairman and gentlemen of the committee, it is unfortunate that we are compelled to present this matter at this time. I received a telegram from the register of the Susanville land office on November 29. My secretary immediately called up the office of the Commissioner of the General Land Office, and that was on the 1st of December. This is what we were advised:

No action is contemplated at present relative to the Susanville land office. However, the commissioner expects to recommend its elimination altogether some time in the near future. Will wait until he sees what action Congress takes relative to appropriations.

Now, on that same day I sent this telegram to the register:

Telegram received. No action is contemplated by Commissioner General Land Office at present relative to the consolidation or elimination of the Susanville land office. Will keep in close touch with matter and leave nothing undone to retain office as at present.

I went to the committee to get a hearing, but was unable to get one. I was unable to get a bill, and the first thing I learned was—

Mr. CRAMTON. Will the gentleman yield?

Mr. RAKER. Yes.

Mr. CRAMTON. Does the gentleman say he consulted with me at all about a hearing on this bill?

Mr. RAKER. Oh, no. I went to the committee's room, but I could not get a copy of the hearings even on Monday. I am not complaining.

Mr. CRAMTON. There has not been a day in three weeks but what I have been in my office all day, and the gentleman has not called upon me at all.

Mr. RAKER. I went to the Committee on Appropriations across the hall and I asked the gentleman in charge if I could get copy of the hearings. This was Monday. He said they were all exhausted and I could not get any, and I did not get them until the next day. I am not blaming the gentleman from Michigan at all.

Mr. CRAMTON. I understood the gentleman to say he had asked me for a chance to be heard.

Mr. RAKER. Oh, no; not to be heard at all.

Now, that was unfortunate because we are unable to present this matter. I immediately then telegraphed to the register, stating that I was mistaken and that I had either not understood the matter or had been improperly advised, and that there was a bill pending to abolish the office which would come up on yesterday.

I have received from the register a statement that this office has been paying at the rate of \$10,000 a year over and above all expenses, and I also received a letter from the judge of the county explaining the situation, and I have also heard from the Chamber of Commerce of Lassen County, the Chamber of Commerce of Modoc County, and the Chamber of Commerce of Plumas County, insisting that opportunity be given for a hearing and that the office be not abolished, because it is necessary by reason of the large amount of land involved and the amount of business done by that office.

Gentlemen, there is a further proposition involved. This is to be transferred to Sacramento, some 300 miles from Susanville. Lassen County, Modoc County, and the part of Plumas County involved are on the eastern side of the Sierra Nevada Mountains. We are 7,000 feet over the Sierra Nevadas, and in the wintertime we can only go part of the way by railroad, and after November until some time in March we can only get there by conveyance unless we go north 100 miles and swing around by way of Redding, another 150 miles, and then 125 miles down the valley to Sacramento.

This land office has been in the heart of this country where the people could attend to their business and attend to it properly, and to now cut it off would create an entirely different situation. In the northeastern part of our State the Sierra Nevada comes right around from Nevada and sweeps around in Lassen County, part of Plumas, and all of Modoc, and on the eastern slope the water never goes to the Pacific slope at all. The situation is entirely different from that in many other places. The distance is so great that the office ought not to be abolished.

These people have been paying taxes and this office has been a source of revenue to the Government. They sold some \$400,000 worth of timberland from the public domain in one lot last year. The public land has not been altogether disposed of yet. Therefore, there can be no possible reason based on the question of economy.

I am as strong for economy as any man can be, but it is not economy to compel a citizen who is entitled to service, entitled to have Government officials perform their work, to suffer such a hardship and be compelled to pay from \$10 to \$100 in order to get such an office do its work, because, in addition to the ordinary taxes which he is compelled to pay, he would have to pay that amount of money out of his pocket in order to have his business attended to.

Supplemental to what the gentleman from Oregon [Mr. SINNOTT] has said, I have been familiar with land practice for the last 45 years and have appeared before the land office at Susanville.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. RAKER. Mr. Chairman, I ask that I may have three minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from California? [After a pause.] The Chair hears none.

Mr. RAKER. The people believe in economy; they believe in service; they believe in having their business attended to properly. A land commissioner is nothing more or less than a notary public, in substance, appointed by the presiding judge of the United States court to take affidavits and do other business, and under the land laws he may take certain affidavits and do other things such as a notary public might

do or a county clerk might do, but he can never have access to the records of the land office unless he goes there, and then he would have to make copies of them. He would have to pay for the making of those copies, and this bill and his expenses would have to be paid; and if the citizen whom he represents desired to be heard, he would have to take the secondhand word of this man after paying his expenses, to say nothing of the time and trouble involved in going to the office; whereas if the office is maintained within a reasonable distance, he can go to the office, present his case to the register, who will look up on the maps and plats and there will find the condition of the land, and then the man can determine whether he wants to file on it or not.

Mr. SINNOTT. Will the gentleman yield?

Mr. RAKER. Yes.

Mr. SINNOTT. His advice would be equivalent to the advice of an ordinary notary public on a legal question.

Mr. RAKER. Exactly so; whereas a register is a Government official. We have relieved many a homesteader and timberland claimant and desert-land claimant by virtue of receiving the advice of the register of the land office, and when his filing according to the law in the office might be different from that in the Land Office, it has been said that the register is an official of the Government and therefore an innocent party ought not to be deprived of his rights, and it is right that that should be done.

Therefore, while every man here might plead economy, every man here might say he is for economy, no man can go home to his constituents and honestly look them in the face and say he is in favor of economy when, as a matter of fact, he deprives the people of the means to do their legitimate business in a country that requires settlement and development, where every ingenuity, where every kind of strength and vitality is required of a man to build up this country. He ought not to be deprived of the opportunity to carry on the legitimate business, to say nothing of going through the hardships he has to go through in developing a pioneer country. [Applause.]

On this subject the first telegram received from Mr. Coffin, register, follows:

SUSANVILLE, CALIF., November 29, 1924.

Hon. JOHN E. RAKER, M. C.,

Washington, D. C.:

Relative to consolidation of Susanville with Sacramento Land office, have to advise Susanville office is self-supporting. Surplus of earnings over expenditures for last two fiscal years nearly \$10,000. This district isolated and mountainous. To close office will bring hardship on homesteaders and home seekers.

E. B. COFFIN, Register.

I made inquiry of the General Land Office and got the following response, viz:

No action is contemplated at present relative to the Susanville land office. However, the commissioner expects to recommend its elimination altogether sometime in the near future. Will wait until he sees what action Congress takes relative to appropriation.

Then sent the following telegram to Mr. Coffin, viz:

WASHINGTON, D. C., December 1, 1924.

Hon. E. B. COFFIN,

Register Susanville Land Office, Susanville, Calif.:

Telegram received. No action is contemplated by Commissioner General Land Office at present relative to consolidation or elimination of Susanville land office. Will keep in close touch with matter, and leave nothing undone to retain office as at present.

JOHN E. RAKER, M. C.

As soon as I learned the true situation, which was on December 3, 1924, and not before, I sent the following telegram to Mr. Coffin:

WASHINGTON, D. C., December 3, 1924.

Hon. E. B. COFFIN,

Register United States Land Office, Susanville, Calif.:

Contrary to report given me by General Land Office and as given you in my reply to your telegram relative to abolishing the Susanville land office the department recommended its abolishment and the Appropriations Committee have provided for its elimination by bill reported yesterday, which bill is being considered in House to-day. Will do our best to stay this action. Telegraph me reasons why this office should not be abolished. Have chamber of commerce and others give their desires in the matter at once.

JOHN E. RAKER, M. C.

Received the following telegrams and letter regarding the abolishment of this land office at Susanville, as follows:

SUSANVILLE, CALIF., December 3, 1924.

JOHN E. RAKER,
House of Representatives, Washington, D. C.:

Over one million acres Government land in Susanville land district, which can be administered here best. Office on paying basis. Lumber and agricultural interests demand local services. Will get State organization to wire you.

LASSEN COUNTY CHAMBER OF COMMERCE.

QUINCY, CALIF., December 3, 1924.

JOHN E. RAKER, M. C.,
Washington, D. C.:

People of Plumas County not in favor of moving Susanville land office to Sacramento. Use your best efforts in blocking same.

QUINCY COMMERCIAL CLUB.

ALTURAS, CALIF., December 4, 1924.

JOHN E. RAKER, M. C.,
Capitol Building, Washington, D. C.:

Modoc protests against any change in the location of Susanville land office and requests you to prevent the passage of any such measure. Revenue from that office is sufficient to pay its own expenses. Any change would mean a great inconvenience to Modoc, Lassen, Plumas.

MODOC COUNTY DEVELOPMENT BOARD,
E. F. AUBLE, Vice President.

SUSANVILLE, CALIF., December 4, 1924.

HON. JOHN E. RAKER,
House of Representatives, Washington, D. C.:

Your telegram even date received. There is no logical reason for elimination of this office. Is on a sound paying basis and serves four counties at present. Over a million acres of unappropriated Government lands within the district besides thousands of acres not yet titled that have been filed on. Protests from all parts of the district follow.

E. B. COFFIN, Register.

SUSANVILLE, CALIF., December 4, 1924.

JOHN E. RAKER,
House of Representatives, Washington, D. C.:

Lassen Advocate joins in protesting removal of Susanville land office. No valid reason for change. We commend your efforts.

LASSEN ADVOCATE.

SUSANVILLE, CALIF., December 4, 1924.

JOHN E. RAKER,
House of Representatives, Washington, D. C.:

Farmers of Modoc, Lassen, and Plumas Counties urge every effort to prevent removal of land office. Great convenience to farmers and stockmen and saves expense.

LASSEN COUNTY FARM BUREAU.

WESTWOOD, CALIF., December 3, 1924.

HON. JOHN E. RAKER, M. C.,
Washington, D. C.:

If land office is moved from Susanville to Sacramento, it will work a hardship on our company and the people generally of this district not only because of the long distance on high mountain railroad fare but the train service is not only slow but irregular, so we would like you to protest against having the office moved.

THE RED RIVER LUMBER CO.

CHAMBERS SUPERIOR COURT,
Susanville, Calif., November 29, 1924.

HON. JOHN E. RAKER, M. C.,
Washington, D. C.

DEAR SIR: Mr. Earl B. Coffin, register of the land office at this place, has just been to see me concerning an effort on the part of some of the citizens of Sacramento to have the Susanville land office consolidated with the Sacramento office. I understand that Mr. Coffin forwarded you a telegram last evening concerning this proposed change.

Mr. Coffin tells me that the receipts of the office over and above the expenses of maintaining and operating the same for the two fiscal years just past is something like \$10,000 per year. It would seem that from a financial standpoint there could be no object in closing the Susanville land office.

Again, we have such a large amount of land that still belongs to the Government in Lassen County, much of which is not worth a damn for anything except a possible stock raising, and very little use for that, and yet some of the stockmen are willing to take up portions of this land, and continue to do so unless the expense of obtaining it

becomes prohibitive, which would be the case were they compelled to lose a week's time, or thereabouts, and spend a hundred or a hundred and fifty dollars to visit a land office to make their filing, and the same amount of money when they came to make their proof, which would be the case if a removal were had to Sacramento.

Furthermore, those pieces that would have some value and which people would like to take as a homestead are desert land, and many of these people are too poor to stand the expenses of a trip to Sacramento and return, and therefore much of this land would not be occupied or used for many years.

You are perfectly familiar with conditions existing here and in the land district, and I trust you will take this matter up and use your very best endeavors to thwart the action of these Sacramento people. I understand it is merely some local people there that are starting the agitation, and that it is not the sense of the people generally. Anything we can do to assist you in seeing that justice is done in this matter, please advise us and we will get busy.

Very truly yours,

H. D. BURROUGHS, Judge.

Mr. COLLIER. Mr. Chairman and gentlemen of the House, this question came up last year both in the committee and on a roll call of the House, and the abolishment of these various land offices was not approved. We have heard a good deal this afternoon about the hardship of having to go 150 or 200 miles, and I appreciate the hardships that the gentlemen speak of; but I want to say to you that in the case of Mississippi you do not expect us to go 150 miles or 200 miles, you expect us to go 1,100 miles and to come up here to the city of Washington. You want to destroy the office there.

If this is to be on the ground of economy, I refer you to the reports in the papers presented by the committee. It is true that the Jackson (Miss.) office is a small office. A great part of our public land has been taken up, but we still have some public land that is not settled, and people continually have to look at these records. Now, talking about economy, while this small office takes in somewhere about \$8,000, it is costing the Government just about half that amount to run the office.

In view of the great inconvenience to the public, in view of the fact that some of the records are old and musty, but placed where we can now get at them, and they will be taken away a thousand miles and many of them perhaps destroyed, I think it is false economy to abolish these offices at this time. I am not going to take up any more of the time of the House. I think we all believe in economy, but the time we are wasting in trying to do away with these little offices is not much economy in itself. This matter was settled by a decisive vote in both the committee and in the House by a roll call, and I see no reason why these changes should be made, and I hope they will not be made. [Applause.]

Mr. LEAVITT. Mr. Chairman and gentlemen of the House, I think the charge of lack of economy should lie at the feet of either this subcommittee or of the officials of the Land Office; whoever are responsible for bringing this matter before us in this form every year. Instead of giving those of us who represent districts needing these land offices an opportunity to cooperate with them in the reduction, and who would fairly agree to a proper reduction if given such an opportunity in a businesslike way, they force us every year to come in here and fight this matter. We are willing to stand for proper reductions as the business of the land offices shrinks. In the State of Montana we are being asked to give up six land offices, offices where the receipts are five times as much as they are costing. As said by the gentleman from California [Mr. RAKER] we are trying in the West to build up a new pioneer country—to make homes on land that is undeveloped—but we can not do it by making it inconvenient for people who come there. Nor do these people originate in Montana. They come from Middle Western and Eastern States that they may have the opportunity to make homes in a new country. To hamper them is not the way to build a nation. That is not the way to economize in this Congress of the United States. [Applause.] I want to repeat my charge that the real cause for this lack of economy is that we are forced to fight the bill when we should have been given an opportunity to enter into this in a cooperative way, into some sort of a plan for reducing the offices as they should be reduced instead of having to fight for them year after year. [Applause.]

Mr. LEATHERWOOD. Mr. Chairman, any proposed economy that impairs the public service I think is false economy. We have a situation in the State of Utah very similar to that described by the gentleman from California [Mr. RAKER]. There are two land offices in the State; the principal one is at Salt

Lake City. Another that serves an important portion of the State is in the extreme northeastern corner, at Vernal. It is proposed by this legislation to abolish the Vernal office. I do not have the figures before me, but there is a large volume of business transacted in that office. I do know that Vernal lies in that portion of the State where there is a large percentage of the public domain yet unentered. If you abolish the office, during the winter season and particularly when there are heavy snows, the people of that part of the State are practically cut off from access to the office at Salt Lake City. It seems to me it is as important to the Government to make it possible for these people to do business in the land office at Vernal as it is to maintain post offices in the same section of the State, many of which do not pay expenses.

Mr. WILLIAMSON. Will the gentleman yield?

Mr. LEATHERWOOD. I will.

Mr. WILLIAMSON. I have the figures here, and I find that the receipts in Vernal are five times as much as are expended for the maintenance of the office.

Mr. LEATHERWOOD. I thank the gentleman for the information. The gentleman says that the revenue of the office is five times what it costs to operate it. Yet the proposed legislation, in the face of this record, says that they will abolish this office and prevent these people, a portion of the year, from getting any service at a land office, and at other times they must travel 200 miles. There is no railroad connecting this portion of the State with Salt Lake City. It is a hard trip under most favorable conditions, and most of it made by stage. I can not conceive why gentlemen in the Congress want to go out into that country and try to impair the service and deprive the people of an office that is self-sustaining and that pays five times its cost of maintenance back to the Government. [Applause.]

Mr. TILLMAN. Mr. Chairman, I suggest to the gentleman from New York [Mr. LaGUARDIA] and also to the President, that we might practice economy instead of preaching it by eliminating the proposed appropriation of \$12,000,000 for the Cape Cod Canal, much favored by New York, by New England, and by President Coolidge, and also we could, with safety and with small hurt to the nation, eliminate a large sum of money that is to be asked for rivers and harbors near New York City. I suggest to the Chairman of the committee [Mr. Cramton] that we might scrap the item of \$406,000 which they seek to appropriate for Howard University, a private institution of higher learning here in the city of Washington, an appropriation of doubtful constitutionality, at least of doubtful propriety. I suggest that we might save a considerable item in this modest bill of \$268,000,000, by cutting out the item of \$202,000 for the Freedmen's Bureau, at least cut or diminish the appropriation of \$50,000 for additional improvements asked. There is another appropriation for the District of Columbia that might be cut the amount of \$103,400, for the Columbia Institution for the Deaf. If gentlemen are obsessed with a burning desire for reducing appropriations why not reduce appropriations? You are seeking to abolish 39 land offices, and altogether the saving in money is a mere bagatelle. I am interested particularly in my own land office at Harrison, Ark. It has been there 50 years. It has served an excellent purpose. It is housed in an elegant Federal building. There is no rent to pay. This office is located in the heart of the vacant land section of the State of Arkansas. Last year there were a large number of unperfected entries, and the number of applications amounted to 456. There are still left there 99,786 acres of vacant lands. In addition to this vacant land, one of the forest reserves is located in this locality, and under the rulings of the department, a man can homestead land in that forest reserve where it is known to be agricultural land. If this office is abolished my people—and the people who homestead land are usually poor people—will be compelled to go, if they desire to consult the register or the receiver of the land office, 150 miles away to the capital of the State, and they must change trains a time or two in order to get there.

They will have to spend quite a sum of money and expend a large amount of time each trip. Whether or not it is necessary for people to go to the land office to consult with a register or a receiver, they actually do so in perfecting their entries, or in making their entries or contests, and in making inquiries as to vacant lands.

This question of economy is important and I favor economy, but let us not start to economize at the bottom. Let us begin at the top. If economy is the sole issue, you might well dispense with all the rural carriers of the country, because they are expensive. You may also abolish a great many of the post offices of the country because they cost more than the amount of the revenue derived from them. The Post Office Department

itself, admittedly a well-conducted and popular department, exceeds its revenue. Should it be abolished? Congressmen are quite expensive luxuries themselves. Does the battle-ax brigade favor their curtailment?

In my district there is quite a lot of activity at the present time in the matter of homesteading vacant lands. This land is chiefly in the mountains, and the grape industry is getting to be an important enterprise there. Welch has established his southwestern grape-juice factory in my district, and a great many people from the North and elsewhere are coming into that country to acquire cheap lands, to homestead them, if they can get them.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. TILLMAN. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. TILLMAN. Many people are going into that section to take advantage of the cheap land for the purpose of setting out vineyards, and Mr. Welch states that the soil of that section has been analyzed, and that it is ideal for grapes, and that at the time these grapes come on the market it is bare of grapes from any other section of the country. For that reason grape culture there can hardly be overdone.

I want this land office preserved, first to encourage homestead entries, to allow these people who have already made entries to perfect them, and not allow them to be cut off without notice. I knew nothing about this provision until it was read here on the floor of the House. I did not know about it two years ago nor one year ago until the bill was under debate in this House. The jurisdiction of this particular subject rests with the Public Lands Committee, and you have heard the chairman of that committee, a very able and popular gentleman here on this floor, and he feels keenly, and his committee feels keenly, the deprivation of jurisdiction which has been brought about with reference to this subject.

I do not want to appeal to you in a selfish way nor to make any threats, but there are a great many of us who have local matters in which we are interested, and we can and should be mutually fair and considerate. We have to pay some little attention to the practical side of legislation. We feel like assisting those who help us as far as it is proper to do so. We do not believe that these 39 offices should be abolished without notice to the people who live contiguous to them, or that these people should be deprived of the privilege of easy communication with those offices.

This is not a new question. We have debated it for three years, and each time the Membership of the House has risen to the occasion and has rebuked the efforts upon the part of this committee to usurp the jurisdiction of the Committee on the Public Lands. This is not a small matter to intending homesteaders, and, after all, the homesteader has been an important unit in the development of this Republic, and he is entitled to honorable mention and fair treatment. [Applause.]

The CHAIRMAN. The time of the gentleman from Arkansas has again expired.

Mr. SWING. Mr. Chairman and gentlemen of the committee, it seems to me that the test of whether a public agency justifies its existence is not to be determined entirely by the question of whether it pays in dollars and cents. But even on that basis the two land offices which are located in my district, which is 500 miles long and 200 miles wide, pays the Government a profit of 50 per cent a year on the business transacted, which is a pretty good dividend. The proper test of the justification of the existence of a governmental agency, I believe, is whether it serves a useful purpose, whether it renders a real service to the people. As proof of that in this case you have the testimony of the Members of this House who live in the communities affected, and who ought to know, and I believe you will take their word for it when they say that these land offices are rendering a useful and needed service. I was much of the time this summer in and out of one of these land offices and saw people going in and out utilizing its officials and records constantly. If this measure is adopted as it is written, these same people will hereafter have to go from 225 to 250 miles to the city of Los Angeles to get desired information and advice or to transact their business. It is not true they can transact this business by mail. You can get your medicine by mail if you want to, but it is not considered good practice to do it; nor will any lawyer advise his client to transact his law business by mail. Every lawyer knows how frequently he has to go to the county clerk's office where the court records are; and so the records in these land offices are constantly referred to by those having land-office

business. Entrymen desire to consult the register and receiver regarding their public-land problems because they know that they are experts who can and will give helpful advice and assistance. Most of these offices are located in the heart of an area where there is much public land and therefore render a beneficial service to the public. If these people hereafter are compelled to go 200 or 300 miles, it will cost them about \$50 each, or if they take their witness \$150, which would be a heavy burden to them, because most of these settlers are people of very limited means.

The real issue here is not so much whether the Government is going to make a profit out of the sale of the public lands at \$1.25 an acre, but whether there is a big public policy to be served, and that is to encourage the building up of our country, to create new wealth and tax-paying property, and produce additional food supplies for the whole country. That is a national policy which, I believe, we all favor. These land offices are agencies which are rendering very useful and very beneficial service in furtherance of that policy, and in addition in most every case are paying a handsome dividend into the Public Treasury besides.

The CHAIRMAN. All time has expired. The question is on the amendment offered by the gentleman from Oregon.

Mr. SUMMERS of Washington rose.

Mr. CRAMTON. I had the impression that the request I made was objected to.

The CHAIRMAN. The Chair let the debate run along pretty well. The rule, of course, says that an amendment shall be debated for five minutes on one side and five minutes on the other.

Mr. CRAMTON. I understand that rule, Mr. Chairman, but the committee in charge of the bill have a certain responsibility, and we have sought to make an amicable agreement to limit the time without enforcing the drastic rule to which the Chair referred. The requests I made have been objected to. The chairman of the subcommittee had the understanding that the last request he made was objected to.

The CHAIRMAN. That is true.

Mr. CRAMTON. If the Chair will permit, the committee does not desire any arbitrary action. We have not limited the time, desiring to give these gentlemen an opportunity to present their case.

The CHAIRMAN. There was a very simple method. The Chair asked the gentlemen as they rose if they moved to strike out the last word of the amendment—

Mr. CRAMTON. Permit me to make this request, and that is that further debate on the pending amendment be limited to 20 minutes; of which the gentleman from Washington [Mr. SUMMERS] have five minutes. I will ask that the time be limited to 30 minutes, 15 minutes to those in favor of the bill and 15 minutes to those against it, notwithstanding most of the time has been consumed by those favoring the amendment.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent that the time be limited to 30 minutes on this amendment and all amendments thereto. Is there objection?

Mr. HILL of Washington. Mr. Chairman, reserving the right to object, I would like to have three minutes.

Mr. CRAMTON. I am not making any division of time except—

The CHAIRMAN. The gentleman from Washington is recognized.

Mr. SINNOTT. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. Will the gentleman from Washington yield?

Mr. SUMMERS of Washington. I yield.

Mr. SINNOTT. Do I understand the proponents of the amendment have the right to close?

Mr. CRAMTON. Mr. Chairman, I do not understand anything of that kind. The committee has the right to close.

Mr. CARTER. Mr. Chairman, I have never seen any other rule invoked since I have been here except that those in charge of the bill had the right to close debate.

Mr. SINNOTT. The rule is that the proposer of the amendment has the right to close.

The CHAIRMAN. The gentleman from Washington [Mr. SUMMERS] is recognized.

Mr. SUMMERS of Washington. Mr. Chairman, as a matter of economy, when we consider the taxpayer we should leave the land offices where the territory is extensive, as it is in many of the Western States.

It is proposed here to eliminate the Yakima and the Walla Walla offices in eastern and southeastern Washington, in a territory that is about half the size of the State of Michigan. That will mean that the poor homesteader who wants to try to make a home on the land and develop the waste places is

going to have to travel from 250 to 300 miles in order to get the simplest elementary information in regard to vacant land or how to proceed.

The suggestion is made that he go to a United States court commissioner. Well, in that case he might have to travel 150 miles even for that purpose, and then he will find a man who has no information along the line he seeks.

Now, take the Yakima office. The register and receiver is already combined in one position there. He is a very efficient gentleman and he has earned during the last year \$2,627.14, and the clerk hire and incidental expenses were \$1,817.50. There was no extravagance or waste there. There are still 197,640 acres of vacant land in that territory, and there are unperfected entries to the extent of 92,160 acres more.

Over in Walla Walla the register and receiver is combined in one officer, and that officer has earned during the last fiscal year \$1,169.85. He keeps the office open and is there ready to serve a large territory. He is there to help display the records and to give the information that the homesteader seeks. We still have 108,758 acres of vacant land there, and we have in unperfected entries 83,399 acres additional.

I submit to you that you may be saving at the spigot but you are wasting at the bung. You are throwing ten times the expense on the man who seeks to establish a home on the land. You are going to necessitate his traveling into Spokane, two or three hundred miles away, or into Seattle, from 300 to 400 miles away, a total expense, including two or three days of time and hotel bill and transportation, of anywhere from \$30 to \$50. That is the best he can possibly do. Not very many trips will have to be made on the part of the taxpayer in that way in order to cause him more expense than the land office costs.

These land offices are practically paying their own way. One of them is a little more than paying and the other a little less than paying its own way. But they are serving a large territory, sparsely settled, and they are helping to develop that territory.

I submit to you that as a matter of economy we should not close offices of that kind.

Mr. EVANS of Montana. Mr. Chairman, I rise to support the amendment. The bill as brought into this House by the Appropriations Committee abolishes 39 land offices situated in the public-land States. Six of these offices, to wit: Billings, Bozeman, Glasgow, Great Falls, Kalispell, and Lewistown, which it is proposed to abolish, and situated in the State of Montana, which I have the honor in part to represent. These offices have been in existence for from 25 to 40 years and have been of great service and convenience to our people. There are still millions of acres of public lands located in the State of Montana, and millions of acres of known coal land and oil land, and all dealings with such properties have heretofore gone through some of these land offices. It is now proposed on the plea of economy to abolish these institutions. These offices have been our convenience for 40 years; they are our convenience just the same as your post offices or rural carriers or your customhouses, and yet without a hearing, without any notice to the Representatives of these States, without any opportunity to be heard, to present our claims or plead our cause, the people living in these Western States are to be deprived of these conveniences.

The offices situated at Lewistown and Great Falls are each known to be in the center of great oil fields that are just beginning to be developed—hundreds and probably thousands of people will want access to records and maps and want information from these offices annually; and yet, regardless of the inconvenience to our people and without notice to us, these offices are to be closed to the public on the sole ground of economy. It has been suggested that this business can be done by a land commissioner. A land commissioner is nothing more nor less than a notary public, in substance, appointed by the presiding judge of the United States court to take affidavits and do other business, and under the land laws he may take certain affidavits and do other things such as a notary public might do or a county clerk might do, but he can never have access to the records of the land office unless he goes there, and then he would have to make copies of them. He would have to be paid for making these copies, and this bill and his expenses would have to be paid; and if a citizen whom he represents desired to be heard, he would have to take the second-hand word of this man after paying his expenses, to say nothing of the time and trouble involved in going to a distant office, whereas if the office is maintained within a reasonable distance he can go to the office, present his case to the register, who will look up on the maps and plats and there will find the condition of the land, and then the man can determine whether he wants to file on it or not.

Therefore, while every man here might plead economy, every man here might say he is for economy, no man can go home to his constituents and honestly look them in the face and say he is in favor of economy when, as a matter of fact, he deprives the people of the means to do their legitimate business in a country that requires settlement and development, where every ingenuity, where every kind of strength and vitality is required of a man to build up this country. He ought not to be deprived of the opportunity to carry on the legitimate business, to say nothing of going through the hardships he has to go through in developing a pioneer country.

It seems to me that the test of whether a public agency justifies its existence is not to be determined entirely by the question of whether it pays in dollars and cents. The proper test of the justification of a governmental agency, I believe, is whether it serves a useful purpose, whether it serves a real service to the people. As proof of that in this case you have the testimony of the Members of this House who live in the communities affected, and who ought to know, and I believe you will take their word for it when they say that these land offices are rendering a useful and a needed service. I was often this summer in and out of some of these land offices and saw people going in and out, utilizing its officials and records constantly. If this measure is adopted as it is written, these same people will hereafter have to go from 200 to 500 miles to get the desired information and advice or to transact their business. It is not true that they can transact their business by mail.

No lawyer will advise his client to transact his law business by mail. Every lawyer knows how frequently he has to go to the county clerk's office where the court records are; and so the records in these land offices are constantly referred to by those having land-office business. Entry men desire to consult the register and receiver regarding their public-land problems, because they know that they are experts who can and will give helpful advice and assistance. Most of these offices are located in the heart of an area where there is much public land, and therefore render a beneficial service to the public. If these people hereafter are compelled to go 200 or 300 miles, it will be a heavy burden upon them, because most of these settlers are people of very limited means.

The real issue here is not so much whether the Government is going to make a profit out of the sale of the public lands at \$1.25 an acre but whether there is a big public policy to be served, and that is to encourage the building up of our country, to create new wealth and taxpaying property, and produce additional food supplies for the whole country. That is a national policy which, I believe, we all favor. These land offices are agencies which are rendering very useful and very beneficial service in furtherance of that policy, and in addition in most every case are paying a handsome dividend into the Public Treasury besides.

I protest against their abolishment, and I am therefore for this amendment.

Mr. RICHARDS. Mr. Chairman and gentlemen of the committee, we are all for economy in every true sense of the word. If not, we have no business being here.

Now, when it comes to a land office being essential, I can conceive of nothing being more so than that office which is situated in Elko in my State.

In the first place, Nevada is 90 per cent Government-owned land. Within the jurisdiction of the Elko land office are over 18,000,000 acres of this land, a vast territory, with few people, and extravagant distances; 110,000 square miles of territory and 77,000 square people. They may not have dealt "square" with me at the last election, but they are "square" just the same.

This land office is essential. It has become an established adjunct in the business affairs and in the social affairs of our people, and in all that which goes to make up the great scheme of our business in that country, it is just as essential as is your post office, and just as essential as some of our courts. In so far as receipts and expenditures of the Elko land office are concerned, last year, according to the report in the hearings, the expenses of the office were only 40.16 per cent of the receipts. That is, the expenses were \$5,719.61 and the receipts were \$12,389.76. If you consolidate this office with the Carson City office, which is over 300 miles from Elko and at a greater distance from some of the outlying sections than the distance at present from the Elko land office, you will subject our people to great inconvenience. It is true that we have modern conveyances that are sufficient; we have the Southern Pacific Railroad and we have automobiles. But for the land claimant to go to Elko from Carson City to look up a record, he would be forced to incur an ex-

pense of time and delay that ought not to be; in many instances forfeit a valid claim or entry owing to inability to defray expenses over the greater distance.

Mr. TILLMAN. The receipts of the office go into the Treasury of Uncle Sam?

Mr. RICHARDS. Certainly. Uncle Sam is receiving \$12,389.76 and is paying out \$5,719.61.

Mr. HUDSPETH. Mr. Chairman, will the gentleman yield?

Mr. RICHARDS. Yes.

Mr. HUDSPETH. Every office produces an excess of receipts, and they go into the Treasury?

Mr. RICHARDS. Yes.

Mr. HUDSPETH. I am surprised at my friend from Michigan trying to abolish offices yielding revenue to the Government. He is an honorable gentleman, and he is in favor of economy.

Mr. O'CONNELL of New York. Would not this help the railroads some?

Mr. RICHARDS. Possibly that would be in keeping with the theories of the party on the other side of the aisle, I suppose.

Now, I want to show you what is said by the present receiver of the Elko land office, Mr. George Russell:

I might say that one can get but little idea of the work done in this office from our reports. There is never a day that we don't have to look up land matters and furnish information as to the status of pending applications, land open for entry, etc.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RICHARDS. Mr. Chairman, I have but a line or two more and ask for an additional half second.

The CHAIRMAN. The gentleman from Nevada asks to proceed for an additional half second. Is there objection? [After a pause.] The Chair hears none.

Mr. RICHARDS (reading)—

The removal of our maps and tract books would work a great hardship, not only on those who might desire to take up land, but on those who hold land already and who want maps for plats made.

Mr. CRAMTON. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CRAMTON. How does the time remain?

The CHAIRMAN. There are 18 minutes remaining, the Chair will say to the gentleman from Michigan.

Mr. CRAMTON. Those opposed to the amendment have 15 minutes, and there are 3 minutes on the other side. The division was between those for and against the amendment.

The CHAIRMAN. The Chair does not recall that was put in the unanimous-consent request.

Mr. CRAMTON. That was the request I presented.

The CHAIRMAN. Of course, in allotting time the Chair, if anyone demanded recognition in opposition to the amendment or in favor of the amendment, would recognize them alternately. But the Chair does not recall that the unanimous-consent request, as stated by the Chair, required that the time be divided equally between those for and against.

Mr. CRAMTON. The Record will show my request. There are three minutes remaining anyway and I believe that is more than the gentleman from Washington [Mr. JOHNSON] will require.

Mr. JOHNSON of Washington. Mr. Chairman—

The CHAIRMAN. The gentleman from Washington is recognized.

Mr. JOHNSON of Washington. Mr. Chairman, I want to state that I am thoroughly opposed to this form of making legislation, and bringing in bills without chance for Members to be heard. I expect to have something to say on other matters in this bill, particularly Indian schools and allotments of Indian lands.

I have been in Congress for several years and have seen two offices of this kind go out of my district, and the office at Vancouver, the last one goes. It is a big district without a land office if this bill passes as written. I know a little something about the State of Oregon, and, as a matter of fact, instead of striking down land offices in Oregon, Congress, in my opinion, should be setting one up at Bend, near the center of that State. This whole proposition is not fair. The better thing to do would be to abolish the entire land office business, end all homesteading rather than to make that doubtful proposition just this much harder and more expensive for persons to homestead.

Mr. Chairman, I yield back the balance of my time.

Mr. CARTER. Mr. Chairman, the committee in taking this action simply undertook to strike out those particular land offices which the department said were no longer necessary.

The committee was careful not to add any other offices for fear that some damage might be done the service.

Now, I think, Mr. Chairman—

Mr. SINNOTT. Will the gentleman yield?

Mr. CARTER. Yes.

Mr. SINNOTT. Will the gentleman point to anything in the hearings where they state these offices are not necessary?

Mr. CARTER. Why, yes.

Mr. SINNOTT. Is not this the statement?

Mr. CARTER. The mere fact that they recommend that these offices be abolished carries with it on its face the assertion that the offices are not necessary. Certainly they are not wanting offices abolished that are necessary. They would not make a recommendation of that kind.

Mr. SINNOTT. Does not the gentleman know—

Mr. CARTER. I can not yield further, as I have but five minutes.

Mr. SINNOTT. But the gentleman does not want to inadvertently mislead the House?

Mr. CARTER. I am not misleading the House.

Mr. SINNOTT. Of course, Mr. Bond stated they cut them out because they were ordered to cut down their estimates, and these offices were very handy.

Mr. CARTER. Is it the gentleman's idea that his administration, in order to secure economy, is wrecking a service that is necessary for the people of this country? Of course, that would appear to be the position the gentleman takes when he says the department has recommended the abolishment of offices that are still necessary.

Mr. SINNOTT. I say that Mr. Bond testified—

Mr. CARTER. I would like to yield to my friend further, but he knows I have only five minutes. I think gentlemen are unduly exercised about the effect this is going to have; that is, the effect the abolishment of these offices is going to have in their districts. We once had a number of these offices in Oklahoma and there were three in my own district. One of the first things I met when I came to Congress was the abolishment of two of those land offices in my district. I went down to the committee and asked them this question: "What are you gentlemen trying to do to me?" They said, "Why, the department says there is no business for these offices; they are through; your lands have been taken up and filed on and there is no further necessity to retain and keep these offices there except to keep some men in office." So, having no case, I acquiesced in the position taken by the department.

Mr. SMITH. Will the gentleman yield?

The CHAIRMAN. Does the gentleman yield to the gentleman from Idaho?

Mr. CARTER. I will yield in a minute, when I finish this story. When that report was made to the House the newspaper boys, of course, took it up and started it all over the country and lo and behold the mayor and president of the commercial club in my own home town came here and they said to me, "You are going to wreck things down there; you are doing away with a valuable institution that ought to be retained and kept." "But," I said, "gentlemen, the department has made the statement and put a statement in the record which indicates that these offices are no longer necessary, so that I have no case. I am willing to go as far as you can give me any logical reason to go, but I have nothing to say in defense of it." "Well," they said, "it is going to ruin you for election; you will certainly lose that country down there if you let these land offices be stricken out." I said, "I can not help it; there is no need for them and I can not retain them." They were stricken out, and the only time I ever heard of the proposition afterwards was when one fellow came to me and told me, in my own home town, "I am mighty glad to see you had the nerve to stand up and strike out these sinecures down there and preventing men from drawing salaries who had no work to do." It was not a question of nerve but it was merely a question of my not being able to prevent it; that is all.

I suppose I would have been like the other boys, and when the president of the commercial club and the mayor bore down on me I would have tried to have continued the offices. If I could; but I found out afterwards that I had done the right thing, and perhaps did not know I was doing such a good thing when I did it. Now I yield to the gentleman from Idaho.

Mr. SMITH. Is it not a fact that the Secretary of the Interior has authority now under general law to abandon these offices if they are not needed? This attempt to abandon these offices by legislation is not only unwise and unfair but unnecessary.

The act of June 12, 1840, provides when land offices may be discontinued by the Secretary of the Interior, as follows:

SEC. 2248 (R. S.). Whenever the quantity of public land remaining unsold in any land district is reduced to a number of acres less than 100,000, it shall be the duty of the Secretary of the Interior to discontinue the land office of such district; and if any land in any such district remains unsold at the time of the discontinuance of a land office, the same shall be subject to sale at some one of the existing land offices most convenient to the district in which the land office has been discontinued, of which the Secretary of the Interior shall give notice.

The act of March 3, 1853 provides when land office may be annexed to adjacent district by the President, as follows:

SEC. 2250 (R. S.). Whenever the cost of collecting the revenue from the sales of the public lands in any land district is as much as one-third of the whole amount of revenue collected in such district, it may be lawful for the President, if in his opinion not incompatible with the public interest, to discontinue the land office in such district and to annex the same to some other adjoining land district.

Mr. CARTER. Certainly; but the gentleman knows what would happen if he should undertake to abolish the office in his district. The gentleman himself and his Senator would be right down on the Secretary's neck, and it would be worth the Secretary's life to try to abolish them under such circumstances as that. [Applause.]

Mr. SUMMERS of Washington and Mr. COLLIER rose.

Mr. CARTER. I yield first to the gentleman from Washington.

Mr. SUMMERS of Washington. The gentleman has in mind the fact that the man in charge of these offices is not paid beyond the earnings of the office, but is simply paid from the fees that come in.

Mr. CARTER. That is true.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

Mr. EVANS of Montana. Reserving the right to object, is that to be in addition to the time fixed?

Mr. CRAMTON. Oh, no.

Mr. EVANS of Montana. Then I have no objection.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to proceed for 10 minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. CRAMTON. Mr. Chairman and gentlemen of the committee, it was only yesterday we sat here and heard read these words from the President:

In my opinion the Government can do more to remedy the economic ills of the people by a system of rigid economy in public expenditure than can be accomplished through any other action.

Anybody—

Said the President—

can reduce taxes, but it is not so easy to stand in the gap and resist the passage of increasing appropriation bills which would make tax reduction impossible.

We have for an hour or more listened to gentlemen who have laid offices in behalf of this amendment which seeks to destroy a saving of \$250,000 annually hereafter, equivalent to the income on \$5,000,000.

All of these land offices stand together. There is no amendment offered to save this one or that one in which the committee may have erred. No; the proposition is the old-fashioned, pork-barrel proposition of everybody standing together. There is the office in the district of the gentleman from Arkansas where the cost of operating it is 127 per cent of all the receipts.

Mr. LEAVITT. Will the gentleman yield?

Mr. CRAMTON. I can not yield now. The gentleman from Texas spoke about that. That does not mean the revenue that results from the operation of the office. It means the value of every acre of land, of every dollar's worth of oil, and so forth, that is produced there that goes through that office and would go into the Treasury just the same if there was no land office.

Here is Del Norte, in Colorado, 108 per cent, and down at Lamar, there is one where there are only 6,175 acres in the entire district; one at Sterling, with 8,000 acres; one at Topeka, Kans., with 2,038 acres. It will reach the point where there will be an office for each acre if they are allowed to continue. Mississippi has been heard from here—Mississippi where there are only 18,000 acres of public land in the whole State. Wausau, Wis., has been more modest to-day and has made no appeal. There are 4,600 acres of land there.

There has been some question about how this comes to the House. My friend from Oregon when he comes to read the

hearings with more care will regret that he has castigated quite so fiercely the chief clerk of the Land Office. He speaks of the land commissioner and quotes Mr. Bond as if he referred to that officer as one before whom these proofs would be made. He has referred to land commissioners and real estate agents as private individuals but not as an officer before whom proof would be made. Proof can be made before the United States commissioner.

Mr. Bond, in the hearings said in response to a question from Mr. French—

I want to know—

Said Mr. French—

quite definitely whether or not you feel that the contraction of the work in this respect is such that we can go to the limit recommended in the bill?

Mr. Bond said:

I was asked by the Budget about this, and I told them that in my judgment this is a good administrative proposition—

Mr. SMITH. Will the gentleman yield?

Mr. CRAMTON. I must decline to yield until I have finished my statements. If I have any time left then I will be glad to yield.

This is a good administrative proposition. I might say in this connection that the same question was asked as to the offices of surveyors general.

Mr. CRAMTON. And what was your answer?

Mr. BOND. The answer was the same, that it was a good economical administrative proposition.

That is where this has originated—with the department that is charged with the administration of this law. It has been said here in the debate that we should have gotten the advice of somebody from the West. Mr. Bond grew up in the land service, was for a long time clerk in a land office in Wyoming or Montana, and was for many years chief clerk of the General Land Office.

Mr. SINNOTT. Will the gentleman yield?

Mr. CRAMTON. I can not yield now.

Mr. SPRY, former Governor of Utah, a great public-land State, recommends this. He is the Commissioner of the General Land Office. Doctor Work, of Colorado, is the Secretary of the Interior, and he recommends this, and, lastly, the President has recommended it as a part of his program of economy.

Understand, a reduction of taxes does not come except with reduction of expenditures, and this program of economy does not come before you in one big lump that you vote for or against. The total of economy that is necessary in order to secure tax reduction is made up of many items that will come before you.

Of the total of the economy that is necessary in order to secure tax reduction the first line is here to-day, and they will come along through the 11 bills. If you want tax reduction to satisfy, you have got to support the Budget program of economy.

Why is there this fear of these gentlemen in whose districts the offices are located as to the result—a lack of service. If you will not take the opinion of the department experienced in the handling of these problems every day and every year, take the lesson of experience. My colleague from Oklahoma has stated the result in his district. Look at the State of Arizona. Arizona is as large as any of the States that are complaining here. Why, 18,000 acres only in the whole State of Mississippi available for entry. In Arizona there are 13,000,000 acres available. There is as much business in the State of Arizona as in any of the public-land States, and there is now only one land office in the whole State, and there has been only one for a number of years. There is no complaint from the people of the State with reference to it. It all results in the question of the abolition of a few political jobs and perhaps an infringement on the local pride of the towns where these offices are located.

Mr. BLANTON. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. BLANTON. How on earth does the gentleman expect to sustain the committee's action and defeat this amendment when every Member nearly has an office located in his district? How does the gentleman expect—

Mr. CRAMTON. I can not yield further. Let me say to the gentleman from Texas that this audience is not the one that I would have selected to vote on this question. [Laughter.] Now I want to yield to the gentleman from Oregon, as I want to be courteous to all, and I may not make much impression on this audience, anyway. While the gentleman from Oregon is pre-

paring his question I would like to say that the General Land Office has not gone off on a tangent. They have made a thorough review of the expenditures of the office, and where they could do it without congressional cooperation they have done it. They have reduced in two years the salary roll in the District of Columbia 25 per cent. The total estimates for the department this year are 20 per cent under the current year.

Mr. SWING. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. SWING. The gentleman says that the Land Office has retrenched where they could, but there are 14 offices where they have the power to consolidate the register and the receiver and save a large sum by doing away with clerks if they were willing to do so, but have not done so; they seem disposed to cut off the head instead of the foot and still render service to the people.

Mr. CRAMTON. The gentleman from California is one of the band that is making no distinction between the head and the foot; in trying to save the head he would save also the diseased member. The department has probably the authority to abolish some of these offices that come within a certain act, and having recommended this I trust that they will exercise their authority regardless of the action of Congress. But as to some of them, perhaps most of them, they probably require the aid of Congress.

The CHAIRMAN. All time has expired, and the question is on the amendment offered by the gentleman from Oregon.

The question was taken; and on a division (demanded by Mr. CRAMTON) there were—ayes 63, noes 38.

Mr. CRAMTON. Mr. Chairman, I ask for tellers, and pending that request I move that the committee do now rise.

The question was taken; and on a division (demanded by Mr. SINNOTT) there were—ayes 47, noes 61.

So the committee refused to rise.

The CHAIRMAN. The question now recurs on the demand of the gentleman from Michigan for tellers.

Tellers were ordered.

The Chair appointed as tellers Mr. CRAMTON and Mr. SINNOTT.

The committee again divided; and the tellers reported that there were—ayes 68, noes 47.

So the amendment was agreed to.

Mr. LEATHERWOOD. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 12, line 6, after the words "South Dakota," strike out the words "Salt Lake City, Utah."

Mr. LEATHERWOOD. Mr. Chairman, that portion of the paragraph to which the amendment is directed seeks to consolidate the offices of register and receiver in the offices named. My amendment seeks to exempt Salt Lake City from that class where there would be a consolidation of these two offices. I offer the amendment, Mr. Chairman, for the reason that through all of these discussions I believe the public necessity is the paramount question. This is one of the leading offices in the West. Nearly 70 per cent of all the land within the State of Utah is included in what is known as the public domain.

Large areas of oil lands are handled through this office. Large areas of coal-bearing lands, the richest, perhaps, in the United States, have been handled and are yet to be handled through this office. For 23 years I have practiced in the office and I know something about the conditions existing there. Contests are almost continuously going on in the office, some of them involving hundreds of thousands and millions of dollars' worth of property. Many of these contests drag out for three, four, five, or six weeks. I know what the congestion is in the office and the necessity for the people to have service. Personally I have seen people wait in that office for two hours to be served, and that is no reflection upon anyone connected with the office, because they were doing all that was humanly possible to serve the public. It seems to me that we should proceed with some caution in the question of this consolidation. Frequently one of these officials will be conducting a hearing, and the other may be in the field investigating, so that they are both kept busy all of the time. It seems to me it would be foolish in a State where there is such a volume of business to consolidate these offices and cripple the service. At the present time the Government is contesting with the State of Utah practically all of the school-section allotments to the State upon the theory that title did not pass when the enabling act went into effect because of the known mineral character of the land, and these hearings involve the right of the State to the most valuable lands set apart for the schools of the

State. It may seem selfish on my part, but for one I speak of this particular office because I know what its congestion is and what the business to be transacted in that office is. It seems a poor policy to consolidate here and further cut down the effectiveness of this particular office, where there is such a demand upon the part of the people for efficient service.

Mr. CRAMTON. Mr. Chairman, the amendment the gentleman from Utah offers seeks to make two offices grow where they are growing now, instead of cutting one out as the bill proposes. The bill is indorsed by the Commissioner of the Land Office, who is a resident of Utah and I dare say familiar with the conditions there. I hope we will not override the Budget provision in this particular case.

Mr. LEATHERWOOD. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. LEATHERWOOD. In reply to the gentleman I desire to say that I have the highest regard for the judgment of the Commissioner of the General Land Office, but I do not believe that the commissioner has been fully advised as to the condition existing in the Salt Lake land office.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word of the amendment. Since the majority leader has come into the chamber, I think he ought to know that his steering committee is in a bad sort of situation. We have here under consideration a committee bill seeking to abolish certain offices, seeking to retrench expenditures, seeking to effect governmental economy, such as has been proposed by the President of the United States, and when it comes to a question of carrying out the policy and abolishing the positions, the majority leader's committee and his great party are able to muster on the floor of the House less than 50 votes to sustain the action of the committee. For our friends who made their assault on the Treasury had 68 votes to pass their amendment and change the committee's bill, and the administration, which is supposed to be behind this Appropriations Committee, which is supposed to support its proposed retrenchments and economies, could muster, with Democratic help of a few votes, only 47 votes.

Mr. CHINDBLOM. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. That is a terrible situation for the country. I yield to the gentleman from Illinois.

Mr. CHINDBLOM. The gentleman spoke correctly when he said that the committee was aided by only a few votes on the Democratic side.

Mr. BLANTON. Oh, they are always aided by votes from the Democratic side in effecting proper economies.

Mr. CHINDBLOM. We grant that and we are obliged for it—

Mr. BLANTON. I do not care to take up any further time, but I want the majority leader to know that his followers are not helping his President in his so-called economy policy which through his message he announced the other day.

Mr. RAKER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from California is recognized in opposition to the motion to strike out the last word.

Mr. RAKER. Mr. Chairman, ordinarily I would not rise, and possibly somebody else ought to, but I do not think there is a man in the House who would submit the language used by the chairman of the subcommittee, or by the gentleman from Texas [Mr. BLANTON] who just left the floor.

Mr. BLANTON. That was facetious.

Mr. RAKER. I know it is facetious, but it goes abroad. There is not a man within the hearing of my voice but who knows these men who voted to-day are not pork-barrel statesmen. You know that we have not had a hearing, you know that this action was taken without an opportunity to be heard, and that our people demand recognition and hearing, and when the gentleman, chairman of the subcommittee, made the statement, he evidently made it facetiously, otherwise he knows and everybody within the sound of my voice knows that this is no pork-barrel proposition. Now, in regard to looting. I am going to answer that once and for all. It is wholly unnecessary to make that kind of remarks on the floor of the House and send broadcast that the Members of the House of Representatives are here trying to loot the Treasury. These statements are made for the purpose of scaring men from voting their honest convictions. If not for that purpose, then they should not be made.

Mr. CRAMTON. Will the gentleman yield?

Mr. RAKER. I will.

Mr. CRAMTON. The gentleman has used some harsh language in reference to some mild statements.

Mr. RAKER. I will withdraw it.

Mr. CRAMTON. I could very properly have used much more vigorous language. Does the gentleman deny that on the proposition which is before the House there was an organization made among those Members who had land offices in their districts for the purpose of defeating this measure of economy? If that is not a pork barrel, what is it, and I will let the language stand.

Mr. RAKER. I will say to the gentleman there has been no organized effort. Since the Members have learned of this attempt to abolish these offices they have justly got busy. I hold in my hand telegrams from the land office, from the judge of the county, from the chamber of commerce, from farmers' organizations in the four counties in which the Susanville land office is situated, and the last has been received since I closed my statement, from men of the highest probity, from men scattered all over that district, who know what they want and know the truth, who know more about that land office than the Secretary of the Interior ever knew or ever will learn about these offices. I do not refer to the gentleman personally, and I hope that he and others will not continue to broadcast that because a man has the courage to vote for things which he knows are right and proper to be voted for, and for that reason it is pork-barrel legislation. This matter of which the gentleman spoke and which he says was facetious is scattered and carried as though it is the truth, saying that we are looting the Government when we have the courage to vote for that which we think, in fact know, is proper and right.

Mr. CARTER. Will the gentleman yield?

Mr. RAKER. I will.

Mr. CARTER. I would like to ask the gentleman how much courage it takes for a man to vote to keep from abolishing an office in his own district?

Mr. RAKER. We have voted to abolish them, and when it is necessary and you have a proper hearing it is all right. It is very proper that these matters should be considered before being acted upon, and this idea that because the business of an office functions within your district therefore you should not have the courage to vote to retain it is all wrong.

The CHAIRMAN. The time of the gentleman has expired. Without objection, the pro forma amendment will be withdrawn. The question is on the amendment offered by the gentleman from Utah.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

The unexpended balance of \$1,576.45 remaining to the credit of the appropriation of \$2,055.67 authorized in the deficiency appropriation act approved September 8, 1916, for examination and classification of lands within the limits of the Northern Pacific grant and made available until expended by the deficiency act of April 17, 1917, shall be carried to the surplus fund and be covered into the Treasury immediately upon the approval of this act.

Mr. JOHNSON of Washington. I would like to ask the gentleman if he intends to go ahead with the Indian affairs or not.

Mr. CRAMTON. It is not. The intention is just to read a few lines more, the item for the Commissioner of Indian Affairs, and then move that the committee rise.

The Clerk read as follows:

BUREAU OF INDIAN AFFAIRS SALARIES

For the Commissioner of Indian Affairs and other personal services in the District of Columbia in accordance with "The classification act of 1923," \$381,500.

Mr. CRAMTON. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. SANDERS of Indiana, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having had under consideration the bill H. R. 10020 had come to no resolution thereon.

LEAVE OF ABSENCE

By unanimous consent—

Mr. O'SULLIVAN was granted leave of absence for 10 days on account of important business.

Mr. FITZGERALD (on request of Mr. FOSTER) was granted indefinite leave of absence on account of illness.

COMMITTEE VACANCIES

Mr. LONGWORTH. Mr. Speaker, vacancies exist on the Committees on the Revision of the Laws, Claims, and Irrigation and Reclamation of Arid Lands, due to the death of the

gentleman from Kansas, the late Mr. LITTLE, whom we all lament. I ask unanimous consent that those vacancies may be filled up to the 4th of next March by his successor, the gentleman from Kansas [Mr. GUYER].

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Th. SPEAKER. It is so ordered.

ADJOURNMENT

Mr. CRAMTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 5 minutes p. m.) the House adjourned until to-morrow, Friday, December 5, 1924, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

666. A letter from the chairman of the Interstate Commerce Commission, transmitting the thirty-eighth annual report of the commission (H. Doc. No. 449); to the Committee on Interstate and Foreign Commerce and ordered to be printed.

667. A letter from the Secretary of the Treasury, transmitting request for the consideration of proposed legislation transferring a certain portion of land on Fayette Street at the southeast corner of the post-office site in Baltimore, Md., to the city of Baltimore, Md.; the proposed legislation was submitted to the House December 5, 1917 (H. Doc. No. 531); to the Committee on Public Buildings and Grounds.

668. A letter from the Director General of the United States Railroad Administration, transmitting statement showing the make, model, and serial number of each typewriter exchanged by the Railroad Administration during the fiscal year ending June 30, 1924, the period of its use, the allowances therefor, the make and model thereof, and the price, including exchange value, paid for each typewriter procured through such exchange; to the Committee on Appropriations.

669. A letter from the Secretary of the Treasury, transmitting statement of expenditures from appropriations for the Coast Guard for the fiscal year ended June 30, 1924; to the Committee on Expenditures in the Treasury Department.

670. A letter from the chairman of the Federal Power Commission, transmitting statement showing permits and licenses issued under section 4 (c) of the Federal water power act during the fiscal year ended June 30, 1924, the parties thereto, the terms prescribed, and the moneys received during the fiscal year 1924 on account of permits and licenses, this statement appearing as Appendix E of the Fourth Annual Report of the Federal Power Commission; to the Committee on Interstate and Foreign Commerce.

671. A letter from the superintendent of State, War, and Navy Department Buildings, transmitting a draft of proposed legislation "For the relief of certain disbursing officers of the office of the superintendent, State, War, and Navy Department Buildings"; to the Committee on Claims.

672. A letter from the librarian of the Library of Congress, transmitting an offer made by Elizabeth Sprague Coolidge to give to the Congress of the United States the sum of \$60,000 for the construction and equipment in connection with the library of an auditorium, which shall be planned for and dedicated to the performance of chamber music (H. Doc. No. 472); to the Committee on the Library and ordered to be printed.

673. A letter from the librarian of the Library of Congress, transmitting annual report of the Librarian of Congress for the fiscal year ending June 30, 1924; to the Committee on the Library.

674. A letter from the president of the Board of Commissioners of the District of Columbia, transmitting statement of the expenditures made from the appropriation for contingent expenses of the government of the District of Columbia for the fiscal year ended June 30, 1924; to the Committee on the District of Columbia.

675. A letter from the Secretary of the Interior, transmitting a statement showing in detail what officers or employees (other than special agents, inspectors, or employees who in the discharge of their regular duties are required to travel constantly) have traveled on official business for the department from Washington to points outside of the District of Columbia during the fiscal year ended June 30, 1924, giving in each case the full title of the official or employee, the destination or destinations of such travel, the business or work on account of which the same was made, and the total expense in

each case charged to the United States; to the Committee on Appropriations.

676. A letter from the Secretary of the Interior, transmitting statement of expenditures made by the Department of the Interior and charged to the appropriation "Contingent expenses, Department of the Interior, 1924," fiscal year ended June 30, 1924; to the Committee on Expenditures in the Interior Department.

677. A letter from the Secretary of the Treasury, transmitting request for the repeal of the act authorizing and directing the Secretary of the Treasury to purchase a site and building for offices to accommodate the United States Sub-treasury, and other Government offices at New Orleans, La., approved June 25, 1910 (36 Stat. 694); to the Committee on Public Buildings and Grounds.

678. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination and survey of Amite River and Bayou Manchac, La. (H. Doc. No. 473); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

679. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination and survey of Bayou Bonfouca, La. (H. Doc. No. 474); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

680. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Sheboygan Harbor, Wis. (H. Doc. No. 475); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

681. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Tradewater River, Ky. (H. Doc. No. 476); to the Committee on Rivers and Harbors and ordered to be printed.

682. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Saco Harbor and River, Me. (H. Doc. No. 477); to the Committee on Rivers and Harbors and ordered to be printed, with diagram.

683. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Siletz River, Bar, and Entrance, Oreg. (H. Doc. No. 478); to the Committee on Rivers and Harbors and ordered to be printed.

684. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Pasquotank River at Elizabeth City, N. C. (H. Doc. No. 479); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

685. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Cooper River, S. C., with a view to the removal of a shoal opposite the foot of Calhoun Street, Charleston (H. Doc. No. 480); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

686. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Buffalo Harbor, N. Y. (H. Doc. No. 481); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

687. A letter from the Secretary of the Treasury, transmitting annual report of the Secretary of the Treasury on the state of finances for the fiscal year ended June 30, 1924; to the Committee on Ways and Means.

688. A letter from the Director of the United States Veterans' Bureau, transmitting annual report of the Director United States Veterans' Bureau for the fiscal year ended June 30, 1924; to the Committee on World War Veterans' Legislation.

689. A letter from the Secretary of the Navy, transmitting reports made by the Chief of the Bureau of Navigation and the Major General Commandant, United States Marine Corps, as to the administration of the World War adjusted compensation act by the Navy Department; to the Committee on Ways and Means.

690. A letter from the Secretary of the Interior, transmitting statement embodying the number of documents received and distributed during the fiscal year 1924 by the Department of the Interior; to the Committee on Printing.

691. A letter from the Secretary of the Interior, transmitting a detailed statement embodying the aggregate number of the various publications issued during the fiscal year 1924 by the Department of the Interior, the cost of paper used for such publications, the cost of printing, cost of preparation of copy, and the number distributed; to the Committee on Printing.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 9234) granting an increase of pension to Charles W. Hildreth; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 9484) granting an increase of pension to Mary J. Hildreth; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. CABLE: A bill (H. R. 10268) to provide for the choice of an officer who shall act as President in the event a President and Vice President shall not have been elected and qualified as provided by law; to the Committee on Election of President, Vice President, and Representatives in Congress.

By Mr. HAWES: A bill (H. R. 10269) regulating the interstate shipment of black bass, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. HOWARD of Oklahoma: A bill (H. R. 10270) authorizing an appropriation to reimburse the State of Oklahoma for the education of Indian children in the public schools of said State; to the Committee on Indian Affairs.

By Mr. JOHNSON of South Dakota: A bill (H. R. 10271) to amend the World War veterans' act of 1924; to the Committee on World War Veterans' Legislation.

By Mr. TREADWAY: A bill (H. R. 10272) to amend the act entitled "An act to limit the immigration of aliens into the United States, and for other purposes," and cited as the immigration act of 1924; to the Committee on Immigration and Naturalization.

By Mr. DALLINGER: A bill (H. R. 10273) to establish a department of education and relief, and for other purposes; to the Committee on Education.

By Mr. FUNK: A bill (H. R. 10274) to provide for the purchase of a site and the erection of a public building at Paxton, Ill.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 10275) to provide for the purchase of a site and the erection of a public building at Fairbury, Ill.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 10276) to provide for the purchase of a site and the erection of a public building at Bloomington, Ill.; to the Committee on Public Buildings and Grounds.

By Mr. TYDINGS: A bill (H. R. 10277) granting the consent of Congress to Bethlehem Steel Co. to construct a bridge across Humphreys Creek at or near the city of Sparrows Point, Md.; to the Committee on Interstate and Foreign Commerce.

By Mr. LUCE: A bill (H. R. 10278) authorizing the Secretary of Agriculture to establish a national arboretum, and for other purposes; to the Committee on Agriculture.

By Mr. HAYDEN: A bill (H. R. 10279) for the completion of first mesa division of the Yuma auxiliary reclamation project, Arizona, and for other purposes; to the Committee on Irrigation and Reclamation.

Also, a bill (H. R. 10280) to reimburse the reclamation fund for the benefit of the Yuma Federal irrigation project, Arizona-California, and to provide funds to operate and maintain the Colorado River front work and levee system adjacent to the Yuma project, Arizona-California; to the Committee on Irrigation and Reclamation.

By Mr. KEARNS: Concurrent resolution (H. Con. Res. 81) authorizing the appointment of a joint committee of the House and Senate to investigate and negotiate with bidders and make report on the Government's property at Muscle Shoals, Ala.; to the Committee on Rules.

By Mr. BEEDY: Resolution (H. Res. 372) authorizing the Committee on Mileage to employ a clerk; to the Committee on Accounts.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AYRES: A bill (H. R. 10281) granting an increase of pension to Jennie Pratt; to the Committee on Pensions.

By Mr. BACON: A bill (H. R. 10282) providing for the examination and survey of Swan River, Long Island, N. Y.; to the Committee on Rivers and Harbors.

Also, a bill (H. R. 10283) authorizing the appointment of Howard D. Norris as first lieutenant of Air Service, United States Army; to the Committee on Military Affairs.

By Mr. BOYLAN: A bill (H. R. 10284) authorizing the appointment of Phillip T. Coffey a captain in the Engineer Corps of the United States Army, and for other purposes; to the Committee on Military Affairs.

By Mr. CROLL: A bill (H. R. 10285) granting a pension to Rebecca Manviller; to the Committee on Invalid Pensions.

By Mr. DICKINSON of Missouri: A bill (H. R. 10286) granting an increase of pension to Amelia Viets; to the Committee on Pensions.

By Mr. DRANE: A bill (H. R. 10287) authorizing preliminary examination and survey of the Caloosahatchee River in Florida with a view to the control of floods; to the Committee on Flood Control.

By Mr. FITZGERALD: A bill (H. R. 10288) granting a pension to James H. Jevens; to the Committee on Pensions.

By Mr. GARDNER of Indiana: A bill (H. R. 10289) granting an increase of pension to Charles Ingle; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10290) granting a pension to Abraham Key; to the Committee on Pensions.

By Mr. GLATFELTER: A bill (H. R. 10291) granting an increase of pension to Catherine Deunes; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10292) granting an increase of pension to Sarah M. Harbott; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10293) granting an increase of pension to Sarah Hartman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10294) granting an increase of pension to Catherine Fry; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10295) granting an increase of pension to Mary S. Heidler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10296) granting an increase of pension to Lizzie Shuman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10297) granting an increase of pension to Mary Chronister; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10298) granting an increase of pension to Mary A. Fake; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10299) granting an increase of pension to Emma Bare; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10300) granting an increase of pension to Lovina E. Becker; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10301) granting an increase of pension to Margaret E. Black; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10302) granting an increase of pension to Ida E. Koons; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10303) granting an increase of pension to Sarah Mummert; to the Committee on Invalid Pensions.

By Mr. GOLDSBOROUGH: A bill (H. R. 10304) granting a pension to Lucy R. Robertson; to the Committee on Invalid Pensions.

By Mr. HOWARD of Nebraska: A bill (H. R. 10305) granting a pension to Reuben P. Hillers; to the Committee on Pensions.

Also, a bill (H. R. 10306) granting a pension to Mary L. Thatch; to the Committee on Pensions.

By Mr. KELLER: A bill (H. R. 10307) for the relief of Robert C. Muirhead; to the Committee on Naval Affairs.

By Mr. KURTZ: A bill (H. R. 10308) granting a pension to Earl Lingenfelter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10309) granting a pension to Mary C. Fluck; to the Committee on Invalid Pensions.

By Mr. LAMPERT: A bill (H. R. 10310) granting an increase of pension to Elizabeth Groetsinger; to the Committee on Pensions.

By Mr. MCKENZIE: A bill (H. R. 10311) granting an increase of pension to Laura E. Reynolds; to the Committee on Invalid Pensions.

By Mr. MILLIGAN: A bill (H. R. 10312) granting an increase of pension to Sallie Gearhart; to the Committee on Invalid Pensions.

By Mr. MOORE of Illinois: A bill (H. R. 10313) granting a pension to Sarah V. Johnson; to the Committee on Invalid Pensions.

By Mr. MURPHY: A bill (H. R. 10314) for the relief of C. M. Rodefer; to the Committee on Claims.

By Mr. ROBSON of Kentucky: A bill (H. R. 10315) granting a pension to John Henson; to the Committee on Pensions.

Also, a bill (H. R. 10316) granting a pension to James M. Cawood; to the Committee on Pensions.

Also, a bill (H. R. 10317) granting a pension to Milton Jordan; to the Committee on Pensions.

Also, a bill (H. R. 10318) granting a pension to Nancy C. Patrick; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10319) granting an increase of pension to Polly Saylor; to the Committee on Invalid Pensions.

By Mr. ROGERS of New Hampshire: A bill (H. R. 10320) granting an increase of pension to Wealthy Young; to the Committee on Invalid Pensions.

By Mr. ROUSE: A bill (H. R. 10321) granting an increase of pension to Louise C. Kimberly; to the Committee on Invalid Pensions.

By Mr. SANDERS of Indiana: A bill (H. R. 10322) granting a pension to Elizabeth Snyder; to the Committee on Invalid Pensions.

By Mr. SWOOPE: A bill (H. R. 10323) granting an increase of pension to Lovisa Buckley; to the Committee on Invalid Pensions.

By Mr. TEMPLE: A bill (H. R. 10324) granting a pension to Laura Crawford; to the Committee on Invalid Pensions.

By Mr. THOMAS of Kentucky: A bill (H. R. 10325) granting a pension to Nancy E. Dillon; to the Committee on Invalid Pensions.

By Mr. TIMBERLAKE: A bill (H. R. 10326) granting a pension to William H. Pettit; to the Committee on Invalid Pensions.

By Mr. TREADWAY: A bill (H. R. 10327) granting an increase of pension to Mary Gorman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10328) granting an increase of pension to Mary A. Fife; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10329) granting an increase of pension to Rose A. Ferguson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10330) granting an increase of pension to Lucy A. Farington; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10331) granting an increase of pension to Hittie Davis; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10332) granting an increase of pension to Victoria M. Dean; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10333) granting an increase of pension to Anna Crosby; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10334) granting an increase of pension to Nellie M. Bunt; to the Committee on Invalid Pensions.

By Mr. UNDERWOOD: A bill (H. R. 10335) granting an increase of pension to Eliza M. Vail; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10336) granting a pension to Belle Boerstler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10337) granting an increase of pension to Mary Jones; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10338) granting an increase of pension to Mary Brooker; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10339) granting an increase of pension to Livonia Rodgers; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10340) granting an increase of pension to Hester C. True; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10341) granting an increase of pension to Julia A. Wagner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10342) granting an increase of pension to Jennie Dorman; to the Committee on Invalid Pensions.

By Mr. WARD of North Carolina: A bill (H. R. 10343) to provide for an examination and survey of Belhaven Harbor, Belhaven, Beaufort County, N. C.; to the Committee on Rivers and Harbors.

By Mr. WILSON of Indiana: A bill (H. R. 10344) granting an increase of pension to Nancy A. Sumner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10345) granting an increase of pension to Sarah E. Hamilton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10346) granting an increase of pension to Margaret M. Blackard; to the Committee on Invalid Pensions.

By Mr. WOODRUM: A bill (H. R. 10347) for the relief of Robert B. Sanford; to the Committee on Naval Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3079. By the SPEAKER (by request): Petition of Ellis Post, No. 6, Department of Pennsylvania, Grand Army of the Republic, Germantown, Philadelphia, Pa., favoring the repealing of the law authorizing the coinage of the Stone Mountain memorial 50-cent pieces; to the Committee on Coinage, Weights, and Measures.

3080. Also (by request), petition of general board of L'Union St. Jean-Baptiste d'Amerique, protesting against the passage

of any legislation tending to establish a Federal bureau of education; to the Committee on Education.

3081. By Mr. ABERNETHY: Petition of George Henderson for the relief of persons who served in the United States Military Telegraph Corps during the Civil War, House bill No. 2719; to the Committee on Military Affairs.

3082. By Mr. CLARKE of New York: Petition of citizens of New York, opposing Senate bill 3218, to secure Sunday as a day of rest for the District of Columbia; to the Committee on the District of Columbia.

3083. By Mr. CULLEN: Petition of employees of the Brooklyn Postal Service of Brooklyn, N. Y., urging the enactment into law of Senate bill 1898, increasing the salaries of postal employees; to the Committee on the Post Office and Post Roads.

3084. By Mr. GALLIVAN: Petition of National Association of Real Estate Boards, Chicago, Ill., recommending legislation by Congress providing for scientific enlargement of the plan for the city of Washington and the extension of its parks; to the Committee on the District of Columbia.

3085. By Mr. PORTER: Petition of Army and Navy Union, United States of America, Capt. Charles V. Gridley Garrison, No. 4, Erie, Pa., favoring increased pensions being granted to war veterans and their dependents; to the Committee on Pensions.

3086. Also, petition of headquarters of Strong Vincent Post, No. 67, G. A. R., 409 State Street, Erie, Pa., favoring the passage of House bill 5934; to the Committee on Pensions.

3087. By Mr. SEGER: Petition of board of commissioners of the city of Passaic, N. J., for the passage of Senate bill 1898, increasing the salaries of postal employees; to the Committee on the Post Office and Post Roads.

3088. Also, petition of board of aldermen of Paterson, N. J., for the passage of Senate bill 1898, increasing the salaries of postal employees; to the Committee on the Post Office and Post Roads.

3089. Also, petition of John A. Gilson and 55 residents of Paterson, N. J., for the passage of Senate bill 1898, increasing the salaries of postal employees; to the Committee on the Post Office and Post Roads.

3090. Also, petition of H. Fronkes, of Passaic, N. J., and 80 residents of Passaic, Paterson, and vicinity, for the passage of Senate bill 1898 increasing salaries of postal employees; to the Committee on the Post Office and Post Roads.

3091. By Mr. SINNOTT: Petition of protest of residents of Bend, Oreg., against passage of Senate bill 3218, compulsory Sunday observance bill; to the Committee on the Judiciary.

3092. By Mr. TEMPLE: Petition of Wm. F. Templeton Post, No. 120, G. A. R., Washington, Pa., asking the repeal of the law authorizing the Director of the Mint to coin 50-cent pieces for the Stone Mountain Confederate Monumental Association; to the Committee on Banking and Currency.

3093. Also, petition of Strong Vincent Post, No. 27, G. A. R., Erie, Pa., in support of increase of rate of pension to veterans of the Civil and Indian wars and their widows, also in support of House bill 5934; to the Committee on Invalid Pensions.

SENATE

FRIDAY, December 5, 1924

(Legislative day of Wednesday, December 3, 1924)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Clerk will call the roll.

The principal legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Ferris	Kendrick	Shipstead
Ball	Fess	Keyes	Shortridge
Bayard	Fletcher	Ladd	Simmons
Borah	Frazier	McKellar	Smith
Brookhart	George	McKinley	Smoot
Bruce	Gerry	McLean	Spencer
Burnum	Glass	McNary	Stanfield
Butler	Gooding	Means	Stanley
Caraway	Greene	Metcalf	Sterling
Copeland	Hale	Neely	Swanson
Couzens	Harreld	Norris	Underwood
Cummins	Harris	Oddie	Wadsworth
Curtis	Harrison	Overman	Walsh, Mass.
Dial	Heflin	Pittman	Walsh, Mont.
Dill	Howell	Ralston	Watson
Edge	Johnson, Minn.	Reed, Pa.	Willis
Fernald	Jones, Wash.	Sheppard	

Mr. HARRISON. My colleague [Mr. STEPHENS] is absent on account of sickness.

Mr. FLETCHER. My colleague [Mr. TRAMMELL] is necessarily absent. I will let this announcement stand for the day.

Mr. GERRY. I wish to announce that the junior Senator from Texas [Mr. MAYFIELD] is detained on official business.

The PRESIDENT pro tempore. Sixty-seven Senators have answered to their names. There is a quorum present.

REPORT OF THE SECRETARY OF THE TREASURY

The PRESIDENT pro tempore laid before the Senate the annual report of the Secretary of the Treasury, transmitted, pursuant to law, on the state of the finances for the fiscal year ended June 30, 1924, which was referred to the Committee on Finance.

REPORT OF THE ATTORNEY GENERAL

The PRESIDENT pro tempore laid before the Senate a communication from the Attorney General of the United States, transmitting, pursuant to law, his annual report for the fiscal year ended June 30, 1924, which was referred to the Committee on the Judiciary.

INTERIOR DEPARTMENT REPORTS

The PRESIDENT pro tempore laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, a statement showing in detail travel performed on official business for the department from Washington to points outside the District of Columbia during the fiscal year ended June 30, 1924, which was referred to the Committee on Appropriations.

He also laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, an itemized statement of expenditures made by the Interior Department and charged to the appropriation "Contingent expenses, Department of the Interior, 1924," for the fiscal year ended June 30, 1924, which was referred to the Committee on Appropriations.

He also laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, a detailed statement embodying the aggregate number of various publications issued during the fiscal year 1924, the cost of paper used for such publications, the cost of printing, the cost of preparation of copy, and the number distributed, which was referred to the Committee on Printing.

He also laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, a detailed statement embodying the number of documents received and distributed during the fiscal year 1924, which was referred to the Committee on Printing.

REPORT OF THE INTERSTATE COMMERCE COMMISSION

The PRESIDENT pro tempore laid before the Senate a communication from the chairman of the Interstate Commerce Commission, transmitting, pursuant to law, the Thirty-eighth Annual Report of the Interstate Commerce Commission, which was referred to the Committee on Interstate Commerce.

REPORT OF THE DIRECTOR, UNITED STATES VETERANS' BUREAU

The PRESIDENT pro tempore laid before the Senate a communication from the Director of the United States Veterans' Bureau, transmitting, pursuant to law, the annual report of the activities of the United States Veterans' Bureau for the fiscal year ended June 30, 1924, which was referred to the Committee on Finance.

THE FEDERAL TRADE COMMISSION

The PRESIDENT pro tempore laid before the Senate a communication from the Chairman of the Federal Trade Commission, transmitting, pursuant to law, the annual report of the commission for the fiscal year ended June 30, 1924, which was referred to the Committee on Interstate Commerce.

He also laid before the Senate a communication from Nelson B. Gaskill, commissioner, Federal Trade Commission, transmitting an individual report and recommendation with reference to possible improvements in the functioning of the Federal Trade Commission, which was referred to the Committee on Interstate Commerce.

CREDENTIALS

The PRESIDENT pro tempore laid before the Senate a certificate of Ephraim F. Morgan, Governor of the State of West Virginia, certifying that at the general election held on the 4th day of November, 1924 (as shown by certificates filed in his office, returned by the boards of canvassers from every county in the State), GUY D. GOFF was chosen by the qualified voters of the State of West Virginia a Senator from that State for the term of six years beginning on the 4th day of March, 1925, which was ordered to be placed on the files of the Senate.

He also laid before the Senate a certificate of the Governor of New Jersey, certifying to the election of WALTER E. EDGE

as a Senator from the State of New Jersey for the term of six years beginning March 4, 1925, which was read and ordered to be filed, as follows:

STATE OF NEW JERSEY.

I, George S. Silzer, Governor of the State of New Jersey, do hereby certify, that at an election held in the said State, on the 4th day of November, 1924, WALTER E. EDGE was duly chosen and elected by the people of the said State of New Jersey to be a Member of the United States Senate for the term of six years beginning on the 4th day of March, 1925.

In testimony whereof, I have hereunto set my hand and caused the great seal of the State of New Jersey to be hereunto affixed, at Trenton, this 2d day of December, in the year of our Lord nineteen hundred and twenty-four, and of the Independence of the United States the one hundred and forty-ninth.

[SEAL.]

GEO. S. SILZER.

By the Governor:

THOS. F. MARTIN, *Secretary of State.*

The PRESIDENT pro tempore also laid before the Senate a certificate of the board of State canvassers of Michigan certifying to the election of JAMES COUZENS as a Senator from that State for the term ending March 4, 1931, which was read and ordered to be filed, as follows:

CERTIFICATE OF ELECTION

STATE OF MICHIGAN.

We, the undersigned State canvassers, from an examination of the election returns received by the secretary of state, determine that at the general election held on the 4th day of November, 1924, JAMES COUZENS was duly elected United States Senator for the term ending March 4, 1931.

In witness whereof we have hereto subscribed our names at Lansing this 1st day of December, 1924.

CHAS. J. DELAND,

Secretary of State,

FRANK E. GANNON,

State Treasurer,

THOMAS E. JOHNSON,

Superintendent of Public Instruction,

Board of State Canvassers.

STATE OF MICHIGAN, Department of State, as:

I hereby certify that the foregoing copy of the certificate of determination of the board of State canvassers is a correct transcript of the original of such certificate of determination on file in this office.

In witness whereof I have hereto attached my signature and the great seal of the State at Lansing this 1st day of December, 1924.

[SEAL.]

CHAS. J. DELAND,
Secretary of State.

PETITIONS

Mr. LADD presented numerous petitions of sundry citizens of the State of North Dakota praying for the passage of the so-called postal wage bill providing increased compensation to postal employees, which were referred to the Committee on Post Offices and Post Roads.

Mr. WILLIS presented numerous petitions of sundry citizens of the State of Ohio praying for the passage of the so-called postal wage bill providing increased compensation to postal employees, which were referred to the Committee on Post Offices and Post Roads.

Mr. McLEAN presented petitions of sundry rural letter carriers of Columbia, Hampton, Litchfield, Springdale, Canaan, Clintonville, South Glastonbury, Bethel, Somers, Naugatuck, Greenwich, Lyme, North Stonington, Gaylordsville, Rockville, Thomaston, Plainville, Ridgefield, Williamantic, Broad Brook, New Preston, Westbrook, Madison, Terryville, New Canaan, Winsted, Watertown, and Middlebury, all in the State of Connecticut, praying for the enactment of legislation granting increased compensation to postal employees, which were referred to the Committee on Post Offices and Post Roads.

He also presented petitions, letters, and telegrams in the nature of petitions of Local Union No. 147, Hartford Post Office Clerks of Hartford; Branch No. 1327, National Association of Letter Carriers, of Milford; Connecticut Branch, National League of District Postmasters of the United States, at Sound View; employees of the United States post office at Canaan; Russell Council, No. 65, Knights of Columbus, of New Haven; and Branch No. 192, National Association of Letter Carriers, of New Britain, all in the State of Connecticut, praying for the enactment of legislation providing increased compensation to postal employees, which were referred to the Committee on Post Offices and Post Roads.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BRUCE:

A bill (S. 3565) to extend the commerce of the United States by creating the World Commerce Corporation and authorizing the establishment of foreign trade zones; to the Committee on the Judiciary.

By Mr. BORAH:

A bill (S. 3566) granting a pension to Mrs. Riley B. Cooper; to the Committee on Pensions.

By Mr. BURSUM:

A bill (S. 3567) granting a pension to William Wallace; and

A bill (S. 3568) granting an increase of pension to George Curry; to the Committee on Pensions.

By Mr. SPENCER:

A bill (S. 3569) granting a pension to Emory Wyatt (with accompanying papers); to the Committee on Pensions.

By Mr. BALL:

A bill (S. 3570) to authorize the Chief of Engineers, United States Army, to accept, as an addition to the park system of the District of Columbia, certain land donated by Mrs. Anne Archbold; to the Committee on the District of Columbia.

By Mr. WADSWORTH:

A bill (S. 3571) authorizing the transfer of real property no longer required for lighthouse purposes;

A bill (S. 3572) relating to the use of the roads leading from the bridges across the Potomac River to Arlington National Cemetery and to Fort Myer, Va.; and

A bill (S. 3573) authorizing the use for permanent construction at military posts of the proceeds from the sales of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes; to the Committee on Military Affairs.

By Mr. McNARY:

A bill (S. 3574) granting an increase of pension to Joseph H. Butterfield; to the Committee on Pensions.

By Mr. SIMMONS:

A bill (S. 3575) granting a pension to Charles A. Stockard; to the Committee on Pensions.

A bill (S. 3576) for the relief of Margarethe Murphy (with accompanying papers); to the Committee on Foreign Relations.

By Mr. COPELAND:

A bill (S. 3577) for the relief of Thomas F. Kenny; and

A bill (S. 3578) for the relief of Antti Merihelmi; to the Committee on Claims.

A bill (S. 3579) granting an increase of pension to Alice J. Hunt; and

A bill (S. 3580) granting an increase of pension to James E. O'Brien; to the Committee on Pensions.

By Mr. McKINLEY:

A bill (S. 3581) for the relief of Francis J. Young; to the Committee on Claims.

By Mr. REED of Pennsylvania (by request):

A bill (S. 3582) to amend the World War veterans' act, 1924; to the Committee on Finance.

By Mr. BORAH:

A joint resolution (S. J. Res. 151) for the relief of Mary M. Tilghman, former widow of Sergt. Frederick Coleman, deceased, United States Marine Corps; to the Committee on Naval Affairs.

AMENDMENT TO INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. JONES of Washington submitted an amendment proposing to appropriate \$115,767.67 for payment of certain local taxes to the counties of Stevens and Ferry, in the State of Washington, on allotted Colville Indian lands, as provided by the act of June 7, 1924, which was referred to the Committee on Appropriations and ordered to be printed.

EDWIN L. McCULLOCH

Mr. CURTIS (for Mr. MOSES) submitted the following resolution (S. Res. 273), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate is hereby authorized and directed to pay out of the contingent fund of the Senate to Edwin L. McCulloch the sum of \$238.33 for services rendered as clerk from November 5 to 30, 1924, to Hon. RICE W. MEANS, Senator elect from the State of Colorado.

COMMITTEE ON INAUGURAL ARRANGEMENTS

Mr. CURTIS. I ask unanimous consent for the consideration of a concurrent resolution appointing a committee to ar-

range for the inauguration. Such a resolution has usually been passed by unanimous consent.

The concurrent resolution (S. Con. Res. 23) was read, considered by unanimous consent and agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That a joint committee consisting of three Senators and three Representatives, to be appointed by the President of the Senate and the Speaker of the House of Representatives, respectively, is authorized to make the necessary arrangements for the inauguration of the President elect of the United States on the 4th of March next.

MUSCLE SHOALS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 518) to authorize and direct the Secretary of War, for national defense in time of war and for the production of fertilizers and other useful products in time of peace, to sell to Henry Ford, or a corporation to be incorporated by him, nitrate plant No. 1, at Sheffield, Ala.; nitrate plant No. 2, at Muscle Shoals, Ala.; Waco Quarry, near Russellville, Ala.; steam power plant to be located and constructed at or near Lock and Dam No. 17 on the Black Warrior River, Ala., with right of way and transmission line to nitrate plant No. 2, Muscle Shoals, Ala.; and to lease to Henry Ford, or a corporation to be incorporated by him, Dam No. 2 and Dam No. 3 (as designated in H. Doc. 1262, 64th Cong., 1st sess.), including power stations when constructed as provided herein, and for other purposes.

Mr. McNARY. Mr. President, I desire to offer an amendment to the amendment to be proposed by the Senator from Alabama [Mr. UNDERWOOD], which I ask may be printed and lie on the table.

The PRESIDENT pro tempore. Without objection, the amendment will be printed and lie on the table.

Mr. UNDERWOOD. Will the Senator allow his amendment to be read for the information of the Senate?

Mr. McNARY. Certainly.

The PRESIDENT pro tempore. The proposed amendment to the amendment of the Senator from Alabama will be read.

The READING CLERK. After the word "contract," in line 25, page 4, add:

The lease, in so far as relating to Dam No. 2, its power house, machinery and equipment, the steam plant at Sheffield, and all lands in connection therewith, shall be made subject to and in accordance with the provisions of the Federal water power act.

In line 1, page 5, for "said property," substitute "all property leased."

Mr. McKELLAR. I offer an amendment to the amendment of the Senator from Alabama, which I send to the desk and I ask that the Clerk may read it for the information of the Senate.

The PRESIDENT pro tempore. Without objection, the Clerk will read the proposed amendment to the amendment.

The READING CLERK. On page 4, at the end of line 19, strike out the period, insert a semicolon, and the following proviso:

Provided, That said lease shall only be made to an American citizen, or citizens, or to an American owned, officered, and controlled corporation; and, if leased, in the event at any time the ownership in fact or the control of such corporation should directly or indirectly come into the hands of an alien, or aliens, or into the hands of an alien owned or controlled corporation or organization, the said lease shall at once terminate and the properties be restored to the United States; the Attorney General of the United States is given full power and authority and it is hereby made his duty to proceed at once in the courts for the cancellation of said lease in the event said properties are found to be alien owned or controlled and are not voluntarily restored.

The PRESIDENT pro tempore. The proposed amendment to the amendment of the Senator from Alabama [Mr. UNDERWOOD] will be printed and lie on the table.

Mr. HARRISON. Mr. President, I shall occupy the attention of the Senate but a short time. In the beginning, as one member of the Committee on Agriculture and Forestry I want to express my personal appreciation and, I am sure, the appreciation of every Senator who comes from my section, of the work of the chairman of that committee in dealing with the Muscle Shoals question. In my 14 years' experience in Washington I have never seen any public official work harder and study the question involved more zealously than did the senior Senator from Nebraska [Mr. NORRIS]. I do not believe there is any other member of the committee who attended the hearings more regularly or who gave the question that high degree of study that he has given it.

I know the conclusions he has formed are most sincere and that his bill represents what he thinks would benefit the country most. I differ with him in the conclusions he has reached. I think the bill he has proposed, the measure he is championing, is a power proposition and that it negatives the intention of the original act that located the sites for the construction of the dams and upon which the erection of the plants at Muscle Shoals was made. I enjoyed his speech yesterday. It was wholesome and eloquent.

Mr. President, the question now comes up for consideration in this very short session of Congress. This Congress expires on the 4th day of March next. I do not speak by the cards, but we all know that in all probability there will be no extra session of Congress. The country knows and men who are close to those who control the affairs of the Government to-day know that the administration would feel better if Congress should adjourn on March 4 and not meet again soon. I do not look for any session of Congress after this one closes until December, 1925. If, during the six weeks remaining, nothing is done dealing with this very important question which has been before Congress for eight years, we may look for at least a year or a year and a half further delay in the Government fixing a settled policy touching Muscle Shoals.

Let me refresh the minds of Senators by stating that it was in May, 1916, when the national defense act was passed authorizing the location of the nitrate plants at Muscle Shoals. Indeed, they were not located at that particular time, but were located at a later date. Let me further refresh the minds of Senators by calling attention to the fact that the construction of Dam No. 2 began in February, 1918, and after six years it is not yet completed. The direction to locate these plants, especially plant No. 1, by the President, was at the request of the farmers of the country. They were the greatest influence in having these plants located at Muscle Shoals.

It will not be forgotten that it was on May 30, 1921, when work was begun on Dam No. 2. Because of a lack of funds, resulting from the failure of Congress to make the appropriations for the purpose, for approximately two years nothing was done toward carrying on the construction of that dam. It will not be forgotten—and I called the attention of the Senate on yesterday to the fact—that Mr. Glasgow in 1919 was placed in charge as the nitrate director of that work. After a long experience he reported to the President that he had tried in every imaginable way to interest private capital to lease those nitrate plants upon inviting and reasonable conditions, but that he had failed to do so. It was then that he recommended that the Government should go ahead with the organization of a corporation to carry on the development. It was upon that recommendation, back in 1920, that Mr. KAHN, of the House of Representatives, chairman of the Committee on Military Affairs, and the Senator from New York [Mr. WADSWORTH] framed the so-called Kahn-Wadsworth bill, which passed the Senate but which at that time died in the House of Representatives.

Following the failure of Congress to enact that legislation and the failure of Congress to make the appropriation of the funds to carry on the construction, and subsequent to the recommendation of a certain committee, which reported that the entire properties down there should be junked—and in one of the recommendations it was stated that those properties were worth only a few million dollars—the War Department asked for bids on the property. That was in April, 1921.

Following that closely, on July 8, 1921, Mr. Ford presented his bid. That offer is not now before the Senate, and I have no desire to go into a discussion of its provisions. I favored the acceptance of the Ford proposal, and I should favor it now if it were before the Senate. The more I have studied the question, the more I have compared Mr. Ford's bid with the other bids which were presented and considered by the Senate Committee on Agriculture, as well as the question of governmental operation, the more I am convinced that it would have been a wise course for the Government to have accepted the bid. I believe the Government would have received a return upon the expenditures which had been made and that the farmers of the country would have obtained cheap fertilizer, which latter object was one of the purposes of the original act.

It will be borne in mind that it was some months after Mr. Ford's bid was made before it was submitted to the Congress by the War Department; and it was some eight months, I believe, following the offer of Mr. Ford that a proposal was

made by the Alabama Power Co. However, be that as it may, it was three and one-half years from the time when Ford made his proposal to the time when he withdrew it. During all that time the Congress of the United States was negligent in failing to accept the bid or to do anything in carrying on the great construction work at Muscle Shoals.

Mr. WADSWORTH. Mr. President, will the Senator from Mississippi yield to me?

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from New York?

Mr. HARRISON. I yield.

Mr. WADSWORTH. I am sure the Senator from Mississippi did not mean to give the impression that nothing has been done toward carrying on construction of this work during the period he has named?

Mr. HARRISON. No; I stated that for about two years the work on the dam was stopped and that nothing was being done during that time, but that at other times the work has been carried on.

Mr. WADSWORTH. It has been carried on for the last 10 years.

Mr. HARRISON. Yes; by funds appropriated by the Congress, but nothing has been done toward the fixing of any settled policy upon the part of the Government for manufacturing nitrate there, either for war purposes or for fertilizer purposes.

In the consideration of this question, it must not be forgotten that during the last 20 years \$3,054,000,000 have been expended by the farmers of the United States for fertilizer. It must not be forgotten that during those 20 years we bought from Chile \$567,000,000 worth of nitrates, and that we were willing to pay to the Chilean Government in a tax \$177,000,000 rather than to make for ourselves nitrate for fertilizer purposes in the United States. I call the attention of the Senate to that fact in order to show the very great importance of early and quick action upon the pending proposition.

Now, let me say in passing that I have here a chart which shows the effect of fertilizer upon the soil. I wish I had a large map; but as one remarkable illustration shown by this chart, while in 1880 for a certain area in the Southland, there were 699,000 bales of cotton produced, in the last 20 years, up to 1920, there has been only an increase in the production of cotton of 3 per cent. During that same period the increase in the cost of fertilizer has been 1,070 per cent. What is the reason for the small increase in the production of cotton of 3 per cent during that time? That question is answered by the very large increase of 1,070 per cent in the cost of fertilizer during the same period.

If Senators will look at the map which hangs upon the wall at the rear of the Senate Chamber, it will show to them that this is not a sectional question, that it affects no one locality alone. The very fact that Muscle Shoals is located in Alabama, near my own State of Mississippi, has nothing to do with the question. The manufacture of fertilizer contemplated by the original act will find its beneficent effect in every section of the country. I ask Senators to inspect the map which hangs upon the wall. I look into the benign countenance of my friend from Maine [Mr. FERNALD], who himself at times is a farmer. He knows the soil; he understands soil production. He knows, perhaps, more than any other man here how to take certain products from the soil, and can them and make them delightful to the palates of the people of this country. His State last year paid a bill of \$7,759,000 for fertilizers.

In the State of my friend from New Hampshire [Mr. KEYES] I find that \$857,000 was expended for fertilizers last year, although that is a very small State.

I find that the State of my friend the new Senator from Massachusetts [Mr. BUTLER] last year expended \$4,000,000 for fertilizers.

I come to the State of Connecticut, a little State of the New England group. One would not think that much money would be expended in that State for fertilizers, but I find that last year \$4,893,000 was expended in Connecticut for fertilizers.

I saw here a moment ago my friend from New Jersey [Mr. EDGE], who has taken much interest in this question. How much does New Jersey pay for fertilizers? I read here that the startling sum of \$10,742,000 was paid by the farmers of that State for fertilizers.

I see before me my friend from Delaware [Mr. BALL]—the little State of Delaware, but always so important in this Chamber. Would you think, Mr. President, that the State of Delaware last year spent \$1,222,000 for fertilizers? Would you think that the State of Pennsylvania, so ably represented

in part by my friend [Mr. REED], expended last year for fertilizers the startling sum of \$15,628,000; and that the State of New York, the Empire State, expended last year for fertilizers \$15,007,000?

I come now to a different section of the country. Would you think, Mr. President, that the State of Michigan expended last year for fertilizers \$4,872,000; that the State of Ohio, important as it is, expended \$13,206,000 for fertilizers; that the agricultural State of Indiana last year expended for fertilizers the sum of \$8,735,000; and that the State of Maryland, represented, in part, by my friend [Mr. BRUCE], expended last year \$7,610,000 for fertilizers?

Would you think that the State of North Carolina, represented by her two distinguished Senators, who have been here for a generation, and I hope will be here until doomsday, expended for fertilizers last year the enormous sum of \$48,796,000? Would you think, Mr. President, that the State represented in part by my friend from Florida [Mr. FLETCHER], who sits before me, expended last year \$10,316,000 for fertilizer, and that the State represented in part by my friend from South Carolina [Mr. SMITH] expended last year the sum of \$52,546,000 for fertilizer?

A survey of the map on the wall will show the enormously increased expenditures for fertilizers that have been made by the States in the far West and the Middle West during the last 10 or 20 years. In every instance it is shown that, while some of them may not have used much fertilizer 20 years ago, they are beginning to use more every day. In the great State of the golden West, represented in part by my eloquent friend from California [Mr. SHORTRIDGE], there was expended last year for fertilizers the sum of \$8,182,000.

Mr. President, I wish to place in the RECORD here in connection with the figures which I have mentioned testimony given to the committee by expert after expert showing that by the development of Muscle Shoals, in the transforming there of nitrate into fertilizers, we can cut the expense of the farmer for fertilizer one-half.

[From the American Farm Bureau Federation, April, 1924]

Ammonia is a chemical compound containing 83 per cent pure nitrogen. Nitrogen fertilizers are valued and sold according to the amount of ammonia (or its equivalent) that they contain.

Chilean nitrate of soda is now (April, 1924) selling at wholesale at our Atlantic ports at \$50 per ton of 2,000 pounds, which is a price of 16.1 cents per pound for nitrogen or 18.4 cents per pound for ammonia.

Sulphate of ammonia is now selling at wholesale at our Atlantic ports at \$58 per ton of 2,000 pounds, which is a price of 14.1 cents per pound for nitrogen or 11.6 cents per pound for ammonia.

The organic nitrogen materials, such as dried blood, tankage, and cottonseed meal, have such a high value in the feed market as to make their use as fertilizers practically prohibitive.

The testimony regarding the necessity of producing ammonia at 5 cents per pound for fertilizer purposes and the possibility of doing this at Muscle Shoals is as follows:

1915

"Agricultural nitrogen hunger has been a practical fact for generations, not because ample nitrogen could not be obtained but because it cost too much. . . . It may be assumed as a governing principle that a commercially successful nitrogen-fixation process must give as an end product potassium nitrate or ammonium nitrate or primary ammonium phosphate, and that the factory costs must not materially exceed 5 cents per pound of combined nitrogen figured as ammonia. (This is 6 cents per pound for nitrogen.) . . . From the point of view of a somewhat intimate acquaintance with all the nitrogen-fixation processes publicly known at this time, there is nothing in the above conclusions which should in the least discourage American technologists." (S. Peacock, chemical engineer, Philadelphia, Pa., in a paper on "Commercial nitrogen fixation" presented before the American Electrochemical Society at Atlantic City, N. J., April 23, 1915.)

1823

"It will be possible eventually to produce ammonia at Muscle Shoals at a cost of 5 cents per pound (or 6 cents per pound for nitrogen). This means that a ton of nitrate of soda would cost \$19. Sulphate of ammonia on the same basis would cost \$25." (S. Peacock, chemical engineer, Philadelphia, Pa., in letter of January 11, 1923, to Senator E. F. LADD, quoted in hearing of Gray Silver before House Committee on Agriculture, February 20, 1923.)

1924

"The actual cost of fixing nitrogen by the process we propose to use is about 6 cents down to as low as 5 cents per pound of actual nitrogen fixed." (Dr. R. F. Bacon, chemical engineer, New York City, formerly

director Mellon Institute of Industrial Research, testifying on behalf of the offer of the Alabama Power Co. and associates before House Committee on Military Affairs, January 25, 1924.)

"I say there is no difficulty in the United States in making fixed nitrogen at Muscle Shoals by a process which would produce ammonia at the prices which our friends have suggested, 5 or 6 cents perhaps (or 6 to 7 cents per pound of nitrogen), half what the present market is now." (Dr. Louis C. Jones, industrial chemist, New York City, testifying on behalf of the offer of the Alabama Power Co. and associates before House Committee on Military Affairs, January 25, 1924.)

"Ammonia up there (at Niagara Falls) is being manufactured at a cost under 7 cents per pound. The Muscle Shoals proposition at the power cost that is set up can manufacture ammonia there at 6 to 5 cents a pound (or 7 to 6 cents per pound of nitrogen). There is no doubt about it, because we are doing it and we know what we are doing. . . ." (E. M. Allen, president of the Mathieson Alkali Works, testifying on behalf of the offer of the Alabama Power Co. and its associates before the House Committee on Military Affairs, January 25, 1924.)

"If electric power can be produced at Muscle Shoals for a rate of 2 mills, as statements have frequently asserted, the catalyst discovered in the Fixed Nitrogen Research Laboratory can produce ammonia at the rate of 5 cents a pound." (This is 6 cents per pound for nitrogen.) (Dr. A. T. Larson, Fixed Nitrogen Research Laboratory, Washington, D. C., in Baltimore Sun, March 16, 1924.)

Just think, Mr. President, what it would mean if the State of North Carolina could save in a year one-half of the enormous sum which is expended there for fertilizer every year! The only persons who have been fighting the policy of making fertilizer at Muscle Shoals are some men interested in industries down there who desire to grab a little power in order to promote their own selfish interests. If North Carolina should be able to get all the power that could be developed at Muscle Shoals for use in her industries in the manufacture of cotton goods or what not, it would save to the people of that Commonwealth hardly one-tenth as much as would be saved to the farmers by cutting down their fertilizer bill by one-half.

And so, Mr. President, whatever is done by this Congress, we must not forget the fact that the original act passed in 1916 had two purposes. One was for the Nation's defense; the other was to manufacture fertilizer for the farmer; and we should not forget that in passing legislation here.

Why, the Norris bill is in the very teeth of that law. It defies the very provisions of the law that we passed at that time. Let me read in part the provisions of that act. I read from section 124, which made possible the location of these plants:

The President of the United States is hereby authorized and empowered to make, or cause to be made, such investigation as in his judgment is necessary to determine the best, cheapest, and most available means for the production of nitrates and other products for munitions of war and useful in the manufacture of fertilizers and other useful products.

It goes further in the same section and says:

And is further authorized to construct, maintain, and operate, at or on any site or sites so designated, dams, locks, improvements to navigation, power houses, and other plants and equipment or other means than water power as in his judgment is the best and cheapest, necessary or convenient for the generation of electrical or other power and for the production of nitrates or other products needed for munitions of war and useful in the manufacture of fertilizers and other useful products.

Nothing is said there about expending a lot of money belonging to the people to develop some power "for power purposes." There is nothing in this act that authorizes the development of power that power may be sold. The bill of the Senator from Nebraska only permits and limits the use of power for fertilizer purposes to 25,000 primary horsepower and 75,000 secondary horsepower. The experts say that that would not furnish enough to manufacture more than 8,000 tons of fixed nitrogen a year; and that power can only be used, as stated by the Senator from Nebraska, in nitrate plant No. 1, which is there for experimental purposes, because nitrate plant No. 2 under his proposal is to remain in statu quo until some plan is ascertained that may be cheaper than the present methods of making fertilizers.

There is an erroneous impression abroad as to the amount of power that can be developed at Muscle Shoals. That was one of the things that seeped into the minds of the people and caused opposition to the Ford proposal. The country was made to believe, under a most systematic propaganda of deception

and misrepresentation, that Muscle Shoals was susceptible of being developed into 1,000,000 or at least 500,000 primary horsepower annually, when all the experts showed—and there is a map upon the wall here that shows if you will study it—that even with the employment of the steam plant there and the employment of the Gorgas plant, which has now been sold to the Alabama Power Co., and utilizing that power to its highest efficiency, there can be developed at Muscle Shoals annually only 241,000 primary horsepower; that is, power that can be used for 12 months in the year, the power that is needed to carry on a great industry. The testimony before our committee—and, so far as I know, it is uncontradicted—is that if Mr. Ford's proposition had carried on and he had been permitted under his proposal to make 40,000 tons of fixed nitrogen, of mixed and unmixed fertilizers of every kind annually, it would have required at Muscle Shoals 257,000 primary horsepower. They did not have that much primary horsepower, even with the operation of these two steam plants and the natural development of power at the dams.

So the country has been hoodwinked with respect to that great question; but they can develop there, by the use of the Gorgas plant and the steam plant at Dam No. 2 and the other, the natural falls, 241,000 primary horsepower for 12 months in the year; and yet my friend from Nebraska in his gracious way has given to the farmers the opportunity of taking 25,000 primary horsepower and 75,000 secondary horsepower, which would mean approximately 65,000 primary horsepower in all for fertilizer purposes.

Mr. NORRIS. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Nebraska?

Mr. HARRISON. I yield to the Senator.

Mr. NORRIS. I presume the Senator will admit that in the present state of knowledge with regard to the manufacture of fertilizer all the evidence demonstrates that even if you had 40,000,000 horsepower you would not be able to produce with it through the cyanamide process fertilizer that would be cheaper than the present commercial product.

Mr. HARRISON. I think that is true.

Mr. NORRIS. Then I should like to say to the Senator, if he will permit me, in his time—

Mr. HARRISON. First let me ask the Senator whether I did not state correctly that his bill limits the amount of power for fertilizer purposes to 25,000 primary horsepower and 75,000 secondary horsepower?

Mr. NORRIS. Oh, yes. The bill goes on the theory that in the present state of knowledge of the fertilizer question nobody knows how to make fertilizer, no matter how much power they may have to use, under the systems we now know about in such a way as to cheapen the product. Admitting that to be true—as much as I hate to admit it, because I am interested, as the Senator is interested, in the fertilizer question, and I agree with him that it is the most important question of any—but, recognizing what we believe to be the truth, we want to provide for a decrease in the cost of manufacture of fertilizer. We have set aside that much power to do it because the scientific men with whom we came in contact have themselves said that that is all they can use. If it can be shown that fertilizer can be made more cheaply than it now is made, so as to get it to the farmer at a reduced price, I am perfectly willing to dedicate to that purpose not only Dam No. 2 and Dam No. 3 but all the other dams, all the storage dams, and everything else provided in the bill, and put them all into fertilizer. I should be glad to do it, but when we have more power than can be used by the specialists in investigating the subject and trying to reduce the cost of fertilizer we do not see why we should take a lot of power that otherwise might do lots of good and use it for a useless purpose.

If 25,000 horsepower is not enough, for God's sake let us have more. The men who know better than I and, I think, better than the Senator from Mississippi, have said to me that 25,000 horsepower is all they can use. I will say again to the Senator, as I said yesterday, that this limitation was put in the bill—it was not in the bill as I introduced it—to satisfy men on the committee who, taking a business view of the situation, said, "If we do not limit it and somebody else is using the power or somebody else has leased the nitrate plant who might be interested in the power proposition, he can demand all the power there is, although he has no use for it, and thus accomplish no good and keep it out of the commercial market."

I admit that power is a secondary proposition. I am glad to concede that fertilizer is the prime thing; and I should welcome an amendment to take away all that limitation

if, at the same time, you will take out of the bill the power of the Secretary of Agriculture to lease any of the plant, and let him, through his scientific men, operate it; and let it be unlimited, and give him the right to demand all of it if he wants to.

Mr. HARRISON. I had understood that to be the Senator's view.

Mr. NORRIS. There is another thing I should like to say. Through the kindness of the Senator I am permitted to make these suggestions.

The Senator has not yet said whether or not he favors the so-called Underwood substitute; but I want to call his attention to this fact: If through future investigation power becomes a necessity in the cheapening of fertilizer, then it will be necessary, I think, in order to cheapen that item as much as possible, to go ahead with the development of the Tennessee River and its tributaries and develop it as a system so as to produce, even at the dam we have now, more primary power, and thus cheapen its cost. In other words, the Senator has stated with practical accuracy the amount of power that can be developed at Dam No. 2. If the committee bill is followed out, instead of developing 100,000 horsepower there—

Mr. HARRISON. That was Dam No. 2 and Dam No. 3.

Mr. NORRIS. All right. If the committee bill is carried out and the river is completely utilized in a scientific way for the development of power, we will increase the primary power of Dam No. 2 and Dam No. 3 from 130,000 or 140,000 horsepower to over 600,000 horsepower without any question, and thus at one swoop we have not only multiplied the amount of primary power by six, but we have divided its cost by nearly the same figure.

Mr. HARRISON. I agree with the Senator. The fact that they have a great superpower system is not repugnant to me. Indeed, it is attractive, because I can very readily see that where they have systems working together, relaying and transmitting and swapping and trading their power, and producing power here and giving it over there to another system when it has no power, it can work economy and be very helpful. I should like to see the whole Tennessee River developed as the Senator would have it developed, and I should like to see a great superpower system established under strict regulations as to rates. I am not at odds with the Senator on that point, and I knew what the Senator's views were with respect to this power proposition. He has not controverted anything. I have said. I say that the original act intended that this power should be developed for the Nation's defense and to manufacture nitrates for fertilizer purposes.

Mr. NORRIS. The Senator would not use power to manufacture nitrates, knowing in advance that he was not going to cheapen the fertilizer product, and that he would have on his hands nitrates that would be of no value to anybody, would he?

Mr. HARRISON. The Senator makes that statement, and yet he knows as well or better than any other Senator here that there was not simply one bid but there were several bids that offered to undertake this work, notably the Ford offer that said, "I will do it. I will manufacture mixed and unmixed fertilizer with a content of 40,000 tons of fixed nitrates annually, equivalent to 2,500,000 tons of ordinary fertilizer in this country"; and he said, "In order to do it I will back it up by signing my name and guaranteeing it with the Ford estate." Of course, I know that there was some difference of opinion about that, but that is what was offered; and the Alabama Power Co. made certain proposals, and if what the Senator said is true, why did they do that?

Mr. NORRIS. I do not question the Senator's sincerity in any respect.

Mr. HARRISON. I know that.

Mr. NORRIS. Of course, the Senator knows that I do not agree with his conclusion and do not agree with the proposition that Mr. Ford made any such offer. I do not want to discuss that or be led into a discussion of it now, because, as the Senator said, it is out of this question. The same proposition, however, was made by other bidders, whom the Senator has not mentioned, notably the Hooker people, who were going to make a concentrated fertilizer—a very attractive proposition.

Mr. HARRISON. That is the Union Carbide.

Mr. NORRIS. Yes; the Union Carbide Co., who have, with our scientists, been working for years. They say they have not succeeded in getting it as a practical proposition. I believe they will eventually, and when they do get a concentrated fertilizer they will cut the cost in two, because they will have taken out all of the worthless material and reduced the freight, which, after all, is one of the greatest items now in the cost of fertilizer that the farmer has to buy, because it means every year the payment of freight on a lot of stuff that does no good.

Mr. HARRISON. I do not understand the Senator to say that in the Ford proposal Mr. Ford did not agree to manufacture fertilizers of every kind, with a fixed nitrogen content of 40,000 tons annually?

Mr. NORRIS. The Senator and I could not reach any conclusion now in a discussion of the Ford proposition that would do us or the Senate or the country any good. I do not agree with any of that proposition. I do not believe Mr. Ford agreed to do anything of the kind.

Mr. HARRISON. Yesterday the Senator from New York [Mr. WADSWORTH] stated it was not in the Ford offer; and it ought to be cleared up.

Mr. NORRIS. If the Senator from New York had gone into it, he would have found that the particular offer quoted in the Underwood proposition came from the corporation Mr. Ford was to form. Mr. Ford has distinctly said that he would not make fertilizer if he could not make it at a profit. I say that without any disrespect for him. I do not blame him for it. Nobody can be expected to do it.

I only want to have the Senator meet me on this proposition, that at the present time nobody knows enough about the proposition to say to us that he can make fertilizer and cheapen the product principally through the cyanamide process, the only system we have known down there that will produce 40,000 tons of nitrogen a year. We have to develop something else, and I would like to have the Senator take up the Underwood substitute, which I suppose he is supporting, and point out just where that provides for negotiation, experiment, and development so as to improve the article.

Mr. HARRISON. I shall take it up.

Mr. NORRIS. I should like to have him compare that with the provisions in the Senate committee bill.

Mr. HARRISON. I will take up these other proposals also, before I have finished, and dissect them as best I can. But I want to clear up one point that has mystified the mind of my friend from New York, and which my friend the Senator from Nebraska still asserts, namely, that Ford made no such proposal and that only the corporation was to sign the proposal. I am going to read, merely for the Record's sake, from the proposal. The Ford proposition is out of it. I gave my support to that offer, and I gave it on this theory, that it meant cheaper fertilizers. If I had not been convinced of that, I would not have supported it. Here is what his contract or proposal states: I read from it—

Since the manufacture, sale, and distribution of commercial fertilizers to farmers and other users thereof constitutes one of the principal considerations of this offer, the company expressly agrees that, continuously throughout the lease period, except as it may be prevented by reconstruction of the plant itself, or by war, strikes, accidents, fires, or other causes beyond its control, it will manufacture nitrogen and other commercial fertilizers, mixed or unmixed, and with or without filler, according to demand, at nitrate plant No. 2 or its equivalent, at such other plant or plants adjacent and near thereto as it may construct, using the most economical source of power available. The annual production of these fertilizers shall have a nitrogen content of at least 40,000 tons of fixed nitrogen, which is the present annual capacity of nitrate plant No. 2.

That means two and one-half million tons of ordinary fertilizers. Could a bid be more explicit? What more could he add to it to make it plainer to anybody? Yet the Senator still has doubt about it; and my friend from New York may argue to the contrary, but the provision is here in cold type, and no one, I care not how ingenious he may be, can controvert the proposition.

Now I shall go further with this Ford proposition:

In order that farmers and other users of fertilizers may be supplied with fertilizers at fair prices and without excessive profits, the company agrees that the maximum net profit which it shall make in the manufacture and sale of fertilizer products shall not exceed 8 per cent of the fair actual annual cost of production thereof.

Now as to the guaranty. Mr. Ford signed the offer himself, "Henry Ford," the proposer. This is not the contract; this is the authority to the Secretary of War to enter into the contract. But Henry Ford offered a proposal. If we had accepted it, it would have been binding on him and on everything he owns, on his heirs and assigns. Indeed, here is what he says in concluding:

The above proposals are submitted for acceptance as a whole and not in part. Upon acceptance, the promises, undertakings, and obligations shall be binding upon the United States and jointly and severally upon the undersigned, his heirs, representatives, and assigns, and the company, its successors, and assigns.

Mr. NORRIS. Mr. President—

Mr. HARRISON. What more could he say? If the Senator from Massachusetts [Mr. BUTLER] should make a proposal like that and sign it that way, he knows it would bind everything that he has, every interest that is unencumbered; and the Senator from Nebraska ought to know it.

Mr. NORRIS. May I interrupt the Senator now?

Mr. HARRISON. Yes; I yield.

Mr. NORRIS. Again I say, I do not care to be led into a discussion of Henry Ford—

Mr. HARRISON. I was led into it.

Mr. NORRIS. But since the Senator has read that language, by which he says it is shown that Henry Ford has personally bound himself and his estate to carry out that offer, I think any lawyer in examining the proposition would say that he agrees to do what it is stipulated in the bid he will do, namely, that he will form a corporation with \$10,000,000 capital. That is what Henry Ford agrees to do. The corporation itself agrees to some other things. We could not get Mr. Ford before the committee in person, but it appears in the record, undisputed, that he told the Secretary of War that whenever he could not make fertilizer at a profit he would quit making fertilizer; and his bid would permit him to do it. Again let me say that shows that Henry Ford has good business judgment. It is perfectly foolish, to my mind, to think for a moment that a man of Henry Ford's business judgment would bind his estate, his heirs, everything he owns, for a hundred years to carry out a contract. He would no more think of doing such a thing than he would think of trying to fly without wings. Nobody could do such a thing. Nobody expects anyone to do such a thing. He has done no such thing. He would not be bound to produce a pound of fertilizer personally. He would have no personal obligation except to form a corporation.

Mr. HARRISON. I will let the wording of the proposal speak for itself. I had thought that a grievous error had been committed when the steering committee on the other side did not lift the Senator from Nebraska to the high position of chairman of the Judiciary Committee; but after the present exposé I think they were wise in keeping him at the head of the Committee on Agriculture and Forestry.

Mr. NORRIS. Mr. President, the Senator from Mississippi has given—

Mr. HARRISON. I withdraw that remark.

Mr. NORRIS. I do not ask the Senator to withdraw it. The Senator from Mississippi has given to the steering committee on this side an excuse for their conduct which they will very much appreciate. They have not given any before, but now they will refer to the great Senator from Mississippi, and say it is because the Senator from Nebraska did not know anything about construing a legal contract; and I am willing to abide by that.

Mr. HARRISON. Very well.

Mr. NORRIS. I am willing to stand on the record, and stand on what I have said about Ford's proposition; and I can prove my position by the testimony of Henry Ford. If he did make that kind of a proposition, then he was certainly a subject for an asylum for the insane at once. Any man who would bind his personal estate for a hundred years certainly would be insane.

Mr. HARRISON. And the Senator does not think Henry Ford is insane?

Mr. NORRIS. No; I do not think he is insane.

Mr. HARRISON. Mr. President, reading a little further in this section 44 of the original act, it shows that it was never intended that anything should be done at Muscle Shoals except to develop power for the Nation's defense and for fertilizer purposes, and I want to read this clause in that law. It reads:

The plant or plants provided for under this act shall be constructed and operated solely by the Government, and not in conjunction with any other industry or enterprise carried on by private capital.

That would prevent acceptance of the Hooker proposition, that would prevent acceptance of the Union Carbide proposition, as I shall show in a minute in the discussion of their proposal.

Now, let us see what other bids were made. Of course, before the Senate there is a choice of two lanes for us to travel. One is to take the Norris proposition, which would give to the farmers an opportunity to get some fertilizer, provided it can be made out of 25,000 primary horsepower and 75,000 secondary horsepower. The balance of the power can

be sold to anyone without let and without restriction, except as to the price they can charge to the ultimate consumer.

The Alabama Power Co., or any other power company, could buy the amount of surplus power they chose, but the Secretary of Agriculture could use only 75,000 secondary power and 25,000 primary power.

Before us, however, there are two lanes, one of which we can follow. One is, as I say, to accept the Norris proposition of Government ownership. There is not a Senator here but who has a very strong idea that the President would veto such a proposition. It is right in the teeth of the message that was read from the Secretary's desk only day before yesterday. I will read a little later what the President said on that proposition.

Mr. NORRIS. Mr. President—

Mr. HARRISON. We would get nowhere by the acceptance of the Senator's proposition. I yield.

Mr. NORRIS. Is this doctrine the Senator is now proclaiming—to which I do not give my assent at all—that before we pass anything we must ascertain whether the President wants it or not, going to actuate the Senator in his conduct in the Senate?

Mr. HARRISON. I am not "from Missouri," but since the election I am almost "from Missouri," and I have about concluded that we have to get the President's consent before anything moves respecting Muscle Shoals.

Mr. NORRIS. Then we had better have a committee wait on him, and have him tell us how to vote on this proposition.

Mr. HARRISON. I would not want to go on the committee. I am afraid it might hurt. I am not blind to this situation—

Mr. NORRIS. The President would be very glad to get the cooperation of the Senator and his valuable support.

Mr. HARRISON. I would be very glad to support him on this proposition. I might be weak in my support of him on some other propositions.

We will have to go the route I have mentioned, or we will have to take the Underwood proposition, which I shall discuss presently. In passing, however, let me say that the Underwood proposal comes on all fours with the President's recommendation. I do not know whether they compared proposals or not, but I do know that the President says, "Let it out to private enterprise, and if private enterprise will not take it, then the Government must carry on the development"; and that is exactly what the Underwood proposal is. There must be some understanding about it. Indeed, if it had not been offered by my friend from Alabama, I would say, in view of the expressions in the President's message, that it was an administration proposal; but I presume the Senator from Alabama is not as yet the spokesman of the Administration.

Let us take another proposal that was before the committee, the Alabama Power Co.'s proposal. They have been fighting. They have had a proposal pending all the time. They want this power. They have worked in circuitous ways, indirect and otherwise. They very much desire it. That is laudable. I have no fault to find with them on that score. They could develop some more power there now if they would, although they have been developing a great deal; but the Alabama Power Co. wants this plant, and under the bill of the Senator from Nebraska, if it should pass, the Alabama Power Co. in all probability would get it.

Mr. NORRIS. Mr. President—

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Nebraska?

Mr. HARRISON. I yield.

Mr. NORRIS. First I want to say most distinctly that the Alabama Power Co. would not get it under my bill.

Mr. HARRISON. Why not?

Mr. NORRIS. As a matter of fact, the only company on earth that can get whatever is left over under the Underwood bill is the Alabama Power Co., and that company would get it. Let me call the attention of the Senator to the fact that under the Underwood bill the Government corporation set up has not any power to build a transmission line. It can sell excess power there, but it can not take it anywhere. The only physical connection with Muscle Shoals by any of the power companies of the South is by the Alabama Power Co., and they pretty nearly have a "cinch" on getting what is left under the Underwood proposition.

Mr. HARRISON. If there is surplus power down there, the Alabama Power Co. can get it or any other power company can get it.

Mr. NORRIS. That company is the only one that can get it. They have a transmission line there now.

Mr. HARRISON. They can not get the amount under the Underwood bill as they would get it under the Norris bill.

The Underwood bill says it shall be leased, that at least 40,000 tons of fixed nitrogen after the fourth year shall be made, and that is the equivalent of 2,500,000 tons of fertilizer in the country. If the lessees get it under the Underwood proposal, they have to make that much fixed nitrogen. I take it that if the Secretary of War should enter into a contract with them he will make them put up a bond. It is provided in the Underwood bill that adequate guaranties shall be made. If the corporation should be organized as set forth in the Underwood bill, it is expressly provided that after the fourth year they must make 40,000 tons of fixed nitrogen at Muscle Shoals. So there would not be very much power left under the charge which the Senator agreed to until they had gone farther up the river and built more dams and had more power, and when that time comes then they could take care of that situation and more power would be developed and more of it would be utilized.

Now let us get to the Alabama Power Co. proposal. What was it? The first bid they made, following the Ford offer, was what? When they saw Ford might get it the first bid they made was purely a power proposition. Did they undertake to do anything with respect to making fertilizer? No. In the proposal which the Alabama Power Co. made in 1922—in February, I believe it was—they said, "We will pay for the completion of the dam; we will pay \$5,000,000 for the steam plant at nitrate plant No. 2, and we will give to whomsoever may take over nitrate plants No. 1 and No. 2, 100,000 secondary horsepower to carry on the fertilizer business." That was the gracious thing they were going to do. They were not going to make the fertilizer themselves. They were not going to take nitrate plants No. 1 and No. 2, but they were going to get the whole thing for power purposes and graciously give 100,000 secondary horsepower to somebody to operate plant No. 1 and plant No. 2, when they knew at the time that 100,000 secondary horsepower would hardly make 5,000 tons of fixed nitrogen at those two plants.

But that is not all. They came in afterwards with another bid, which is a very good bid in many respects. In 1924, when they saw there was a great chance for Ford to get it, that it was slipping out of their hands, then they made a real proposition. I would not be surprised if the amount in consideration that they offered was not larger than the Ford proposition, because it was perfectly natural that if they wanted it and were competing with Ford they would lift the amount they might offer just a wee bit in order to get favorable consideration from the American Congress. But they placed in their bid certain loopholes. They put in it certain little words, changing "and" to "or" and changing the whole proposition.

They did not agree in their bid to make 40,000 tons of fixed nitrogen of mixed and unmixed fertilizers annually. No; they did not do that, but they agreed, as I shall read, to make 50,000 tons of nitrogen—not fixed nitrogen, but either one of three kinds—ammonium phosphate, ammonium sulphate, or other concentrated nitrogenous fertilizers—as the commercial demands of the country warranted it, and the only guaranty that the Alabama Power Co. made in its last proposal was to make 50,000 tons of nitrogen; they choosing either one of the three different kinds.

I want to comment to the Senate about the three kinds that they propose to make at that time. They were to make this fertilizer in either of three forms. For instance, sulphate of ammonia could be made exclusively under their contract, and yet there is an overproduction to-day of sulphate of ammonia in this country. There would have been no benefits to the farmers of the country under that provision. I cite to the Senate the fact that last year we imported of sulphate of ammonia 3,539 tons and we exported of that particular kind of fertilizer 150,544 tons. The domestic production of sulphate of ammonia, the kind the Alabama Power Co. said they could make and which they guaranteed to make, was 619,000 tons. That was the domestic production last year. There was a consumption last year of only practically one-half that amount, or 395,000 tons.

Bear in mind, Senators, that the domestic fertilizer consumption in the United States last year was 6,647,000 tons, and that the consumption of sulphate of ammonia in the United States was just 6 per cent of that amount. What good would it have done the farmers of the country for the Alabama Power Co. to have made sulphate of ammonia and nothing else? They would have created an overproduction. It would have been sold in foreign countries and it was to be sold at a price to be fixed on the cost of production and sale. That was the proposal they made, not upon a certain profit on the "cost of production" as was contained in the Ford proposal, but on a certain percentage of the "cost of production and sale," which might have

been so expensive as to have prohibited the farmers entirely from purchasing any of it. So the Alabama Power Co.'s proposition had many features that would deceive and mislead. It was a power company proposal and that was all.

Now, let us take up the Union Carbide Co. That is the one which, as I saw in the press the other day, is favored by my friend from Illinois [Mr. McKINLEY]. It may have been that he was incorrectly quoted. What is this great institution? They have been making carbides for many years. They have industries all over the country. They are a rich and prosperous concern. That is all right. They are well able to guarantee the faithful performance of their proposal. But they proposed what in their first bid? They said, "If you will give us 50,000 horsepower, 25,000 primary and 25,000 secondary, we will make down there at nitrate plant No. 2 urea, but we will only do that with the understanding that you will give to us 50,000 horsepower additional, to be used in the other half of nitrate plant No. 2 in any wise we may see fit."

In other words, they wanted to manufacture carbide or other products there. They wanted the power there for that purpose and urea was really only incident to it. Urea, they tell us, is made after we reach the stage of cyanamide. It could be made at plant No. 2, but it has already been stated, and it is in evidence by expert after expert, that the cost of fertilizer by the cyanamide process is so high that it is useless. If we go into the manufacture of urea, and in doing so must manufacture cyanamide first, we know the cost of urea would be higher than the cost of cyanamide and it would be of not benefit to the farmers of the country. But they said, "We will make also phosphozote," but the experts say that is made from some combination of urea with cyanamide. In other words, in order to make phosphozote we would have to go in and make cyanamide first and then develop it to a higher state of urea, and that process would be so excessively costly that phosphozote would be useless to the farmers of the country. That is the Union Carbide theory.

But they made a second bid, and it is the second bid that looks pretty attractive. It is attractive as a matter of fact. They took nothing into consideration with respect to Dam No. 3, but at Dam No. 2 they propose to pay quite a good deal, I think in the aggregate \$120,000,000, but the only undertaking they offered was to manufacture urea, and they proposed that on a 10 per cent cost-plus basis, and they said that must be based on the cost of production and cost of sale. They say if it is not profitable then they may turn it back to the Government, and they will act as agents for the Government in doing that work upon the cost-plus basis. The testimony of one of the gentlemen, Mr. Morrison, who appeared before the Senate committee representing the Union Carbide Co., was that he was after power. The question of making urea was incident to getting the power at Muscle Shoals. He had no patent on the process. He only had an option on a certain patent that made urea. It would run out in a certain time, he said. Here is what this man who represented the Union Carbide Co. said before the committee:

Senator HARRISON. You state that all you had is an option on the process?

Mr. MORRISON. The option is binding.

Senator HARRISON. I understand that, but you merely have an option and you acquired that about a year ago?

Mr. MORRISON. Yes, sir.

Senator HARRISON. How long does it run?

Mr. MORRISON. I think it runs probably another year. I am not entirely definite on that.

Senator KENDRICK. As I understood you just there, you have, under an agreement, a right to use this process in the United States?

Mr. MORRISON. Absolutely. It is just like a land contract. If we take up this option within the period, they are bound to sell it to us.

Senator McNARY. I suppose you merely took an option instead of an outright purchase, because you do not want it unless you can acquire the necessary horsepower?

That was the question that touched the real spot.

Senator McNARY said:

I suppose you merely took an option instead of an outright purchase, because you do not want it unless you can acquire the necessary horsepower?

Mr. MORRISON. No. We want to secure for our use certain horsepower at Muscle Shoals, and in order to do that we have got to meet this fertilizer proposition.

That is his testimony. Senators may cite proposal after proposal, but it will be found that their authors all want the power; that the question of making fertilizer is only incident to their proposals.

Mr. WADSWORTH. Mr. President—

The PRESIDING OFFICER (Mr. SIMMONS in the chair). Does the Senator from Mississippi yield to the Senator from New York?

Mr. HARRISON. I yield.

Mr. WADSWORTH. The Senator does not mean that remark to apply to all the proposals that are before Congress, does he?

Mr. HARRISON. I am going to get to the Hooker proposal in a moment, if the Senator from New York will wait. That is an ingenious proposition; that is a smooth plan. Under it the Government puts up all the "dough" and at the end, after the preferred stock dividends shall have been paid to Mr. Hooker and his associates, the Government and Mr. Hooker are to divide on the theory of Mr. Hooker and his friends getting one-fourth and the Government getting three-fourths. Oh, Mr. Hooker has submitted a fine proposal for himself. Now Mr. Morrison further says:

Under our first offer we leave that extra power to the Government to do with it as it will. Under our second offer we take that power to do with it as we will.

Now, Mr. President, let us see about the other proposal, the one about which my friend the Senator from New York [Mr. WADSWORTH] has inquired—the Hooker-Atterbury-White proposition—wherein Mr. Hooker states in order to show good faith that they are willing to put up \$1,000,000; but he also states that, of course, they put up nothing substantially, that it is merely a partnership proposition, that is all, rather than for the Government to go there with its chemists, who receive \$2,500 a year, whom my friend the Senator from Nebraska [Mr. NORRIS] wants to put in charge to make fertilizer down there. Most of them, I presume, never had any business experience in the world and know nothing about anything, perhaps, except chemistry. I am not speaking disparagingly of them, but when experts devote themselves entirely to chemistry and study only chemistry, it seems to me that about 99 per cent of them must go crazy, because if there is any subject that is tantalizing it is chemistry. Chemists are not expected to know anything about ordinary business, and yet my friend from Nebraska would place this great laboratory research board under the charge of these cheap employees, who are all inadequately paid, and impose upon them the task of operating these great nitrate plants No. 2 and No. 1, which he himself admits is a hazardous business and is yet in its infancy—its swaddling clothes.

Now, let us see about the Hooker proposition. It is presented by Mr. Hooker, Mr. Atterbury, and Mr. White. They are excellent gentlemen; they are men of great business training; they have had large experience in chemistry, in railroad-ing, and in business of other kinds. I have no doubt from what I have heard of these gentlemen that they are men of the highest character, and that if the Government wanted to employ somebody to go down there and operate the business for the Government, and if they could be secured at a reasonable salary, they might be as good as anybody in the world; but if they should get this contract and be allowed to fix their own salaries, to be taken out of running expenses, I imagine they would fix somewhat higher salaries than probably the Government would fix if it were controlling them.

Property leased: Dams Nos. 2 and 3, nitrate plants Nos. 1 and 2, including all extension, development, and all property under control or used by the United States in connection with the Muscle Shoals project, no matter where located. (Para. 1 and 2.)

Payments: The United States is to receive:

Let us see about that, how the Government is ever to get anything back under this proposal out of this bill:

1. All net profit derived from the manufacture of fertilizer which remains after deducting and paying to the company 8 per cent of the current sales price of all fertilizers manufactured.

That is what section 11 proposes.

2. To determine the share which the United States shall receive from the profits derived from the production of electric power the annual net earnings from the power are determined and the following deductions are made from them:

(a) An 8 per cent dividend on all outstanding preferred stock of the company.

That is without limit; these estimable gentlemen can make it as high as they want to.

(b) An amount not to exceed \$200,000 for research is taken out of the current expenditures.

(c) Sinking-fund payments sufficient, at 4 per cent compound interest, to amortize the amount expended by the United States in com-

pleting the dams subsequent to the signing of the lease, plus one-half of the amount expended on Dam No. 2 prior to the signing of the lease, but not exceeding \$15,000,000.

That is section 12.

(d) A sufficient annual payment to retire the outstanding preferred stock—

Of these very estimable gentlemen—

prior to the termination of the lease; said preferred stock, however, having no par value, and no method of valuation of said stock being provided.

Next:

(e) Payments into a second sinking fund (payable only when power sales equal or exceed 150,000 kilowatts primary power and fertilizer sales aggregate 30,000 tons of nitrogen or more) which, if paid continuously each year after the first year for 40 years, would amortize, at 4 per cent compound interest, the remainder of the original expenditure on Dam No. 2 (excluding funds expended for navigation purposes) and the steam-power plant at nitrate plant No. 2, but not to exceed \$21,000,000.

If there remain any net earnings from the power after all of these deductions have been made, then for the first 10 years two-thirds of this remainder shall be paid to the United States and one-third to the common-stock holders of the company, and after 10 years three-fourths of such a remainder, if any, shall be paid to the United States and one-quarter to the common-stock holders of the company.

This payment to the United States, however, is not a net payment, for it is subject to a still further deduction.

It does not say, "This payment to the United States and to the stockholders," but—

This payment to the United States, however, is not a net payment, for it is subject to a still further deduction. Out of the share payable to the United States from the earnings of the company the advisory committee, controlled by the company, shall set aside a fund of an indefinite amount, called "an extraordinary replacement and betterment fund," to be used to keep the steam and water power plants intact and abreast of the art.

But even then the United States Treasury does not receive any funds, because all the remaining undistributed profits payable to the United States are turned into a "rotary fund," controlled by the Secretary of War, who, in his discretion, may make "expenditures for general purposes of the Muscle Shoals enterprise," which removes all doubt that the Treasury will in the end receive very much.

Mr. WADSWORTH. Mr. President, I see the Senator is reading from a prepared document. Will he regard it as impertinent on my part if I inquire if the Senator prepared that himself?

Mr. HARRISON. I myself prepared the document. It is a part of my notes.

Mr. WADSWORTH. I am very much interested in it, because that is the most extraordinary description of the Hooker offer that I have ever heard.

Mr. HARRISON. It may so appear to the Senator. I have no doubt the Senator will endeavor to combat it in his argument and attempt to show some good features in the Hooker proposal, to which I have just alluded. Mr. President, the Hooker proposition is all right if the Government wants to go in on a basis of giving to the gentlemen submitting the proposal one-third or one-fourth, the Government taking the remainder and the gentlemen forming the company doing the business; but under the Hooker proposal the Government will put up all the money and the farmers will not be guaranteed one cent of reduction in the price of fertilizer.

Mr. WADSWORTH. Mr. President, if the Senator will permit another interruption, let me say to him that that is true with respect to every proposal in regard to Muscle Shoals. The Government has already put up the money; no one but the Government has spent a cent there.

Mr. HARRISON. I understand that.

Mr. WADSWORTH. And this proposal, like all the others, merely contemplates the Government finishing the plants and the dams.

Mr. HARRISON. It is quite true that the Government has put up all the money.

Mr. WADSWORTH. Then it should not be a matter of denunciation in such stentorian tones.

Mr. HARRISON. Well, I have not denounced these gentlemen; I think it is a fine business proposition for them. The Senator could not have been here when I paid my very eloquent tribute to the character and business qualifications of these estimable gentlemen.

Mr. WADSWORTH. In referring to the question as to who put up the money, everybody knowing, of course, that the Government has put up all the money and must have put it up, I can only interpret the intent of the Senator by the manner in which he has made the utterance.

Mr. HARRISON. The Senator must not consider that I have cast any reflection on these particular gentlemen, who happen, perhaps, to be citizens of the State of New York. They are splendid gentlemen, no doubt; but I have talked about who put up the money in each one of these proposals; I am only analyzing the Hooker proposal.

Mr. WADSWORTH. The Senator has gone considerably further than that.

Mr. HARRISON. I have no venom in me at all.

Mr. WADSWORTH. The Senator has referred to them as being "smooth."

Mr. HARRISON. I say that that theirs is a pretty smooth offer. I do not mean it in an offensive sense.

Mr. WADSWORTH. That is a question to be demonstrated, which the Senator has not done.

Mr. HARRISON. I will not use such strong language if it gives offense to my friend from New York.

Mr. WADSWORTH. The Senator is liable to use strong language.

Mr. HARRISON. I withdraw the word "smooth," and I will say it is an ingenious proposal; that if the Government should accept it, it would lose much money, and these gentlemen would be greatly benefited and receive very large profits therefrom.

Mr. President, I do not care to occupy the time of the Senate longer. I believe that the best policy for the Senate to pursue is to accept the proposal made by the Senator from Alabama, to which I have some amendments I desire to offer. I believe that proposal embodies a plan that will mean the early completion of the dams and the operation of the nitrate plants at Muscle Shoals. I believe, in the end, it will work a great benefit to the farmers of the country.

Of course, I think the Senator has made an error, and I am sure that he will accept an amendment to his proposal in that his proposed substitute provides that if within four years, or at the expiration of four years—I may not have it exactly right—it is not paying, the corporation shall cease to function. I think, perhaps, it will not pay during the first four years. I think it should have a longer time to be tried out than that. I think that if there is any limitation at all to this corporation, it should be at least 10 years; and I would much prefer to see no limitation whatsoever. Even though the Government should lose some money in the making of nitrates for powder purposes and nitrates for fertilizer purposes there, is it not incumbent on us to provide for the Nation's defense? Was it not the intention when we poured out these millions on millions that we were to provide, in case of the exigency of war, a supply of nitrates for war purposes? We build a battleship at a cost of millions of dollars and in a few years it is sunk by airplanes or something else. We operate various Government agencies and we get nothing in return; indeed, the only department of the Government from which we get anything in return is the Post Office Department; and I learn from a report which has just been filed by the Postmaster General that on second-class mail matter we lost last year around \$40,000,000, I believe. That ought to be changed, perhaps, but whether that is so or not, we are giving to the people a benefit; we are giving to them a means of acquiring knowledge and getting their mail quickly. So in this case, even though we should lose some money in the manufacture of fertilizers at Muscle Shoals, we would be giving the farmers some benefit; we would be giving them cheaper fertilizers, and at the same time we would be providing for the defense of the Nation in time of war. So I say I am opposed to limitation of four years within which to determine whether or not the corporation has proved successful. I prefer 10 years or even a longer period.

Mr. UNDERWOOD. Mr. President—

The PRESIDING OFFICER (Mr. COPELAND in the chair). Does the Senator from Mississippi yield to the Senator from Alabama?

Mr. HARRISON. I yield.

Mr. UNDERWOOD. Mr. President, I think the Senator's statement is a very just criticism of the proposal I made in that regard from his standpoint. I want to say that the proposal in the bill, although it shuts down the plant at the end of four years if it is not on a profitable basis, is not intended to shut it down entirely. It merely requires the officers to close down the works and report the fact to Congress, and

then, if the plant is losing money, allow the Congress to determine whether it will go ahead and lose money or whether it will continue to keep it closed down. The matter comes back to the Congress for determination.

As I stated yesterday, I think that as a matter of national defense we can well afford to lose money on the operation of a plant if that is the only way we are going to get the nitrogen that is necessary for our national defense. It is no more loss of money than it is to maintain a battleship; and the purpose of that clause in the bill is merely to bring it back to the attention of the Congress and allow the Congress to keep control of the organization.

Mr. HARRISON. I thank the Senator for his explanation; but I still hold to the view that the four-year provision should be eliminated, and it should be either 10 years or without limit. It is because I am an ardent, sincere advocate of the bill that I am offering these minor criticisms. They are merely minor criticisms, but here is one criticism that I am going to suggest to the Senator that I think is worth while:

The Senator authorizes and directs the Secretary of War to complete the construction of Dam No. 3 in the Tennessee River, and so forth, and then the Senator provides in the following section for Dam No. 3: Bear in mind that the Senator's proposal applies only to Dam No. 2. It has nothing to do with Dam No. 3. It is based, as I take it, on the theory that Dam No. 3 has not been started, has not been authorized, and that nothing has yet been done with it; but Dam No. 3 is a part of this system. Dam No. 3 will not only help in creating a reservoir for these waters and preventing damage from flood waters around Chattanooga and that section of the country and aiding navigation but it will add greatly to the primary power as well as the secondary power; and, in my opinion, the lessee who procures the right to develop power at Dam No. 2 should have the same right in regard to Dam No. 3. I think it is one system. I do not think we should disconnect them. I think that whoever bids on this proposition it should be along the lines that are contained in every proposal except that of the Union Carbide Co., as I understand, that Dam No. 3, when completed, will bear the same relation to the lessee as Dam No. 2.

So I hope that before the debate is closed, and before the consideration of the Senator's bill is ended, he will consent, if it meets with the views of the majority of the Senate, that the two propositions shall be consolidated, and not make the development at Dam No. 3 and the lease of power at Dam No. 3 wait upon the contingency of its completion before we enter into that lease. I have seen too much delay in this matter. I have seen practically eight years of delay with respect to Dam No. 2; and with a different personnel in a new Congress in the years to come when Dam No. 3 is completed, if it takes that long, the farmers will be delayed that much in getting cheaper fertilizer, or the people in getting power in that event.

Mr. UNDERWOOD. Mr. President, if my friend will allow me, if the Senator desires to make an amendment to that effect I have no objection. As a matter of fact, the clauses that the Senator reads are supplemental clauses to the part of the bill which relates to Dam No. 2. When I provided in the bill for the authorization of the building of Dam No. 3—which ought to be done, and which the Government will lose no money in building, because it is already demonstrated that when it is finished if the Government wants to lease the power it can do it for the cost of the dam—I did not provide what should be done with that power, but simply said that after its completion the Congress should determine it, because—I will be candid with the Senator—I did not know what to provide. Of course, so far as fertilizer is concerned, at Dam No. 2 there is enough power already developed to make fertilizer to the extent that this bill provides.

Mr. HARRISON. In that connection, I think the Senator is a little in error there. As I recall, the testimony and the maps prepared by the experts show that with the utilization of the steam plant at Gorgas, which is now gone, and which supplied 40,000 horsepower, and the steam plant at nitrate plant No. 2, which provides 80,000 horsepower, by converting the secondary power into primary power by the use of both of those steam plants we would have at Dams Nos. 2 and 3, not just Dam No. 2, only 241,000 horsepower, and that it will take 257,000 horsepower to make fertilizer to the extent of 40,000 tons of fixed nitrogen, mixed and unmixed, of all kinds of fertilizer.

Mr. UNDERWOOD. The Senator is right. One witness, and a very expert witness, testified to that effect, but the power at Dam No. 3 is 40,000 horsepower. Practically speaking, there is 200,000 primary horsepower with the same units added at Dam No. 2, and of course as to the utilization of power the 200,000 horsepower is more than sufficient to operate the

nitrogen plants. But if you are going to use the power also—and that probably ought to be done—to develop the making of phosphoric acid for fertilizer, it probably will require more power.

Now, having a double-barreled bill, one part of it providing for a lease and the other part for Government operation, I really was in doubt when I wrote that section as to how to word it in a way that might fit into a contract on the one hand or Government operation on the other. That is the reason why I merely provided that at a future date the matter should be determined by Congress, because if it goes to a lessee it might be treated in one way and if the Government operates it it might be treated in another way. I have no objection, however, to any amendment along that line that the Senate may wish to put on at this time.

Mr. HARRISON. The Senator understands that I am merely pointing out that criticism, which I think is a criticism.

Mr. UNDERWOOD. I think it is a criticism, and I should be glad to have it remedied if possible. I say that the reason why I did not attempt to remedy it was because I could not make up my mind how I could write a clause that would fit a lessee and a Government corporation both at the same time, and I left it to the future determination of Congress; but I have no objection whatever to the Senate amending that clause and providing now for the use of the power if it can be done satisfactorily.

Mr. HARRISON. Mr. President, the Senator from Alabama has done a great work in the preparation of this bill. It seems to me that he has solved this problem. The provisions of the bill meet the expressions of the President's message. I can not understand how even anyone who favors governmental operation can object to the bill. It seems to me that it is a method which we can all agree upon and do something that will reflect great credit upon this Congress.

The Senator's bill makes it necessary and obligatory that at least 40,000 tons of fixed nitrogen shall be made annually at Muscle Shoals, whether operated by the Government or whether operated by a lessee. Of course, that does not apply for the first three years, because it goes up in steps of ten, twenty, thirty, and at the fourth year it reaches forty thousand tons. There may be some question in my mind as to whether you have given the lessee long enough time in order to reach the 40,000 tons; but at least at a certain time, whether a lessee enters into a contract with the Government or whether the Government operates the plant through a corporation, the farmers will be assured of 40,000 tons of fixed nitrogen manufactured annually at Muscle Shoals, which will be a guaranty of the Nation's defense in time of war and a guaranty that at least 2,500,000 tons of ordinary fertilizer will be produced annually for the farmers in America.

I do not know, if this bill should pass, whether anybody will make a bid under its terms or not. It provides, as I read it, that the rate shall be fixed and regulated by the States into which the power enters and is sold—a proposition that even a Hamiltonian Republican ought to agree is sound. They ought to have that right.

Mr. DIAL. Mr. President—

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from South Carolina?

Mr. HARRISON. I yield to the Senator.

Mr. DIAL. I should like to suggest to the Senator that if it is contemplated to build Dam No. 3 it could be done much more economically soon after the completion of Dam No. 2, while the machinery and force are intact.

Mr. HARRISON. The Senator and I are in entire accord. We have just discussed that matter, and that is agreeable to the Senator from Alabama.

There are provisions here which say that the Secretary of War shall compel the lessee to put up adequate security. I do not know whether we ought to leave that power in the Secretary of War or not. I have some doubts about that proposition. I believe the Secretary of War will compel him to put up at least a \$10,000,000 bond, or capitalize the organization at that much, because every proposal that has come to us except the Hooker-Atterbury bid has proposed a \$10,000,000 corporation, and some of them \$15,000,000. But certainly a guaranty that is adequate should be required of whoever may lease this particular property. So under the provisions of the Underwood proposal we will get the required fertilizer; the rates will be regulated, because the Senator from Alabama writes into the bill the same proposal that was placed in the Ford bid, that the price to the consumer of fertilizer shall in no case be larger than the cost of production plus 8 per cent, leaving out, and wisely so, the cost of production and of sale plus 8 per cent; so the farmers will receive some benefit from

that proposition. If they do not bid on it, if these institutions that have made their proposals are not willing to come under the terms of the bill if we should pass it during this session, and the 1st day of July of next year should arrive, then the Government is to proceed with the \$50,000 corporation to run and operate this great natural resource down there.

Why, it is the wise thing to do. It is the economical—it is the expedient thing to do. I hope that the Senate will adopt this proposal, with certain minor amendments, and that after that shall have been done the House, without sending it to conference, will ratify and concur in the proposal. If that is done, I have no doubt that the President of the United States will sign it, because I read with thrills in my heart the expressions of the President touching this great subject.

Oh, how long it has been delayed! For what time have the farmers waited to get some benefit from the act of 1916; and how culpably negligent, how lacking in statesmanship, has the American Senate been—I will not say anything about the House, because under the rules I am prohibited from doing so—in dealing with this great question!

Here is what the President said:

The production of nitrogen for plant food in peace and explosives in war is more and more important. It is one of the chief sustaining elements of life.

What does he mean by that? Does he mean power?

It is one of the chief sustaining elements of life.

No; he means fertilizer.

It is estimated that soil exhaustion each year is represented by about 9,000,000 tons and replenishment by 5,450,000 tons.

What does he mean by "soil replenishment"? Does he mean power for some industries in that great section of the country? No; he means fertilizer.

The deficit of 3,550,000 tons is reported to represent the impairment of 118,000,000 acres of farm lands each year.

He goes further. He sounds more eloquent as the message goes on.

To meet these necessities the Government has been developing a water-power project at Muscle Shoals to be equipped to produce nitrogen for explosives and fertilizer. It is my opinion that the support of agriculture is the chief problem to consider in connection with this property.

Oh, with what emphasis did he use that expression! Was he talking about power when he took his pen to employ that language, when he said, "It is my opinion that the support of agriculture is the chief problem to consider in connection with this property"? Is it considered in the Norris bill, which gives 75,000 secondary horsepower and 25,000 horsepower? Is it considered in the Alabama Power Co. proposal? Is it considered in some of the other proposals, like that of the Union Carbide Co., made to the Senate?

The President further says:

It could by no means supply the present needs for nitrogen, but it would help and its development would encourage bringing other water powers into like use.

Several offers have been made for the purchase of this property. Probably none of them represent final terms. Much costly experimentation is necessary to produce commercial nitrogen. For that reason it is a field better suited to private enterprise than to Government operation. I should favor a sale of this property, or long-time lease, under rigid guaranties of commercial nitrogen production at reasonable prices for agricultural use.

Let me read that again. Let me burn it into your minds. Let me stamp it upon your hearts. These are the words of the President:

I should favor a sale of this property, or long-time lease, under rigid guaranties of commercial nitrogen production at reasonable prices for agricultural use.

Does he say anything about the development of power for power purposes, as is embodied in the Norris bill? No; it is to be for agricultural purposes. He goes further:

There would be a surplus of power for many years over any possibility of its application to a developing manufacture of nitrogen. It may be found advantageous to dispose of the right to surplus power separately, with such reservations as will allow its gradual withdrawal and application to nitrogen manufacture. A subcommittee of the Committee on Agriculture should investigate this field and negotiate with prospective purchasers.

Everything that the President suggests there is contained in the first part of the amendment offered by the Senator from

Alabama. Under that they would have six months to make their proposal to lease it under rigid guaranties, as the President says, to make nitrogen to insure this country against war and for fertilizer purposes. What does the President say in his concluding paragraph? He says:

If no advantageous offer be made, the development should continue and the plant should be dedicated primarily to the production of materials for the fertilization of the soil.

That is exactly what the bill introduced by the Senator from Alabama proposes, first, to give it to private initiative. If they do not accept it, the Government should then continue and the plant should be dedicated primarily to the production of materials for the fertilization of the soil.

Mr. President, the proposal made is a statesmanlike one, and we should at the earliest possible moment adopt it, with certain amendments, and get it to the White House, so as to let the farmers get some ray of relief, which has been long delayed.

The PRESIDING OFFICER. The question is on agreeing to the substitute reported by the Committee on Agriculture and Forestry.

Mr. HARRISON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The principal legislative clerk called the roll, and the following Senators answered to their names:

Ball	Fernald	Jones, N. Mex.	Sheppard
Bayard	Ferris	Jones, Wash.	Shipstead
Borah	Fess	Kendrick	Shortridge
Brookhart	Fletcher	Keyes	Simmons
Bruce	Frazier	McKellar	Smith
Bursum	George	McNary	Smoot
Butler	Gooding	Means	Stanfield
Caraway	Greene	Metcalf	Sterling
Copeland	Hale	Noel	Swanson
Couzens	Harrell	Norris	Underwood
Cummins	Harris	Oddie	Wadsworth
Curtis	Harrison	Overman	Walsh, Mont.
Dial	Heflin	Pittman	Watson
Dill	Howell	Ralston	Willis
Edge	Johnson, Minn.	Reed, Pa.	

The PRESIDING OFFICER. Fifty-nine Senators having answered to their names, there is a quorum present.

Mr. DIAL. Mr. President, I send to the desk an amendment to the amendment, which I ask may be printed and lie on the table.

The PRESIDING OFFICER. The amendment to the amendment will be printed and lie on the table.

Mr. WADSWORTH. Mr. President, I know that some other Senators desire to address the Senate on the question, but some of them are not ready at this time to do it, and although I can not boast of being completely prepared by any means to discuss such a complicated measure, I shall endeavor to offer some comments at least.

Mr. NORRIS. If the Senator from New York does not care to go on now I would like to make a suggestion, and I ask the attention of the Senator from Alabama [Mr. UNDERWOOD].

In the parliamentary sense the question before the Senate is the committee amendment. As I understand it, if the committee amendment were substituted for the House text, then unless we have some agreement to begin with it would not be subject to amendment. The amendments ought to be offered and acted on first. The Senator from Alabama can not offer his amendment until we get rid of this one. I do not want to limit amendments in any way, so I was going to suggest that if it is agreeable I will ask unanimous consent that if the committee amendment is substituted on the vote, which I suppose will only be a formal vote, because there is no one here advocating the House text now, it shall then be considered as an original bill subject to amendment in every way that an original bill would be.

We could pass on the committee amendment now, and then the Senator from Alabama could offer his amendment. I want this understanding, however. If that is agreed to and the Senator then offers his amendment, I would like the same unanimous-consent agreement when that comes up, that if it is agreed to it shall then be subject to amendment the same as an original bill.

Mr. UNDERWOOD. Of course I recognize in the present parliamentary state that it is probable I could not offer my substitute as an amendment to the committee substitute, but if the committee substitute is adopted then when the bill goes into the Senate I could move my substitute.

Mr. NORRIS. I am thinking not only of the Senator's amendment, but of amendments that other Senators may wish to offer. I presume there are various Senators who have amendments to offer, both to the proposition of the Senator

from Alabama and to the committee substitute as well. I do not want to preclude any such Senators from offering those amendments by any parliamentary procedure that would shut them out.

Mr. SMOOT. The Senator could not do that.

Mr. NORRIS. If we should vote now on the substitution of the committee amendment for the House text and it were substituted, I would be willing that we should consider it subject to amendment just as if it were an original bill, and not limit it in any way.

Mr. BRUCE and Mr. SMOOT addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Nebraska yield; and if so, to whom?

Mr. NORRIS. I yield first to the Senator from Utah.

Mr. SMOOT. It seems to me there is no advancement of the measure or time saved by that program. The rules provide that any amendment can be offered when the measure reaches the Senate.

Mr. NORRIS. I understand that; but many Senators would not want to wait until then. They might want two votes on their propositions. I am not making the suggestion for my own convenience. I want to do it in order to be as accommodating and courteous as I can to all Senators. I do not want anything to happen that might preclude those who may not be as familiar with the rules as is the Senator from Utah.

Mr. UNDERWOOD. As I understand the situation, an amendment to the committee substitute for the bill is not in the third degree, and anyone could move to strike out a clause of the committee amendment now; but I can not offer an amendment by way of a substitute.

Mr. NORRIS. I think the Senator is perfectly right; but I have talked with the Presiding Officer of the Senate, and he is of the opinion that if the committee amendment is now substituted, as the committee recommended, it would not then be subject to amendment again until the bill reached the Senate.

Mr. UNDERWOOD. That is true.

Mr. NORRIS. I think that is the parliamentary situation.

Mr. UNDERWOOD. I think so.

Mr. NORRIS. If some Senator wants to offer an amendment now, then I do not want to preclude him from offering it.

Mr. UNDERWOOD. Of course, when that time comes we can determine by unanimous consent whether we can offer another substitute in the Committee of the Whole or whether we shall wait until the bill gets into the Senate. I would prefer to wait until we have voted on the committee substitute.

The PRESIDING OFFICER. The Senator from Nebraska asks unanimous consent—

Mr. NORRIS. No; I shall not submit the request. I took the Senator from New York off the floor without intentionally doing it. I thought everyone would agree to my suggestion, but if nobody else wants it I certainly do not.

Mr. BRUCE. Mr. President—

Mr. WADSWORTH. I shall be glad to yield if the Senator from Maryland desires to proceed.

Mr. BRUCE. I merely desire to remind the Senator from Nebraska that I have already offered an amendment to his substitute.

Mr. NORRIS. That amendment is not before the Senate. I did not understand that it had been formally offered.

Mr. BRUCE. Oh, yes.

Mr. NORRIS. It was ordered to be printed.

Mr. BRUCE. I would like to have my amendment read at this time.

Mr. SMOOT. Does the Senator offer it at this time?

Mr. BRUCE. I have offered it, and I would like to have it read now.

Mr. NORRIS. I ask the Senator if his amendment has been printed?

Mr. BRUCE. It has been printed.

Mr. NORRIS. I would like to be supplied with a copy of it.

The PRESIDING OFFICER. The Clerk will read the amendment offered by the Senator from Maryland to the amendment in the nature of a substitute reported by the committee.

The READING CLERK. On page 23, after line 5, strike out "section 6" and substitute therefor the following:

In the appointment of officials and in the promotion of any such officials no political test or qualifications shall be permitted or given consideration, but all such appointments and promotions shall be given and made on the basis of merit and efficiency; and in the selection of employees for said corporation and in the promotion of any such employees all selections shall be made in accordance with the provisions of the Federal statutes relating to the Federal classified civil service and the powers and authority of the President and the United States

Civil Service Commission with respect thereto. The board shall keep a record of all requests, oral and written, made to any member thereof, coming from any source, asking for any favor in behalf of any person or the promotion of any employee, which record shall be open to the public inspection. Any member of said board who permits the use of political or partisan influence in the selection of any employee, or in the promotion of any such employee of said corporation, or who gives any consideration to political consideration in the official action of said board, or who, knowing that such political influence has been or is attempted, does not record the same in said record, shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in a sum not exceeding \$1,000 or be imprisoned not to exceed six months, or both such fine and imprisonment, and the conviction of any member of said board of the offense herein defined shall have the effect of removing such member from office.

Mr. NORRIS. If the Senator's amendment is pending and he is going to talk on it, I would like to have him call the attention of the Senate to the difference between his amendment and the text which he seeks to amend. As it was read at the desk I thought it corresponded to the language of the proposed committee substitute.

Mr. BRUCE. I shall be glad to explain it.

Mr. NORRIS. From a casual reading of his amendment, which has just come to my desk, I think the only difference between the text of the committee substitute which the Senator seeks to amend and the Senator's amendment is that he adds one sentence providing for the application of the civil-service rules to appointments. If that is the only difference, I have no objection to the amendment myself.

Mr. BRUCE. I thought that the Senator from Nebraska probably would not have any objection to it; but let me offer just a word of explanation with reference to the scope of the amendment.

Section 6 of the committee substitute provides that in the appointment of the officials and in the selection of the employees of the proposed Federal corporation there shall be no political test or discrimination of any sort either as respects appointment or selection or promotion, and that all appointments or selections or promotions of such officials or employees shall be based upon merit and efficiency. That is all very well, of course, for the province of moral platitudes. Those provisions sound very smoothly to the ear, and I do not question for a moment that it was sincerely the object of the draftsman of the substitute to remove the officials and employees of the proposed Federal corporation entirely from the field of partisan influence.

But we all know that in order to do that something more is necessary. The amendment which I have proposed leaves the text of the committee substitute so far as it relates to officials of the proposed Federal corporation wholly untouched but it provides that when any employees, as distinguished from officials, are selected by the proposed Federal corporation they shall be selected agreeably with the Federal statutes bearing upon the Federal classified service and the powers of the President and the United States Civil Service Commission with regard thereto. If the amendment in that form is satisfactory to the Senator from Nebraska, I have little further to say.

Mr. NORRIS. It is perfectly satisfactory to me, I will say to the Senator. I think the Senator's amendment adds one sentence and helps the bill, and I am very glad to have it.

Mr. BRUCE. I was sure that it would be satisfactory to the Senator from Nebraska, and I trust that it will be equally satisfactory to all of the Members of the Senate. But I have no means of knowing whether it is or not, and I should like to supplement what I have said with just a few more observations. I feel all the more encouraged to do so now that I am aware that I have the very encouraging support of the Senator from Nebraska.

Of course, the object of this amendment is perfectly plain. It is to make sure that the employees of the proposed Federal power corporation, who, doubtless, will be very considerable in number, shall be selected agreeably not with the old patronage system of appointment or, as the President very fittingly called it two days ago in his message, the old "spoils system" of appointment, but agreeably with the statutes relating to the Federal classified service and the powers of the President and the United States Civil Service Commission in relation thereto.

I, for one, was delighted when, in addition to his other timely observations, the President declared that there was now almost universal recognition of the value of the principle that underlies the national merit system of appointment; and when he proceeded to recommend that even first, second, and third class postmasters should also be brought within the purview of that system.

I remember that a great many years ago the Rev. Henry Ward Beecher became so much interested in the merit system of appointment that he declared that he was beginning to believe that even entrance into the kingdom of heaven should be regulated by competitive examination. I am not such an extremist as that, but I do believe that nothing has ever been more effectual to promote the true spirit of our American institutions than the adoption of the national merit system of appointment. Certainly there could be no more seasonable occasion for the extension of that system than the present, when the President, in the message to which I have just referred, not only suggests that the entire Prohibition Unit should be brought within the Federal classified service but that when this is done the present members of that unit should not be covered into it. So far as I know, that is the first time in the history of the United States when there has been an extension of the Federal classified service and existing officeholders were not sheltered by its provisions.

So it seems to me that if this proposed Federal corporation shall be created, with the great number of Federal employees which we have every reason to believe that it would have, we shall require something more than the mere, bare declaration in section 6 of this substitute that those employees shall be selected without regard to partisan considerations. We shall want them actually brought under the protection of the Federal classified service so that they may have some better security for their tenure than any mere moral assurance or any mere smoothly turned profession of good intentions can ever be. That is the object of the amendment, and I trust that it will receive the support of every Senator in this body.

Mr. NORRIS. Mr. President, before the Senator from Maryland takes his seat I wish to ask him if, instead of striking out the entire section, he will not offer the amendment merely as an insertion?

Mr. BRUCE. I will do so with pleasure.

Mr. NORRIS. I suggest to the Senator that after the word "efficiency," in line 11, on page 23, he simply insert a new sentence instead of striking out the entire paragraph.

Mr. BRUCE. I accept the Senator's suggestion.

The PRESIDING OFFICER. The amendment as now proposed by the Senator from Maryland will be stated.

The READING CLERK. On page 23, line 11, after the word "efficiency," it is proposed to strike out the period and insert a semicolon and the words:

and in the selection of employees for said corporation and in the promotion of any such employees all selections shall be made in accordance with the provisions of the Federal Statutes relating to the Federal classified civil service and the powers and authority of the President and the United States Civil Service Commission with respect thereto.

Mr. BRUCE. That is entirely satisfactory to me.

The PRESIDING OFFICER. The Chair understands that the chairman of the committee favors the amendment suggested by the Senator from Maryland [Mr. BRUCE].

Mr. NORRIS. Yes. Personally I have no objection to it, and I myself am going to vote for it.

The PRESIDING OFFICER. The amendment, then, is before the Senate.

Mr. SMOOT. Let the amendment again be read as it has been finally agreed upon.

The PRESIDING OFFICER. The Senator from Utah asks that the amendment be again read. The Secretary will state the amendment.

The amendment was again read.

Mr. SMOOT. Mr. President, I wish to ask the Senator from Nebraska what the amendment means where it refers to promotions, where, it seems, under the wording of the amendment, the Civil Service Commission is called upon to pass upon every promotion that shall be made. If that shall be the case, it will be necessary to have three or have four or five times the number of Civil Service Commission employees we now have.

Mr. NORRIS. Promotions will be in accordance with existing laws and statutes.

Mr. SMOOT. But the Civil Service Commission has nothing to do with promotions.

Mr. NORRIS. I do not have the amendment before me, but under it promotions are to be in accordance with the Federal statutes.

Mr. SMOOT. I am going to ask the Senator from Maryland what he had in mind in presenting the amendment?

Mr. BRUCE. As I have said, the purpose is merely to provide that political consideration shall not be given weight—

Mr. SMOOT. To that we all agree.

Mr. BRUCE. In the selection of employees of the proposed Federal power corporation. I leave the existing provisions of

section 6 of the substitute as respects officials unaltered, because properly, of course, the higher officials of the proposed corporation ought not to be subjected to competitive examinations. So my amendment is directed solely at the selection of employees, and merely provides that in their selection and promotion the provisions of all statutes relating to the Federal classified service and to the powers of the President and the United States Civil Service Commission with respect thereto shall apply.

Mr. SMOOT. I have not read the amendment carefully, but I take it for granted that the Senator intends that the statutes governing the classified service as affecting the employees of our Government shall apply to all promotions.

Mr. BRUCE. That is right, and to appointments and selections.

Mr. SMOOT. Of course, there is no necessity of having that in the bill, because those statutes apply in any event, and it is impossible to get around them.

Mr. BRUCE. I do not think they would apply in this instance.

Mr. SMOOT. Why not?

Mr. BRUCE. Because the corporation will not be a part of any existing departmental organization of the Government; it will be a new governmental agency, for the substitute proposes to create a new field of administration altogether, just as in the case of the creation of the Prohibition Unit.

Mr. NORRIS. Mr. President, may I interrupt the Senator there?

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Nebraska?

Mr. BRUCE. I do.

Mr. NORRIS. I take it that the suggestion of the Senator from Utah is to the effect that the law does not provide for the Civil Service Commission controlling promotions.

Mr. SMOOT. Yes; it does not control promotions.

Mr. NORRIS. Of course, if the law does not so provide, that portion of the Senator's amendment would not mean anything; and if the law does not so provide I suggest to the Senator that he strike out that portion of his proposed amendment.

Mr. STERLING rose.

Mr. BRUCE. I speak with hesitation in the presence of the Senator from South Dakota [Mr. STERLING], who is very familiar with the subject. My recollection is that the rules and regulations relating to the classified service do in some respects relate to promotions.

Mr. SMOOT. The rules of the classified service have to do with promotions, but the Civil Service Commission has nothing to do with them.

Mr. BRUCE. My amendment is not limited to the Civil Service Commission. It provides that selections and appointments are to be made agreeably with the provisions of the statutes relating to the United States Civil Service Commission and the classified service.

Mr. SMOOT. I should like to read the proposed amendment of the Senator from Maryland.

Mr. BRUCE. I am glad to give the Senator a copy.

Mr. STERLING. Mr. President—

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from South Dakota?

Mr. BRUCE. I do.

Mr. STERLING. I simply wish to say that, in my opinion, the proposed amendment does not change the law or attempt to change the law in regard to promotions or confer any power on the Civil Service Commission that it does not already possess in regard to promotions. It will be noted that the amendment proposed by the Senator from Maryland refers to the Federal statutes, and to provisions in regard to the classified civil service. The statutes themselves have something to say in regard to promotions.

Mr. BRUCE. That is the point I was endeavoring to make.

Mr. STERLING. That is the meaning of this amendment. The fact that the word "promotion" and the words "Civil Service Commission" are used in the same sentence does not confer any new power upon the Civil Service Commission. The situation is as stated, I think, by the Senator from Nebraska in that respect. The amendment reads:

And in the selection of employees for said corporation, and in the promotion to any such employees, all selections shall be made in accordance—

With what?—

with the provisions of the Federal statutes relating to the Federal classified civil service and the powers and authority of the President and the United States Civil Service Commission with respect thereto.

How do they get any power at all except under statutes already existing?

Mr. SMOOT. Mr. President, since I have read the amendment carefully I think that the construction which has just been placed upon the wording of the amendment by the Senator from South Dakota is correct. When it was first read from the desk, however, I thought that it only applied to promotions, and provided that the United States Civil Service Commission should have power over such promotions. I know if such a thing were attempted that it would be absolutely impossible of administration, and I did not want any mistake to be put into the law that would bring about such a result.

Mr. BRUCE. Mr. President, I am very much obliged to the Senator from South Dakota, especially for the service that he has rendered me in accomplishing the very difficult task of disabusing the mind of my friend from Utah of an impression when once formed.

Mr. SMOOT. It is the wording of the provision that convinced me and not any statement that has been made, Mr. President.

Mr. BRUCE. It is very natural under the circumstances, I assure the Senator, that he should have formed the misapprehension that he did.

Mr. SIMMONS. Mr. President, I desire to ask the Senator from Maryland a question.

Mr. BRUCE. Certainly.

Mr. SIMMONS. I do not understand the Senator from Maryland to mean that these appointments would be made by the Civil Service Commission.

Mr. BRUCE. Oh, no.

Mr. SIMMONS. They would be made by agencies set up by the corporation itself?

Mr. BRUCE. Certainly. The United States Civil Service Commission would simply hold competitive examinations and report eligible lists to the corporation, and the corporation would make the appointments.

Mr. SIMMONS. Then the Senator does mean that these employees would be selected after a civil-service examination held by the Civil Service Commission?

Mr. BRUCE. So far only as one is required by the Federal statutes at the present time. Laborers, of course, would be selected as other Federal laborers are selected.

Mr. SMOOT. But they would have to pass the examination?

Mr. BRUCE. Yes; if required by the civil service laws.

Mr. SIMMONS. And that examination is before the Civil Service Commission, and they certify to this corporation an eligible list?

Mr. BRUCE. Yes; so far as the nature of the employment calls for examination and certification.

Mr. SIMMONS. Just as pertains to one of the departments of the Government now?

Mr. BRUCE. I say, so far as the nature of the employment is such as legally to call for examination and certification, and not otherwise.

Mr. SIMMONS. Now, Mr. President, another question. Does the Senator from Maryland really believe that he can successfully apply the civil-service system, as now inaugurated and practiced, to an industrial corporation?

Mr. BRUCE. Indeed I do. I do not see that there is any difference between the situation created by this substitute and any ordinary situation in which the Federal Government has to command the services of clerks, or messengers, or what not.

Mr. SIMMONS. Practically the Civil Service Commission would select the three from whom the managers of this industrial corporation would make the appointments from the highest down to the lowest employee in that industrial concern. Does the Senator know of a single great industrial corporation in this country that has a civil-service system of its own of that character, that takes out of the hands of the managers of this industrial corporation—it is not a Government function; it is a business institution, an industrial corporation—that takes out of the hands of the managers of that corporation the selection at will of its employees, from the highest to the lowest, its experts, its chemists, all the various grades of employees that work in that great institution, and forces them to make a selection from a list of three certified to them by the Civil Service Commission, based upon a test that they themselves do not as business men apply, but that the Civil Service Commission applies?

Mr. STERLING. Mr. President—

Mr. BRUCE. Just one moment. I will yield to the Senator in a moment. Just let me answer first.

Mr. STERLING. Certainly.

Mr. BRUCE. I am pretty familiar with this subject, I think. So far as private industrial concerns go, I can truly say that I do not know of any private industrial concern in the United States worthy of the name that has not of its own volition and as a matter of wise policy adopted a merit system of appointment of its own, absolutely free in every respect from partisan or sectarian influences, as the Federal classified civil service is intended to be.

Mr. SIMMONS. That is another question.

Mr. CARAWAY. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Arkansas?

Mr. BRUCE. I will yield in just one minute.

Mr. CARAWAY. Very well.

Mr. BRUCE. Private industrial concerns are not exposed to the temptations, the perversions, the pressure that belong to party politics; but we all know that every governmental agency is, whether it is a departmental agency created directly under the provisions of the Federal Constitution or merely such a special agency as the proposed Federal Power Corporation contemplated by this committee substitute.

Of course, the employees of the corporation—I am not speaking of the officials; my amendment does not include them—would be of precisely the same general nature as the ordinary employees of the Government when it is exercising its ordinary departmental or administrative functions.

Some of them will be chemists, just as the Senator from North Carolina suggests. Some of them will be clerks. Some of them will fill other subordinate positions of one kind or another; but I venture to say that there will not be one of them, no matter how highly exacting his duties may be, that will not fall directly within the spirit, even if in some cases not within the letter, of the Federal statutes relating to the Federal classified service.

Does not the Senator from North Carolina know—I am sure he does—that many applicants seeking positions of the most highly specialized or technical character are subjected to competitive examination at the hands of the United States Civil Service Commission? Why, surely the Senator receives periodically, as I do, printed circulars from the United States Civil Service Commission calling attention to vacancies that are to be filled by competitive examination. Those lists include positions that can be filled only by scientific experts, or highly trained technicians of one sort or another. Therefore I respectfully submit to the Senate that there is no real validity in the objections which the Senator from North Carolina is making to this amendment.

Mr. SIMMONS. Mr. President, I have no disposition to engage in any controversy with the Senator from Maryland. I did not rise with a view of trying to defeat his amendment; but it does seem to me that what the Senator has said has not removed the impression that to apply the civil service rules of this Government to this purely business institution—for that is what it is, although all its stock is owned by the Government—would necessarily result in very great embarrassment to the officials who have to administer the powers of that great corporation.

The Senator says he does not know of any private enterprise that applies the rigid practices of the Federal civil-service system. I think if you treat this as a private enterprise, you will see the wisdom of that course and the necessity under which private business has been to give full freedom and discretion to its officials in the selection of employees and subordinates, and not in any way to fetter them by the action of some collateral or outside organization. Now, this business that we are about to inaugurate—especially if we should adopt the plan proposed by the Senator from Alabama, and the Government should not be able to lease the plant, and should have therefore to operate the plant itself—while it would be a corporation owned by the Government, and in a sense operated by the Government, if it is to be operated successfully will have to be operated upon exactly the same principles that a private corporation engaged in the same kind of business would have to operate. I was afraid—and that was the only object of my making the suggestion—that if the principles of the civil service were to apply, the responsible officials of that corporation, those who have the general management and direction and control of its affairs, might find themselves very much embarrassed if they were forced to make a selection from three names certified to them by an outside agency, selected by the outside agency upon the application of certain tests that they have evolved as the legitimate and proper tests of efficiency, instead of being selected by the head officials or by a board appointed by the

corporation upon the application of such tests as they think, or business men like themselves would think, were the proper and legitimate and necessary tests in order to establish the qualifications and fitness of a particular employee.

The Senator does not understand me as antagonistic to his measure?

Mr. BRUCE. Oh, no.

Mr. SIMMONS. I am simply calling to his attention the fact that if we should impose this restriction upon the head of this corporation in the management of this business it might be very handicapping and might result in a great deal of embarrassment.

Mr. BRUCE. Now, as it seems to me, to establish—if I may say so without disrespect—the futility of the suggestions made by the Senator from North Carolina, it is only necessary to read the first lines of section 5 of the committee substitute:

That the business of said corporation shall be transacted by a board of directors (hereinafter called the board) consisting of three persons, to be appointed—

By whom, pray?—

to be appointed by the President of the United States, by and with the advice and consent of the Senate.

By what possible process of transmutation can the Senator from North Carolina convert such a corporation as that into a mere private industrial concern? It is perfectly obvious that this corporation is to be clothed with insignia of public authority and public responsibility.

Now, suppose, if you please, that this substitute, instead of providing for a Federal power corporation, had chosen to impose directly upon the Secretary of War, in the exercise of his departmental authority, the duty of carrying on this great work. Would it not be necessary for him to employ chemists? Would it not be necessary for him to employ skilled technical experts? Would it not be necessary for him to employ still other agents of a highly specialized character? Yet would not every one, or practically every one, of these agents have to be selected subject to the powers of the United States Civil Service Commission?

The alternatives presented are either to have this great work carried on by a Federal power corporation incorporated for the purpose or to have it done by the Secretary of War in the direct exercise of his departmental responsibility; and there is no more reason why the merit system of employment should not apply to the selection of employees required by the Federal power corporation than to the selection of employees by the immediate action of the Secretary of War himself; and subtle as may be the reasoning of the Senator, I feel sure that he would never be able to convert the Secretary of War of the United States, at least, into a private industrial concern.

Mr. SIMMONS. Mr. President, if the Senator will pardon me, if I have been subtle in any particular in the views I have presented, I have not intended to be, and I am not conscious of having been; but I want to ask the Senator this question: He has offered this amendment, as I understand, to the so-called Norris bill?

Mr. BRUCE. To the committee substitute, which I understand was drafted by the Senator from Nebraska.

Mr. SIMMONS. That is, looking to Government operation and control?

Mr. BRUCE. Yes.

Mr. SIMMONS. If the committee amendment is agreed to and the Underwood proposition is offered as a substitute for it, is it the purpose of the Senator from Maryland to offer this same amendment to the substitute proposed by the Senator from Alabama?

Mr. BRUCE. I never believe in jumping over a fence, to begin with, until you have arrived at it, and it will be time enough to take up the Underwood substitute, it seems to me, when that substitute comes before the Senate for consideration. If the scheme of forming a corporate organization proposed by the Underwood substitute is in all essential particulars the same as the scheme of organization proposed by this committee substitute, I most assuredly will submit the same amendment to the Underwood substitute.

Mr. SIMMONS. If the Government should lease this plant, would the Senator apply the merit system?

Mr. BRUCE. No; because the solicitations of political temptation and the pressure of political influence would not then operate; for no intelligent, well-conducted private business enterprise in the United States would think of asking whether its employees were Democrats or Republicans. That much I can answer without a moment's hesitation.

Mr. SIMMONS. Of course, I agree entirely with the Senator that the appointments should not be political, and respecting that part of the amendment I think no one could raise any objection or make any criticism. The only disagreement I have is with reference to the application of the civil service system to the operations of this corporation engaged in the manufacture and production of nitrogen.

Mr. BRUCE. It is a public administrative corporation.

Mr. SIMMONS. I think, although it is a public corporation, it is engaged in a purely business and industrial enterprise, a competitive enterprise.

Mr. BRUCE. So is the Government in a sense, when it delivers letters.

Mr. SIMMONS. I think the very same principle that would apply to a business conducted by a private corporation in the selection of its officials would apply with equal force to a corporation of this sort conducted by the Government.

Mr. BRUCE. Not at all. The board of directors is to be composed of appointees of the President.

Mr. SIMMONS. If the Government inaugurates this business and appoints a board of directors to manage it, it wants that business to succeed. It is the same business in which private individuals in this country are engaged, and it will be conducted by the Government in competition with private institutions. The prices of its products will be regulated, in part, by the prices charged by private industries engaged in the same line of endeavor, and I think any interference from the outside in the selection of employees, laborers, and officials, would be just as harmful and just as embarrassing and just as great an interference with the successful and efficient conduct of that business, although the Government owns it, as would like interference with a private enterprise engaged in the same or any other line of business.

Mr. BRUCE. How would the plan of the Senator work practically? We should endeavor satisfactorily to answer that question; not simply spin theories about the matter. Here is a Federal power corporation formed, the President appoints certain persons as the directors of that corporation, and the selection of employees is not subject at all to the provisions of the Federal statutes relating to the classified civil service. All of us know, whether we are Democrats or Republicans, that that corporation would hardly be under way before every one of us would be subjected to an insistent pressure for place. Friends of the Senator from North Carolina, in whose State, I am sorry to say, the merit system of appointment does not seem to flourish as it might—

Mr. SIMMONS. The Senator has no right to say that I am opposed to the merit system. I have said nothing which indicates that at all. But I want to ask the Senator this question—

Mr. BRUCE. One of the saddest things in the world to me, as a native of the South, which I dearly love, is the fact that because perhaps of conditions which it is very hard to surmount, this splendid system, the merit system of appointment, has never obtained the foothold there which I trust some day to see it obtain.

But I have stated what would happen if that corporation should be organized. In three days after it was incorporated I would have in my office over in the Senate Office Building, and the Senator would have in his office, applicants for places under it, and then there would be the same solicitations, the same greedy clamor, the same jostling and pushing, the same gross exhibitions of human selfishness which were invariably found in association with all the operations of this Government when there was no impersonal and efficient system like the civil-service reform system by which employees of the Government could be selected without regard to partisan or sectarian considerations.

Mr. SIMMONS. Mr. President, if the Senator will pardon me for saying it, he is setting up a man of straw and knocking it down. I have heard nobody intimate in this discussion any objection to the Federal merit system. Personally, I have none to it myself. I do not question that it has worked very satisfactorily where it was properly administered. I think sometimes it is not quite properly administered.

Mr. BRUCE. Of course, every system has its limitations and defects.

Mr. SIMMONS. Where it is properly administered I am satisfied it has worked very successfully, and I do not know of anybody who is asking that it be abolished or repealed. But that is not the question I was raising at all. I was simply propounding an inquiry to the Senator, and he converts my inquiry into opposition to the civil-service system. I was simply questioning whether the system could be applied to a corporation, although organized and operated by the Gov-

ernment but engaged in industry in competition with private industries of like character. I was asking him whether he thought it could efficiently function under the handicap of having its employees selected by an outside agency, applying a test which probably no man engaged in that particular business in a private way would apply. Now, I ask the Senator a question, and it will test the matter, I think. Does he think that if the Government should be able to find a lessee for this property, any private interest in the country would lease the property if it was to be leased with the understanding that its employees should be selected through a civil-service examination?

Mr. BRUCE. The Senator's question, of course, is entirely beside the mark, because I have already stated that if the property were leased there would be no necessity for any amendment like mine.

But let me ask the Senator a question. It is one of the peculiarities of the Yankee—by which I mean Americans generally—that when he is asked one question, he replies by asking another. The Senator has asked me a question, and I am going to ask him one that is just the converse of the one that he has put to me. Suppose the Government decided not to carry on this great work through the instrumentality of any corporate agency at all, but to carry it on itself directly.

Would it be proper then, I ask the Senator from North Carolina, that all the employees engaged in such a vast enterprise should be employed wholly without regard to the United States civil-service system? That, I submit, is the true test of the scope of the Senator's convictions upon this subject.

Mr. SIMMONS. Mr. President, I will state to the Senator very frankly that I do not think the civil service should be extended to anything except a purely Government function. When the Government goes outside of its political functions and engages in private business, then it subjects itself to the rules that obtain and apply to private business. That is a matter of law. When a State in this Union undertakes to engage in any private venture, such as running a railroad or conducting a factory, it divests itself, for that purpose, of its sovereignty. It loses some of its privileges and some of the exemptions to which it is entitled, and to which the private citizen is not entitled, and for the purpose of that enterprise it becomes practically a private citizen.

That is what the Government is proposing to do here. The United States Government is not going into this business directly. It is expressly provided in the Underwood substitute and I think in all these measures that the Government shall not in any way be responsible for the indebtedness of this concern. The Government simply has certain property which it proposes to put into the hands not solely of the Secretary of War. The Secretary of War is not to operate this corporation by virtue of his functions and his duties as Secretary of War. He is merely to be one of the board of directors. He is to be the chairman of that board. He will be the head man in the operation of the affairs of the corporation. But as a member of that directorate or as the head of that corporation he is not acting as an official of the United States. It is an extra duty that has been imposed upon him by law.

The Government is deeply interested in the corporation. We may say in one sense it is a Government corporation. It is operating Government property. It is trying to make money out of Government property. It is trying to make that property useful to the citizens of the country and useful in supplying a necessary demand of the Government. Nevertheless it is engaged in a business outside of its governmental functions. I think that in order to succeed it must have the same degree of freedom in the selection of the agencies which it employs in order to conduct its business that the head of a great private enterprise of like character would have to have.

The question between the Senator and myself is a very simple one. The Senator seems to have some feeling about it—

Mr. BRUCE. Not the least.

Mr. SIMMONS. I have none in the world. I am merely suggesting a difficulty, and I think it is a very serious difficulty. However, it seems to me so patent, so obvious, that it ought not to require any argumentation, and so I am satisfied to leave it with that statement.

Mr. BRUCE. I am so familiar with the workings of the old system that perhaps I am somewhat morbidly vigilant when suggestions of that kind emanate from a member of the Senate. I say that the function in this case is exactly the same whether it is clothed with the ordinary corporate form or whether it is clothed with a purely governmental form. The work to be done is the same in either instance. The function to be performed is the same in either instance.

It seems to me that it is idle, not to use too strong a term, for the Senator from North Carolina to speak of the Government divesting itself of its sovereignty simply because it chooses to work out results through the agency of a corporation of this kind. The substitute on its very face says that the affairs of the corporation, if created, are to be conducted by a board, and that the members of that board are to be appointed by the President. How could there be a plainer indication of the intent on the part of the Government to retain a public, a political, an administrative, whatever you choose to call it, control over the transactions of the corporation?

Mr. FESS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Ohio?

Mr. BRUCE. Certainly.

Mr. FESS. Assuming that it will be a public corporation run by the Government, the difficulty about the civil service in actual work, as I see it—and I have always stood for it because I think it is better than the old plan—is that we protect the inefficient about the same as we protect the efficient. Our purpose is, of course, to relieve our men and women employees from the embarrassment of constant interruption by political influence. That result I join with the Senator in trying to produce. But does not the Senator think we ought to find some cure for this constantly growing tendency in our civil service in which our employees, protected by the civil-service regulations, become possessed of the thought that they own the office, that they can do such work as they please, that they can come and go as circumstances permit, and in that degree we are not doing what we ought to do for the civil service in our efforts to protect them as I have suggested? Is there not some way to cure that? I think the Senator recognizes the condition here in Washington.

Mr. BRUCE. I have listened with great pleasure to what the Senator from Ohio has said, but I really do not think that the grievance of which he speaks is quite so considerable as he seems to believe. I have not been here long, but to me the thing in my contact with incumbents of subordinate Federal offices which proves distasteful is the lack of a manly independence of bearing that I sometimes observe.

I mean the disposition to pay a Member of the Senate just a little larger measure of deference and consideration than ought to be agreeable to him. I recall an incident which arose shortly after I landed in Washington. I entered one of the elevators to go to my office. There was a lady in the elevator who desired to get off on the second floor. My office was on the third floor. She gave seasonable notice of her desire to leave us at the second floor, but, to my amazement, the operator of the elevator continued his ascent to the third floor, notwithstanding a reminder from me that the lady wished to get off on the floor below. No! Members of the United States Senate were not to be arrested in their course from one floor to another.

That is a trifling incident, but it is illustrative of the point I make. It was the offspring of one of the infirmities of the old spoils system that has not yet been entirely worked off. The full tone of manly independence is not even yet to be found in the public service of the Government that, I am sure, as time goes on will be found.

Of course, my remarks are applicable only to a small percentage of the Federal officeholders at Washington. It will be a long day still, if my experience is worth anything, before any such subordinate officeholder will assume a supercilious or indifferent attitude toward anybody in Washington who is clothed with a considerable degree of political authority. I admit that there are shortcomings to be found in the merit system of appointment, but what is that but what we might say of the workings of any human system? I do say, however, that if there ever was a system in the political history of the world that has demonstrated its invaluable worth, it is this merit system of appointment.

The Senator from Massachusetts [Mr. BUTLER] knows that in New England it is considered almost a discreditable thing for a very rich man to die without leaving a legacy to Harvard University. So it has become almost a censurable thing for any man to fill the exalted office of President of the United States and to surrender it without having given another additional impulse of extension to the national merit system of appointment. Everyone of our recent Presidents, whether a Democrat or a Republican, has broadened the range of this wise and beneficent system.

And now we have the present President of the United States, for whom, despite the fact that I differ from him in many respects in point of political convictions, I entertain a strong feeling of liking and respect, sending a message to this body not only extolling the operations of the merit system in all its

general aspects, but practically expressing the hope that before his eyes close on his presidential deathbed it will be so enlarged as to embrace first, second, and third class postmasters. It now includes practically the whole great mass of the subordinate positions under the Government, and we should be quick to see that whenever a bill like the pending one comes along there shall be proper language in it applying the merit system to any employees to be selected under it.

I was delighted so promptly to have the support of the Senator from Nebraska [Mr. NORRIS] when I offered my amendment, because I can truly say, though flattery does not come very readily to my lips, that since I have been a Member of this body there has not been a man in it whose bearing in all his public relations has been marked in a higher degree by transparent candor and perfect honesty of motive and purpose than that of the Senator from Nebraska.

Mr. President, I have said far more about this matter, perhaps, than I should have said, but Senators will all, I am sure, do me the justice to recognize that I have been drawn unexpectedly into the wide range of observations into which I have wandered. In conclusion, I will only again express the hope that whatever may be the fate of the substitute when it comes to a final vote my amendment at least will receive the universal approval of this body.

I believe that the Senator from South Dakota [Mr. STERLING] desired to interrupt me? Is it too late?

Mr. STERLING. I rather desired to interrupt the Senator from North Carolina [Mr. SIMMONS], but I see he is not on the floor at the present moment.

Mr. WADSWORTH. Mr. President, I shall not detain the Senate long, as I know most of the Senators present want to get away pretty soon. I have been very much interested in the colloquy which took place between the Senator from Maryland [Mr. BRUCE] and the Senator from North Carolina [Mr. SIMMONS]. To my mind that colloquy exposed, perhaps unwittingly, the whole vice of Government operation. Whenever we approach a discussion of any measure proposing to put the United States Government into a commercial business undertaking we are immediately confronted with two alternatives. Shall we allow the men who are to be put in charge of that undertaking entire freedom in the exercise of their abilities to the limit to make a success of the undertaking in the way they see fit to make their efforts, or shall we restrict them by statute and bind them down by limitations in order to prevent the injection of politics into the effort itself? Just so long as we have before us here in the Senate any measure proposing to put the Federal Government into a business which is commercial in character we will all be confronted with that dilemma. I do not know which is the worse alternative; they are both bad. If there are to be no restrictions with respect to the appointment of subordinates and their promotion, if you please, as the Senator from Maryland says, nine-tenths of the Members of this body will be importuned by constituents to get them jobs under that Government corporation. We all know it; and yet if we are to impose restrictions and subject the whole thing to civil-service rules, the management of the corporation will have lost that most valuable privilege which should inure to every man who is to be held responsible for the success of a business undertaking—he will have lost the right to hire and fire.

Mr. NORRIS. Mr. President, may I interrupt the Senator from New York?

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from Nebraska?

Mr. WADSWORTH. I yield.

Mr. NORRIS. I should like to ask the Senator, in order to have his judgment on the matter, whether the section to which this amendment is offered, if unamended or, at least, if unamended by the proposed amendment, would, in his judgment, leave the board absolutely free from any influence in conducting this business? Are any of the limitations in section 6 such that they ought not to be there? I want to say to the Senator that it was the object of the committee in inserting those provisions to take the operations of the proposed corporation entirely out from the influence and control of partisan politics.

Mr. WADSWORTH. Yes; and, of course, that is a very high ideal, but it will never be achieved.

Mr. NORRIS. I should like to have the Senator suggest some amendment—

Mr. WADSWORTH. If I may make this observation in supplementing the remark I just made, the words "government" and "politics" are almost synonymous. Whatever the Government does is actuated, and must be actuated, in whole or in part by political considerations. Government is politics.

Mr. NORRIS. I do not agree with the Senator. It depends upon what the Government is doing. Because this has not been done is not, in my opinion, a reason why it can not be done. I have never seen it undertaken since I have been in Congress but what, to my amazement and my sincere regret, any reform of this kind has always been opposed by the so-called leaders of both of the great political parties. Twenty years ago when the civil-service idea was practically new the appropriation of public funds to carry it on was once defeated in the House of Representatives for reasons which the Senator gives. I should like to get the Senator's candid opinion. Is it the Senator's judgment that this corporation, a part of whose duties are outlined in section 6 of the substitute bill, can not be made to operate without being controlled by politics?

Mr. WADSWORTH. I think it can not be, because it is part of a government.

Mr. NORRIS. That is a very frank statement. Therefore, because the Senator thinks that way, he is opposed to any provision trying to do it?

Mr. WADSWORTH. Not at all.

Mr. NORRIS. Would the Senator from New York entirely eliminate section 6?

Mr. WADSWORTH. No; not at all. It is an effort in the right direction, but I have no hope for its ultimate comprehensive success.

Mr. NORRIS. Let me ask the Senator another question. Suppose he were appointed a member of this board and the statute provided, as this bill proposes, that it should be the duty of the board to conduct its business without regard to politics; that it should give no attention to recommendations for political preferment in any case; would the Senator obey that law?

Mr. WADSWORTH. The Senator from New York would do his best to do so, but he doubts his powers of resistance, because he knows perfectly well that 90 per cent of his present colleagues in the Senate would be in his office within a week asking him to appoint somebody to a position under it.

Mr. NORRIS. That may be true, but would the Senator still lack courage and nerve to say to them, "You are asking me to do something illegal?" And what does the Senator from New York suppose would be their reply?

Mr. WADSWORTH. The Senator from Nebraska is putting me on trial as an individual, and I will say that I do not know.

Mr. NORRIS. I should like to put the Senator from New York on trial in that kind of a position, for I have confidence and faith in the Senator's ability, integrity, and honesty. If he were running such an institution and I appealed to him and said, "I want John Doe to be appointed as a surveyor down here;" and the Senator should ask, "What has John Doe been doing?" and I replied, "He has been working in a livery stable," and the Senator should then inquire, "Did he ever see a surveyor's instruments?" and I should answer, "No, but he has been a good Republican all his life; he has shouted for the straight ticket ever since he has been out of his cradle; he has always voted right; he is a Republican and I have got to have him appointed," would the Senator agree to that? Would the Senator comply with my request? Notwithstanding our long and friendly relations here, would not the Senator say to me, "Why, look at the law; the law says that to do what you ask would be illegal; it would make me a criminal if I should do it. Under the statute which Congress enacted I would be subject to removal from office; I would be subject to go to the penitentiary if I should do what you ask?" Would not the Senator then, if I still persisted, turn around and kick me out of his office?

Mr. WADSWORTH. Now, Mr. President—

Mr. NORRIS. I have no doubt as to what the Senator would do.

Mr. WADSWORTH. If the Senator has no doubt as to what I would do, he should not have asked me the question.

Mr. NORRIS. I should like to have the Senator's view about the matter.

Mr. GLASS. Mr. President—

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from Virginia?

Mr. WADSWORTH. I do.

Mr. GLASS. I merely wish to observe that the Senator from New York might say that to me, but I do not think he would say it to the Senator from Nebraska. [Laughter.]

Mr. WADSWORTH. In any event, Mr. President, anything that this unfortunate person did under those circumstances would be subject to suspicion. In this body and in the Congress generally there are constant rumors of political influence being used; for example, in the management of the

Emergency Fleet Corporation. Every Senator knows that. I think the officers of that corporation resist those influences to the limit of their ability, but I know from personal observation they are under constant pressure. Now, the appointments under that corporation are not subject to civil service, and I know that when that corporation—

Mr. NORRIS. Why would it not help it if they were? Would it not be a good thing?

Mr. WADSWORTH. I do not know.

Mr. NORRIS. Would it not be a good thing if this great corporation could point to a statute containing the words that are in section 6 and say, "Here, Mr. Senator, you ask me to do something, although the law makes me a criminal if I comply with your request." Does not the Senator suppose that would remedy conditions?

Mr. WADSWORTH. The Senator has asked me a question to the effect, Do I not think it would be better if the employees of the Emergency Fleet Corporation were under civil service? I am not so sure that it would be better. The administrative officers of that corporation would then lose all choice in the matter of employing their own subordinates. That is a business undertaking. It is not an ordinary Government function. I am not opposing the provision.

Mr. NORRIS. If the amendment suggested by the Senator from Maryland, which appeals to me as being a good thing, does not reach what we aim to reach, if it detracts rather than adds to section 6, I would rather not have it; that is true. We are trying in section 6—and the committee worked diligently and very faithfully for a long time on this feature of the bill—to suggest a law that will take this business out of politics. That is the object; we want to get it clear out of politics; we want to keep it out; and we welcome any suggestion that will help take it out. I do not want, however, to cripple the organization.

I can see some force in what the Senator has suggested in regard to the Fleet Corporation. I am not contradicting him. I myself think it would be better if that corporation were under civil service; but I realize I may be wrong and the Senator may be right. It would, however, free them from some of their unpleasant duties. But this provision we have put in the bill with the thought that it would remove politics from the operation of the proposed corporation. The only objection to the amendment which strikes me as having any merit is that it might result in keeping inefficient men in office after they got in.

Mr. WADSWORTH. It certainly would.

Mr. NORRIS. I do not want to do that; but my understanding of the civil service law is that if it were enforced properly it would not have that effect, and I do not want it to have that effect.

Mr. WADSWORTH. I should like to resume, if I may, the trend of my alleged thought. I did not rise to attack section 6 or to attack the amendment offered by the Senator from Maryland. I opened my remarks by the observation that the colloquy between the Senator from Maryland and the Senator from North Carolina—and I might enlarge that and say the presence of section 6 itself in this bill—should go far toward exposing the vice of the Government attempting to run a business undertaking. If there were not a vice inherent in it, we would not see section 6 proposed; we would not hear of the amendment offered by the Senator from Maryland. The fact is we are frightened to death that politics will get into anything that the Government undertakes. So we attempt to fortify the agency we are about to set up against the injection of politics; and how do we fortify it? By robbing the men to be in charge of the organization, to be in charge of this business agency, of all discretion in the matter of selecting their own subordinates. So I say that we have two alternatives, each of them bad, and the Government operation of a business undertaking starts in, no matter which alternative we choose, severely handicapped; and it will always be so.

Mr. NORRIS. May I interrupt the Senator further?

Mr. WADSWORTH. I yield.

Mr. NORRIS. I do not believe the Senator is quite warranted in saying—and perhaps he did not say it, but I inferred that that is what he meant—that any private business not connected with the Government in any way is free from the vice that all the governmental organizations are subjected to on account of politics getting in. I think the Senator from Maryland has well said that every successful, honest business concern, as a rule, had some method similar, or somewhat similar, at least, to the civil service, depending upon the nature of its business, for the selection, promotion, and discharging of its employees.

Mr. WADSWORTH. Certainly; but the discretion rests with its officers and it is not imposed by others.

Mr. NORRIS. Exactly; but great business corporations, the great oil corporations, the great water-power corporations, even a private company such as would get control of Muscle Shoals and operate it for private purposes and for private gain without any idea of it being connected with the Government in any way, if devoid of any regulation of any kind, would be subject to the same criticism that the Senator makes against the proposed governmental corporation created under the bill.

How many United States Senators have gone out of this Chamber to become attorneys for oil companies in this city and elsewhere? How many members of the Cabinet, who never shone as attorneys anywhere in the field of litigation before any of the courts of the country, became shining lights as attorneys and were able to command huge salaries after they had a connection of some kind with the Government? In the case of nearly all great corporations such things have happened; they are occurring all the time. They have the right to discharge an employee. If a man went to one of them to repair a chair, or a woman went to their office to clean a window, they would have the supreme right of letting her in or discharging her whenever they saw fit. If, however, it came to a salary where \$100,000 were involved, and a United States Senator or a Cabinet member or some similar public personage had lost his office and was not employed, having been defeated by his own people, he could get a job there right away. Yet that is an example of the efficiency of private business that is never afflicted by any of the ills that it is charged beset corporations of governmental origin designed to perform a function of a public nature.

Mr. WADSWORTH. Mr. President, I am not quite sure whether the Senator from Nebraska was asking me a question or not.

Mr. NORRIS. I am not, either.

Mr. BRUCE. Mr. President—

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from Maryland?

Mr. WADSWORTH. I will yield for a question.

Mr. BRUCE. If the Senator will allow me, I will make it plain that I am asking one.

I do not know whether the Senator has read the Underwood substitute or not. That expressly declares that the corporation contemplated by his substitute and all of its assets—

shall be deemed and held to be instrumentalities of the United States, and as such they and the income derived therefrom shall be exempt from Federal, State, and local taxation.

Then:

The directors, officers, attorneys, experts, assistants, clerks, agents, and other employees of the corporation shall not be officers or employees of the United States within the meaning of any statutes of the United States, and the property and moneys belonging to said corporation, acquired from the United States or from others, shall not be deemed to be the property and moneys of the United States, within the meaning of any statutes of the United States.

Mr. WADSWORTH. I am aware of that.

Mr. BRUCE. Does that provision, taking the directors, officers, attorneys, experts, and so on, entirely out of the scope of the Federal classified civil service or the principle of the Federal or merit system of appointment, meet with the concurrence of the Senator from New York? Is that the system that he would like to see inaugurated in case a power corporation is established by the Government?

Mr. WADSWORTH. I can give only one answer to the Senator from Maryland, and I may be the only person in the Senate who entertains this view. I think the whole thing is hopeless in the matter of efficient management. You may install your civil service and have it apply to your work managers, to your chief chemist, your chief transportation agent, and men who go out and do business in competition with men who are working for their living in competition in turn with others. You may apply civil-service rules to those, if you please; but do not hope to pay dividends.

Mr. BRUCE. Then the Senator would prefer the system under which he says, in case he were one of the directors of this corporation, the Senator from Nebraska and myself would be hammering at his door clamoring for appointments?

Mr. WADSWORTH. No, Mr. President.

Mr. CARAWAY. He would not give them to you.

Mr. BRUCE. Well, then, the Senator from New York is a much more resolute man than I am, I am bound to say, because the most difficult form of pressure that I have had to confront in my life is just that sort of pressure.

Mr. WADSWORTH. I was practically quoting the Senator from Maryland, paraphrasing what he had already said. No; I am not in favor of the spoils system.

Mr. BRUCE. I know the Senator is not. He could not be.

Mr. WADSWORTH. Not at all.

Mr. BRUCE. The Senator could not be.

Mr. WADSWORTH. And for that reason, among others, I am utterly opposed to the Government going into commercial business.

Mr. BRUCE. I was just going to say, is not the Senator a little bit unduly influenced by that bias which he has against any governmental interference with private business, or anything that partakes of the nature of private business, which I share with him to a very great degree? That is my analysis of the conviction to which the Senator from New York is giving expression at the present time.

Mr. WADSWORTH. It is not for me to say whether my own views are extreme or not; it is for others to say. I hope, of course, they are not extreme.

Mr. BRUCE. Here is a case where you have to make the choice.

Mr. WADSWORTH. I have not been permitted to discuss this bill yet, or this general question of Muscle Shoals. I merely opened my remarks by saying that whenever we propose to put the Government into commercial business we are confronted with two desperately difficult alternatives, both of which I think are bad. We may do a little better by adopting one than by adopting the other, but there is little hope that by the adoption of either of them we shall escape the inherent difficulties in the Government operating a commercial business. I commenced to discuss this question along that line, and ever since then I have been asked whether I am a devotee of the spoils system or a devotee of rigid application up to the very limit of the civil service system. I think either the spoils system or the civil service system constitutes a terrible handicap to any business undertaking, but you have to take one or the other. That is all I have said on that question.

Mr. NORRIS. Then let me suggest, before the Senator leaves that subject, that we take the one that has the least evil in it and try to improve it, and see if we can not make it better.

Mr. WADSWORTH. All right.

Mr. NORRIS. Let us find out what is wrong about it, and, like men, meet that, whenever we find any wrong, and eliminate it.

Mr. WADSWORTH. Yes; assuming, of course, that we are committed to Government operation, I will join with the Senator from Nebraska, and the Senator from Maryland, and the Senator from Alabama in setting up every conceivable safeguard against the dangers to which all Government operations of commercial business are heir. It is going to be a long, long, uphill fight. Such a fight never has been won in the history of governments up to this hour.

Mr. President, the possibilities at Muscle Shoals are enormous. Long since I became a convert to the idea that they should be utilized for the benefit of the country at large; and I became even a more enthusiastic convert as I listened to some of the hearings before the Committee on Agriculture and Forestry last year, and read portions of the hearings as printed.

I think there will be developed down there an immensely valuable asset to the United States. We sit in committee, and we listen to testimony, and we debate upon the floor of the Senate, and we are apt to do a good deal of dreaming and prophesying, which at times is dangerous and certainly is never reliable; but the more we think about this thing the more we will be convinced that it is of the highest importance, and then in our second sober judgment, as it were, if we examine into it very, very carefully we will also be convinced that we are faced with a very complicated technical problem.

I would give a good deal if I were competent to discuss this matter before the Senate in all its technical ramifications. I will admit that in most respects that side of the discussion is over my head. Only a chemist or an engineer with the highest sort of education and the widest experience is competent to discuss the practical side of the problem which we are attempting to solve. I mean no impertinence to my colleagues in the Senate, but I have not heard it discussed in that way before the Senate. I wish it could be. None of us happen to have had experience, I suppose, equipping us for such a discussion. There are, however, one or two things which I might be permitted to refer to in connection with the bill reported by the committee and the bill offered by the Sen-

ator from Alabama which seems to me to be of sufficient simplicity to warrant my attempting to discuss them very briefly.

Let us assume that we are going to have Government operation at Muscle Shoals. That is the assumption of the so-called Norris bill. The bill introduced by the Senator from Alabama compels Government operation just so long as and until the Secretary of War can lease the facilities there. But for the moment let us assume that we are going to have Government operation of those immense installations. The bill reported by the committee divides the responsibility and the functions into two parts. The Federal Water Power Corporation provided for in the bill of the Senator from Nebraska is to take charge of the generation and distribution and sale of power generated at Dam No. 2 and later to be generated at Dam No. 3; and most of the bill, as I read it, is taken up with provisions setting forth the general policies under which the power shall be distributed and sold. Then the bill provides that the manufacture of the nitrogen or other chemical products to be used ultimately in the manufacture of fertilizers shall be done by another agency of the Government, this laboratory, which is in turn a subordinate agency of the Department of Agriculture; but I assume it is fair to say that ultimately the Secretary of Agriculture will be held responsible for the successful management of those plants and the manufacture of nitrogen through the air-fixation process.

Is it practical, from a business standpoint, to separate those two functions and have two entirely different agencies engaged in the work there and make both of them successful? I assume that we want to make this thing successful not only in the technical field of production but in the commercial field of production and distribution. We can not hope to make any money from the chemical industry there for several years to come. I think that is conceded by most of the witnesses who came before the Agricultural Committee. We have a right to hope to make money very shortly from the sale of power. So it is apparent that if we are to push the fertilizer side of it, the chemical industry side of it, with as little loss as possible, we ought to put back of that effort the whole strength and income from power development and sale. In other words, we ought to finance and sustain the chemical part by and with the power part. Otherwise, you will have the chemical part of it coming back to Congress for several years to come asking very, very substantial appropriations to make up the deficits in the chemical industry; and the income derived by power distribution and sale, bearing no relation financially to the chemical industry, will be turned into the Treasury of the United States.

There are very interesting and intricate questions of financial commercial management connected with this little problem that I have just tried to outline. There are a good many people very well informed on this subject who believe that the Government, if it is to embark on this thing as a Government operation pure and simple, would do better if it took the whole thing under one management—the sale of power and the manufacture and sale of chemicals—rather than dividing them between two agencies, with the necessary increase in overhead and the lack of that teamwork between the two which is essential.

Mr. President, there are some terribly technical sides to this matter, and I am going to read just a small portion of the testimony indicating it if I can find it.

Senators may know that I introduced a bill—and I am not going to discuss my bill this afternoon, at least—representing what was known as the Hooker-Atterbury-Wright offer. Those three gentlemen came before the committee, and I think I am not far off in saying that they probably brought to the Committee on Agriculture and Forestry more information on the intricacies of this problem than any other group that appeared before them.

Their frankness and candor and public spirit were apparent in everything they said. In fact, I think many members of the committee felt and still do feel very grateful to them for the light they threw on the problem, although the committee believed that another solution was better.

Mr. NORRIS. Mr. President, I think I ought to interrupt the Senator here by way of emphasizing something he is saying. Not all of the gentlemen the Senator has referred to, I think, gave us very much light, but Mr. Hooker did.

Mr. WADSWORTH. And Mr. A. H. Hooker, also, his brother, the chemist of the company.

Mr. NORRIS. Both of the Hookers. Of course, Mr. Atterbury is just an operative. He did not attempt to do very much there. But I do want to add to what the Senator has said in regard to these Hookers. They did give us a great deal of information and, as far as I was able to discern—and I tried

to find out—they were absolutely fair and absolutely frank in their testimony and did everything they could, I think, to help us, and they did assist us very materially. I think I ought to state that, although I am not in favor of accepting their proposition or in favor of the Senator's bill.

Mr. WADSWORTH. I am glad the Senator entertains those views. I happened to know he did, because he mentioned those sentiments to me during the last session.

Mr. FESS. Will the Senator yield?

Mr. WADSWORTH. I yield.

Mr. FESS. In case the Underwood substitute were adopted, permitting the Government to make certain contracts, would that forestall entirely the Hooker-Atterbury-Wright proposal?

Mr. WADSWORTH. I think it would not forestall anyone's right to make a proposal for a lease, but I anticipate that with the mandatory provision contained in the bill of the Senator from Alabama for the production of 40,000 tons of nitrogen annually, no one will come forward to attempt it. It would have to be done at such a big loss.

Mr. FESS. That would not be until the fourth year, as I understand it.

Mr. WADSWORTH. The fourth year. I may be mistaken. The art may change in the meantime, but as it stands to-day I doubt if any man, unless he be a veritable Croesus, will attempt to fulfill any such contract.

Mr. FESS. I have read the Senator's bill and have been somewhat impressed, but I thought that the substitute would still leave it open for consideration of that bill.

Mr. WADSWORTH. It does; yes. Then it is a question of business men talking with business men and one set of business men making up their minds about entering into such a contract.

I did not want to discuss the bill I introduced, however. I mentioned a few moments ago my belief that these two efforts should be under a single head and a single management in order to get the maximum of efficiency, the maximum of production of fertilizer, which, I think, is the primary objective in our thoughts to-day.

Mr. A. H. Hooker, the chemist of the Hooker Chemical Co., was asked a good many questions by the chairman and other members from time to time, which led to a pretty technical discussion of what he would do if he were put in charge of this place as the managing chemist, and I want to read one paragraph of the testimony, to indicate, if nothing else, how far over the head of the average Senator this whole thing is. I will admit it is away over my head.

The Senator from Nebraska [Mr. NORRIS], the chairman of the committee, said:

I want to find out whether by putting in this improved process—

Which is known as the Casale process—

that you have at Niagara Falls now operating, so you know it can be done, getting the same amount of nitrogen per year, you would save horsepower; and if so, how much?

The Senator from Nebraska wanted to know how much horsepower would be saved if this concern went down there and used their process, after, of course, developing and altering the plants through a period of time. Listen to what he said:

Mr. A. H. HOOKER. I will tell you just what I would do down there, Senator, exactly; if I went down to Muscle Shoals in connection with our people to operate the power and the nitrate plant down there, to operate it with the greatest economy and cheapest for the company and with the greatest returns from power and the cheapest fertilizer through an organization controlling both. The first thing I would do, if operating a modified Haber plant, would be to operate in connection with an electrolytic hydrogen plant, produce my hydrogen electrolytically, using such undistributed power as I had there, and using this 10,000 horsepower in connection with that plant, thus using more power than you would use in the cyanamide plant, in order to produce that hydrogen, because hydrogen, in any one of your processes, is the most essential element of fixation of nitrogen, and in making your fertilizer, or that part of your fertilizer, I would use that excess power, a large amount of power, during the time that I was building up a use and demand, changing from a low use of water power of seasonal power to a small consumption as the demand and means of distributing that power became better established so that the public at large wanted that power, and when there was that demand for the power I would change right around and go to distributing that power to the uses of the South as they should want it, and manufacture water gas and hydrogen and take coal and coke to make that fertilizer and reduce my power down to 10,000 or 12,000 horsepower instead of 100,000.

You can see that you have an awfully complicated proposition there. There are processes and modifications of processes involving the use of by-products in the chemical industry which have a most profound and controlling effect as to the amount of horsepower needed in fixing nitrogen from the air, and these gentlemen suggested to the committee many probable processes, many different schemes, which could be used to get the maximum of efficiency out of the water power and the maximum production of fertilizer at the same time. Their contention is—and I agree with them—that if you are going to get the maximum in both efforts, you had better put the two efforts under one management, so that one boss can say how much power shall be used for fertilizer manufacture, and that same boss say how much is surplus for distribution for other purposes of a manufacturing nature throughout that district. The changes and variations in the use of power necessary for the manufacture of fertilizer will be constant. They will be changed from month to month, and in my humble judgment it is essential that one management be in charge of the two efforts.

There is a lot more of this testimony which, as I said, is very technical, but by using one sort of process and making use of a certain set of chemical by-products, they can make the 40,000 tons of fertilizer ingredient by using only 12,000 horsepower. With another set of processes, and with the use of a different set of chemical by-products, and especially with the use of the cyanamide process of extracting nitrogen from the air, they will require 91,000 constant horsepower to get the 40,000 tons production per year.

In between the 12,000 horsepower requirement and the 91,000 horsepower requirement there are an infinite variety of processes and alternatives, but if the Government is going into this thing, I honestly believe we had better put the whole job under one man or under one agency. Do not separate them, because they are inextricably interwoven, and you have to put all the power side of it, all the resources of the power situation, back of the chemical side, to sustain it and push it financially in order to get all the fertilizer that can be gotten, and what we are after, I think, primarily is fertilizer.

If we go ahead and complete Dam No. 3, there will always be a very, very large amount of surplus power after the requisite amount of fertilizer is produced, for, as the Senator from Nebraska said yesterday, the tendency of the art of atmospheric fixation is in the direction of using less and less power to produce a unit of nitrogen. But there are so many ways of doing it, and they are of such a technical character that it will be pretty wise of us, I think, to put the whole effort under one management.

You will not get men to run this thing successfully for the Government—for, mind you, it is going to be one of the biggest industrial and commercial undertakings in America—with a salary limitation of \$7,500 a year. You might just as well lift off these limitations on pay, and go at this thing as you would go at any business. Hire the best man in the United States, no matter what he costs, because even if it costs you twenty-five or fifty thousand dollars more in salary for one man, with freedom of choice of that kind given to the management by the law of the Congress, he undoubtedly will save you fifty times his increase of salary in the expenses of operating the plant, or by way of gain in income, after it is put into commercial operation.

What is a \$50,000 salary when you are dealing with present assets of two hundred million, and which are bound to grow? If there is to be any success at Muscle Shoals at all, two hundred million will not measure the assets of that place 40 years from now. It will be much more than \$200,000,000. Let us stop limiting salaries in advance. None of us would do anything of the sort in our private business. No one of us, if he had a \$200,000,000 property, would advertise for a manager to run it for him and in the advertisement say, "I will not pay anybody more than \$7,500 a year." He would not get anybody.

Mr. FESS. Mr. President—

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from Ohio?

Mr. WADSWORTH. I yield.

Mr. FESS. I am in sympathy with what the Senator has said in regard to Government ownership. I shy at it whenever it is suggested. But there are two things we have to keep in mind, one of which the Senator from Nebraska mentioned the other day, namely, monopoly in the case of private ownership. We must keep that in mind as one thing.

The second I would like to have the Senator give me some light on. This is a new thing, as he has suggested, like the

radio. We had no conception of what the radio was going to be. I have just been amazed, as everybody has, at the development in the last two years of wireless and its application. Under the Senator's plan would the public be assured of the advantage of new discoveries and inventions that are bound to come in the application of this principle?

Mr. WADSWORTH. If the Senator from Ohio refers to the plan of the Senator from New York, does he mean my bill?

Mr. FESS. Yes.

Mr. WADSWORTH. I was not discussing my bill.

Mr. FESS. I mean private ownership as against public ownership.

Mr. WADSWORTH. I was not discussing that. I can not quite answer the Senator's question now. I was making this plea, that if the Senate is going to vote for Government operation it put that operation all under one management.

Mr. FESS. I agree with that.

Mr. WADSWORTH. That is all I was arguing about then.

Mr. FESS. I agree with the Senator's salary argument.

Mr. WADSWORTH. Yes; but the Senator knows how it is. Somebody will complain if we pay a high salary. It becomes a political issue and it is stormed about in campaigns. Whatever administration pays some Government officer at Muscle Shoals \$25,000 a year will be attacked in the next political campaign for having done so. It is dragged into politics inevitably.

Mr. UNDERWOOD. If the Senator will allow me, I agree with all the Senator said about the difficulties of Government operation of any business proposition whatever. So far as the substitute I have offered is concerned, it looks first to private endeavor and an opportunity to get private endeavor; but when we have to provide for national defense, if private endeavor does not function, then we have to go to Government operation.

I want to call to the Senator's attention that the substitute I have offered puts the whole proposition of a Government corporation under one head absolutely and unequivocally, and that is the President of the United States, who can select five men in the United States for a board of directors, and if he gets the men who have the nerve and courage to do it they can keep it out of politics.

Mr. WADSWORTH. The personal equation is, of course, a very important factor.

Mr. UNDERWOOD. And in the last analysis that is all there is to it.

Mr. WADSWORTH. That is true. Persons come and go.

Mr. UNDERWOOD. If the President chooses five men who go there and run that plant as a business proposition under my substitute, it can be run that way. Of course, if he picks five men who will yield to the importunities of ourselves—and I want to say we all have to make requests for friends and constituents—then it is a wreck. I am in hopes the President of the United States may be able in an emergency of this kind to pick five men who are far removed from the political equation and who would run the plant purely as a business proposition.

Mr. WADSWORTH. Of course, I dare say that strong men could keep that political influence down to a very low minimum.

Mr. NORRIS. Mr. President—

Mr. WADSWORTH. If the Senator will pardon me, I am going to finish my remarks in just a moment. There is another element in it. Men working for the Government in a commercial undertaking never have the courage of men working for themselves in a commercial undertaking—never. They fear criticism. I know perfectly well, for example, that some of the officers of the War Department wanted to sell some of the surplus property of the department back in 1920 at what they thought then would be as much as they could ever get for it and sell it at private sale. The law did not govern at all as to how it should be sold. They did not dare make the sale, because they feared criticism from the Congress and elsewhere. So, being cautious and anxious to remain in the good graces of the coordinate branches of the Government, they kept the property and eventually got for it about half of what they could have obtained had they sold in the first instance.

Now, that is the instinct in most Government officials. It is always going to be a handicap. Occasionally we get a strong, two-fisted man who does not care a rap about who criticizes him, and he goes ahead. We are fortunate when we find them in executive positions. But the tendency, especially the longer they stay in office, is for them to become more and more cautious and to lose their initiative. We can make a success of Government operation if we can eliminate some of these inherent weaknesses on the personal equation side that so often

seem to be present. I do not say that the thing is utterly hopeless, but I do say, as I said in the beginning, that we start in with a desperate handicap and we have to build up slowly, slowly, and it all depends upon who comes and who goes. We can stand here to-day and talk about it, but I do not know, neither does the Senator from Alabama know, who will be here running this thing 30 years from now.

Mr. UNDERWOOD. I quite agree with the Senator about that. I agree that if we can get private endeavor to carry on the business, it is better to have it, but if we can not get that it has to be carried on.

Mr. WADSWORTH. Yes; I admit that.

Mr. UNDERWOOD. More than that, there are instances of public operation that have been successful. Lloyd's, the British insurance company, is the greatest insurance company in the world, controlled by the British Board of Trade, which is a government function. I do not say that politics does get into it, but still it is a governmental function.

Mr. WADSWORTH. Mr. President, I have been diverted from a further and brief discussion of this technical and complicated side of the problem. I want to add another piece of testimony in regard to the difficulty of running the chemical industry separate from the power side of it. Again I take it from Mr. Hooker's testimony. To the layman, as I am, this is very interesting, although I confess that I can not quite fathom all of the steps which he suggests. He said:

Perhaps at this point it would be well for me to make a little clearer some of the reasons why I believe it is in the public interest that some one of these opposing bids should be accepted as a whole with suitable modifications, and why it is not in the public interest to divide any of them in two, joining the power part of one to the fertilizer part of another, for instance; at least, if you are serious in trying to accomplish a great fertilizer benefit to the farmers of the country over a period of years and have a real influence on our national life.

Taking "firm" power and "seasonal" power lumped together there is about 324,000 horsepower at Dam No. 2, and on the same basis about 130,000 at Dam No. 3. Let us assume, for example, one sensible way of developing this enterprise; suppose we start making fertilizer by using all of plant No. 2 to make 40,000 tons of cyanamide ammonia, and work this in conjunction with phosphoric acid obtained from the electric furnace to produce the full amount of fertilizer. This would be a natural and quick way of getting plant No. 2 into operation. The combination would require, roughly, 280,000 horsepower, or practically the entire output of Dam No. 2, leaving 50,000 horsepower for sale. Suppose, then, for the next forward step you were to combine phosphoric acid from the electric furnace with electrolytic hydrogen, so as to get the same amount of fertilizer covered by the above. This would release plant No. 2 but would still require all the power output except 50,000 horsepower from Dam No. 2.

Suppose now we pass to the next stage of progress and secure our hydrogen from water gas instead of electrolytic hydrogen. We could now develop the same amount of fertilizer and release half of this power from Dam No. 2. Later we will pass to the production of the phosphoric acid by the fuel-fired furnace, and this will release the other half of the water power from Dam No. 2. We would then have the same amount of fertilizer developed as in the beginning, but we would only be using about 30,000 horsepower instead of 280,000, and this could be released from Dam No. 2 for general purposes in the South.

Now it is interesting to see that after this process had been followed the equipment developed for use during the early years would not be wasted but would be continuously available for use during flood periods and for seasonal power for perhaps six months of the year, using power that was not otherwise salable.

I outline this progressive development to show you how intimately and inseparably the manufacturing uses of power and the power development itself are interconnected, so that they can not be used to the public advantage unless they are under common handling.

There must be no mistake made about this, if you propose to achieve a large amount of cheap fertilizer delivered to the farmer. The driving force of the power production and earning must be back of the attempt to deliver fertilizer to the farmer.

I think Mr. Hooker is right. He has often said to me, as I think he said to the committee, "If the Government goes into this thing, rejects our offer and rejects the Union Carbide offer and rejects the Alabama Power Co. offer, for heaven's sake go into it under one management."

I merely present these considerations, Mr. President, without undertaking to discuss my bill at this time.

Mr. NORRIS. Was the Senator reading from Mr. Hooker's testimony?

Mr. WADSWORTH. Yes.

Mr. NORRIS. I thought his testimony, as I remembered it, reduced the amount of power to be used further than that

would indicate. I was wondering if the Senator had the figures right. I thought he got down to 10,000 horsepower.

Mr. WADSWORTH. He did with another step in the process.

Mr. NORRIS. The figure the Senator read would indicate he would stop at 30,000 horsepower.

Mr. WADSWORTH. In another step in the process he could go down to 10,000 horsepower.

Mr. NORRIS. Of course, Mr. Hooker argues for one control, because his bid depends on it. All the bidders want it that way, because they want to use the horsepower, the profitable part. Of course, it is only natural and the Senator, of course, appreciates that. The first bill I introduced left it all in one control. I was induced by members of the committee and others to change. I reached the conclusion that they were right and that we could do it more scientifically if we divided it. However, I will explain that later.

Mr. WADSWORTH. I do not intend to discuss the matter further, much less discuss any bill that I have introduced. It is my own judgment that we will get along faster, that we will spend less money in the first few years and get more for the United States in the great number of years to come within the 50-year period, if the Government goes into partnership with men who know how to do this kind of business.

Mr. CURTIS. Mr. President, I ask unanimous consent that when the Senate concludes its business to-day it adjourn until 12 o'clock Monday.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Kansas?

Mr. UNDERWOOD. I would like to see this legislation pushed along. Does the Senator think we can expedite business in that way?

Mr. CURTIS. Three or four Senators have said to me that they want to discuss the matter, that they have not yet prepared themselves, and if they had until Monday they would be better prepared and probably would not talk so long. I have talked with Senators on both sides of the Chamber and thought perhaps we had better adjourn over to save time.

Mr. UNDERWOOD. I would like to see the legislation pushed to a conclusion as early as may be. The only difficulty about going on to-morrow is that if we should come to a vote there would be a good many absentees, and I would like to have a full attendance in the Senate when we vote. Under those circumstances I shall not resist the Senator's request.

The PRESIDENT pro tempore. The Chair hears no objection, and it is so ordered.

Mr. HOWELL. Mr. President, I would like to ask the Senator from New York a question if I may.

Mr. WADSWORTH. Certainly.

Mr. HOWELL. Do I understand that by the use of power to produce hydrogen by the electrolytic method and using that in connection with water gas, the amount of power necessary to produce, for instance, 40,000 tons of fixed nitrogen a year would be reduced to in the neighborhood of 10,000 horsepower?

Mr. WADSWORTH. I am only relying upon the testimony of the men who are doing that very thing. I do not know anything about it from my own experience.

Mr. HOWELL. The purpose of my question is this: It may be the power is a mere incident to the production of fixed nitrogen.

Mr. WADSWORTH. Some of it will always be necessary.

Mr. HOWELL. Some of it will always be necessary, but what I mean is that the power is an incident. If we get down to 10,000 horsepower to produce this amount it would be a mere incident to the operation. Therefore, does it not suggest itself to the minds of Senators that we may be giving away this great power to somebody for profit when ultimately only a very small fraction of it may be needed to produce fertilizer?

Mr. WADSWORTH. The Senator must have in mind there is to be an everlasting limit of 40,000 tons of fertilizer per annum. I think the thing will go to 400,000 tons with improvement in process and increase in power going on at the same time.

Mr. HOWELL. It limits the amount to only 40,000 tons.

Mr. WADSWORTH. We do not limit the amount; that is a minimum.

Mr. HOWELL. We make the minimum 40,000 tons.

Mr. WADSWORTH. That figure was discussed because that was the figure of the original Ford offer, and the committee in asking the witnesses questions asked them, "How much power is it going to take to produce 40,000 tons a year?" The 40,000 tons was merely used as a standard, a measure of the amount. That happens to be the capacity of the cyanamide plant at

this time, but that is not a limit; it is a minimum. I think the sky will be the limit eventually.

Mr. HOWELL. I was thinking of the proposal of the Senator from Alabama [Mr. UNDERWOOD], that it might result in this great plant being used for the distribution of power only, and merely 10,000 horsepower being utilized for the production of fertilizer. Would not the Senator and the Congress in general feel that the best use had not been made of this great power if it were turned over to some company that might ultimately only use 10,000 horsepower in the production of fertilizer?

Mr. WADSWORTH. No one has made that suggestion, either in a written offer or in testimony.

Mr. HOWELL. I am merely suggesting what might be done.

Mr. WADSWORTH. That is up to the Government.

Mr. HOWELL. If the Senator and I had a power plant and it were our purpose to make money and we found that we could make more money by merely making 40,000 tons of fixed nitrogen a year by some method that only required 10,000 horsepower, and then could go on to sell all the remainder of that great power and make a great profit in that way, our purpose being to make money, that is the way we would do it. We would not go on and make more fertilizer; we would proceed to operate that plant to our best advantage. Are we not to assume that that is the way the Muscle Shoals plant will be operated by anybody who takes it over?

Mr. WADSWORTH. Not unless the Government deliberately permits it; and I do not think anybody will assume that the Government will permit such a thing.

DEATH OF REPRESENTATIVE EDWARD CAMPBELL LITTLE

The PRESIDENT pro tempore. The Chair lays before the Senate a resolution from the House of Representatives, which will be read.

The resolution (H. Res. 359) was read, as follows:

Resolved, That the House has heard with profound sorrow of the death of Hon. EDWARD CAMPBELL LITTLE, a Representative from the State of Kansas.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

Resolved, That, as a further mark of respect, this House do now adjourn.

Mr. CURTIS. Mr. President, I offer the resolution which I send to the desk, and ask unanimous consent for its consideration.

The resolution (S. Res. 274) was read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. EDWARD CAMPBELL LITTLE, late a Representative from the State of Kansas.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

DEATH OF REPRESENTATIVE SYDNEY E. MUDD

The PRESIDENT pro tempore. The Chair lays before the Senate a resolution from the House of Representatives, which will be read.

The resolution (H. Res. 360) was read, as follows:

Resolved, That the House has heard with profound sorrow of the death of Hon. SYDNEY E. MUDD, late a Representative from the State of Maryland.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

Resolved, That, as a further mark of respect, this House do now adjourn.

Mr. BRUCE. Mr. President, I submit a resolution, and I ask unanimous consent that it may be considered at this time.

The resolution (S. Res. 275) was read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. SYDNEY E. MUDD, late a Representative from the State of Maryland.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

DEATH OF REPRESENTATIVE WILLIAM STEDMAN GREENE

The PRESIDENT pro tempore. The Chair lays before the Senate a resolution from the House of Representatives, which will be read.

The resolution (H. Res. 361) was read, as follows:

Resolved, That the House has heard with profound sorrow of the death of Hon. WILLIAM STEDMAN GREENE, a Representative from the State of Massachusetts.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect this House do now adjourn.

Mr. BUTLER. Mr. President, I offer the resolution which I send to the desk, and ask unanimous consent that it may be immediately considered.

The resolution (S. Res. 276) was read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. WILLIAM STEDMAN GREENE, late a Representative from the State of Massachusetts.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Mr. BUTLER. Mr. President, as a further mark of respect to the memory of the deceased Representatives, I move that the Senate do now adjourn.

The motion was unanimously agreed to; and (at 4 o'clock and 20 minutes p. m.) the Senate adjourned, the adjournment being, under the order previously made, to Monday, December 8, 1924, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

FRIDAY, December 5, 1924

The House met at 12 o'clock noon, and was called to order by the Speaker.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Heavenly Father and our God, as we wait in the solemnity of this moment do Thou hear our prayer. Unto Thee we look at day dawn and find our rest at evening time. Persuade us that the abiding realities of moral and spiritual being are found in a godly life. Do Thou sustain us in every effort to make a better world and to bring good cheer to mortal beings. Assure us of Thy presence, of the comfort of Thy care, and the blessing of Thy forgiveness. By calm and fortified understanding may we serve our country and help our fellow man. Consider, O Lord, and let the light of Thy wisdom fall upon the pathways of our duty. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, one of its clerks, announced that the Senate had insisted upon its amendments to the bill (H. R. 71) entitled "An act authorizing the Cowlitz Tribe of Indians, residing in the State of Washington, to submit claims to the Court of Claims," disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon and had appointed Mr. HARRELD, Mr. CURTIS, and Mr. KENDRICK as the conferees on the part of the Senate.

The message also informed the House of Representatives pursuant to the provisions of House Concurrent Resolution 30 the President pro tempore had appointed the following Senators as members of the committee on the part of the Senate to arrange for the joint meeting of Congress in commemoration of the life, character, and public service of the late President Wilson: Mr. SWANSON, chairman; Mr. FERNALD, Mr. KEYES, Mr. COUZENS, and Mr. PITTMAN.

LEAVE OF ABSENCE

By unanimous consent, Mr. ROGERS of Massachusetts (on request of Mr. FROTHINGHAM) was granted indefinite leave of absence, on account of illness.

DEPARTMENT OF INTERIOR APPROPRIATION BILL

Mr. LONGWORTH. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 10020) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1926, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. SANDERS of Indiana in the chair.

The Clerk read as follows:

For salaries and expenses of such attorneys and other employees as the Secretary of the Interior may, in his discretion, deem necessary in probate matters affecting restricted allottees or their heirs in the Five Civilized Tribes and in the several tribes of the Quapaw Agency, and for the costs and other necessary expenses incident to suits instituted or conducted by such attorneys, \$40,000: *Provided*, That no part of this appropriation shall be available for the payment of attorneys or other employees unless appointed after a competitive examination by the Civil Service Commission and from an eligible list furnished by such commission.

Mr. HOWARD of Oklahoma. Mr. Chairman, I move to strike out the last word.

Mr. Chairman and gentlemen of the committee, this Congress is right now engaged in appropriating a lot of money for the benefit of the Bureau of Indian Affairs, based principally on a report made by the officers of that bureau. After having lived amongst the Indians since 1880, it is my opinion that there is more money wasted and more sins committed in public matters in the name of the Indian than in the name of any other parties with which this Congress has to do, except, possibly, it be in the name of the farmers. I think there is a little information due the Congress from the Bureau of Indian Affairs as to some discrepancies that exist and to which I want to call attention.

I note, Mr. Chairman, that in the report of the chairman of the subcommittee to this House one day this week, in a table, compiled evidently from a report made by the Bureau of Indian Affairs—that report being on page 83 of the CONGRESSIONAL RECORD of December 3, 1924—that according to it there are now in the State of Oklahoma 117,364 Indians. Now, Mr. Chairman, I note also from volume 3, page 829, of the census of 1920, that according to the census of the United States compiled by the Census Bureau there were in the State of Oklahoma, as shown by that census, only 57,337 Indians, as compared with 117,000 reported to this Congress by the Bureau of Indian Affairs. I think this Congress, when it is making appropriations for the purpose of caring for the Indian Bureau, should have some information as to just how many Indians are being cared for. The facts are, Mr. Chairman, that the Indian Bureau, including the Muskogee office of the Five Civilized Tribes, so far as the Muskogee office is concerned, is, as a matter of fact, caring for the business of only 16,850 Indians, that being the number of restricted Indians that are on the rolls of the Five Civilized Tribes. And yet, in my opinion, for the purpose of enlarging their appropriations and for the purpose of carrying on the rolls a larger number of employees than is actually needed either in the department here in Washington or at Muskogee, they have never stricken from the rolls of the Five Civilized Tribes an Indian since those rolls were made up, and Congress by that is led to believe that this bureau is caring for the business of 117,000 Indians, when, as a matter of fact, they are caring for the business of only 16,850 Indians, the majority of whose property is in value limited and probably the amount they expend in caring for the Indians' property is three or four times what it would bring in average interest if it were drawing interest.

I want to say to the Congress that I think we are entitled to a report. I want to express the opinion here, further, that this condition as to statistics from the Bureau of Indian Affairs is presented to this Congress for the purpose of, and is responsible for, unnecessary expense to the people of the United States and the employment of unnecessary help in the Indian Bureau in Washington and in the city of Muskogee. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

The Clerk read as follows:

INDIAN LANDS

For the survey, resurvey, classification, and allotment of lands in severalty under the provisions of the act of February 8, 1887 (24 Stat. L. p. 388), entitled "An act to provide for the allotment of lands in severalty to Indians," and under any other act or acts providing for the survey or allotment of Indian lands, \$50,000, reimbursable: *Provided*, That no part of said sum shall be used for the survey, resurvey, classification, or allotment of any land in severalty on the public domain to any Indian, whether of the Navajo or other tribes, within the State of New Mexico and the State of Arizona, who was not residing upon the public domain prior to June 30, 1914.

Mr. HILL of Washington. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Washington offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HILL of Washington: On page 20, between lines 17 and 18, insert: "For payment of certain local taxes to the

counties of Stevens and Ferry, in the State of Washington, on allotted Colville Indian lands, as provided by the act of June 7, 1924, \$91,470.33."

Mr. CRAMTON. Mr. Chairman, I reserve a point of order against the amendment. I will say, in order to save time and dispose of the point of order, that I note the gentleman has cut the amount some \$25,000 or \$26,000 from what was estimated by the Budget. I would assume he is deducting the amount that has been paid as tuition for Indian children in the schools of those counties.

Mr. HILL of Washington. Will the gentleman yield?

Mr. CRAMTON. Yes. I am asking that of the gentleman.

Mr. HILL of Washington. Yes. I take from the chairman's speech on Wednesday of this week the figures included there, as given him by the Bureau of Indian Affairs, as being the amount of tuition paid to these counties, Ferry and Stevens, respectively, and I have deducted the total of those two items.

Mr. CRAMTON. Has the gentleman information as to whether the other condition precedent of the act of 1924 has also been complied with? Has it been determined that the rate of tax that would be accomplished by this payment to those counties is no higher than similar property in white ownership is now paying and has paid?

Mr. HILL of Washington. I will say to the gentleman that in the hearings before the subcommittee there were submitted unofficially made-up tax rolls to embrace the allotted lands in these two counties involved in that particular bill, employing the same rates as the official rates of tax levy for the years covered in the claims. This was made in the respective counties and based on valuations of lands in the same localities and of similar character to the allotted lands, and I want to refer the gentleman further to a statement included in the report of the inspector who made the investigation in the field and reported back the result of his investigation to the Secretary of the Interior in the following language:

The sources of evidence used by me indicated that the amounts placed upon the Indian lands are just if the assessments against the white lands are just.

I will say to the gentleman that when the committee that heard this matter, the subcommittee of the Committee on Indian Affairs, at the last session of Congress, when the bill to authorize this payment was under consideration, was holding hearings thereon these documents were submitted to the subcommittee for inspection—that is, the official tax rates were taken and the values were placed on a parity with similar lands in the localities where the allotted lands were situated.

Mr. CRAMTON. Mr. Chairman, I will make the point of order in the interest of economy of time, and the point of order is this: There is no law authorizing the expenditure that is proposed in the amendment offered by the gentleman from Washington except the act of June 7, 1924. The act of June 7, 1924, provides:

That the Secretary of the Interior be, and he is hereby, authorized and directed to make certain payments: *Provided*, That there may be deducted from said amounts by the Secretary of the Interior such sum or sums as he may find have been paid to said counties for Indian tuition; also the excess, if any, after the rate based on the value of Indian allotments may be found to be in excess of the rate on taxable lands.

The statute governing this matter does not authorize, necessarily, the appropriation of \$115,000. It contemplates a reduction of that amount by two items; first, the amount of Indian-school tuition heretofore paid in those counties and, second, deduction of any excess involved in a higher rate of taxes being applied to these Indian lands than to similar white lands. The hearings disclose the fact that the Secretary of the Interior has not since June or since this law became effective made any examination of the question as to the tax rates. As to the matter of the payment of tuition, the records are in his office, and as I understand it is covered by the deduction that the gentleman from Washington has made, and I do not raise any question as to that; but as to the tax rates, an obligation is placed on the Secretary to make that investigation. The investigation has not been made by the Secretary under the statute. The only appropriation we are authorized to make is an appropriation subject to such reduction as the Secretary of the Interior would find necessary under that provision of the act of 1924, but the amendment before us proposes a flat appropriation of some \$90,000 and disregards that provision of the statute.

Mr. WINGO. Will the gentleman yield for a question?

Mr. CRAMTON. In a moment. I want to make this one suggestion first: If the gentleman desires to include authority to the Secretary to do as the act of 1924 authorized, then I do not think it would be subject to a point of order, and I would not desire to make a point of order.

Mr. HILL of Washington. I will be very glad to have that inserted; in fact, that was my understanding of the authority already given by the act of 1924.

Mr. CRAMTON. Yes; the authority is given by the act of 1924, but not preserved in the gentleman's amendment. The gentleman's amendment disposes of that matter. If the gentleman desires to add a proviso providing that the Secretary of the Interior shall deduct from such payment such excess, if any, as shall result from the rate based on the value of the Indian allotments above the rate based on taxable land, such an amendment would not be subject to a point of order, and I have no desire to be overtechnical or prevent the gentleman having a hearing.

Mr. HILL of Washington. I will be very glad to ask for a modification of the amendment in order to embrace that.

Mr. CRAMTON. Then, Mr. Chairman, I withdraw the point of order.

The CHAIRMAN. Does the gentleman from Washington desire to modify his amendment?

Mr. HILL of Washington. Yes, Mr. Chairman, I desire to modify my amendment to embrace the proviso in the language suggested by the chairman of the committee.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to modify his amendment in the manner indicated, and without objection the amendment will be made and the clerk will report the amendment as modified.

There was no objection.

Mr. WINGO. Will the gentleman from Michigan yield for a suggestion?

Mr. CRAMTON. Certainly.

Mr. WINGO. May I direct the gentleman's attention to the fact that the reference to the act in the amendment in question says "as provided by that act"? I suggest instead of having a proviso, if after the figures "\$91,000" there is inserted "or so much thereof as may be necessary," you will have your limitation beyond any question. The gentleman's amendment does not say "as authorized by," but "as provided by."

Mr. CRAMTON. I am not sure how it would be construed if the gentleman's amendment put that in as a reference to the authorization for the appropriation. I am not sure it would be construed to carry with it the restrictions of the original provision. I am sure that this would reach the matter.

The CHAIRMAN. The Clerk will report the amendment as modified.

The Clerk read as follows:

Amendment offered by Mr. HILL of Washington: On page 20, between lines 17 and 18, insert:

"For payment of certain local taxes to the counties of Stevens and Ferry, in the State of Washington, on allotted Colville Indian lands, as provided by the act of June 7, 1924, \$91,470.33: *Provided*, That from such sum the Secretary of the Interior shall deduct an amount to equal the excess, if any, in the rate based on the value of Indian allotments as compared with the rate on taxable lands."

Mr. HILL of Washington. Mr. Chairman, I ask unanimous consent that I may proceed for 10 minutes.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to proceed for 10 minutes. Is there objection?

There was no objection.

Mr. HILL of Washington. Mr. Chairman, I want to direct my remarks to certain specific objections made by the chairman of the committee in his speech before the House on Wednesday of this week touching the particular item involved in the amendment I have offered. I want to refer first to this language in the remarks of the chairman of the subcommittee. After quoting section 2 in the act of July 1, 1892, which provides, among other things, that the Secretary of the Interior from time to time shall pay out of the special fund created by that act moneys for the maintenance of schools for such Indians and for the payment of such local taxation as may be properly applied to the land allotted to such Indians as he shall think fit, so long as such allotted land will be held in trust and exempt from taxation, and so forth.

Then the chairman proceeds with this language:

That is to say, it authorized these payments in lieu of taxes from the tribal fund if sufficient was available.

Now, I want to call the attention of the committee to the fact that the special fund referred to is not a tribal fund, and was never considered a tribal fund by the Congress. That the act of 1892 did not recognize in the Indians on the Colville Reservation any right, title, or interest in the lands restored by that act to the public domain or the land still occupied by them in that reservation. That provision will be found in section 8 of the act of July 1, 1892, and section 8 reads as follows:

That nothing herein contained shall be construed as recognizing title or ownership of said Indians to any part of the said Colville Reservation, whether that hereby restored to the public domain or that still reserved by the Government for their use and occupancy.

As a matter of fact, they did not follow the report of the commission which had negotiated the agreement with the Colville Indians. They ignored the agreement and did not comply with any of its terms, but simply restored the land of the Colville Indians in the north half to the public domain without any agreement or recognizing any right of the Indians in the lands restored or to the moneys realized from sales of the lands so restored as a tribal fund.

Now, I want to call the attention of the committee in that connection to section 2 of the act of July 1, 1892, a part of which is as follows:

That the net proceeds arising from the sale and disposition of the land to be so opened to entry and settlement shall be set apart in the Treasury of the United States for the time being, but subject to such future appropriation for public use as Congress may make, and that until so otherwise appropriated may be subject to expenditure by the Secretary of the Interior from time to time in such amount as he shall deem best in the building of schoolhouses, the maintenance of schools for such Indians, for the payment of such part of the local taxation as may be properly applied to the land allotted to such Indians as he shall think fit so long as such allotted land shall be held in trust and exempt from taxation—

And so forth.

If this was a tribal fund, then the Government of the United States would not have authority to appropriate that money to other public uses. In other words, it would have no authority to appropriate it to be used for any purpose other than for the benefit of the Indians; it would have authority only to hold it in a special fund for the benefit of the Indians and for appropriations in their interest. But authority is given to appropriate the money for public use such as Congress may thereafter determine, and hence it could not be a tribal fund.

Now, I want to refer in that connection to a statement contained in a decision by the Comptroller of the Treasury found in 21, Decisions of the Comptroller of the Treasury, page 765, as follows:

The report herein referred to is the report of this commission which negotiated the agreement with the Indians. The decision stated:

The record indicates that after holding the report about six months Congress took—

The word "took" is italicized—

by the said act of July 1, 1892, without consideration or compensation to the Indians what the previous Congress had sought to secure by cession from the Indians through agreement, ignoring both the substance and fact of the agreement, except in so far as it seemed expedient to copy in part without credit the dictation of the agreement in the statute enacted.

In 1906, June 21, 15 years after the report of the commission was submitted, Congress passed an act which complied in part with that agreement and provided for the payment of one and one-half million dollars to the Colville Indians for one and one-half million acres of land in that north half.

Not until that time was the agreement entered into with the Indians by this commission recognized by Congress, and only through that act was any money paid to the Indians as tribal money for lands situated in the north half of the Colville Reservation. This special fund was created, and it was the money of the Government of the United States, but the act of Congress provided that out of that Government money in this special fund there should be paid or might be paid, as the Secretary of the Interior saw fit, money for the building of schoolhouses and the maintenance of schools for the Indians, and for the payment of such part of local taxation on Indian allotments as might be properly applicable thereto; but it was Government money all of the time, it was not tribal funds. This special fund stood, according to the terms of the act, until Congress should dissipate the fund or find other uses for it through an act of Congress, and no act of Congress has ever

been passed dissipating or taking the money out of that special fund or discontinuing that special fund. Hence that special fund still stands as a matter of law, although as a matter of fact in January, 1915, under a decision of the Comptroller of the Currency, through a matter of bookkeeping in the Treasury Department, I take it, this fund was discontinued on the books and was either covered into the General Treasury or perhaps placed in the reclamation fund. I am not advised as to which of those two things happened, but so far as any act of Congress is concerned that special fund still stands.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. HILL of Washington. Mr. Chairman, I ask unanimous consent that I may be permitted to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. HILL of Washington. It is disclosed in that official document that the moneys accruing to this special fund from July 1, 1892, to June 21, 1906, amounted to \$123,017.66, and that the moneys accruing to this special fund from June 21, 1906, to January 31, 1915, amounted to \$271,661.12, or a total to January 31, 1915, of \$394,678.78. Under the act of 1906 the Congress authorized the payment to the Colville Indians of the sum of one and a half million dollars in payment for the one and a half million acres of land which had been restored to the public domain in that reservation, and the Indians were charged with the amount of this special fund, \$271,661.12, or that amount was deducted from the \$1,500,000, or at least was so recommended by the Comptroller of the Treasury in his decision; so that that amount was restored to the special fund, and should at this time stand in that special fund, because that special fund has never been discontinued. They restored to that special fund out of this \$1,500,000 the amount of money that had accrued to the special fund from June 21, 1906, to January 31, 1915, when, as a matter of bookkeeping, the special fund as a separate item was discontinued; so that there should be in that special fund as Government money, not as Indian money, \$271,661.12, at least, because that much of the money accruing to that special fund has never been either otherwise appropriated or paid out to the Indians, and there is ample money in this special fund to pay the amount of the claims we are presenting now through this amendment which we offer.

I call attention again to the fact that this is not tribal money. If the committee is making any point on the fact that it is tribal money out of which this claim should be paid, I claim that was not in contemplation when the act was passed; that there was no tribal money provided by the act of July 1, 1892, and there never has been any tribal money placed in that fund, but that this money was to be paid out of the fund which belonged to the Government of the United States at all times, and I contend that the proposition that it should be paid out of the tribal fund is not well taken.

The CHAIRMAN. The time of the gentleman from Washington has again expired.

Mr. CRAMTON. Mr. Chairman and gentlemen of the committee, I have no desire to resort to any technical objection to this item, because the matters of Indian tuition and the rate of taxation are minor matters; but there is involved in this amendment offered by the gentleman from Washington [Mr. Hill] a very large proposition. Whatever merit there may be in his contention should be reached in an entirely different way. If there is merit in his contention, it should be worked out in a different way. The proposition as it is now presented means not a matter of \$90,000 but several million dollars, if the precedent which would be established by the adoption of this amendment should be followed logically in other cases.

The situation is this: These Indians had some lands. The land was sold and a fund was created, and the act of 1892, which the act of 1924 is supposed to be carrying out, contains a provision which I shall directly call to your attention. The gentleman from Washington intimates that the act of 1892 did not intend this money to be taken from tribal funds. Please note that the act of 1892 provides that these moneys so received from the sale of the lands should be—

Sec. 2. . . . set apart in the Treasury of the United States for the time being, but subject to such future appropriation for public use as Congress may make, and that until so otherwise appropriated may be subject to expenditure by the Secretary of the Interior from time to time, in such amounts as he shall deem best, in the building of schoolhouses, the maintenance of schools for such Indians, for the payment of such part of the local taxation as may be properly

applied to the lands allotted to such Indians as he shall think fit, so long as such allotted lands shall be held in trust and exempt from taxation, and in such other ways as he may deem proper for the promotion of education, civilization, and self-support among said Indians.

That act of 1892 authorized those funds of the Indians to be paid for the benefit of the Indians, and also for payments in lieu of taxes, and we are not protesting against that use of the money of the Indians. The proposition before us is to take the \$90,000, not out of the Indian funds but out of the Treasury of the United States. The gentleman from Oklahoma [Mr. CARTER] probably knows more about Indian affairs than any other man in this country, and he fully indorses my statement. I think the gentleman from New York [Mr. SNYDER], the chairman of the Committee on Indian Affairs, will also indorse my statement.

I think that every man here who is at all familiar with conditions in the West will indorse my statement to this effect: That if you once start in taking money out of the Federal Treasury to make payment in lieu of taxes where Indian lands are held exempt from taxation in counties and States—if you once start on that program and carry it out logically without partiality, it will cost us millions of dollars. It is an important matter that is before you now. What I am protesting against is making any such precedent.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CRAMTON. I shall ask for five additional minutes. And I will ask to be allowed to proceed without interruption in order that I will not take up too much time.

Mr. McKEOWN. Did the money pass—

Mr. CRAMTON. I am going to talk about that. I read the speech of the gentleman from Washington in the Record the other day, and I heard his remarks just now. But my friend from Washington is under a misapprehension as to the facts of the case. He said:

It is set apart in this special fund for the use to which I have referred. It is to stay in that fund until Congress shall otherwise appropriate it. There was accumulated in that fund from 1900, when the Indian reservation was opened by proclamation of the President, until some time about the year 1915, a little less than \$400,000. A part of that money was spent in building schoolhouses and maintaining schools for Indians, and no part was spent for local taxation or for the building of roads or any improvements that went to the civilization of these Indians. It stayed in that fund, and Congress never appropriated it for any other purpose, but the Comptroller of the Treasury, without any act of Congress, covered it into the General Treasury of the United States, and it went into the reclamation fund.

Now, I phoned the Indian Commissioner, calling attention to the statement, and I have this letter from him, which came to me as I came on the floor this noon. Now, please note:

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington.

MY DEAR MR. CRAMTON: In response to your informal inquiry regarding the receipt and disposal of funds involving the north half of the Colville Indian Reservation in the State of Washington, the records of the office show that from the total sum of \$1,500,000, appropriated by Congress to pay the Indians in full for 1,500,000 acres of land, a per capita payment of \$500 was made to the Colville Indians approximating \$1,134,000—

That went directly to the Indians—

the sum of \$60,000 was paid on account of attorneys' fees and the remainder, except a balance of \$9,240.92, now to the credit of the Indians in the Treasury was expended for the benefit of the Indians in accordance with the terms of the appropriation act.

A million and a half dollars was turned over to them, and has gone to their benefit directly, except \$9,000, and now the gentleman's contention arose from this other proposition—but the letter further says:

Under a decision rendered by the Comptroller of the Treasury dated April 27, 1915, copy herewith, it was held that the proceeds of land sold prior to the act of June 21, 1906 (34 Stats. 377), belonged to the Indians and all proceeds of lands disposed of subsequent to the act of June 21, 1906, belonged exclusively to the United States and not to the Indians; consequently, all such proceeds were covered into the Treasury as miscellaneous receipts.

That is to say, sales before a certain act went to the benefit of the Indians, and sales after a certain act went to the benefit of the Treasury.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. CRAMTON. I will ask to proceed for five additional minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. CRAMTON. Mr. Chairman, I want to make this point clear, that the gentleman's amendment proposes to take money out of the Treasury for the payment of these taxes, and that we must absolutely resist or we start upon a very ruinous course. Any merit there is in the gentleman's proposition, and I am not prepared to say there is much or little, is involved in the question of whether land sold after June 21, 1906, or rather the proceeds from that land should have gone into the Treasury or to the benefit of the Indians. Now, the way to settle that question is to settle it. It is not to have mere dribblets out of the Treasury to pay taxes and establish this undesirable precedent. The thing to do is to have an act of Congress correcting any mistake that was made in the disposition of these funds from lands sold after 1906.

Now, it has come to me just as I was coming on the floor, and I have not had a chance to study it. I do not know whether the covering of this fund into the Treasury after 1906 was right or not, but I wish the gentleman from Washington, instead of starting in to take mere dribblets out of the Treasury, would introduce a bill to have the subject brought to a focus and pass upon the whole matter.

Mr. McKEOWN. Will the gentleman yield?

Mr. CRAMTON. I will.

Mr. McKEOWN. The gentleman talks about precedent. Can the gentleman say whether or not the United States Government paid Jersey City, N. J., money to recompense the city for the taxes on the German-American docks taken from them?

Mr. CRAMTON. I hope the gentleman will not attempt to fight the war all over or anything else. If it is any satisfaction to the gentleman, I will say I do not know.

Mr. HILL of Washington. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. I yield.

Mr. HILL of Washington. The gentleman states that he has not had time to read the decision of the comptroller. I just want to direct my question to the statement contained in the letter there to the effect that the proceeds accruing from this fund prior to June 21, 1906, belong to the Indians, those accruing subsequent to that time belong to the Government. I read that statement recently, and I read it several times recently, and I very respectfully submit that that is a conclusion, in my judgment, which is not borne out by the facts.

Mr. CRAMTON. Let me suggest to the gentleman from Washington this: The gentleman contends that his justification is in some diversion of the funds into the General Treasury that should have been retained as a special gratuity for the Indians. Now, is not the thing to do, instead of starting in to make an appropriation directly out of the Treasury, as the gentleman's amendment does, to bring a bill before consideration of the Committee on Indian Affairs for the determination of the question as to whether one or two or three million dollars has been diverted? After establishing the fact that there has been a diversion and that you have that fund then a conclusion can be arrived at.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. CARTER. The gentleman speaks of this being determined through the jurisdiction of the court. Is that the way it is to be determined?

Mr. CRAMTON. Either through the court or through the Committee on Indian Affairs. In any event, it should receive careful consideration. Let me illustrate. The gentleman from Washington is probably familiar with it. He reads the opinion and gets one view of it. The Commissioner of Indian Affairs is also familiar with it, and he gives a different opinion. Is the House ready here to inferentially and indirectly pass upon the claim of these Indians for two or three million dollars, not to speak of disposing of this as a precedent?

Mr. HILL of Washington. My contention is that that was a special fund created by the act of 1892, and the only way it can be done away with is through an act of Congress such as this.

Mr. CRAMTON. But the statement of the bureau was that one million and a half was all that was due to the Indians under the act of 1892, and all of that except \$9,000 had been spent for their benefit.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. SUMMERS of Washington. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Washington moves to strike out the last word.

Mr. SUMMERS of Washington. Mr. Chairman, this seems to be a very complicated situation for us to pass upon here on the floor of the House, but I want to call your attention to the fact that this has been before the Committee on Indian Affairs of the Senate several times in the last few years. It has been passed upon favorably by the Indian Committee in the Senate, and twice passed the Senate, and has been passed upon favorably by the Indian Committee of the House. It was then submitted to the Congress, and was passed by this House, and passed by the Senate, and signed by the President. It has been three times approved, or rather it has been approved by three different Secretaries of the Interior, and has been passed by the Director of the Budget.

I would like to know if, at this stage of the game, we are going to undertake to say that none of them understood the situation, and that we should reverse the action and the judgment of all of them at this time? I think we are too far along with this thing to undertake that in this sort of way here in the House.

Mr. CRAMTON. An illustration of that sort of situation is given by the letter of the Secretary of the Interior of April 5 last, presented in the Indian Committee report, when he says that the claim is based on the act of 1892. Did not that act require payment out of the tribal funds, whereas the act of 1924 approved required the payment out of the Treasury?

Mr. SUMMERS of Washington. Bringing up questions here that have been passed upon repeatedly by deliberative committees and asking us to reverse all of them at this time seems to me very inadvisable. I admit that sometimes things slip by the attention of a committee and points are overlooked. But does it seem probable that three different Secretaries of the Interior would be mistaken about this, that the House Indian Affairs Committee would be mistaken, and the Senate Committee on Indian Affairs would be twice mistaken, and that it would be passed by the Senate and by both branches of Congress, and then slip past the Director of the Budget, that iron man down there, you know, who does not pay attention to anything except to hold down appropriations?

I am very much in favor of the amendment. I think the amendment offered by my friend from the State of Washington is entirely fair. He is willing to eliminate all that has been paid in the way of tuition. He puts a further limitation on, as provided in the legislation passed here last spring, at the last session of Congress. All of that is put into his amendment, and I believe the amendment should be adopted by the House.

The CHAIRMAN. Without objection, the pro forma amendment is withdrawn.

There was no objection.

Mr. CARTER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Oklahoma is recognized.

Mr. CARTER. As I understand this situation, an act of Congress was passed providing for the ceding or sale of the north half of the Colville Reservation in the State of Washington, the proceeds to be used for certain purposes specified in the act. Any part of the sum could be used for either of those purposes, and all the sum could be used for either of the purposes under the language.

Now, the only question, as I understand it, for us to determine here is whether or not all that money has been used for either one of these three purposes. If it has not been used, then certainly it may be used for taxes. It could be legally used for taxes. It would be appropriate to use it for taxes. It would be just to the Indians and to all parties concerned to use it for taxes. But if that money has been consumed for either one of the purposes specified, then certainly we would set a very dangerous precedent, as stated by the gentleman from Michigan [Mr. CRAMTON], when we go into the Federal Treasury and appropriate as a gratuity money to pay taxes on Indian lands that have been exempted. If that policy is pursued, it will cost \$50,000,000 every year to do justice to the State which I have the honor in part to represent, Oklahoma; and to pay taxes on Indian exempt lands there would cost perhaps more than that in Arizona, and as much in New Mexico and South Dakota and Idaho, and other States having Indian lands. So that I think we might well hesitate before we undertake to set any such dangerous precedent. I realize fully that the Indian Committee of the House has passed upon this proposition.

Mr. HILL of Washington. Mr. Chairman, will the gentleman yield?

Mr. CARTER. If our friends on the Indian Committee can recall the facts in the case, I should be very glad to hear from them and get such information as they can give on the subject. But until I get such information I feel very reluctant about establishing any dangerous precedent now.

Mr. HILL of Washington. Will the gentleman yield?

Mr. CARTER. Yes.

Mr. HILL of Washington. The gentleman has referred to precedents. Does the gentleman have in mind the peculiar language in this act of July 1, 1892, providing for the payment of such local taxes, and that such language is not contained in any other similar act?

Mr. CARTER. Well, I have not any particular language in mind at all in any act. The only thing I have in mind at present is this, as I have just tried to make clear, that I believe in keeping any agreement or understanding we have with the Government's wards—the Indians. If we agreed that certain of their funds should be used to pay taxes for certain purposes and we have not done that, then we should do it; but if those funds have been used and exhausted, then certainly we have not the right to go into the Federal Treasury and use money for any of the purposes mentioned in the act.

Mr. SNYDER. Will the gentleman yield?

Mr. CARTER. Yes.

Mr. SNYDER. The gentleman has made reference to the fact that this bill has been before the Indian Affairs Committee. I will say to the gentleman that for seven years this bill has been in various forms before the Indian Affairs Committee and has been discussed many times. The last time was the first time it was ever considered of enough importance to send it to a subcommittee to investigate. In the closing of the session the subcommittee reported favorably upon this bill, but the committee as a whole had no time to go into an investigation of it to any very great extent. I have always had my doubts about the propriety of passing such legislation, and I concur heartily in what the chairman of the subcommittee and the gentleman from Oklahoma [Mr. CARTER] have said with reference to the matter. I think there is a question of grave doubt in that bill as to whether the amount should be paid.

Mr. CARTER. That satisfies me about it.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. McKEOWN. Mr. Chairman, I move to strike out the last word, because I want to get this matter of precedent straight. If gentlemen want to set a precedent, then I would have no objection if it is going to be a precedent that is going to be adhered to in all parts of the country.

The Representative from Hoboken, N. J., has a bill here, which has been favorably reported, to refund to Hoboken money in lieu of taxes, due to the fact that the United States Government took over the German-American docks at Hoboken during the war.

Now, it may not be wise to set a precedent for the House, but there is something about it that does appeal to the average man as not being wholly fair to a large city or community to exempt large properties from taxation and at the same time allow those owning the property to enjoy the same privileges that the men who bear the burdens enjoy. Now, it does not appear to me to be fair for Congress to pass a bill providing that any citizen should receive all of the privileges and all of the protection which others receive and his property receive the same protection without paying any taxes.

Mr. CRAMTON. Will the gentleman yield?

Mr. McKEOWN. Yes.

Mr. CRAMTON. In the gentleman's State, Oklahoma, there are great areas of Indian lands withheld from taxation but enjoying the blessings of which he speaks, and do I understand the gentleman from Oklahoma to say he feels we ought to appropriate from the Federal Treasury an amount equivalent to or in lieu of those taxes?

Mr. McKEOWN. I did not say that.

Mr. CRAMTON. Does not the gentleman feel we ought to treat Oklahoma as favorably as Washington?

Mr. McKEOWN. I want to show you the difference between the situations. Here is a case where the money was set apart and where the Government arbitrarily, as I see it and as I understand it, put some money into its own Treasury, and that we have not gone ahead and carried out the agreement to apportion the money to the different uses for which it was set apart. Now, if the Government does that these counties and municipalities should not lose on account of the act of some officer of the Government who goes beyond his powers or contrary to the law.

Mr. CRAMTON. If the gentleman will permit, it is a question whether that has been done or not. If it has been done, is not the proper thing for us to do to correct the whole error rather than to fuss away with this \$90,000?

Mr. McKEOWN. I think the gentleman should do as he is in the habit of doing, straighten it out right now without having to wait all these months and months in trying to get a bill through to do what ought to be done now.

Mr. CRAMTON. If the gentleman is correct, there is \$1,500,000 due them, while it is the contention of the Indian Bureau that only \$9,000 is due.

Mr. McKEOWN. The proposition is this: If you are not going to set a precedent to provide for the payment of money out of the Treasury of the United States in lieu of taxes due on large pieces of property then, of course, if you make the rule apply to all of the United States equally, nobody has any right to complain, but if you do not make it apply equally, of course, we have a right to complain.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired. The question is on the amendment offered by the gentleman from Washington [Mr. HILL].

The question was taken; and on a division (demanded by Mr. HILL of Washington) there were—ayes 17, noes 48.

Mr. HILL of Washington. Mr. Chairman, I ask for tellers.

The CHAIRMAN. The gentleman from Washington [Mr. HILL] demands tellers. Those in favor of ordering a vote by tellers will rise and stand until counted. [After counting.] Not a sufficient number, and tellers are refused.

So the amendment was rejected.

The Clerk read as follows:

INDIAN LANDS

For the survey, resurvey, classification, and allotment of lands in severalty under the provisions of the act of February 8, 1887 (24 Stat. L. p. 388), entitled "An act to provide for the allotment of lands in severalty to Indians," and under any other act or acts providing for the survey or allotment of Indian lands, \$50,000, reimbursable: *Provided*, That no part of said sum shall be used for the survey, resurvey, classification, or allotment of any land in severalty on the public domain to any Indian, whether of the Navajo or other tribes, within the State of New Mexico and the State of Arizona, who was not residing upon the public domain prior to June 30, 1914.

Mr. JOHNSON of Washington. Mr. Chairman, I move to strike out the last word.

I would like to ask the chairman in regard to expenditures for allotments in the paragraph just ahead of the one read for the survey, resurvey, classification, and allotment of lands in severalty, and so forth. The appropriation is \$50,000, and I would like to ask the chairman if any provision was made in connection with that or at any other place in the bill for the allotment required under a decision of the Supreme Court of the Quinault Indian Reservation.

Mr. CRAMTON. The item the gentleman refers to is on page 20 and is the general item for survey, resurvey, classification, and allotment of lands in severalty?

Mr. JOHNSON of Washington. Yes.

Mr. CRAMTON. And the gentleman asks is there any specific item for the allotment of the lands of the Quinault Indians.

Mr. JOHNSON of Washington. I will state it a little more explicitly.

Mr. CRAMTON. There is no specific item in the bill in reference to the Quinault Indians.

Mr. JOHNSON of Washington. The Supreme Court, in a decision rendered a few months ago, decided that the land in the Quinault Indian Reservation, whether agricultural or chiefly timber, had to be allotted. This is a large reservation. At one time some 600 allotments were made ready. This was 15 years ago. The markings, I understand, are now imperfect, and much of the land is unallotted. Now arises the question of proceeding to the allotment under the Supreme Court decision, and the statement is continually made to me in response to my requests on behalf of those who desire allotments that the Indian Office has no funds and that this allotment now required by the decision of the Supreme Court can not be made until that office has funds. I was prepared to go before the committee and make a showing in respect to that.

Mr. CRAMTON. Has the gentleman asked the Indian Office whether the funds provided for 1923 would take care of his situation?

Mr. JOHNSON of Washington. I do not know where to find out about the fund unless it is this item of \$50,000.

Mr. CRAMTON. The Indian Office would know exactly. If the matter the gentleman has in mind is in regard to the survey or resurvey or classification or allotment of lands in severalty under the act of 1887, or any other act, this would be wide enough to cover it.

Mr. JOHNSON of Washington. Except that the money here proposed to be allotted would not be enough.

Mr. CRAMTON. The money might not be sufficient. A question addressed to the Indian Office as to whether they have included something in their estimate for your particular situation would give the desired information. They would know better than I would. At the hearings their statement was that the amount allotted for the use of the Land Office, according to the figures received in that office, have been apportioned for 1925 and included \$3,000 for the State of Washington, and in apportioning survey funds made available for use during the fiscal year 1926 it was intended to allow not less than \$40,000 for work to be done under the supervision of the General Land Office in the allotment of this money; but there is no exact statement as to what lands in the State of Washington are to be cared for, and I can not answer about that.

Mr. JOHNSON of Washington. I have made inquiry. The Assistant Secretary of the Interior paid a visit this summer to western Washington, including a trip to the Quinault Reservation. He was in consultation with the superintendent of the various tribes in that part of the country, and thereafter stated that the allotments could not be made until funds were provided. I am simply bringing the matter to the attention of the chairman. It is a matter of administration, including the necessary appropriation by Congress.

Mr. CRAMTON. I will say to the gentleman from Washington I will be very glad to get some exact and definite information for him. All I could give him now would be speculation, but I will later get the exact information for him.

Mr. JOHNSON of Washington. That is much the same situation I am in myself. The allotment matter has to be considered. Timber on this reservation is probably worth \$7,000,000, some of it being sold under long-term contract, a partial allotment started 15 years ago and then stopped by a ruling that the land could not be allotted unless it was chiefly agricultural. The Supreme Court has reversed that ruling and ordered the allotment. How are we going to do it? Are we going to put a \$1,500 a year allotting agent out there to handle that great property? Who is going to take care of and close the rolls? It is quite a problem and one that should be discussed in some detail by some committee of this House.

Mr. CRAMTON. On inquiry at the Indian Office I learn the matter the gentleman from Washington mentions is under consideration, and a supplemental estimate to cover it is likely to follow.

The CHAIRMAN (Mr. CHINDBLOM). Without objection, the pro forma amendment is withdrawn, and the Clerk will read. The Clerk read as follows:

For necessary surveys and investigations to determine the feasibility and estimated cost of new projects and power and reservoir sites on Indian reservations in accordance with the provisions of section 13 of the act of June 25, 1910, \$1,000.

Mr. TAYLOR of Colorado. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Colorado offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. TAYLOR of Colorado: Page 20, line 2, after the figures "1,000," insert: "for reconnaissance work along the upper waters of the San Juan River, in La Plata County, Colo., to determine the water supply available for irrigation of lands in that vicinity by gravity and to determine whether or not such supply can be augmented by the impounding of flood waters and whether there are any feasible reservoir sites should investigations develop the feasibility of impounding such flood waters for irrigation purposes, \$10,000. Said sum, or any part thereof, that may be expended for this work shall be charged to lands that may hereafter be benefited by reason of these investigations and before any development pursuant to investigations made under authority of this act shall be carried out, the Secretary of the Interior shall execute with the landowners to be so benefited contracts providing for payment of the money expended."

Mr. CRAMTON. Mr. Chairman, if the gentleman from Colorado will yield, the amendment the gentleman has offered is an amendment which has been discussed with the Indian Office and which I have talked over with him.

Mr. TAYLOR of Colorado. Yes. I have used the language that we discussed with the officials of the Bureau of Indian

Affairs at the time of the hearings on this project and since that time.

The hearings before our subcommittee pertaining to the Pine River project on the Southern Ute Indian Reservation, in La Plata County, Colo., disclosed that the irrigation system was originally constructed by the Indians, but, due to inefficient methods and the rough topography of the country, it has required many changes and repairs, and the department urges an appropriation sufficient to rehabilitate that work. The commissioner also sets forth that a suit has been brought in the United States court at Denver for the purpose of preventing infringements by the whites upon the water rights of the Indians.

When I was down in southern Colorado this last fall a large number of ranchmen living adjacent to the Pine River came to see me at Bayfield and very earnestly presented the seriousness of the situation. Mr. Meritt, the Assistant Commissioner of the Bureau of Indian Affairs, stated before our committee that his bureau would look with favor upon the authorization of an investigation of the reservoir possibilities and of an appropriation of this amount to ascertain the cost of the construction of storage reservoirs sufficient to furnish the necessary amount of water to supply all the white settlers as well as the Indians, and that is the object of my amendment.

I am in hopes that the engineers of the Interior Department may during the next spring and summer make a thorough investigation of practical reservoir sites and also the flow of water throughout the season in that drainage section and ascertain whether or not there is sufficient water flow to supply all the needs of both the whites and Indians.

This situation is of very great importance to the welfare of that southern part of my State. In fact, the suit has a far-reaching effect generally to southwestern Colorado. In fact, it affects directly or indirectly every resident of the San Juan Basin and the drainage of the streams crossing the reservation; that is to say, practically all of the population of that part of southwestern Colorado.

Personally, I feel that this appropriation could not be made as a charge against the lands ultimately benefited, because both the whites and the Indians have absolute rights there, and it does seem to me that it comes squarely within the principle adopted by Congress concerning the Yakima Indian Reservation, in the State of Washington. I notice in Senate Document No. 337, Sixty-third Congress, second session, volume No. 5, pages 23 to 26, where a joint commission on impounding water on the Yakima Indian Reservation project was appointed, under section 23 of the Indian appropriation act approved June 30, 1913. That commission reported December 20, 1913. This document sets forth a condition almost identically parallel to this, and in pursuance to that report Congress passed an act approved August 1, 1914, which appears in the United States Statutes, Sixty-third Congress, volume 38, part 1, page 604, providing for the appropriation of money for the construction of waterworks to supply the Yakima Indians for the water taken away from them by the whites. And in this bill we are now considering is an item of \$11,000, which has also been carried in this bill for several years past, for the benefit of the Yakima Indians, in pursuance with that act of Congress.

While this suit referred to only directly affects those residing in the Pine River Valley, the same condition exists as to all the other streams in southwestern Colorado lying west of the Continental Divide. If the theory of the Government in this suit is correct, it practically nullifies and repudiates the State laws, giving preference to users of water for domestic purposes, such as our towns and cities; that is, if the theory of that suit is correct, the Government can not only take away the waters heretofore appropriated by the ranchmen and whose rights have become vested under the constitution and laws of Colorado and have been in active use unmolested for many years, but the Government could also take for the irrigation of Indian lands the waters appropriated and used by our towns and cities.

It does seem to the people of southwestern Colorado that there can be no justice or equity in the Government now attempting to deprive the people who have developed all of that country of the results of their many years' labor and expenditures and pioneer hardships. The Government has consistently and continually offered inducements for the people to settle upon and develop the lands throughout the country, and the Government has received the money for the payments on the lands and has encouraged the expenditure and improvements upon the lands and ditches and has formally approved the water rights acquired thereby.

The Indians and whites on the Pine River have gotten along with difficulty, I understand, and up to the present time there has been sufficient water for both the whites and Indians, and we see no immediate cause for the bringing of this suit.

The worst feature of the litigation is that the mere bringing and the pendency of this action has practically destroyed the credit of all those farmers and made it practically impossible for them to secure loans upon their lands irrigated from the Pine River.

It does seem to me that this situation presents a case that is entirely parallel to the one referred to on the Yakima Indian Reservation, in which Congress has recognized the rights of the whites to their appropriations and has appropriated money out of the Federal Treasury every year toward enlarging the water supply to make it sufficient for both the Indians and whites without working any hardship upon either. And in this case reservoirs of sufficient capacity can be provided at comparatively modest cost to fully supply all the immediate and future needs of the Indians for their lands; but the independent farmers have not the means and can not build these reservoirs, and they should not be required to do it, and they certainly can not secure the means to build such reservoirs under any circumstances with the present litigation pending. By the construction of those reservoirs the Government can fulfill to the very utmost every obligation it may owe to the Indians with respect to providing water for the irrigation of their lands, and it can allow the white settlers to retain what both the Government and the State of Colorado have allowed and approved and induced them to believe they were obtaining by their settlement and development.

The seriousness of the situation presented by this litigation is very fully set forth in a letter to me from the Durango Exchange, of Durango, Colo., which is the leading business men's organization of all southwestern Colorado, and I think their suggestions and information upon this subject are worthy of careful consideration by Congress. The letter is as follows:

THE WESTERN COLORADO CHAMBER OF COMMERCE,
Durango, Colo., October 3, 1924.

HON. EDWARD T. TAYLOR, M. C.,
Washington, D. C.

DEAR SIR: Your attention is called to the suit recently instituted in the District Court of the United States for the District of Columbia, sitting at Denver, No. 7736, and entitled "The United States of America, plaintiff, v. The Morrison Consolidated Ditch Co. et al., defendants."

In the suit the Government claims and demands the absolute first and prior right to the use of 212 cubic feet of water per second direct from Pine River, and one additional foot from Dry Creek, a tributary of the Pine River emptying into that stream near Ignacio, Colo.

This demand is not founded upon any claim of prior appropriation or application to beneficial use, but is based upon the theory that under the several so-called "treaties" made by the Government, and particularly the treaty ratified by Congress June 15, 1880 (21 Stat. 199), and the act of February 20, 1895 (28 Stat. 677), the Government impliedly agreed to and did reserve for use upon the Indian lands whatever water might at any time thereafter be required for their irrigation, and reserved and held the absolute right to take and use upon such lands the entire flow of the river, if necessary, regardless of the loss or damage to ensue, even though it mean the utter ruin of the settler, who, at the invitation of the Government, had invested his all, and had spent years of hardship in improving and reclaiming the theretofore barren, fruitless, and desert lands.

The present case involves, as we are advised, some 150 or more defendants, and threatens great damage, if not ruin, to every resident of the Pine River Valley from its head to the Colorado-New Mexico line.

It is asserted the contention of the Government is supported by the cases of *Winters v. U. S.*, 28 Sup. Ct. Rep. 210; *U. S. v. Conrad Co.*, 161 Fed. 829 and 156 Fed. 128; *U. S. v. Morrison*, 203 Fed. 364; and other cases.

On the other hand, it is contended that none of these decisions are controlling.

But it is not our purpose to discuss the legal propositions but to call your attention to what we consider the uncalled-for hardship and rank injustice of such procedure in this instance.

Whether the Government on the one hand or the settlers on the other might win in the end, these things we think deserve consideration by the Interior Department in determining whether a better method of settling all controversies may not be reached.

(a) These farmers are mostly men of small means; like farmers elsewhere, they have under conditions recently prevailing for several years operated at a loss which has practically wiped out all previous profits.

They are unorganized and without machinery for a combined, common defense to the suit.

(b) The Government has for years been gathering its data and formulating its plans, collecting and arranging its evidence, making its surveys, etc., with unlimited means at its disposal.

A proper preparation of the defense and proper trial of the case will involve an expenditure far beyond the combined resources of the defendants.

(c) The institution of this suit, threatening as it does to take away water rights, without which their lands would revert to their original desert condition, has affected, if not destroyed, their ability to raise by loan any money to conduct their defense.

(d) It appears from the complaint in this suit that beginning with the year 1877 and continuing until now the defendants and their predecessors in interest "have from time to time constructed numerous ditches and diverted water from the Pine River and its tributaries for the irrigation of their lands."

And such settlement and ditch construction was made at the invitation of the Government (which encouraged the reclamation of these desert lands), and was under and in conformity with Government and State laws and regulations.

(e) The defendants have some equity; the Government owes them an obligation no less weighty than its obligation to the Indians.

(f) The Government can fulfill to the utmost its obligation to furnish water to the Indians (if such obligation exists) without the slightest injury or injustice to anyone by the construction of reservoirs to conserve the flood waters of the river.

Such flood waters are more than ample to care for every need of all the Indian lands for all time to come, and can be constructed at a moderate cost, but a cost beyond the reach of these defendants.

(g) Several such reservoir sites have already, as we are informed, been surveyed by the reclamation and Indian departments, and we believe the Government is now in possession of surveys, plats, details, and information sufficient to enable it to determine with substantial accuracy the cost of construction of reservoirs amply for all needs of the Indians now or hereafter.

Why can not such reservoirs be constructed? We ask no favors for the white settler as against the Indian, but we do ask that all stand upon the same basis. Where Indian ditches have actually been built let their priority, as the priority of the white man, be based upon priority of diversion and application to beneficial use.

We believe it would be simple justice if the Secretary of the Interior will include in the Budget an amount sufficient to build these reservoirs and ask Congress to make the necessary appropriations.

In the meantime we suggest that the mere pendency of this suit, with the apparent effort to force it to an early issue, is working an untold hardship upon the hundreds who have in good faith accepted and acted upon the invitation of the Government to purchase and reclaim these lands.

May we ask you to give prompt and serious consideration to our suggestions?

Very respectfully,

THE DURANGO EXCHANGE,
By CHARLES E. HALL, Secretary.

I may add that the local attorneys of southwestern Colorado feel that the Winters case, in the Supreme Court, referred to by Mr. Meritt, is not, strictly speaking, applicable to the conditions prevailing upon the Pine River. And in support of that position they have called my attention to several cases, as follows: 166 Fed. 128; 143 Fed. 740; 148 Fed. 684; 230 Fed. 277; 240 Fed. 274; same case, 39 Supreme Court report, page 40; 234 Fed. 95; same case, 246 Fed. 112.

I have not had time to look into them carefully myself. I desire also to state in the records that I personally know the conditions upon that project, and in pursuance of my conference with the settlers I have asked the Interior Department and the Indian Bureau and the Budget Bureau to approve my application to them for their indorsement of an appropriation for \$10,000 to make a thorough investigation of the situation and a survey and estimate of the cost and feasibility of reservoir sites in the Pine River Basin sufficient to supply all the water necessary for the future use of the Indians and whites in that basin. And the Interior Department has so recommended to the Budget Bureau. In the meantime I have asked the Interior Department to request the Department of Justice to suspend further action in this litigation until such report is made and until Congress may have reasonable opportunity to take action in the matter, and I understand that recommendation has been made to the Department of Justice.

I believe that such an appropriation and expenditure would come thoroughly within the provisions of what is known as the Snyder Act—Public No. 85, "An act authorizing appropriations and expenditures for the administration of Indian affairs, and for other purposes." (42 Stats. p. 208, pt. 1, approved

November 2, 1921.) Under the provisions of that act, "For extensions, improvement, operation, and maintenance of existing Indian irrigation systems and for development of water supply."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado.

The amendment was agreed to.

The Clerk read as follows:

For commencement of construction work on a dam across the canyon of the Gila River near San Carlos, Ariz., to be hereafter known as the Coolidge Dam, for the purpose, first, of providing water for the irrigation of lands allotted to the Pima Indians on the Gila River Reservation; and, second, for the irrigation of such other lands in public or private ownership as in the opinion of the Secretary of the Interior can be served water impounded by said dam without diminishing the supply necessary for said Indian lands as provided for in the act approved June 7, 1924 (43 Stat. L. pp. 475, 476), \$450,000, to be immediately available: *Provided*, That said sum, or so much thereof as may be required, shall be available for purchase and acquiring of land and necessary rights of way needed in connection with the construction of the project: *And provided further*, That the total amount appropriated shall be reimbursed to the Treasury of the United States in accordance with said act of June 7, 1924.

Mr. CRAMTON. Mr. Chairman, I do not think we need to settle the affairs of the State of Texas up here. They seem to be able to settle them themselves, although they have a lot of trouble in doing it. I have some sympathy with the gentleman, the Governor of Texas, or any other citizen who desires to be in the limelight in competition with our colleague from Texas. [Laughter.]

But the item before us results from a suggestion of eminent members of a different party from that of the President. It was deemed by them desirable, and I do not believe there is anyone but what would agree to that, except the gentleman from Texas. If the gentleman from Texas really is opposed to that language in the bill, as he has manifested by his speech, it seems to me his proper course is to bring the matter before the committee by an amendment and let us see how many will agree with the gentleman from Texas.

Mr. SNELL. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. SNELL. It in no way affects the cost of the dam.

Mr. CRAMTON. Absolutely not.

Mr. SNELL. The remarks of the gentleman from Texas have nothing to do with that feature of it.

Mr. CRAMTON. They have nothing to do with any economy program.

The Clerk read as follows:

For maintenance and operation of the irrigation systems on the Flathead Indian Reservation, in Montana, by and under the direction of the Commissioner of Indian Affairs, including the purchase of any necessary rights or property, \$10,000 (reimbursable).

Mr. EVANS of Montana. Mr. Chairman, with regard to the question of the appropriation for the Flathead Indian reclamation project, I beg to suggest to the committee that the language carried in this bill differs from the language of the preceding bill in that this provides only for maintenance and operation of this project. It is a \$7,000,000 project, and I think about \$5,000,000 have been expended. The Congress has annually appropriated an average of about \$250,000 until last year. Last year the Budget Committee recommended \$300,000. The House committee recommended only \$50,000. In a compromise between the House and the Senate \$150,000 was appropriated. This year provision is made in the bill only for maintenance and operation and no money is appropriated for a continuation of the work.

I do not think this project is thoroughly understood by the House or by the committee, or perhaps by the department, and if you will bear with me I am going to suggest there was in Montana for many years what is known as the Flathead Indian Reservation. It consisted of a territory in a basin, not perhaps unlike this Hall, consisting of about 1,000,000 acres of land. Some 20 years ago the Government, through its Congress, conceived the idea of embarking upon the proposition of opening this reservation, and by a bill passed through the Congress it was provided that the Indians, about 2,000 in number, should take their lands in severalty—40 or 80 acres, as the case might be—and that the remainder of the agricultural lands of that reservation should then be subject to homestead entry by homesteaders, white people, at an appraised value.

The Government appraised the land at \$1.50 to \$7 per acre, so that the homesteader had to pay anywhere from \$1.50 to \$7

per acre, depending upon the appraisalment of the individual land he took, and then had to comply with the homestead law for a period of three or five years, as the case might be. Then the Government found in the lower part of this great basin about 150,000 acres of agricultural land that might be irrigated, and it embarked upon the plan of reclaiming that land. Part of this land had been taken by the Indians as their individual allotments, part of it had been taken by the white men as homesteads, and the Government said, "We will withhold title to these homesteads until this land is reclaimed and then, when the citizens have paid their fair share of the cost of reclamation, we will give them title and we will charge to the Indians a like amount, prorated for his acreage within the arid strip of territory that is being reclaimed." So this is not primarily an Indian project.

The larger portion of these arid lands that are being reclaimed was homesteaded by white men. The reservation was opened in 1908, and these people went on the reservation 16 years ago with the understanding made by the Government of the United States and the Congress of the United States that we would reclaim the lands and would reclaim them in a reasonable time and would give these people title to the land upon payment of the cost of reclamation. It was estimated by the engineers of the Bureau of Reclamation that it would cost about \$40 to \$45 per acre. We now find that when it is completed it will cost considerably more than that, and that is largely brought about by the fact that the Government has not conducted the matter in a businesslike way. It appropriated about \$200,000 a year, or perhaps \$250,000 or \$300,000 a year on an average, for 15 years upon a project that will cost \$6,500,000 or \$7,000,000 and then we complain that we get nothing back. The truth is the overhead charges in conducting a business transaction like that of \$7,000,000, with an expenditure of \$300,000 a year—the overhead charges and the waste represent about half the amount of money that has been spent on the project. These people have been there 16 years waiting for the Government to comply with its implied contract. They can not get title to their land. The State of Montana can not even tax the land. They can tax the improvements put upon it, but they can not collect taxes for the land, because the title is in the Government of the United States, and yet the Government of the United States will not go on and carry out its implied contract, at least to reclaim these lands.

The Government has spent now four and a half to five million dollars upon this project, and the recommendation of the committee is that we spend no more money. This recommendation is based upon the fact that the committee feel the people are not using the water to the extent it is susceptible of being used, and I suspect, in some degree, there is merit in that contention. They are not using it to the extent it is susceptible of use; why? Many factors enter into it. A man who has 40 acres of land can not improve the whole 40 acres of land the first year for irrigation purposes, or perhaps for two or three years.

Again, the turnover of the people upon that land has been very considerable. Men can not live always upon barren land waiting for the Government to do something. So that the first man moves off and sells his improvements to his neighbor or some newcomer or some one else, and he in turn stands it for four or five years and then he himself moves off, and naturally the turmoil and disturbance is very great, and for that reason there is not as much water used as would otherwise be if the matter had been completed in a businesslike way. It is incomprehensible, gentlemen, that the Government of the United States should put four and a half or five million dollars in an uncompleted project and then absolutely abandon it.

The truth is the Government has not got the water yet. They have got water in spots. To my personal knowledge there are 7,000 acres of land lying contiguous to the little town of Ronan that is claimed to have been reclaimed. The ditches are there, but back in the mountain the reservoir is not sufficient to supply the water to fill those ditches to irrigate that land in the irrigation season, so there are 7,000 acres of land which, of course, did not pay any revenue last year and will not pay any next year if they do not furnish water, and it will not pay if water is furnished one season and not furnished the following season, because farmers can not carry on a successful business under such circumstances. No manufacturer or any other business man could exist if every other year his business goes to pieces; of course he accomplishes nothing.

In August of this year I visited a considerable portion of this project, and I found miles of ditches and two reservoirs

as dry as this floor, because the storage capacity is not sufficient. For the last half dozen years I have been annually urging this Congress to make adequate appropriation to build storage reservoirs. Of course until an adequate supply of water is furnished these people can not be expected to make any returns to the Government.

The Appropriations Committee, which brings in this bill, recommend no appropriation to continue work on this project. Such a course is unwise and unbusinesslike. It is unjust to the people who for 16 years have waited for the Government to comply with its promises. It is unjust to the Congress itself to discontinue a worthy project under such circumstances. There are 20,000 people now living on what was the Flathead Indian Reservation; a considerable part of these people are dependent largely upon the reclamation of these lands for sustenance, and yet it is proposed by this bill, without any notice whatsoever, to discontinue this work.

It appears to me that if the committee and Congress are not satisfied and feel that something should be done by the people on this project before more money is expended, then the better plan would be to make an appropriation, with a limitation upon the same, providing that the money should not be spent until the conditions are complied with.

But the committee do not ask that. They simply cut off all appropriations for the further development of this project.

The discontinuance of this work for even a year means added expense and hardship to these people which in the end they must pay. I have no doubt that the actual additional expense will be more than \$100,000. It means that the whole working force must be broken up, moved, and disintegrated, the engineers and the office force discharged or sent to some other point, the steam shovels and similar equipment shipped to some other point or disposed of, the horses and mules used in this construction to be sold at a sacrifice, only to be repurchased or replaced at some future time at an additional price. The lumber, cement, and other necessary supplies for carrying on the project will deteriorate or disappear, so I think I am well within reason when I suggest the actual loss by a year's delay will be \$100,000. The potential loss in crops and produce will be twice as much more. It is a manifest injustice that should not be imposed by this Congress upon any body of American citizens, and I appeal to the sense of justice of the Members of this House to make a reasonably adequate appropriation to continue this work. I protest against even a temporary abandonment of this project.

Realizing the temper of this House to-day and the futility of attempting to amend the bill at this moment, I am not offering an amendment, but I am simply protesting against the passage of this bill without adequate appropriation for this project. I have consulted with other members of the Montana delegation who agree with me in the course I am pursuing. I am hopeful, however, that the Senate will so amend this bill that when it eventually becomes a law it will carry the necessary appropriation to warrant a belief in the completion of the project within a reasonable time.

Mr. CRAMTON. Mr. Chairman, I rise in opposition to the pro forma amendment. The questions involved in these Montana Indian irrigation projects are very important and very serious. A year ago the committee sought to go into it, and the department was woefully lacking in the information that they ought to have. We assumed—and we had a right to assume—that this year they would be better equipped to enlighten the committee, but this year I think, if anything, they knew less than they did a year ago. I refer now to anybody who could come before the committee. No doubt the information is out in Montana.

Mr. EVANS of Montana. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. If the gentleman will first permit me to complete what I have to say. I am saying this because I want the gentleman from Montana to understand the attitude of the committee. I esteem the gentleman as highly as any Member of the House. Having served with him on the Committee on Appropriations, and having traveled with him in his State, I know his merits. I feel that some time or other Congress should come to a definite decision as to what is to be done on those Indian projects in his State, but it is up to the department, it seems to me, to get busy and further analyze that situation out there and be prepared to give us information as to whether the project should be completed or abandoned. If completed, then to what extent and what new structures are necessary, and as to what has been done in the past, and whether readjustments are necessary. All of those things ought to be worked out in a completed plan. I have in mind myself, as have other members of the subcommittee, that this

coming season. If we do visit any activities of the department in the West, we especially want on the ground to make a study of the problems with reference to these projects. However, until we do have information so that we can go ahead with a definite knowledge, it has seemed to us that the proposition presented by the department this year, that of marking time as to construction, is the proper one to follow, and we have only presented appropriations for operation and maintenance. This is not to be taken as a final decision, even as to the subcommittee, that the matter of further construction should not be reopened and completed some time later. I now yield to the gentleman from Montana.

Mr. EVANS of Montana. Mr. Chairman, I should be gratified if the committee would go upon this project and make a personal investigation. It seems to me that the responsibility is not so much with the Indian Office as it is with the Congress. It is the Congress that is legislating. I agree with the gentleman from Michigan that he gets very little information from the department on this question, but the information is available. If Congress would take the necessary steps to get it, it could get it. Congress should call on the engineer in charge of the project, Mr. C. J. Moody, and he would tell all about it. He would be able to tell more in a minute than you will learn from the department in a thousand years.

Mr. LEAVITT. Mr. Chairman, I move to strike out the last two words so that I may make this suggestion with reference to the Flathead project. The settlers on all Indian projects ought to be given the benefit of the new law with regard to a more scientific and fair manner of repayment to the Government of their water charges, such as has been given by Congress in the act passed by the Senate the day before yesterday and now before the President. I have a favorably reported bill to the effect. They will then be in a position to meet the charges that are accruing against them in a reasonable way. I am sure we will then be in a position to ask successfully for the necessary appropriations to complete the project. I am in entire accord with my colleague from Montana [Mr. EVANS] as to the steps which should be taken in this regard.

The Clerk read as follows:

For operation and maintenance of the irrigation system on the Pyramid Lake Reservation, Nev., \$3,500, reimbursable from any funds of the Indians of this reservation now or hereafter available.

Mr. RAKER. Mr. Chairman, I move to strike out the last word. The Pyramid Lake Reservation in Nevada and the irrigation system, together with the Newlands irrigation project that is further east and west, together with a diversion dam of the Newlands project known as the Derby Dam, together with the use of the Pyramid irrigation project have so affected the flow of the Truckee River from Lake Tahoe and its various smaller reaches in the river before it reaches Reno, except that when the river reaches Pyramid Lake at the mouth at the lake, it extends out in a number of fingers whereby the trout are prevented from going up the stream to the various reaches of the river and Lake Tahoe. I have had this matter up with all the departments—the Bureau of Fisheries, the Fish and Game Commission of California, and the Fish and Game Commission of Nevada, and the Reclamation Service, and the Bureau of Indian Affairs.

It seems as though it is really incumbent upon the Reclamation Service and Bureau of Indian Affairs to provide in one of these appropriations, either under the Newlands project or the project here, with a proper provision to be made that the Derby Dam and other places on the stream, occasioned by virtue of the use of the river and use of water for irrigation projects as well as Indian reservations and irrigation projects, so that the fish might be utilized and come up this stream, which has been a wonderful resource to that part of Nevada and California. I have a lot of data and hoped to get the department to agree to put a provision in the reclamation part of it—that is, under the Newlands project—that a certain amount be expended to keep this stream open. May I ask the chairman if that matter was brought to his attention in the committee's hearings?

Mr. CRAMTON. I have not been able to follow all the gentleman said, although I tried hard to do so. I think nothing has been brought to the committee along the line the gentleman has suggested.

Mr. RAKER. Possibly we will not reach that part of the bill which provides for the Newlands reclamation project to-day.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RAKER. I ask for two more minutes.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. RAKER. When we reach that paragraph which provides for an appropriation for the Newlands project between now and to-morrow, if I could furnish data and authorization from the department, would the gentleman have any objection to a proviso that a certain amount be used for this purpose?

Mr. CRAMTON. I think we had better wait until we come to that paragraph. If it is not reached until to-morrow, I will read the record of what the gentleman has said also. I am always open to conviction.

Mr. RAKER. What I have said concerning this is simply a general statement without presenting facts as I should like to do.

Mr. CRAMTON. The gentleman will have that opportunity for a further presentation.

Mr. RAKER. All right.

The CHAIRMAN. Without objection, the pro forma amendment is withdrawn.

There was no objection.

The Clerk read as follows:

For improvement, maintenance, and operation of the Modoc Point, Sand Creek, Fort Creek, Crooked Creek, and miscellaneous irrigation projects on the Klamath Reservation, \$8,940, to be paid from the funds held by the United States in trust for the Klamath Indians in the State of Oregon, said sum, or such part thereof as may be used, to be reimbursed to the tribe under such rules and regulations as the Secretary of the Interior may prescribe.

MESSAGE FROM THE SENATE

The committee informally rose; and Mr. ANDERSON having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Craven, one of its clerks, announced that the Senate had passed the following concurrent resolution:

Concurrent Resolution 23

Resolved by the Senate (the House of Representatives concurring), That a joint committee consisting of three Senators and three Representatives, to be appointed by the President of the Senate and the Speaker of the House of Representatives, respectively, is authorized to make the necessary arrangements for the inauguration of the President elect of the United States on the 4th of March next.

DEPARTMENT OF THE INTERIOR APPROPRIATION BILL

The committee resumed its session.

Mr. HUDSPETH. Mr. Chairman, I move to strike out the last word. I desire to ask the gentleman from New Mexico [Mr. MORROW], living close to the line, in regard to the bridge which he advocated here last session on which the Pueblos could cross over to their farms, they living on one side of the river and having to cross backwards and forwards. Has the gentleman secured an appropriation for the building of that bridge?

Mr. MORROW. It is under construction at the present time; appropriation has been made.

The Clerk read as follows:

For operation and maintenance, including repairs, of the Toppenish-Simcoe irrigation unit, on the Yakima Reservation, Wash., reimbursable as provided by the act of June 30, 1919 (41 Stat. L. p. 28), \$3,500.

Mr. SUMMERS of Washington. Mr. Chairman, I move to strike out the last word. I offer an amendment to the paragraph, to strike out "\$3,500" and insert "\$5,000."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 36, line 2, strike out "\$3,500" and insert in lieu thereof "\$5,000."

Mr. SUMMERS of Washington. Mr. Chairman and gentlemen, I want to say a word concerning the general situation. In 1855, when the Indians of eastern Washington surrendered many million acres of land to the United States Government by treaty and limited themselves to the present Yakima Reservation, they were accorded certain rights and privileges under that treaty. The treaty was only fairly well observed by the whites, and the Government slept on the Indians' rights. Water was filed on by our irrigation projects and finally the United States Government had to expend something more than a million dollars in providing water rights in lieu of those they had permitted to slip away. At that time the Government agreed that it would furnish water for 40 acres for each Indian allotment, so we are under obligation to the Indians. Now, I am not wanting this work unduly pushed, but the situation is this, and I will have to say to you the same thing in regard to three different units all on the same project. The work has been under way for many years. There is something more than 100,000 acres that is now under irrigation, and it is

universally agreed that it is the most successful Indian irrigation project in the United States, and that it has cost less per acre than any other Indian project in the United States. I have been looking into this during the past several months, and I have learned that they have about \$100,000 worth of machinery there on the project with which they have been operating.

They tell me that they have the best organization that they have ever built up at any place in all the western territory for operating this machinery, and that it is doing efficient and effective work.

Now, the question is, since we are under obligation to put water on this land for these Indians—and we have been doing it for many years—whether it is the proper thing simply to take up \$100,000 worth of machinery and give it a dose of oil, which will stop deterioration to a certain extent, and disseminate and scatter and distribute to the four winds the best working organization they have ever had.

Mr. LaGUARDIA. Mr. Chairman, will the gentleman yield?

Mr. SUMMERS of Washington. Yes.

Mr. LaGUARDIA. Would that \$3,500 a year be enough to do that?

Mr. SUMMERS of Washington. My contention is that it is not economy, and you are subjecting those who will have to repay this to undue expense which they ought not to be subjected to.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield?

Mr. SUMMERS of Washington. In just a moment. The chairman of the committee, I am sure, would not start to build a residence and do a certain part of the work this year and then say, "We will do just enough next year to cover up the foundation," and next year build a little more, up to the second story, and then stop there, and a year or two later put on the next story, and finally put on the roof. That is an expensive way of doing private business. But we do those things here and then criticize the whole irrigation policy because it does not work out exactly on a business basis and because we do not get repayment charges as promptly as we should.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. SUMMERS of Washington. May I have two additional minutes?

The CHAIRMAN. The gentleman from Washington asks unanimous consent to proceed for two minutes additional. Is there objection?

There was no objection.

Mr. SUMMERS of Washington. Now there has been some work done on this particular unit, and they have a partial but insufficient supply of water, so they do get a little early crop. The Government is committed to this project. It is just a question as to when it will perform its duty. My question is, "Shall we do it in this slipshod, piecemeal fashion, covering many years, which is the most expensive way to do it?" This is the most highly productive Indian project in the United States.

Now I yield to the chairman of the committee.

Mr. CRAMTON. How much is necessary to complete the project? Does this \$1,650,000 referred to by the bureau apply to this unit?

Mr. SUMMERS of Washington. I have not had an opportunity of looking at those figures. I think the most economical way would be to appropriate a large amount. But I am not asking that in these times of severe economy, but I do not want to have them quit work entirely.

Mr. CRAMTON. Let me ask another question. The water is now covering 4,000 acres of the most productive land in the United States.

The CHAIRMAN. The time of the gentleman from Washington has again expired.

Mr. CRAMTON. Mr. Chairman, I ask for recognition in opposition to the amendment.

The CHAIRMAN. The gentleman from Michigan is recognized.

Mr. CRAMTON. Why is it that no maintenance charges are being collected from these lands?

Mr. SUMMERS of Washington. The water that is supplied to this particular unit is only sufficient for some early crops. They have not a sufficient water supply to cultivate the land in the way the surrounding lands are cultivated, and grow remunerative crops.

Mr. CRAMTON. Leaving out of consideration the 2,200 acres that are cultivated by the Indians of this most productive land in the United States, even though we do not collect a dollar an acre from that, why should we not collect a dollar an acre for maintenance from the white owners on the 1,016

acres and the other 871 acres? In other words, why not collect from the white owners of these lands?

Mr. SUMMERS of Washington. I will say to the gentleman that if this project is completed up to the point where they are supposed to pay they should pay.

Mr. CRAMTON. This water that they are getting now is worth a dollar an acre. Why should the Treasury of the United States furnish it?

Mr. SUMMERS of Washington. I do not know what the department is getting.

Mr. CRAMTON. The department says that on account of the Indians on this project no rate has been fixed. But year after year we are maintaining this out of the Treasury, and 2,000 acres of the richest land in the United States are getting water at the cost of the United States Treasury. So much for that.

As to the amendment that the gentleman offers, I agree perfectly with him that as to any project we are going to build we ought to appropriate each year for an economical construction unit.

The gentleman's figure—\$50,000—is not an economical construction unit. His whole argument condemns the amendment which he offers. Either we should go ahead with this project at an expense of several hundred thousand dollars and get done with it, or do as we have provided in the bill. To pay out money in dribbles would be unwise. To spend only \$50,000 a year is dribbling money and wasteful. I think we had better retain the committee provision.

Mr. SUMMERS of Washington. The first thing that is to be done is to acquire a dam site, and the \$50,000 will take care of that and some of the preliminary work and tide the thing over without stopping operations entirely. I am considering this in connection with the other two units.

Mr. CRAMTON. I understand the zeal of the gentleman from Washington for the interests of his State. At the present time there is nothing in this bill that can be given to the State of Washington where the gentleman does not have his hands held out. I wish him success, but I do not think we should spend money to maintain irrigation projects in his district any more than in any other place, and we ought not to provide for construction units in dribbles.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For continuing construction and enlargement of the Wapato irrigation and drainage system, to make possible the utilization of the water supply provided by the act of August 1, 1914 (38 Stat. L. p. 404), for 40 acres of each Indian allotment under the Wapato irrigation project on the Yakima Indian Reservation, Wash., and such other water supply as may be available or obtainable for the irrigation of a total of 120,000 acres of allotted Indian lands on said reservation, \$10,000: *Provided*, That the entire cost of said irrigation and drainage system shall be reimbursed to the United States under the conditions and terms of the act of May 18, 1916: *Provided further*, That the funds hereby appropriated shall be available for the reimbursement of Indian and white landowners for improvements and crops destroyed by the Government in connection with the construction of irrigation canals and drains of this project: *And provided further*, That not to exceed \$100 of the amount herein appropriated shall be available for settlement of damages caused in connection with the drainage of Mud Lake.

Mr. SUMMERS of Washington. Mr. Chairman, I offer an amendment to the section just completed: Line 18, page 36, strike out "\$10,000" and insert "\$200,000."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. SUMMERS of Washington: On line 18, page 36, after the word "reservation," strike out the figures "\$10,000" and insert in lieu thereof "\$200,000."

Mr. SUMMERS of Washington. Now, Mr. Chairman and gentlemen, what I have said in regard to the Toppenish-Simcoe project applies here with even more force. We have worked on this particular portion of the project for a great many years and we have been making good headway. It is the champion Indian project of the United States.

I want to digress just a moment to reply to the chairman. He says that at every point in this bill where it is possible the gentleman from Washington has his hands out. Now, I am here to represent that district. I did not have any time before his committee; I did not have that opportunity, and this

is the only opportunity I have of stating the facts in regard to this Government work.

We are committed to it; we are going to do it; we have been doing it for years. We do have there \$100,000 worth of machinery and the best organization and the most efficient, they say, they have ever built up. And now are we going to make repayment charges impossible by dribbling the thing along and be forever in getting it done, and thus bring criticism year after year from the chairman of the committee, who is favorable in a general way to this project? I insist that the policy we maintain here of distributing these appropriations for construction over a long period of time makes it impossible to handle the project in a businesslike way, and then my people out there are criticized for the logical results of our illogical actions.

Now, I have offered this amendment for \$200,000, which will carry on the work and utilize the expert force they have gathered together, which they can never get together again, instead of standing the machinery up to rust until such time as we decide we shall go ahead and add another story to the house, the foundation of which we have already laid and which we are going to some time complete.

This is a successful project. I have familiarized you with it on previous occasions. If we put it on a business basis and go forward and complete it, I know of no reason why they should not go ahead with repayment collections and conduct the project in a businesslike way; but if we stretch construction out over 10 or 15 years instead of completing it in 3 or 4 years, we are simply making that thing impossible.

I maintain it is economy for the Government and economy for the people who have to pay the bills if we make this appropriation of \$200,000 and let the work move forward.

Mr. CRAMTON. Mr. Chairman, as I understand it, \$535,000 will complete the project. That is to be spent for a power and pumping plant. I suppose the power plant will save considerable to the users of water. The profits, if power is sold, will be used as they are on the Salt River project, namely, to reduce the cost of operation and maintenance.

I agree with the gentleman that when we start to complete that project we ought to appropriate enough for the economical construction of the project. There is nothing going on there this year, and I understand there was nothing last year in the way of construction. There is operation and maintenance, however, authorized by this item.

Mr. SUMMERS of Washington. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. SUMMERS of Washington. I think the gentleman is mistaken about no work having been done there in the last two years.

Mr. CRAMTON. I am wrong about 1924, and there is only an appropriation for operation and maintenance for the current year. For 1925 there is nothing. That is correct, is it not?

Mr. SUMMERS of Washington. The chairman has the figures, and, as far as I know, it is correct.

Mr. CRAMTON. This is the most successful Indian project in the United States. Notice that; and yet we are asked to rush into the expenditure of another couple of hundred thousand dollars to provide a power plant for them. There are 10,000 acres cultivated by the Indians and 60,000 acres cultivated by the whites. I have been on that project. It is a splendid region, and any Indian who owns 40 acres of that land, with this water available, is comfortably fixed if he will simply be willing to go to work. If they will set it out to fruit, they can have an income of several thousand dollars a year. But instead of that most of them on that most successful Indian project in the country rent the land unimproved for about \$800 a year and then expect us to pay the school charges for their children when they send them down to Chemawa. I say that the more we make things easy for those people the less of a favor we are doing them.

Now, we do not even get the operation and maintenance cost back. For 1924 the collections on that project for operation and maintenance were \$70,000 and the cost was \$108,000, about \$1.50 an acre in a rich country, where the field crops are splendid and much is in great orchards—\$1.50 an acre for water. We pay out of the Treasury \$108,000, and only \$70,000 comes back. I think we can just mark time a little until we get straightened out.

Mr. SUMMERS of Washington. What is that date?

Mr. CRAMTON. That is 1924, the fiscal year; not the calendar year 1924 but the fiscal year. Before we build a power plant for them I think we should ascertain whether they are going to pay it back and pay it back with interest.

Mr. SUMMERS of Washington. The power plant has nothing to do with this, because this is already under irrigation.

Mr. CRAMTON. But the \$200,000 which the gentleman proposes is on the power plant.

Mr. SUMMERS of Washington. It is for a continuation of the project; it is to finish up the work we have agreed to do under the treaty and under later agreements.

Mr. CRAMTON. And that is the completion of the power plant and the pumping plant.

The CHAIRMAN. The time of the gentleman from Michigan has expired. The question is on the amendment offered by the gentleman from Washington [Mr. SUMMERS].

The question was taken, and the amendment was rejected.

The Clerk read as follows:

For operation and maintenance of the Satus unit of the Wapato project that can be irrigated by gravity from the drainage water from the Wapato project, Yakima Reservation, Wash., \$5,000, to be reimbursed under such rules and regulations as the Secretary of the Interior may prescribe.

Mr. SUMMERS of Washington. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Washington offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SUMMERS of Washington: Page 27, line 7, strike out "\$5,000" and insert in lieu thereof "\$50,000."

Mr. SUMMERS of Washington. Mr. Chairman and gentlemen, these are not three separate projects. They are units of the same project, and the same machinery and the same organization that would operate in one place would also take care of the others. We have here a little different situation from the others. If we do not utilize water rights that are available, they are liable to be filed on further down the river and we will still be under obligation to the Indians to make good under our treaty and under later agreements we have had with them, and we may then find ourselves under the necessity of making a very great outlay for water rights. That has once occurred. We did that very thing. The United States slept on the Indians rights and it cost us \$1,000,000, and yet we blame the people for it. The Congress of earlier days is to blame for it. The members of the old Committee on Appropriations were responsible for that, and that is the policy you are asked to pursue now.

Let us appropriate \$50,000 and start the reservoir and show that we are going to use the water there and in that way hold the water right for 35,000 acres that are yet to be irrigated instead of letting it flow on down the river and be filed on further down. We will then have to expend perhaps half a million dollars for another water right.

This is one of the best districts in the country, and if it is not being conducted wholly on a business basis I maintain we are as much to blame right here on the floor of the House as they are down in the department or as they are out on the reservation itself. If you do this work piecemeal, spread over a lifetime, the overhead is bound to be enormous and you are bound to be a long time in getting your repayments, and my people are criticized because they do not repay. How could you pay for a piece of property out of the rentals from the property if you laid the foundation one year, spent a little money the next year to take care of the foundation, and the next year built the first story, and the next year the second story, and a few years later put a roof on the building?

How could you expect repayment of your capital from rentals received on property handled in that manner? That is what we are doing on our reclamation projects. It seems to me that it is not economy and that it is shortsighted, and that we ought to at least go ahead and complete the work we are obligated to perform and that we have undertaken and have under way, and handle it in a businesslike manner.

As far as the repayments are concerned or any just charges that the chairman has referred to for tuition for children, I am willing to go with him all the way in regard to that. I am not asking something for nothing. I am only asking that we handle public business as we would handle our own private affairs. I have told you time and again of the fertility of the soil, of the salubrious climate, transportation, hard-surface highways, near-by schools, and business facilities. This appropriation ought to be made now and the work on the Satus project continued at this time.

Mr. CRAMTON. Mr. Chairman, the hearings disclose that I asked Mr. Reed, the chief engineer of the Indian Service, about this amount of \$50,000 which is the appropriation for the

current year for this item, which is the Satus unit of the Wapato project. I asked Mr. Reed these questions:

Mr. CRAMTON. Does \$50,000 for construction, operation, and maintenance complete the Satus unit?

Mr. REED. Yes, sir.

Mr. CRAMTON. So now it is just a question of operation and maintenance?

Mr. REED. Yes, sir.

Mr. Reed says the current appropriation is going to complete the Satus unit. Evidently there is some addition to the Satus unit involved in the gentleman's amendment.

Mr. SUMMERS of Washington. Will the gentleman yield briefly?

Mr. CRAMTON. I think the orderly way would be to have the gentleman come before us and give us the information if he wants an additional project.

Mr. SUMMERS of Washington. May I make just a brief statement?

Mr. CRAMTON. Yes.

Mr. SUMMERS of Washington. There are 40,000 acres involved, but there is one part of that unit, one field, so to speak, that they have put water on.

Mr. CRAMTON. Are the conditions so flourishing in the State of Washington in agriculture that there is any need to hurry to put thousands of additional acres into cultivation?

Mr. SUMMERS of Washington. This does not bring them into cultivation at this time.

Mr. CRAMTON. Oh, no; but it takes the money out of the Treasury.

Mr. SUMMERS of Washington. With the best they can do, it will require several years.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Washington. The amendment was rejected.

The Clerk read as follows:

Fort Bidwell Indian School, California: For 100 pupils, \$25,000; for pay of superintendent, drayage, and general repairs and improvements, \$7,000.

Mr. RAKER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. RAKER: Page 42, after line 8, insert:

"Greenville Indian School, California: For 100 pupils, \$25,000; for pay of superintendent, drayage, and general repairs and improvements, \$15,000; for repair and reconstruction of school buildings damaged and mostly destroyed by reason of fire on December 19, 1921, \$60,000, to be immediately available; in all, \$100,000."

Mr. CRAMTON. Mr. Chairman, I reserve a point of order on the amendment. I have not had time to read it all, but as I understand it, the amendment provides for construction of new buildings and for the opening of a school that is now closed.

Mr. RAKER. The school is practically nonactive at the present time. The \$60,000 for building is for the reconstruction of a building which was mostly destroyed by fire, but the foundation is there. This is on the point of order, I take it, Mr. Chairman?

The CHAIRMAN. Yes.

Mr. CRAMTON. Your item is for repair and reconstruction of school building damaged and mostly destroyed by fire, \$60,000?

Mr. RAKER. Yes.

Mr. CRAMTON. I withdraw any point of order, Mr. Chairman.

Mr. RAKER. Mr. Chairman, the facts of this particular case are that the school was in operation for a number of years, well located so far as providing for the Indian children was concerned. Within 1 mile to 20 miles the parents of practically all these children live. The school owned a very splendid tract of land upon which were 28 buildings still remaining. They obtained through the Forest Service 320 acres of timberland adjoining for experimental purposes. Six years ago we obtained sufficient appropriation to procure a farm upon which we raised hay and stock that provided meat and milk for the school. We had it so that it was really giving an education to these young men and women attending the school. At the time designated the fire came and destroyed the one building used for administrative purposes and a dormitory for the boys at one end and the girls at the other end and a kitchen. The other buildings are good. I was there last year and again this year. The children were moved

from that school, some to Salem, Oreg., many miles away in another State, some went to the northern part of the State of California, a number were sent to the Carson Indian School in Nevada, a long distance away, and some were sent clear to the Sherman School in the southern part of the State of California. A number, some 25 or 30, got nothing. I have been to the Sherman Institute in southern California, and to the others. Much has been said about their being splendid schools, but I want to say to you from personal observation that so far as the Indian schools are concerned that where a boy or girl can go to school at home where he can at intervals be in the environment of his own people, inhabitants who are building up the country, it is much better for that boy or girl than it is to go to a large institution all fenced in and 90 per cent artificial; because when that pupil leaves the institution after having been there 5 to 10 years he becomes isolated from his own people and does not take up the ways of the white man as he ought to. You get the schools close to the homes and you get results.

Now, this school can be replaced and put in shape for the amount designated. Everybody in the community asks for it to be done, because of the good it will do.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. RAKER. Mr. Chairman, I ask unanimous consent for three minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. RAKER. I have sought every means I could to get this school reopened. Had I been on the ground at the time it never would have been closed, because they saved practically all of the dishes and bedding, and the boys had a building where they could have stayed and the girls another building on the other side, and within two months they could have got the necessary appropriation to reconstruct the building at the cost price, because they were ready to do it and are willing to do it now. I hope the chairman will, out of the goodness of his great heart, not object to letting this school be reopened. It will help the Indians out; it will not help me. It makes no difference who represents the school. If we could have had the chairman of the subcommittee and the chairman of the Indian Affairs Committee visit that country, I know they would have unanimously voted for this item. We have done our best to get the members of that committee to go to that territory, where they could see the national park and the school. We have offered to pay the expenses, railroad and otherwise. It is some distance from the railroad. We had one gentleman come there last summer, and it did a world of good. I hope the chairman of the subcommittee will allow the item to go in.

Mr. CRAMTON. Will the gentleman yield?

Mr. RAKER. Certainly.

Mr. CRAMTON. Is this amendment for the Greenville Indian School or for the national park?

Mr. RAKER. For the Greenville Indian School. We have not come to the park yet.

Mr. CRAMTON. Mr. Chairman, there are two reasons why we ought not to do this, and the gentleman knows that my opposition is based upon the necessities of the case. In the first place, it is not desirable to open the school anyway. We prefer a few large boarding rather than more small schools, where the overhead is greater and the facilities less. The second reason is that when I was in Arizona a year ago I visited various schools, and I met an inspector who was familiar with the conditions in the various towns where there were Indian schools. I was very much pleased at Riverside, where through the liberality of the community they gave every facility of the high school to any Indian pupil and in the junior college without tuition, no matter from what State they came. The same is true in Phoenix, where they are received in the churches and in the homes of the town in a way that I thought was splendid. In response to my inquiry I learned that the only community in this section of several States where there was an Indian school where the Indian pupils were discriminated against by the people of the town was in Greenville, Calif., where they were welcome neither in the homes nor in the churches or the local schools, and I am against opening or reopening an Indian school in any town anywhere where that situation prevails.

Mr. RAKER. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. RAKER. Mr. Chairman, in reply I say to the gentleman that that inspector was mistaken. There is no finer com-

munity anywhere, there are no finer schools nor better churches, nor more well attended by the higher class of citizens, nor any who recognize the rights of the Indians any better than do the people of Greenville and the people in that valley and Plumas County. The gentleman must remember that it is not very long since when the last trouble occurred with the Indians in that part of the State, and it took some time for the people to get over the feeling engendered by that trouble. A short distance from there, over on Honey Lake, the Pearson family were killed, and it took a long time for those people to get over that. They feel that these Indian children ought to go to school by themselves and not be mixed up with the whites, and with a good deal of that I am in hearty accord. We get better results now from Indian pupils who are segregated in that way than by mixing them up with the whites, boys and girls together.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California.

The amendment was rejected.

The Clerk read as follows:

Sequoyah Orphan Training School, near Tahlequah, Okla.: For the orphan Indian children of the State of Oklahoma belonging to the restricted class, to be conducted as an industrial school under the direction of the Secretary of the Interior, \$59,850; for repairs and improvements, \$6,500.

Mr. HASTINGS. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. HASTINGS: Page 44, line 20, after the semicolon, insert "for the enlargement of the school building so as to provide four additional classrooms, not to exceed \$20,000."

Mr. HASTINGS. Mr. Chairman, this is an orphan training school and is the only school of that kind in the United States. It is the only school where orphan children alone may attend. It is true that orphan children can go to other schools, but none but orphans can go to this school. Recently, within the last two or three years, there have been some additional dormitories erected, paid for out of the Cherokee funds. All of the Cherokee funds have been donated for the upbuilding of this school. They now find it in a crowded condition, where they do not have sufficient classrooms for the pupils. If this amendment is adopted, the idea is to raise the building up so that four new classrooms may be added, and thereby provide sufficient facilities to take care of the present attendance at the school. The school has a capacity of 250 children, and there were 246 in attendance there the other day when my colleague from Oklahoma [Mr. CARTER] and myself visited the school. I hope the amendment will be adopted.

Mr. CARTER. Mr. Chairman, I had an opportunity to visit the school within the last month, and I find this situation: The dormitory capacity had been increased until the school is able to accommodate from 250 to 275 children. On the day that I was there they had an attendance of 246 children and only 4 ordinary-sized classrooms, which made over 60 children to a classroom. The school is in a crowded condition. When I came back I called the attention of the committee to this, but not having the data at hand at that time as to what the cost might be, the chairman of the subcommittee, the gentleman from Michigan [Mr. CRAMTON] very kindly suggested that the matter go over and that we offer the amendment on the floor of the House. It is a very well-conducted school, serving a very splendid purpose, because no one but orphan children attend. In my opinion the additional classrooms can be used to very good advantage. As I saw the school, it was entirely too crowded for efficient instruction to be given.

I really think the amendment ought to be incorporated in the bill. It is an increase of \$20,000, which will be used for raising the school building, in order that four more classrooms may be added above those now being used. As far as I am concerned, I hope the amendment will be adopted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma.

The amendment was agreed to.

The Clerk read as follows:

Chemawa, Salem, Oreg.: For 850 Indian pupils, including native Indian pupils brought from Alaska, including not to exceed \$1,000 for printing and issuing school paper, \$191,250; for pay of superintendent, drayage, and general repairs and improvements, \$17,000; *Provided*, That except upon the individual order of the Secretary of the Interior, no part of this appropriation shall be used for the support or education at said school of any native pupil brought from Alaska after January 1, 1925.

Mr. HAWLEY. Mr. Chairman, I move to strike out the last word for the purpose of asking a question concerning the proviso at the top of page 45. This school at Chemawa has an attendance now of 900 students, of which a large number come from Alaska. For 40 years the children of the Indians of Alaska have been admitted to this institution, and in the last 8 years some 821 different Indian children have come from Alaska to the school. They have proven to be very good students and have taken unusual advantage of the opportunities afforded. The people of the vicinity, the various civic organizations of Salem, which is within 5 miles of the school, are very much interested in these children, because of the excellence of their work and of their character. They have made inquiry as to why the committee proposes now to exclude these children from the school, to which they have been admitted for some 40 years. It has been stated that it is the intention of the committee to provide for the education of Alaskan children in Alaska without bringing them away from their native place. What is the purpose of the committee in making this change?

Mr. CRAMTON. Mr. Chairman, the school at Chemawa is one of our best Indian schools, I am advised, although I have not visited it. There is a demand for facilities there greater than we can accommodate. There are Indian children from the United States that could be placed there to the full capacity of the school without the Alaska children. The information that has come to the committee for the last three or four years with reference to the Alaska children is that bringing them from Alaska down to Oregon to educate them, with the idea of returning them to Alaska, is not practical. The results do not work out well. We simply unfit them for return to their people in Alaska. To a considerable degree the industrial training in Oregon which they receive does not fit them for practical work in Alaska. The health conditions surrounding them are not the best because of this change.

Mr. HAWLEY. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. HAWLEY. Of the 821 children within the last eight years that have come to the Chemawa school, only 16 have been sent to institutions for tubercular affliction, and the health of the children is good. Less than 2 per cent of the children have been afflicted with tuberculosis, and they probably had it before they came here.

Mr. CRAMTON. My impression is that the gentleman from Idaho, a member of the subcommittee [Mr. FRENCH], who has given some attention to this, visited the sanatorium at Fort Lapwai, Idaho, and found quite a lot of Alaska children there who had tuberculosis—

Mr. HAWLEY. There were only 16—

Mr. CRAMTON. Perhaps they had it when they came. But, however that may be, the committee has felt the other reasons sufficient—the need for the school to take care of the Indian children for which it had been built, the effect of the industrial training in Oregon on Alaska children, their whole education unfitting rather than fitting them for their duties among the people of Alaska. And the idea of the committee was that it would be better to provide educational facilities for them in Alaska. We made some start last year. There is probably \$50,000 or over in the bill this year for construction and extension of industrial schools to take care of those.

But the limitation put in last year was not a very radical one. We did not desire to disturb those children now in the school and until the 1st of next January they have been permitted to come in. The committee desires that no more should come from Alaska, and gradually that the Alaska attendance at this school shall disappear, and in the meantime we are striving to provide ample facilities for their education in Alaska.

Mr. HAWLEY. Will the gentleman answer this question: These children have proven such excellent students; that is, they have taken advantage of the opportunities they have and we are interested in them by reason of the fact of their proximity and in the welfare of all such children in Alaska. Is it the intention of the committee to provide in Alaska—

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAWLEY. I ask for two minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. HAWLEY. Is it the intention of the committee to provide for education of the children in Alaska and to have suitable facilities as will approximate those at Chemawa?

Mr. CRAMTON. It is the desire of the committee, and the program that committee has entered upon is, to provide facilities for them in Alaska to best fit them for their future in Alaska. They may not be identical with those at Chemawa.

Mr. HAWLEY. Will it be as efficient?

Mr. CRAMTON. They will be more efficient for the benefit of their future work in Alaska. There is one thing we are doing now. We have a ship—the *Boxer*—that makes the different ports clear up to the Arctic Circle. Now, one use that is made of it is as a floating school in the winter. We have a limited number of boys who are being trained in the care and repair of gasoline engines that are so largely used. These boys are trained in the making of repairs and it is a very valuable training that is given them on the *Boxer*, and they have a more practical training than can be given elsewhere.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAWLEY. I withdraw the pro forma amendment.
The Clerk read as follows:

The Secretary of the Interior is authorized to withdraw from the Treasury of the United States, in his discretion, the sum of \$35,000, or so much thereof as may be necessary, of the principal sum on deposit to the credit of the Chippewa Indians in the State of Minnesota arising under section 7 of the act of January 14, 1889, and to expend the same for payment of tuition for Chippewa Indian children enrolled in the public schools of the State of Minnesota.

Mr. SMITH. Mr. Chairman, I move to strike out the last word for the purpose of asking a question with reference to the item on page 32 providing for maintenance and operation of the Fort Hall irrigation system, Idaho, \$15,000. The appropriation for the current fiscal year is \$49,000, reimbursable. I received a telegram this morning from the Pocatello Water Users' Association, which is as follows:

POCATELLO, IDAHO, December 5, 1924.

Hon. ADDISON T. SMITH,

House of Representatives, Washington, D. C.

Reports indicate appropriation maintenance Fort Hall project, \$15,000. Total maintenance cost approximately \$1.50 per acre. Indian area not paying on acreage basis. Thirty-two thousand acres require maintenance appropriation \$48,000. Water users protest against paying maintenance cost for Indian lands.

POCATELLO WATER USERS' ASSOCIATION.

I wish to have the chairman explain the committee's reason for reducing the appropriation from \$49,000 to \$15,000. Is the department planning some new policy that is being made applicable to Indian irrigation projects?

Mr. CRAMTON. In my preliminary statement on Wednesday, page 84 of the RECORD, I go into that situation somewhat. The gentleman from Idaho is correct. It is the policy of the committee, taking in a number of reservations—Yuma, Fort Hall, Flathead, Blackfeet, Crow, Confederated Utes, and Wind River. With reference to Fort Hall, our best information is that there is Indian owned and not leased 15,000 acres, of which 7,249 acres are cultivated. White owned, 14,760 acres, of which 3,822 acres are cultivated; white leased, 19,446 acres. Total, 52,010 acres. There is a total amount of 34,000 acres white owned and white leased land. The assessment sought to be spread against that 34,000 acres would be \$42,690, but the estimated amount for operation and maintenance is \$40,000.

We did not want the whites to take care of the cost of irrigation for the Indians, and we did not desire the Treasury to take care of the cost of operation and maintenance of irrigation on the white land, and therefore we made the recommendation. From the information we have at hand that the Indians had about one-third of the land properly assessable and should pay about one-third of the cost of operation and maintenance, and taking \$40,000 as the cost, we placed \$15,000 in the bill as being the Indians' share.

Mr. SMITH. But if the Indians do not pay their share of these charges, are any portion of them imposed on the white landowners?

Mr. CRAMTON. That is a matter between the Treasury and the Indians. But there will be \$15,000 appropriated from the Treasury to take care of the third that belongs to the Indians. Now, if the whites will pay \$30,000 or less to take care of their two-thirds, then the department will have enough to operate and maintain the project. The trouble has been that the whites have not been paying their share.

Mr. SMITH. But under the proposed plan of the committee the white landowners would be required to pay operation and maintenance in advance.

Mr. CRAMTON. That is not the plan of the committee. That is the law and the order of the department. The order of the department fixing all of these charges under the act of 1914 provides for the payment in advance.

Mr. SMITH. Is that law being enforced?

Mr. CRAMTON. That is what we are trying to bring about. The order of 1914 fixes the authority of the department. We are trying to make it a little more practical and require that these charges be paid by the whites for the operation and maintenance of the white-owned land. We want them to pay their share, but not to pay the Indians' share.

The CHAIRMAN. The time of the gentleman from Michigan has expired. The pro forma amendment is withdrawn. The Clerk will read.

The Clerk read as follows:

For aid to the common schools in the Cherokee, Creek, Choctaw, Chickasaw, and Seminole Nations and the Quapaw Agency in Oklahoma, \$155,000, to be expended in the discretion of the Secretary of the Interior, and under rules and regulations to be prescribed by him: *Provided*, That this appropriation shall not be subject to the limitation in section 1 of the act of May 25, 1918 (40 Stat. p. 564), limiting the expenditure of money to educate children of less than one-fourth Indian blood.

Mr. HOWARD of Oklahoma. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HOWARD of Oklahoma: Page 47, line 13, strike out "\$155,000" and insert "\$578,000."

Mr. HOWARD of Oklahoma. Mr. Chairman and gentlemen of the committee, one of the most pathetic and yet one of the most ridiculous things that I know of is to see some fellow who has been elevated to some office, either through political preference or otherwise, writing a report about how much good he has done for the Indian, when in most instances the fellow making the report never saw an Indian except the one that stands in front of a cigar store until he received a political preferment, and in most other instances he is only interested in the Indian to the degree that he draws his salary.

This situation, Mr. Chairman, is especially true with respect to the Five Civilized Tribes in the State of Oklahoma, and I want to say without fear of contradiction that in the manner of the education of the Indian there is no greater waste, considering the amount involved, than there is in the expenditure of the moneys boasted of by the Indian Bureau in referring to what it does for the Indians of the Five Civilized Tribes.

In the first place, I want to say, Mr. Chairman and gentlemen of the committee, that I have lived among the Indians for 33 years, and I challenge any man to present to me a case of an Indian in the Five Civilized Tribes who has been under the surveillance and supervision of the Indian Bureau who is to-day any further advanced toward caring for himself than he was 33 years ago. On the other hand, where we have turned these Indians loose, where we have given them an opportunity to get out from under these self-styled "guardian angels," in just so many cases, as in an equal number of instances with respect to the white men of Oklahoma, those Indians have made good and have become good citizens.

I want to charge, Mr. Chairman, that the Indian Bureau, in so far as the Five Civilized Tribes are concerned, does not in anywise do what they claim to the Congress of the United States that they do in the matter of educating the Indians; and I will guarantee to this Congress that if you will give to the State of Oklahoma one-half of the money you spend on Indians in the Five Civilized Tribes for educational purposes we will place them in better schools than the Government furnishes and educate them among our white people, where they should be and where within seven years they must be educated.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield?

Mr. HOWARD of Oklahoma. Yes.

Mr. CRAMTON. If I understand the gentleman's proposition, it is interesting; but does he say that if we will give him half—

Mr. HOWARD of Oklahoma. Half of the \$680,000.

Mr. CRAMTON. About \$77,000?

Mr. HOWARD of Oklahoma. It is \$680,000.

Mr. CRAMTON. That is something else.

Mr. HOWARD of Oklahoma. I will get to that.

The Interior Department does not do for the Five Civilized Tribes what they claim they do. In that connection I want to call your attention to the table on page 83 of the CONGRESSIONAL RECORD of December 3, 1924. This report sets out that in the Five Civilized Tribes of Oklahoma there are 26,979 children of school age, and then it sets out—

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. HOWARD of Oklahoma. Mr. Chairman, I ask unanimous consent to proceed for five more minutes.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent for five additional minutes. Is there objection?

There was no objection.

Mr. HOWARD of Oklahoma. And then it sets out, Mr. Chairman, that there are in these Indian schools 19,605 students.

Now, Mr. Chairman, I hold in my hand here a copy of the report made by the United States Commissioner of Education in 1922, in which it is shown that instead of 19,605 of these children being in these schools supported by the Government, through tribal and governmental funds, there were, as a matter of fact, 3,584 of those Indians.

Mr. HASTINGS. Mr. Chairman, will the gentleman yield?

Mr. HOWARD of Oklahoma. Yes.

Mr. HASTINGS. I heard the gentleman make some statement about the number of unrestricted Indians in remarks that he made before to-day. I think the misapprehension as to the figures arises from this fact, that the members of the Five Civilized Tribes were made citizens of the United States under the act of March 3, 1901. I think the Commissioner of Education or the Census Bureau does not make a report of all of those of Indian blood, whereas the Indian office or those who are charged with disbursing this money for the benefit of Indian schools take a census of all of the Indians of every degree of blood, and therefore the figures representing nineteen thousand-odd children are approximately correct, whereas the Commissioner of Education or the Census Bureau in taking the census does not take note of the great many Indian children who are not carried on the rolls, who are not restricted as of one-half Indian blood. I think that is the proper explanation.

Mr. HOWARD of Oklahoma. Yes; that is the camouflage of the Indian Bureau, when, as a matter of fact, the condition does not exist. But I refer to the fact that according to the report there are only 3,584 Indian children in the Indian schools maintained by the Government in the Five Civilized Tribes from governmental and tribal funds.

Now, Mr. Chairman, I find that the Government spent in 1922, \$680,000 for educating 3,584 of these Indian children, while the State of Oklahoma, according to the report of the Commissioner of Indian Affairs, is educating 21,245 of these Indian children, and they very liberally, so they think, appropriate to us \$150,000.

Now, Mr. Chairman, the table to which I refer says there is a total capacity in all schools for 18,095 children provided by the Government of the United States in Oklahoma. I want to ask where those schools are. I want to ask data from the Commissioner of Indian Affairs as to how many of those children are in their schools.

The facts are, Mr. Chairman and gentlemen of this committee, that those children are being educated, 21,000 of them, by the State of Oklahoma; but in order to camouflage this Congress and secure \$680,000, most of which they are wasting in the State of Oklahoma, they carry in the table presented to you a statement which would lead you to believe that they are educating 18,095 of these Indian children.

Now, Mr. Chairman, to get back to my amendment. I am only asking for justice for the State of Oklahoma. According to the report of the Commissioner of Education we in Oklahoma could have collected in school taxes \$1,283,000 last year had it not been for the agreement which the Government is carrying out with the Indians, and properly so, because they made that agreement. But I maintain, Mr. Chairman, that the Government of the United States should not impose upon the citizenship of the State of Oklahoma by asking them to educate 21,245 children while they, in carrying out their agreement with the Indians, keep that land off the tax rolls.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. HOWARD of Oklahoma. Mr. Chairman, I ask for three more minutes.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent to proceed for three additional minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. HOWARD of Oklahoma. Now, Mr. Chairman, I have figured this thing from the basis of the \$680,000 spent by the Government, and deducting that from the \$1,283,000 which the State could collect on these lands for school purposes, and it does seem to me but fair and it does seem to me but justice that this Congress should make up the difference, because the white children of Oklahoma, through this condition, are being kept out of school from one to three months each year and the taxpayers of Oklahoma are compelled to levy from \$400,000 to

\$650,000 extra in State funds upon themselves in order to carry on these schools and educate these children which the Indian Bureau tries to camouflage you into believing it is educating. It does seem to me Congress should make up the difference to us, and that difference is \$578,000, including the \$155,000 carried in this bill. I ask this on the recommendation of the Bureau of Education of the Interior Department, because in its report it said:

The school system should be organized so that the Indian youth shall ultimately be educated in the public schools of the State. To this end the responsibility of the Federal Government will gradually decrease, and that of the State will increase, until the schools are entirely controlled and maintained by the State. In view of the fact that the trust periods on Indian lands are to expire within 5 to 10 years, unless extended by Congress, it is important that the State shall make all possible effort to improve the rural schools of the Indian districts, incorporating in the curriculum those phases of education which are vitally related to home life, so that the Federal Government may resign its responsibility in favor of the State with the assurance that satisfactory standards of education will be maintained.

The Federal Government should provide liberal financial aid for the education of Indian children in the public schools during the trust period.

Mr. BLANTON. Will the gentleman yield?

Mr. HOWARD of Oklahoma. Yes.

Mr. BLANTON. The gentleman has in his district in Oklahoma a magnificent State university?

Mr. HOWARD of Oklahoma. Not in my district.

Mr. BLANTON. At Norman? May I ask the gentleman whether any of these Indian children are attending that university?

Mr. HOWARD of Oklahoma. There are Indian children in every school we have in Oklahoma.

Mr. BLANTON. I mean in the university.

Mr. HOWARD of Oklahoma. Yes.

Mr. BLANTON. Does the State of Oklahoma receive any remuneration for those children?

Mr. HOWARD of Oklahoma. No, sir; except the \$155,000 included in this bill for the education of 21,245 children. Gentlemen, I ask you to do justice to the State of Oklahoma.

The CHAIRMAN. The time of the gentleman from Oklahoma has again expired.

Mr. CRAMTON. Mr. Chairman, it is not for me to argue with the gentleman from Oklahoma, as well informed as is the gentleman who has just spoken as to what is or is not in Oklahoma, but I do think that a gentleman as eminent as the gentleman from Oklahoma, before he would twice in one day challenge the accuracy, and not only the accuracy but the good faith of the Indian Bureau, would want to be sure that he was doing justice to those officials.

Now, he has claimed that they are misleading you about the number of children cared for in Indian Government schools in Oklahoma. Let me read to you from the hearings with respect to this particular item, page 936, and available to the gentleman from Oklahoma. It is a statement from Mr. Meritt on this item of \$145,000:

The total number of eligible children in the Five Civilized Tribes is 26,979, not including freedmen. Of these there were enrolled in the public schools about 16,563; in Government schools, about 2,097; in contract and noncontract schools, 945, making a total enrollment of 19,605.

Nobody but the gentleman from Oklahoma has any idea that the Indian Service has been trying to claim there were 19,000 children in Government schools in Oklahoma.

But the amendment proposed, what is it? The gentleman wants a total of some \$680,000 to be turned over to the State of Oklahoma to educate a total of 19,605, \$30 per capita for all of them, in addition to what we are providing in our other schools. I do not understand that his amendment would provide schooling for one additional child in Oklahoma, but it would transfer \$500,000 more from the Treasury to the coffers of Oklahoma than does this bill.

Mr. HOWARD of Oklahoma. Will the gentleman yield?

Mr. CRAMTON. Yes.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. HOWARD of Oklahoma. Mr. Chairman, I ask unanimous consent that the gentleman from Michigan have two more minutes.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that the gentleman from Michigan [Mr. CRAMTON] have two additional minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. HOWARD of Oklahoma. Mr. Chairman, I reiterate what I said relative to the table on page 84, which states that the total in school is 19,695 and the total capacity of all schools is 18,095, evidently leading anyone who had no opportunity to attend the hearings of this committee, as was the case with most of us, because you will remember they were ready to report when we arrived in Washington, to the conclusion that they had facilities for 18,095 children out there, when they have not facilities for one-third of them.

Mr. CRAMTON. Mr. Chairman, this table has nothing to do with the question of whether they are in Government schools or State schools. It is a table of the number of Indian children who are in school. In another paragraph there is an appropriation of \$350,000 to pay tuition in the public schools, and I think everyone agrees who is familiar with the question that these Indian children are better off, where it is possible to do so, if they are in the public schools with the white children, and so we are constantly making that appropriation larger.

This table has nothing to do with the question of what kind of school they are in. It is the number that are in school, and if there is an error in it, I think gentlemen might better blame me than the Indian Service, because the table is a condensation which I prepared of much more elaborate tables which appear in the Indian Office reports, and the information I have just referred to absolutely acquits the Indian Bureau of any misrepresentation which the gentleman has twice to-day charged them with.

Mr. HOWARD of Oklahoma. Yes; and he is going to charge them with some more before he gets through and prove it, too.

Mr. CRAMTON. The gentleman wants to be just, I know.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma.

The question was taken; and on a division (demanded by Mr. HOWARD of Oklahoma) there were—ayes 10, noes 26.

So the amendment was rejected.

The Clerk read as follows:

For necessary expenses in connection with oil and gas production on the Osage Reservation, including salaries of employees, rent of quarters for employees, traveling expenses, printing, telegraphing and telephoning, and purchase, repair, and operation of automobiles, \$58,400, to be paid from the funds held by the United States in trust for the Osage Tribe of Indians in Oklahoma.

Mr. CRAMTON. Mr. Chairman, the gentleman from New York [Mr. SNYDER], chairman of the Committee on Indian Affairs, has an amendment to this paragraph. He is on his way over now, and I ask unanimous consent that this paragraph may be passed until the gentleman from New York arrives.

The CHAIRMAN (Mr. SNELL). The gentleman from Michigan asks unanimous consent to pass this paragraph temporarily. Is there objection? [After a pause.] The Chair hears none.

The Clerk read as follows:

For expenses incurred in connection with visits to Washington, D. C., by the Osage Tribal Council and other members of said tribe, when duly authorized or approved by the Secretary of the Interior, \$10,000, to be paid from the funds held by the United States in trust for the Osage Tribe.

Mr. CRAMTON. Mr. Chairman, I ask now that we return to the item on page 58 concerning the Osage Indians.

Mr. SNYDER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. SNYDER: Page 58, after line 18, insert a new paragraph, as follows:

"For the erection of a monument under the supervision of the Secretary of the Interior on the Osage Indian Reservation in Pawhuska, Okla., as a memorial to Indians of that tribe who gave their lives for their country in the recent war with Germany, \$25,000, payable from the tribal funds of the Osage Indians."

Mr. SNYDER. Mr. Chairman, I do not think it is necessary to say anything with reference to this proposed amendment. Recently I was in Pawhuska, on Indian matters, and the council of the Osage Tribe were in session at that time. They requested me to present this amendment. I have found in my experience with the Osages that they are a very patriotic people. They were among the first to send their sons to war. They have ample funds; in fact, more money than they know what to do with, and they want this appropriation in order to

set up in their own country a monument to commemorate the activities of their own people in the Great War.

Mr. CARTER. And it is to be paid out of their own funds?

Mr. SNYDER. Yes; from their own funds. It is not a charge on the Government at all. I would be very pleased, of course, to see the amendment adopted.

Mr. LaGUARDIA. Will the gentleman yield?

Mr. SNYDER. Yes.

Mr. LaGUARDIA. Does the gentleman provide in his amendment that the design shall be by an American artist?

Mr. SNYDER. The amendment does not call for that; but it would be rather unreasonable to expect the Indians of this country would go outside of the country to get an artist to design their own monument.

Mr. LaGUARDIA. That happened very recently in this country, and that is why I inquired.

Mr. HOWARD of Oklahoma. Mr. Chairman, I represent as a Member of Congress practically all of the Osages. I want to say I am pleased at the cooperation of the chairman of the Committee on Indian Affairs with the Osage Indians in introducing this amendment providing for the building of this monument.

I dare say there was no race of people whose sons made a better record on the battle field than did the sons of the Osage Tribe. I think it is fitting that the Osages themselves want to erect this monument to the memory of those of their tribe who fought for their country in the Great War.

In passing I also want to call attention to the fact that while it will not be commemorated by the building of this monument, yet the great Osage people with their great wealth exceeded in many instances, and always equaled, in the exemplification of the spirit of patriotism, any other citizenship, and the remarkable manner in which they subscribed their funds for the benefit of the Government at the time of war was a precedent and an act of which the Osages and the Nation should certainly be proud.

Mr. SNYDER. Will the gentleman from Oklahoma permit an interruption?

Mr. HOWARD of Oklahoma. Yes.

Mr. SNYDER. I know the gentleman will be pleased to have inserted in his remarks the fact there are about 2,200 Osages still on the rolls, in various ways, and there were 144 Osage Indians who served in the late war, and the per capita subscription of the Osage Indians to Liberty bonds was \$1,500.

Mr. HOWARD of Oklahoma. I thank the gentleman, and I want to say that one of the prettiest pictures I saw during the war was of one of these old Osage women, past 80 years of age, holding a great barbecue and feast at her home for the purpose of raising funds to help with the war work.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. SNYDER].

The amendment was agreed to.

The Clerk read as follows:

PATENT OFFICE SALARIES

For the Commissioner of Patents and other personal services in the District of Columbia in accordance with "The classification act of 1923," \$2,370,000: *Provided*, That of the amount herein appropriated not to exceed \$25,000 may be used for special and temporary services of typists certified by the Civil Service Commission, who may be employed in such numbers, at \$4 per diem, as may, in the judgment of the Commissioner of Patents, be necessary to keep current the work of furnishing manuscript copies of records.

Mr. LaGUARDIA. Mr. Chairman, I move to strike out the last word for the purpose of asking the gentleman from Michigan, the chairman of the committee, a question. I am pleased to state that there has been a marked improvement in the conduct of the Patent Office within the last two or three years. What I would like to ask the gentleman is, Has there been any provision made for making the responsible officers of the various divisions and the technical positions more attractive? I understand that young men get positions, remain there a few years, and, with nothing to look forward to, they leave the Government service for higher compensation in private offices. The result is that, instead of building up a permanent skillful and specialized personnel, the Patent Office becomes a mere training school. It seems to me that while the clerical force has been provided for under the present appropriation, it might be well if some thought was given to the reorganization of the office in regard to heads of divisions and technical men with a view of making the places more attractive and providing proper promotions and better remuneration, so as to build up a skilled and trained personnel in that office. Surely in the

greatest Patent Office in the world we should provide properly for the men who have such responsible work.

Mr. CRAMTON. I will say that within the last two years there has been an increase of about 50 per cent in the cost of administration in the Patent Office, very largely due to the salary increase not passed by Congress and approved February 8, 1922. At that time the cost was about one and a half million dollars, and at the present time it is almost two and a half million dollars. That is almost entirely due to the increase of salaries; not entirely, because there has been some increase in the personnel. So that at the present time we have probably gone about as far as we should in that direction. The gentleman will recognize that in any technical branch, and especially one like the Patent Office, where the Patent Office is the court that finally passes on the issuance of patents, bright and competent men who go into the service and become technical experts, by reason of the very training that they secure there, will attract salaries outside higher than the Government can pay, and therefore they will accept the outside position, taking them from the Government to some extent.

Mr. LA GUARDIA. Some of these men who become specialists I believe receive salaries of four or five thousand dollars, and I can understand how they would receive calls from outside with higher salaries. But if we could increase the pay of these men we would build up a permanent force that would expedite business and make it worth while for them to remain, as they do in the Army.

Mr. CRAMTON. The difference between this and the Army is that, generally speaking, the experience gained in the Army, outside of the Engineer Corps, is not a training that attracts offers of increased pay from outside. Then there are some other nice things about the Army; they are trying to retire them before they reach the age of 50, so that nobody is going to leave the Army.

But that is apart from the subject. We can not expect to put the Government salaries so high that no one will receive offers of a larger salary from outside.

Mr. SNELL. If the gentleman will yield, I would like to ask him how is the current work in the Patent Office?

Mr. CRAMTON. The current work is greatly improved, and we are told that with the temporary roll carried in the bill by the 1st of July, 1926, the work of the office will be current. That is to say, every application that comes in will be taken up for consideration with reasonable promptness and made practically current. There will still be quite a large number of applications pending, but the work will be current at that time.

Mr. WATSON. Will the gentleman yield?

Mr. CRAMTON. Certainly.

Mr. WATSON. This is the only office where they have made sufficient money to pay the expenses. Since the increase of the salaries, has it developed a situation where they are making more money or are they making less?

Mr. CRAMTON. Less; but still the situation is this: A more rapid disposition of the cases has increased the receipts, but the increase in receipts is not as great as the increase of expenditures. For the last fiscal year there is about \$214,000 deficit. That is not a very fair comparison, because a lot of business disposed of came in prior years. On the whole they have a surplus of about \$8,000,000 to their credit.

Mr. WATSON. As I recall, in some years past they have returned something like \$300,000.

Mr. CRAMTON. Yes; and as soon as we get caught up again and running on an even keel they will be able to take care of their expenses again.

The Clerk read as follows:

For temporary additional employees in the Patent Office at rates of compensation in accordance with "the classification act of 1923," such employees to serve without annual or sick leave allowance and to be appointed under the provisions of the civil service laws, rules, and regulations for the purpose of making current the work of the Patent Office, \$191,000.

Mr. HUDSON. Mr. Chairman, I move to strike out the last word, for the purpose of asking the chairman of the subcommittee whether the language in the paragraph is new in respect to the employment of temporary help, whether it has been carried before, where the annual and the sick leave allowance is not granted?

Mr. CRAMTON. That has generally been the policy with these temporary rolls. For instance, take a technical roll of this kind. It was a two-year program that we entered upon. It would take some little time to get the appointees selected through their proper examinations. Then it would take sev-

eral months to get them organized so as to produce, and it does not seem necessary or desirable that those who are on the temporary roll should be given these very generous sick leaves and annual leaves that occur generally in the civil service. In these temporary rolls we have generally exempted that. We did it in the Pension Office on a similar temporary roll a year ago.

Mr. HUDSON. I can understand the justification for taking out the annual leave, but it seems to me that if these temporary employees who are to be there for at least two years—

Mr. CRAMTON. Not two years, but it was a total of two years.

Mr. HUDSON. Then a year at least. I think that those who are serving under the civil-service rules and who are appointed under civil-service rules ought not to be penalized because the hand of misfortune brings sickness upon them. I think they ought to have 30 days' sick leave. I ask again if this is the usual practice?

Mr. CRAMTON. It is; and I think this sick-leave business has been abused. When putting on an emergency force like that it is not contemplated to have it disorganized by people taking the maximum sick leave.

Mr. HUDSON. Is it the thought of the chairman that this ought to be continued down through the general classification act? I refer to the cutting out of the sick leave.

Mr. CRAMTON. I do not know that I need pass upon that. That is out of my jurisdiction. I do think that there is a tremendous drain on the efficiency of the departments through the practice of a good many employees taking the maximum sick leave. I understand the departments have been trying to restrict that somewhat.

Mr. LA GUARDIA. Mr. Chairman, I move to strike out the last two words. I notice that the report shows that the temporary typists are being paid \$4 a day and are required to turn out 10,000 words, for which the Government receives \$10. Is that to be fixed by law, or is that under the discretion of the commissioner or some head of a department?

Mr. CRAMTON. That is a special work. It does not apply to the stenographers who are engaged in the work of the Patent Office generally, but it has reference to stenographers who are engaged to do a certain work in making copies of records that are desired by the public.

Mr. LA GUARDIA. What I want to get at is this: Congress is not fixing that rate of \$4 a day, is it? That is entirely under the discretion of the department, is it not?

Mr. CRAMTON. That is a limitation carried in the appropriation bill. I think there is no other legislation with reference to it.

Mr. LA GUARDIA. It seems to me to be rather low pay if they are required to turn out that much work, but from what I read on page 241 of the hearings I thought that that was discretionary with the department and that it was not up to us to do it.

Mr. CRAMTON. Four dollars is the maximum.

The Clerk read as follows:

Minidoka project, Idaho: For operation and maintenance, continuation of construction, and incidental operations, \$797,000.

Mr. RAKER. Mr. Chairman, I move to strike out the last word. I have not had time to go into this matter particularly, but the appropriation now under consideration is the Minidoka project in Idaho, which carries an appropriation of \$797,000. Is that to be reimbursed under the new system of 5 per cent on the gross proceeds of the project?

Mr. CRAMTON. I have been forced to make up my mind about some things in connection with the reclamation projects in this bill and to answer some questions in respect to them. I do not like to answer any more questions than I have to, because they are hard to answer. What is the status as to the Minidoka project I do not know. Whether the Minidoka project is one of those that is to take 138 years in repaying its money to the Government I do not know. I do know that there has been some change in the law, but how far-reaching it is I do not know as to the projects under construction.

Mr. RAKER. What I am trying to get at is this: Of course, as to all of the old projects, the money will be collected as the law stands.

Mr. CRAMTON. I should supplement that further in respect to the Minidoka project, to be perfectly frank. There are several hundred thousand dollars in this. My impression is that all of that for new construction is for the American Falls Reservoir, which is being constructed, so far as private lands are concerned, under certain contracts which require payment with interest by the private districts affected.

Mr. RAKER. The principal thought that was in my mind is that under the bill that finally passed, but that has not yet been signed unless it was signed to-day, the payment according to production would not apply to these projects unless the Secretary of the Interior pushed, as it were, the present occupants out of the project, and I am wondering whether or not the gentleman had accumulated any information with respect to that, whether it is the intention of the department to so arrange the matter that payments shall come under that contract that may run for from 50 to 150 or 200 years.

Mr. CRAMTON. As to the projects heretofore under construction, I have not gone into the question, because it was not particularly pertinent as to our work. As to the new projects authorized, of course new legislation, however far-reaching it is, will apply.

Mr. RAKER. The gentleman does not quite get my point. Under the old projects they will not come under the new law, when signed by the President, unless the Secretary so presents the matter as to make it so that the present occupants feel as if they had to come under the project, and I am wondering if anything of that kind has been presented to the committee.

Mr. CRAMTON. The committee has had no discussion as to the effect of the new legislation upon projects heretofore under construction.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RAKER. I ask for an additional minute.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. RAKER. The gentleman from Michigan, chairman of the subcommittee, and myself, I think, have been practically in accord on that proposition, and not having an opportunity to hear the testimony I wondered whether or not anything had been presented in committee at this session?

Mr. CRAMTON. We discussed with the Director of Reclamation the status of the law in reference to new construction being undertaken—for instance, Kittitas and Salt Lake and, to some extent, Spanish Springs and Owyhee. We discussed that because it was before us, and, as I said before in my opening speech, the Director of Reclamation feels that the legislation to which the gentleman from California referred is incomplete, and would not desire to go ahead with construction on these new projects until the law was supplemented by other features which he thinks are important.

The CHAIRMAN. The time of the gentleman has expired, and without objection the pro forma amendment will be withdrawn.

There was no objection.

The Clerk read as follows:

Sun River project, Montana: For operation and maintenance, continuation of construction, and incidental operations, \$611,000: *Provided*, That no part of this appropriation shall be used for construction purposes until a contract or contracts in form approved by the Secretary of the Interior shall have been made with an irrigation district or with irrigation districts organized under State law, providing for payment by the district or districts as hereinafter provided. The Secretary of the Interior shall by public notice announce the date when water is available under the project, and the amount of the construction costs charged against each district shall be payable in annual installments, the first installment to be 5 per cent of the total charge and be due and payable on the 1st day of December of the third year following the date of said public notice, the remainder of the construction charge, with interest on deferred amounts from date of said public notice at 4 per cent per annum, to be amortized by payment on each December 1 thereafter of 5 per cent of said remainder for 40 years, or until the obligation is paid in full: *Provided further*, That no part of the sum provided for herein shall be expended for construction on account of any lands in private ownership until an appropriate repayment contract in accordance with the terms of this act and in form approved by the Secretary of the Interior shall have been properly executed by a district organized under State law, embracing the lands in public or private ownership irrigable under the project, and the execution thereof shall have been confirmed by a decree of a court of competent jurisdiction, which contract, among other things, shall contain an appraisal approved by the Secretary of the Interior, showing the present actual bona fide value of all such irrigable lands fixed without reference to the proposed construction, and shall provide that until one-half the construction charges against said lands shall have been fully paid no sale of any such lands shall be valid unless and until the purchase price involved in such sale is approved by the Secretary of the Interior, and shall also provide that upon proof of fraudulent representation as to the true consideration involved in any such sale the Secretary of the Interior is authorized to cancel the water right attaching to the land involved in such fraudulent sale; and all public lands irrigable under the project shall be

entered subject to the conditions of this section, which shall be applied thereto: *Provided further*, That no part of the sum hereby appropriated shall be expended for construction until a contract or contracts shall have been executed between the United States and the State of Montana, whereby the State shall assume the duty and responsibility of promoting the development and settlement of the project after completion, including the subdivision of lands held in private ownership by any individual in excess of 160 irrigable acres, the securing, selection, and financing of settlers to enable the purchase of the required livestock, equipment, and supplies and the improvement of the lands to render them habitable and productive. The State shall provide the funds necessary for this purpose and shall conduct operations in a manner satisfactory to the Secretary of the Interior: *Provided further*, That the operation and maintenance charges on account of land in this project shall be paid annually in advance not later than March 1, no charge being made for operation and maintenance for the first year after said public notice. It shall be the duty of the Secretary of the Interior to give such public notice when water is actually available for such lands.

Mr. RAKER. Mr. Chairman, I reserve a point of order on all of the matter on page 69 after the word "provided" in line 9. I do that for the purpose of asking a few questions; that is all.

Mr. CRAMTON. I would be glad to have the point of order presented.

Mr. RAKER. As a matter of fact, it is new legislation.

Mr. CRAMTON. It is not legislation. These are limitations, but it does provide some certainty as to the term on this particular project which does not apply on any other project.

Mr. RAKER. It is too late and the wrong place to get any results now, I appreciate that. Really, we ought to have had a hearing and a presentation before the Committee on Arid Lands.

Mr. CRAMTON. I hope there will yet be such a presentation and hearing.

Mr. RAKER. But this will bring one theory for one project, and another project will have another contract. Of course, there is one thing valuable in this; they are getting new work. They will not be in position to say the original notice was \$50 and now it is going to cost \$75, because, you understand, under this provision you have to enter into a contract and pay in addition what is required. That is, of course, valuable, and it is going to work tolerably well; but it is going to have this effect, that all the other projects—involving, I imagine, something like \$50,000,000—are going to say, "You ought to have done this for us, but you did not do it." I hope it will not occur that way. But there ought to have been a general law for all of these projects covering new works and new development. But I am not going to insist on the point of order. I am going to withdraw it with the idea it is going to have some beneficial effect. It is unfortunate that the legislation is not on the statute book to cover all of these other projects, so as to make these projects workable and make these men pay, to the end that we may get more money, have more and better development of our arid lands, which tend to the development of our country. I withdraw the point of order.

The CHAIRMAN. The reservation of the point of order is withdrawn.

Mr. LEAVITT. Mr. Chairman, I wish, first of all, to express my appreciation of this item being in the bill. For a period of 15 or 16 years an effort has been made to secure the construction of this storage dam. For the first time the Sun River project in Montana will be assured an adequate supply of water. I hope, however, that some of the terms set forth here will have further consideration, in view of the fact that this project is already partly constructed and partly settled. A very large part of the area has been under cultivation for a long period of years, and with the terms of payment previously made it has been rather difficult to meet the contract. Now, I have in mind, with several other provisions, this one which says that none of the money shall be expended until the State of Montana has made certain agreements.

I believe, since some of the people there have been operating for a period of 15 or 20 years, that this is a rather drastic provision. I will agree with the committee that in all new construction definite provision for repayment must be made. My position on that is plain as a member of the Reclamation Committee. But I believe the conditions imposed should be such that costs may be reasonably met, because that is one thing necessary to insure the payment of the money. I would ask the reconsideration of this provision in conference.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. LEAVITT. Yes.

Mr. RAKER. The gentleman is a member of the Committee on Irrigation and Reclamation of Arid Lands. This contains a special new provision. Does not the gentleman feel that we ought to have a policy that will apply to all projects, rather than to have a special matter like this on each individual project?

Mr. LEAVITT. The gentleman is also a member of the committee, and he knows that we had before us at the last session the report of the fact finding commission and that we attempted to write such a measure as that. We were able at the close of Congress only to get as far as the provisions that were enacted by the House before we adjourned and by the Senate on day before yesterday and which I believe would have been signed by the President before he went West if time had been allowed. I believe it will be signed by him. That takes care to a certain extent of the recommendation of the fact finding committee to cover the old projects. I am in favor of considering further the questions contained in this fact-finding report and also of carrying out the request made by the President in his message that we do enact into law the recommendations of the fact finding commission. This will put reclamation on a sound business basis by doing two things—by assuring, first, the success of the settlers on reclamation projects and, second, the return of the funds invested by the Government to the Treasury of the United States.

Mr. RAKER. The gentleman would agree with me in this, would he not, that what we want is a workable reclamation act that will develop the country and allow us to get an appropriation for that purpose and at the same time get a good citizenship and get our money paid back, as it ought to be?

Mr. LEAVITT. Yes. I will agree to that with this statement: That we should have in the reclamation law provisions as to the future which will make it possible for the settlers to receive such terms as can be complied with.

Mr. RAKER. We will never get a payment unless we make it mandatory and require the fellow to pay or forfeit his property if he does not pay.

Mr. LEAVITT. In defense of many of the people of the West I will have to disagree to that. Many of them have paid up to date under the present law.

The CHAIRMAN. The time of the gentleman from Montana has expired.

Mr. GREEN. Mr. Chairman, I ask unanimous consent that the gentleman may have two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GREEN. Is this project a Government project?

Mr. LEAVITT. Yes. It was on Government land, and it was originated by the Government something like 20 years ago. It is simply a matter of good faith to some extent to the people who have been waiting for many years and who have not had adequate supplies of water in dry years.

Mr. GREEN. Do you expect this will finish the project?

Mr. LEAVITT. No. This will not complete the project. This is the beginning of a storage dam which has heretofore been denied to the settlers although it was tentatively promised to them many years ago.

Mr. GREEN. What new land will this open to the prospective settler?

Mr. LEAVITT. About 40,000 acres of land. It will carry with it provisions that will enable them to pay and which will require them to pay.

Mr. GREEN. The expectation is to carry out that line of action?

Mr. LEAVITT. Yes. No further steps will be taken toward new construction without carrying provisions of that kind.

Mr. CRAMTON. Mr. Chairman, in response to the suggestion of the gentleman from Montana [Mr. LEAVITT] the committee would have been very glad if conditions had been such that we could have had more fully the benefit of the advice of Members like the gentleman from Montana who are well versed in these matters and have a breadth of view. There is nothing more important to the success of new projects than the methods of settlement and financing the settlers. It is properly a matter of State cooperation rather than of Federal activity. As to the language that is in the bill, I do not want to hold the Director of Reclamation responsible for it, but I think I am justified in saying that the language that we have in the bill has his complete and thorough indorsement.

Mr. LEAVITT. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. LEAVITT. I talked with the director about this, and he was rather surprised to notice that no construction should start until that provision should have been met.

Mr. CRAMTON. I do not know about that, but I discussed it with him. The situation on that particular project is, of course, a little more involved. As I understand it, the construction now under way will provide additional water facilities for about 40,000 acres of land, and new and complete facilities for 40,000 acres more. That involves 80,000 acres, which is as much as the San Carlos project in Arizona involves. To what extent the contracts may be held to apply to the 40,000 acres partially supplied with water and partially developed is a problem. I will say to the gentleman that it will be the desire of the committee, of course, as we go on taking the successive steps in this bill, to proceed in the light of the best information we have, considering all the matters that the gentleman has suggested.

Mr. RAKER. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from California moves to strike out the last word.

Mr. RAKER. Mr. Chairman, I can hardly express my views in language that I would really like to use regarding some of the provisions of this particular item. We had about a month's work on the committee. We had only three witnesses, and those were members of the fact finding commission. We were unable to get outsiders or others to testify. While there is no opposition or obstruction or intention to obstruct legislation, there are many provisions here that I understand the fact finding commission has not suggested. Some of them are almost revolutionary. I will read one of them:

That until one-half of the construction charges against that land shall have been fully paid, no sale of any such land shall be valid unless and until the purchase price involved in such sale is approved by the Secretary of the Interior.

Now, in America one of the things we have stood for for years is the right to dispose of property; yet here you are building up a system by which a man can not sell or develop unless one-half of the whole construction charge has been paid or unless he goes down to the Secretary of the Interior and gets his consent. I am just calling the attention of the chairman of the committee to the unfortunate situation we are in.

Mr. CRAMTON. But the gentleman from California, who is so well informed on reclamation matters, knows, first, that the bulk of the lands to be developed hereafter are privately owned lands?

Mr. RAKER. I thoroughly agree with the gentleman on that.

Mr. CRAMTON. Second, the minute you start a project those lands take on a speculative value and, third, unless we restrict it the private owner, through the force of human nature, is going to sell that land at the highest speculative price he can secure. The result, therefore, is that the benefit of the liberal provisions the Government makes in developing these projects will go to the land speculator and none of it to the settler, so that the settlers on these projects during the years are groaning, not under obligations they owe the Government, but under obligations they owe locally or obligations secured at higher rates of interest, either to buy that land at speculative values or in financing its development.

The CHAIRMAN. The time of the gentleman from California has expired. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

The Clerk read as follows:

Lower Yellowstone project, Montana-North Dakota: For operation and maintenance, continuation of construction, and incidental operations, \$180,000.

Mr. WATSON. I would like to call the chairman's attention to the fact that the words "continuation of construction, and incidental operations," are rather indefinite. They appear on page 71, line 20. Is the appropriation for all of the Yellowstone project or does it simply mean a part of it, and does operation and maintenance refer to a section of the Yellowstone project or to all of it?

Mr. CRAMTON. The item is for the lower Yellowstone project, but that, of course, does not mean all of the water rights that would be available on the Yellowstone River. There has been some question about those in the park or adjacent thereto, but, of course, this item has nothing to do with any except where the construction is already authorized.

Mr. WATSON. What construction does the \$180,000 involve?

Mr. CRAMTON. Well, \$100,000 of the \$180,000 is for drainage construction. The hearings show that:

About 5,000 acres have a water table within 4 feet of the surface and it is estimated that the amount requested will provide drainage for 4,000 acres of this land.

Five thousand dollars is to be expended on the distribution system, on some minor lateral extensions, additional turnouts, and so forth, and for operation and maintenance, \$75,000. So the gentleman will see there is no extension of the project involved.

Mr. WATSON. Does this include the building of roads or bridges?

Mr. CRAMTON. No; not generally speaking, but I would not say that under operation and maintenance there might not be some small item of that kind. But generally speaking that is not involved in this.

The CHAIRMAN. Without objection the pro forma amendment is withdrawn.

There was no objection.

The Clerk read as follows:

North Platte project, Nebraska-Wyoming: For operation and maintenance, continuation of construction, and incidental operations, \$510,000: *Provided*, That any unexpended balance of any appropriation available for the construction of the Guernsey Reservoir and incidental operations for the fiscal year 1925 shall remain available for such purposes during the fiscal year 1926: *Provided further*, That all net revenues from any power plant connected with this project shall be applied to the repayment of the construction costs incurred by the Government on this project until such obligations are fully repaid.

Mr. SIMMONS. Mr. Chairman, I move to strike out the last word. The Budget recommended for the North Platte project, as I understand it, \$520,000, while this bill calls for \$510,000. I am advised that the additional \$10,000 which is not included in this bill is for putting in effect the classification of lands on the North Platte project under the provisions of the law that was attached to the deficiency bill. Doctor Mead has advised me that that \$10,000 is necessary, and I am wondering whether the chairman of the subcommittee will not consent to having that changed without the necessity of offering a motion to that effect, in order that we can give that project the money it needs. Doctor Mead says it is necessary and the Budget recommended it. I dislike to ask the committee to vote on it if the chairman is willing it should be done. The testimony regarding it, if the chairman pleases, is to be found on page 433; that is, the testimony regarding this item of \$10,000.

Mr. CRAMTON. I will say, Mr. Chairman, that the item of \$10,000, as I recall it—I have not been able to locate it yet in the hearings—was for a reclassification of lands involved in this project that are not now under operation.

Mr. SIMMONS. No; I think the chairman misunderstands that. It is for a reclassification of all of the lands that are now in operation under the project in order to comply with the repayment provisions in the law that went to the President the first of this week.

Mr. CRAMTON. I see Mr. Walter's statement to the effect that \$10,000 is to provide for the reclassification of about 113,000 acres of irrigable land as recommended by the committee of special advisers on reclamation. However, the legislation is very incomplete as yet. Under the present legislation, as I understand it, even if you get that land reclassified you do not know what you are going to do next about it, and the desire of the committee and the policy we have followed in this bill was to hold down just to the minimum extensions, and so forth, and new ventures, until this matter of legislation is straightened out by the proper legislative committee.

Mr. SIMMONS. If the chairman pleases, this is not an extension and not a new venture.

Mr. CRAMTON. I understand that; but it is the expenditure of \$10,000 that some time ought to be paid back by those people, and we hope it will be. But I do not understand that the program of legislation is thoroughly completed in order to be sure it is worth while to spend that \$10,000. And, further, if I may answer the gentleman, as I understand it, there is going to be a year or two yet in which they can reclassify, and then we can determine about spending the \$10,000, after we know what kind of a law we are going to have. I think in the interest of the gentleman's constituents we ought not to authorize this further burden upon them until that legislation becomes more tangible and more definite than it is now.

Mr. SIMMONS. If the gentleman please, the Director of Reclamation ought to know what is necessary, and he has advised me that this \$10,000 is needed.

Mr. CRAMTON. I have gotten far enough along with Doctor Mead to think that if you gentlemen from the West would

accept his judgment throughout and take the position on all the big things that you take on this little matter of \$10,000, I would be willing for you to have the \$10,000, and the Treasury would be several million dollars ahead. The gentleman agrees with the director just on this item, but when we come to something else he may not agree with him so thoroughly.

The pro forma amendment was withdrawn.

Mr. RAKER. Mr. Chairman, I move to strike out the proviso beginning on page 72, at line 4, and ending with line 8; and, pending that, I would like to ask the chairman a question. Does this proviso authorize the collection of the amount due in excess—

The CHAIRMAN. Will the gentleman pardon the Chair? Did the gentleman move to strike out the proviso?

Mr. RAKER. In the interest of time, Mr. Chairman, I move to strike out the last word in order to ask the chairman of the subcommittee whether this proviso authorizes the Reclamation Service to take the net revenues and pay off this debt without its being deposited in the Treasury and appropriated?

Mr. CRAMTON. Yes; I think that would be the result.

Mr. RAKER. Now, that is the only case we have remaining in all these governmental activities where we can take the revenue and handle it without its being deposited in the Treasury and then authorized by Congress.

Mr. CRAMTON. The entire reclamation fund, in so far as it derives any revenues from return of construction costs or from operation and maintenance, is handled in just that same way.

Mr. RAKER. It does not have to be deposited in the Treasury and then appropriated?

Mr. CRAMTON. In order to spend it again you would have to come to Congress, but we let them put the money in the Treasury without any let or hindrance. The only trouble is to get them to do it.

Here is what the proviso means: We are going to build a power plant, and that is going to reduce the cost of operation and maintenance, and there may be a profit in the power they may sell to private individuals. In one project in the Southwest we did that, and they are getting enough profit off of the operation of the power plant to pretty much take care of operation and maintenance, but they are only paying us back in dribbles in 20 years, without interest during all this time. We now propose that when we put up a power plant and they can sell the power and make some profit, as well as reduce the cost of operation and maintenance on the power which they use, any net profit shall immediately be applied to repay what they owe the Government.

Mr. RAKER. That sounds proper, with that explanation.

The pro forma amendment was withdrawn.

The Clerk read as follows:

Newlands project, Nevada: For operation and maintenance, continuation of construction, and incidental operations, \$167,000, together with the unexpended balance of the appropriation for this project for the fiscal year 1925, of which amount \$245,000 shall be used for drainage purposes, but only after execution by the Truckee-Carson Irrigation district of an appropriate reimbursement contract satisfactory in form to the Secretary of the Interior, and confirmation of such contract by decree of a court of competent jurisdiction and final decision on all appeals from such decree.

Mr. RICHARDS. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Nevada offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. RICHARDS: Page 72, between lines 19 and 20, insert:

"Spanish Springs Irrigation project, Nevada: For continued investigations, acquisition of rights of way and reservoir sites, commencement of construction, if found feasible, and incidental operations, \$500,000."

Mr. RICHARDS. Mr. Chairman and gentlemen of the committee, I have offered the amendment because it is in keeping with the recommendation of the fact finding commission. It has been recommended by the Secretary of the Interior. It has been estimated by the Bureau of the Budget and allowed at this amount.

Nothing I might say before this committee at this time, I hope, shall be construed as antagonistic toward any person or any committee or any project, but this matter is of considerable and vital interest to the people of my State, and my sole desire is to lay before the committee what I think to be facts, constituting an unjustifiable discrimination, so far as leaving out this project is concerned.

The President of the United States, in his message delivered to Congress on December 3, 1924, gave his approval of such

amendment. The President, in his message, under the title of reclamation, gave his approval in the following language:

Our country has a well-defined policy of reclamation established under statutory authority. . . . Legislation is pending based on the report of the fact finding commission for the proper relief of those needing extension of time in which to meet their payments on irrigated land and for additional amendments.

I take that to mean just this kind of an amendment—one that is necessary and essential in order to properly fulfill the obligations of this Government.

The President, by such unequivocal statement, gave his earnest approval to the recommendations of the Special Advisory Committee on Reclamation which was appointed by Secretary of the Interior Work last year and which began its sessions at the Interior Department building in Washington on October 15, 1923, and filed its report with the Department of the Interior on the 10th day of April, 1924.

This committee is commonly known and described as the fact finding commission.

On the 21st day of April, 1924, the President submitted to Congress the report of this special advisory committee or fact finding commission.

The special advisory committee consisted of Thomas E. Campbell, former Governor of Arizona, chairman; Dr. John A. Widtsoe, former president of the State University and Agricultural College of Utah, secretary; James R. Garfield, of Ohio, former Secretary of the Interior; Elwood Mead, now Commissioner of Reclamation and at that time professor of rural institutions in the University of California, and chairman California State Land Board; Oscar Bradfute, of Ohio, president of the American Farm Bureau Federation; and Clyde C. Dawson, of Colorado.

The report of the special advisory committee was unanimous.

The special advisory committee in dealing with the Spanish Springs project treats it as a supplemental project to the Newlands project. It is discussed in recommendations under the general discussion of the Newlands project, Nevada, and is found on pages 182 and 183 of the report. The committee under such recommendation has this to say in part:

The Newlands project was among those first selected and authorized after the passage of the reclamation law.

The engineering features were carefully considered, the water supply based upon the use of storage in Lake Tahoe, and the agricultural study of soils made in accordance with then known scientific methods. It seemed to offer climatically, agriculturally, and physically an opportunity for a successful project.

The original possible area was thought to be about 450,000 acres; that was early reduced to 397,000 acres and later to 206,000 and finally to 73,000, when it was found, as a result of years of legal controversy, that the expected use of the water of Lake Tahoe was not available.

The unexpected failure of storage is the underlying cause of the difficulties from which the project has suffered. Unusual drainage and seepage condition and the existence of 20,000 acres held by a few owners with a prior water right, which became impotent because of the failure of the expected storage, added to the difficulties of the project.

The committee is satisfied that the proper course to pursue is the construction of the Spanish Springs Reservoir; otherwise the interests of both the settlers and the Government will be seriously jeopardized.

We recommend—

1. That the construction of the Spanish Springs extension be authorized, subject to Resolution No. 8.

The CHAIRMAN. The time of the gentleman from Nevada has expired.

Mr. RICHARDS. Mr. Chairman, I ask unanimous consent to proceed for 15 minutes. This is of vital interest to my people.

Mr. CRAMTON. Can not the gentleman make it five minutes?

Mr. RICHARDS. No; I will make it 10 minutes.

The CHAIRMAN. The gentleman from Nevada asks unanimous consent to proceed for 10 minutes. Is there objection?

There was no objection.

Mr. RICHARDS. Following this report, and in accordance with the recommendations therein contained, Secretary of the Interior Work, in preparing the estimates for his department for the fiscal year ending June 30, 1925, requested an appropriation of \$800,000 for the continued investigation, commencement of construction, and incidental operations of the Spanish Springs project. The Bureau of the Budget approved such estimate and requested and included the item of \$800,000 for

the Spanish Springs project in the Budget. Later, reduced to \$200,000, such appropriation was not agreed to by the House.

When the bill reached the Senate an amendment was offered to the bill by Senator PITTMAN, of Nevada, carrying an appropriation of \$800,000 for the Spanish Springs project. The amendment was unanimously adopted by the Senate. It then went into conference. It was one of the few Senate amendments that the conferees of the House refused to agree to.

In the face of the fact that it was one of only two projects recommended by the special advisory committee, the Secretary of the Interior, and estimated for by the Bureau of the Budget. To substantiate this, I read from the hearings of the second deficiency appropriation bill, 1924, page 459, under the heading—

PROJECTS RECOMMENDED BY FACT FINDING COMMITTEE FOR IMMEDIATE APPROPRIATION

Doctor MEAD. The question was asked whether there had been other recommendations beside the North Platte and the Spanish Springs, and I said, "Yes; but they were subject to investigation."

I would like to insert this morning, so that it would be perfectly clear, exactly the statement of the recommendations.

Doctor MEAD (reading):

"As to the proposed new projects—Owyhee, Vale, Salt Lake Basin, and Kittitas—the committee has not sufficient information upon which to make specific recommendations."

Mr. CRAMTON. So that it remains that this North Platte addition and the Spanish Springs Reservoir as an extension of the Newlands project are the only items that your service or the Interior Department are as yet prepared to urge for immediate appropriation without further investigation?

Doctor MEAD. That which I have read represents the attitude of the advisory board.

The CHAIRMAN. You are going to quote the Secretary now, are you, Doctor?

Doctor MEAD. Yes.

The CHAIRMAN. Is that in a communication to somebody?

Doctor MEAD. I am going to read from a letter of the Secretary to General Lord; a letter dated May 16.

The CHAIRMAN. Do you think you had better read the whole letter or just part of it?

Doctor MEAD. It will not take long; I will read the whole letter.

WASHINGTON, May 16, 1924.

Brig. Gen. H. M. LORD,

Director of the Bureau of the Budget,
Washington, D. C.

MY DEAR GENERAL: Your letter of April 30 was duly received, stating that the President finds it inconsistent with his financial policy to approve the estimates for the Owyhee, Vale, Salt Lake Basin, and Kittitas proposals that were recently submitted as a part of a supplemental budget for reclamation work.

At the subsequent hearing I understand you reiterated the foregoing and it was understood that there would be submitted a reduced supplemental estimate covering the following:

North Platte project, commencement of Guernsey reservoir, etc., \$800,000; Spanish Springs project, \$200,000; investigations, \$150,000. Estimates are transmitted herewith accordingly.

If I am correctly advised, the difference between the policies involved in the original supplemental estimates submitted by this department and your direction to eliminate certain proposed projects or units is that the department having on the advice of the committee of special advisers selected certain projects as apparently feasible, recommended appropriation for completion of investigations and beginning of construction and operation, while your view was that until all investigations were completed no appropriation should be made for construction or operation.

The department already has much data concerning each project or unit described in said estimates and thought that the remaining investigations could be carried on as a preliminary to subsequent construction. The limitations which accompanied each of said estimates were designed to protect the United States by the execution of appropriate contracts with duly organized districts, and with legal assurances that large landowners would divide their holdings and dispose of them to settlers at reasonable prices.

Under these conditions, and with these safeguards, I felt it proper to make the original recommendations and would be glad to have you give them further consideration, with the foregoing in mind. At the same time, in accordance with your direction, there has been prepared and is herewith submitted new supplemental estimates, confining the appropriations to the amounts fixed by you.

I quote from the report of the advisory committee on reclamation, merely for further information and because germane to the subject under discussion:

"As to the proposed new projects, Owyhee, Vale, Salt Lake Basin, and Kittitas, the committee has not sufficient information upon which to make specific recommendations. Attention is called to the fact that the estimated costs of construction are nearly all in excess of \$120 an acre. The committee is of the opinion, based upon the reports of annual production from lands now under irrigation, that projects requiring such acre cost as above suggested should be constructed only after it is clearly shown that the lands when irrigated can produce annual crop values sufficient to enable the settlers to repay costs from production and within a reasonable time.

"It is understood that the above projects are those which offer the most favorable conditions for present investigation, and hence the committee is of the opinion that the appropriations therefor should be authorized, but with the provision that further investigation should be made of their feasibility, and that, if finally selected, they should be constructed and developed in accordance with the general resolutions of this committee."

Very respectfully,

HUBERT WORK.

Mr. CRAMTON. So that situation boils down to this: That the Secretary of the Interior would have liked to have had appropriations for a number of projects joining with that permission for further investigation, to satisfy himself whether the money ought to be spent or not. That, when it is required that he present only those projects on which the department is prepared to take immediate responsibility of saying whether they are now satisfied that this money should be spent for these purposes, the only items that the department is prepared at this time to recommend are the North Platte and the Newlands, the items that we have under discussion.

The result of the fight for this amendment in the Senate resulted in the conference report being referred back to the conferees with instructions to insist upon the Spanish Springs amendment. No action had been taken upon the conference report at the time of adjournment of Congress.

On the 2d day of this month the chairman of the Appropriations Committee of the Senate asked unanimous consent to reconsider the order by which the conference report had been referred back to the conferees with instructions to insist upon the Spanish Springs amendment, and Senator PITTMAN, of Nevada, joined in the request. The conference report upon the second deficiency appropriation bill was thereupon adopted by the Senate.

Senator PITTMAN, then on the floor of the Senate, supported the motion of Senator WARREN to recede from the Senate amendment in favor of Spanish Springs, and stated in supporting said motion that he was assured that such amendment would become a part of the Interior Department appropriation bill for the fiscal year ending June 30, 1926. It is entirely left out of the bill.

When the item was under consideration before the subcommittee of the Committee on Appropriations for Interior Department appropriation bill for 1926, Dr. Elwood Mead, Commissioner of Reclamation, appeared before such committee and made the following statements on behalf of the proposed appropriation for the Spanish Springs project:

(Page 443 of the hearings)

SPANISH SPRINGS PROJECT, NEVADA

Mr. CRAMTON. The next item, which is for the Spanish Springs project, Nevada, is as follows: For continued investigations, commencement of construction, if found feasible, and incidental operations, \$500,000.

Doctor MEAD. In connection with that, I offer the following statement:

For continued investigations, commencement of construction, if found feasible, and incidental operations, \$500,000.

The primary purpose of this storage system is to provide an adequate water supply for the irrigation of land under the Truckee Canal, a part of the Newlands project, amounting to about 21,000 acres. About 7,000 acres of this have been settled, but the water supply for its irrigators has proven so inadequate that the remainder of the land has been withdrawn from settlement and is now of no value to the project. The Truckee Canal and dam cost \$1,683,816. Its operation for the limited area of land now irrigated is unprofitable. In order to improve the financial situation of the Government by increasing the use of this canal and conserving the flood and waste waters of the Truckee River, a matter of great importance to Nevada because of the State's limited population, it is proposed to build a storage work large enough to hold the dependable flood supply of the stream. Investigations to date indicate that there will be sufficient water to irrigate 39,000 acres of land, now irrigated by the Newlands project. The greater part of this would be within the original boundaries of the project, and about 18,000 acres outside those boundaries. An economic survey has been made to determine the suitability of the land for irrigation culture, and I submit a summary of its conclusions.

On page 445 continuing, Doctor Mead further said:

The investigations have been pretty well completed on this project. The situation is this: That when the original Newlands project was carried out a canal and a dam from the Truckee River were built at an expense of \$1,683,000. This was done under the belief that a dependable water supply could be obtained by the regulation of Lake Tahoe. Subsequently, litigation with water-power interests led to an agreed decision that has made it impossible to regulate the flow of that river. The result is that of the land underneath that canal only 7,000 acres was settled. Then it was discovered that there was not water for this area, and the rest of the land was withdrawn.

So that we have there now an investment of over a million and a half that is unprofitable, the operation expenses are heavy, the income is small, and some of the best land is below it.

Mr. CRAMTON. And now why is it, Doctor, if you have made your investigations, why do you not make a report on this one way or the other; if you have completed your investigation, why do you not either recommend or deny this project?

Doctor MEAD. Well, I do recommend it.

Mr. CRAMTON. What I am asking you now is this: Whether you have decided the questions that are preliminary to the approval of the project; first, do you consider it a feasible project?

Doctor MEAD. Yes.

Mr. CRAMTON. Next, are there any of these conditions that you speak of that can not be surmounted, as to limitation upon the price of the land and the method of settlement, and so forth?

Doctor MEAD. This is one of the places where the greater part of the land is public lands.

On page 462 of the hearings, as follows:

Mr. CRAMTON. It is the duty of the Reclamation Service to investigate and pass upon these projects. You are the technical branch of the Government having to do with this, and the present law contemplates that your recommendations will come to Congress. Congress will act, first, in approving the project, and, second, in appropriating the money to build it. What is the recommendation of your office with reference to the Spanish Springs Reservoir?

Doctor MEAD. I recommend that it be built, and, coupled with that recommendation, that there be a change in the settlement law.

Now, mind you, in the face of these facts, when the second deficiency bill received consideration originally—I do not know what the ultimate allowances were, but originally there was \$1,250,000 for Owyhee, Vale \$250,000, Salt Lake Basin one million and a half, and Kittitas one million and a half—\$4,500,000 was provided for in that bill for these four reclamation projects that were not ready for recommendation according to the advisory committee.

Mr. LEATHERWOOD. Will the gentleman yield? I know he does not want to mislead.

Mr. RICHARDS. I do not.

Mr. LEATHERWOOD. There was only \$375,000 carried in the deficiency bill for the Salt Lake Basin.

Mr. RICHARDS. I said I did not know what the ultimate allowances carried in the bill were.

Mr. LEATHERWOOD. That whole amount was not appropriated.

Mr. RICHARDS. I said I did not know the ultimate figures appropriated, because I have not been able to get a copy of the deficiency bill as it passed. But be that as it may, here are appropriations made in the deficiency bill for projects that the fact finding committee said they were not ready to recommend, in view of the fact that the only projects that were recommended were the North Platte and the Spanish Springs, and Spanish Springs is now conspicuous by its absence. That seems to me to be an unjust discrimination against the Spanish Springs, and if it is not I do not know what discrimination is.

I do not stand before you advocating the spilling of the Nation's millions in the middle of a Nevada desert just for the sake of spending them. Reclamation will be the one great boon to my section of the world if properly conducted. The ultimate end will be developed country, contented Americans owning their respective homes, and increased taxable wealth added to the Nation and prosperous communities instead of an otherwise barren waste. All this is the desired end, but it must rest on a sound business policy to commence with. All interests must be considered. The ultimate refund of the Government's money, the certainty of the settler to make good, and the general safeguarding of all rights, vested and to become vested, by adequate and proper reclamation laws. This I am convinced to be the sole aim and desire of those now

formulating the future reclamation policy of our Government. I most sincerely hope to see it accomplished.

The CHAIRMAN. The time of the gentleman from Nevada has again expired.

Mr. RICHARDS. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CRAMTON. Mr. Chairman, I shall take only a minute or two to make the position of the committee clear. This is a big new project. It involves additional water rights to about 7,000 acres, a complete new development of a large area. I asked Doctor Mead why they came in the Budget in this language in connection with this proposed item:

For continued investigation, commencement of construction, if found feasible, and incidental operations.

I said, after some discussion:

That is to say, that proposes that Congress shall appropriate this money and leave it up to the Reclamation Service whether it will be built or not.

To that Doctor Mead replied as follows:

Doctor MEAD. There are a number of things embraced in the term "feasibility." We will have to determine how this unoccupied land is to be settled; we will have to make an arrangement for the creation of a district and secure a contract with that district before construction begins if the appropriation is made.

Mr. CRAMTON. What I am asking you now is this: Whether you have decided the questions that are preliminary to the approval of the project; first, do you consider it a feasible project?

Doctor MEAD. Yes.

That is on page 446 of the hearings. Then, on page 461 of the hearings—and I think this refers to the report that has been made of an investigation this summer by various local engineers and Federal and business men—I find the following:

Mr. CRAMTON. You have received that report, which I understand is a favorable report; is that right, Doctor?

Doctor MEAD. Yes; it is favorable in this way, that it recommends the project as feasible, provided changes in method of development are adopted. It bas its favorable conclusion on this change in the method of settlement.

Mr. CRAMTON. That is, that you be authorized to select the settlers?

Doctor MEAD. Yes.

Mr. CRAMTON. Without that authority the report would not recommend that the project be attempted. You have no authority under the present law, and this committee, of course, can not give you any authority of that kind.

Doctor MEAD. No.

Again, farther down on the same page, I quote the following:

Mr. CRAMTON. So that is what you mean by feasibility. Your idea would be more clearly met if instead of using the language that is here we should appropriate the money and say, "provided none of this money shall be available until Congress gives the Reclamation Service the authority to select the settlers." That expresses your idea?

Doctor MEAD. Yes.

They have not that authority yet, as I understand it, and Doctor Mead does not recommend commencing the construction of this project. I do not believe we ought to start any other new projects now. We should not have started some of these others, but that was done when we could not help ourselves. We ought not to start any more until the law becomes clear.

Mr. RICHARDS. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. RICHARDS. There are 7,225 actual water applications on the Newlands project not now supplied with water, and is not this the real source from which the Government can keep its contract and is there not an obligation?

Mr. CRAMTON. Let us keep them clear. One is the Newlands project, where they want additional water, and the other is a much larger area to be provided for by this expenditure of \$6,000,000. As to the new area to be provided for, Doctor Mead says that until he has the right to select the settlers instead of being obliged to accept the one who draws a ticket by lot and who goes on there not knowing anything about it, who can not make a success, and who ruins the reputation of reclamation and keeps the money out of the Treasury, we ought to wait. As to those on the Newlands project, I do not know whether what I am about to say will be news from home to my friend or not, but I received this telegram this morning:

FALLON, NEV., December 5, 1924.

Congressman LOUIS CRAMTON,

House of Representatives, Washington, D. C.:

We heartily indorse your stand on Spanish Springs. The settlers on Newlands project are against it to a man. Why waste millions of Government money building new projects when ours is not half settled, besides robbing us of our water supply? Please wire us to-day names of Senators that would help us in this fight against Spanish Springs.

THE LAHONTAN VALLEY WATER USERS' ASSOCIATION,
L. A. BECKSTEAD, Secretary.

As I did not want to be embarrassed by starting any movement in the Senate against this, I simply replied as follows in acknowledgment to that telegram:

DECEMBER 5, 1924.

L. A. BECKSTEAD,

Secretary The Lahontan Valley Water Users' Association,
Fallon, Nev.:

Your wire received. The Senators from Nevada would no doubt be interested in the expression of your views if you have not already advised them.

LOUIS C. CRAMTON.

I probably should have also told them to get in touch with the Member from that State in the House, but they merely asked me about the Senate and I let it go at that.

Mr. RICHARDS. Mr. Chairman, in reply to that I want to state to the gentleman that I have a wire from Truckee-Carson irrigation district requesting that the action of the fact finding committee be put into law as far as it can be.

Mr. CRAMTON. And Doctor Mead, a member of the fact finding committee, says that this project should not be built until this program of legislation is completed and there is some provision for this selection of settlers.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. RICHARDS. Mr. Chairman, I ask unanimous consent to proceed for one minute.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. RICHARDS. Mr. Chairman, I would like to ask the gentleman in charge of the bill a question. In so far as the law authorizing action on the part of the Reclamation Bureau to spend money appropriated when it should be spent, I am just wondering whether the annual report of the Secretary of the Interior, on page 7, has any bearing. Referring to the law as embraced in the deficiency bill, the language of the report is as follows:

In a special message to the Sixty-eighth Congress the President urged that the legislation suggested by the special advisory committee be enacted into law, pointing out that a definite policy is imperative. This legislation failed in the last hour of the last session of Congress. In my opinion, the future of Federal reclamation depends on the prompt enactment of this legislation at the coming session. Public approval of this measure since Congress adjourned would justify its prompt passage.

I wonder if it has passed in the desired form?

The CHAIRMAN. The time of the gentleman from Nevada has expired.

Mr. CRAMTON. Mr. Chairman, I merely say that the deficiency bill contained legislation which in the view of the service is incomplete and must be supplemented with reference to settlement.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Nevada.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Williston project (formerly North Dakota pumping project), North Dakota: The Director of Reclamation is authorized, during the fiscal year 1925 or thereafter, to appraise the buildings, machinery, equipment, and all other property of whatever nature or kind appertaining to this project, and to lease or to sell the same at public or private sale, on such terms and in such manner as he may deem for the best interests of the Government, reserving the right to reject any and all bids. The proceeds from such lease or sale shall be paid into the reclamation fund.

Mr. SINCLAIR. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 73, line 2, after the words "North Dakota," strike out all the remainder of the paragraph and insert in lieu thereof the following: "For operation, maintenance, and incidental operations, \$50,000."

Mr. RAKER. Mr. Chairman, a point of order. Would it be too late to reserve a point of order on the original paragraph?

The CHAIRMAN. The Chair thinks it is.

Mr. RAKER. It has not been debated.

The CHAIRMAN. But an amendment has been offered. The Chair will be glad to hear the gentleman, if he can show any authority to the contrary. The Chair's recollection is that a point of order must be reserved to a paragraph before an amendment is offered.

Mr. RAKER. I thought before debate began.

The CHAIRMAN. That is the Chair's recollection. Of course, the point of order would lie to an amendment offered.

Mr. RAKER. I want to make a point of order to the paragraph.

Mr. CRAMTON. Mr. Chairman, I make the point of order it is too late to make a point of order against the language of the bill, as an amendment to the bill has been offered, which is the same as debate.

Mr. RAKER. There has not been any argument. I am trying to get the matter before the Chair, and I think I will make the point of order and present it to the Chair on the ground that it is new legislation on an appropriation bill. It is legislation authorizing and directing the sale of this project.

Mr. CRAMTON. I want to do the thing that is going to be the quickest. The gentleman's point of order would not get anywhere under the language of the Kelp decision referred to yesterday; but there has been an amendment offered to the paragraph here, and I make the point of order it is too late to make a point of order to the paragraph in the bill.

Mr. RAKER. Let the Chair pass on the question. I have not the time, but the point of order the gentleman argued the other day and this are entirely different, because it is legislation authorizing the Director of the Reclamation Service to sell a project. He certainly has power now; but the Chair is ready to rule and I do not care to argue the question.

The CHAIRMAN. Unless the gentleman from California can cite the Chair to some authority to the contrary, the Chair will hold that it is too late to make a point of order against the language in the paragraph after an amendment on the merits has been offered.

Mr. RAKER. Let me do this—well, at present I will withdraw the point of order.

The CHAIRMAN. The gentleman from California withdraws the point of order.

Mr. RAKER. That will relieve the rendering of a decision at this time.

Mr. SINCLAIR. Mr. Chairman, this Williston project is one of the first projects and one of the smallest projects in the whole Reclamation Service. As I understand the report of the fact finding committee, they recommend the discontinuance of this project because it has failed to pay operating expenses in the past three years, using the past three years as a basis. Now, it seems to me that if that is going to be the policy of the Government with reference to irrigation and reclamation questions we are going gradually to close up all of our irrigation projects, because certainly during the last three years a great many projects have not been paying operating expenses. At this time it seems to me that the Committee on Appropriations has chosen a very unfair time in which to put in operation any such policy as that. We all know that farming, the business of agriculture, has been unprofitable along every line, and quite so, of course, in irrigation. Now last year, 1923, on this project there was raised a gross value of farm crops of something like \$24.15 per acre. If that could be continued and the operation costs maintained at a reasonable figure, certainly the project will be put on a paying basis. The facts are, of course, that the operating expenses have been so high that many settlers have been forced off their farms, have lost their farms, but to-day there are something like 144 farms still remaining on this project. There are 7,650 acres capable of irrigation under this project, but because of the deplorable condition of farming and the heavy payments that were to be made much of the land was abandoned until only 1,170 acres were actually under irrigation last year. Under the new and more liberal policy incorporated in the bill passed this week, I have no doubt but that all of the 7,650 acres would be resettled and brought under a high state of irrigated cultivation, and the project thus made a success.

I maintain that it is not right, it is not fair to those farmers, to now dispose of their project and take away the operation of it at a time when they are not financially able to take care of it themselves. There certainly seems to me to be an obligation there that the Government owes to the farmers who are on this project.

Further than that, I believe that the chairman will agree with me when I say that no congressional district in the United States has supplied a greater portion of the irrigation fund than has the third district of North Dakota. The total amount of money coming from the State of North Dakota and used for irrigation purposes amounts to over \$12,000,000. This is the only project wholly within the State, and should receive consideration from this Congress on that account.

Mr. RAKER. Mr. Chairman, will the gentleman yield to a question right there?

Mr. SINCLAIR. I shall be very glad to.

Mr. RAKER. Under the new bill, if it is signed, this project, like the rest, can get on its feet without question, because it will have to pay only 5 per cent of the gross proceeds of production on that project.

Mr. SINCLAIR. I think so. The new bill that has been passed will enable the farmers on this project, like those on all the other projects, to get on their feet, and they can have some hope; they can go on and resettle the vacant lands that are now subject to irrigation and put them under operation.

Mr. RAKER. Have those people had any opportunity to oppose this legislation that is to set them out of their homes?

Mr. SINCLAIR. No. As you know, Members of Congress have not had an opportunity to present any facts with reference to the legislation in this bill at all. It seems to me that before this policy was adopted a full hearing should have been had and the districts affected should have had an opportunity to present their side of the case.

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. SINCLAIR. May I have one minute more?

The CHAIRMAN. The gentleman from North Dakota asks unanimous consent for one minute more. Is there objection?

There was no objection.

Mr. SINCLAIR. I just want to say in that connection that the failure of the settlers on this project has been for two reasons: First, the payments were too high, more than they could possibly make, and were limited to too short a time; and second, farmers were not instructed with reference to irrigated farming. Now a new policy has been adopted and new ideas have come in, and this land has been found to be the best kind of sugar-beet land. They are now raising sugar beets. A sugar-beet factory has been erected in the city of Williston and the business will be put upon a paying basis.

Mr. RAKER. May it not be a fact that some big sugar company wants to buy out the whole thing and take it from these farmers at a sacrifice?

Mr. SINCLAIR. I would not like to say that. I think the committee has acted in good faith. I would not have in mind such a thing as the gentleman has suggested.

Mr. CRAMTON. You do not have to look so far away as that for an excuse. There has been irrigated in this tract 1,160 acres. None of the construction cost has been paid back. The land is situated where they believe in irrigation only by spells. In a wet year they think irrigation is not necessary. In a dry year they know it is necessary. The appropriation last year was \$105,000. My friend from North Dakota, I think, says there are 240 farmers involved. I do not know how that can be with only 1,160 acres, but I would rather give them \$500 apiece and close down the works than to continue operation as it has been conducted hitherto. Every year it costs, outside of construction costs, more to maintain than is derived from the project. I have the figures here. The average of four years in cost was \$84,000; collections, \$53,900; or a net loss to the Treasury of \$31,000 each year.

Mr. SINCLAIR. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. SINCLAIR. The gentleman has included in those costs some betterments.

As a matter of fact, in 1922, despite the adverse conditions, and the inclusion of certain sums for permanent improvements, the project came within \$7,286.21 of paying all expenditures upon it. The actual cost of operating and maintenance of this plant for the past six years is as follows:

1919,	\$44,266;	per irrigable acre,	\$6.61.
1920,	\$50,198;	per irrigable acre,	\$7.50.
1921,	\$39,852;	per irrigable acre,	\$5.96.
1922,	\$29,219;	per irrigable acre,	\$4.27.
1923,	\$28,795;	per irrigable acre,	\$4.31.
1924,	\$28,000;	per irrigable acre,	\$4.19.

These figures prove that the operating costs are being constantly reduced, and I do not think there is a doubt but that if the project can be continued it will soon be on a self-sustaining basis.

Mr. CRAMTON. One year there were some betterments. The truth is that the principal business we are in up there is not to furnish water for this tract of 1,160 acres. We are operating an electric-light plant for the town of Williston, and we are running a coal mine to get enough fuel to run our plant.

Now, the fact finding commission recommended that this project be wiped off of the slate. The language gives authority to sell or to lease, and it seemed to us very desirable that the Treasury be protected against any further losses there.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent to extend my remarks in the Record by putting certain figures in the Record.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to extend his remarks in the Record by inserting certain figures. Is there objection? [After a pause.] The Chair hears none.

Mr. CRAMTON. Under the leave given I present the following:

DEPARTMENT OF THE INTERIOR,
BUREAU OF RECLAMATION,
Washington, December 2, 1924.
Memorandum on Williston project

This project was authorized in 1906 to irrigate an area estimated at 10,753 acres.

Area actually irrigated, 1923.....	Acres 1,163
Area actually irrigated, 1924.....	1,160

A part of this area is a State experiment farm maintained and operated by North Dakota.

Total construction cost of project.....	\$498,782.87
Total net investment, including operation losses.....	852,763.93
Amount indebtedness written off.....	178,667.20

Disbursement vouchers, calendar year 1923.....	64,312.39
Collection vouchers, calendar year 1923 (mainly power).....	43,002.85

Loss.....	21,309.54
-----------	-----------

With this data before it the fact finding commission recommended the following:

"No. 55, Williston project: The history and prospects of this project do not justify its further operation by the Bureau of Reclamation. The committee recommends:

"The Williston project be appraised and sold and the losses incurred charged to the reclamation fund."

A report on this project, made by Andrew Weiss in October, 1924, contains the following:

"Continuance of operations by the Reclamation Bureau can only be done with the full knowledge and understanding that losses must be accumulated, because the cost per acre can hardly be expected to come to less amounts than five or six dollars per acre, and, judging from experiences on other projects where farmers are situated much more advantageously than here, such a charge would be prohibitive and could be borne only by those owners of suburban plots or near-by truck farmers who are operating under special conditions and do not follow a general or diversified system of farming.

"RECOMMENDATION"

"In view of the foregoing it would seem most desirable to effect a transfer of the works to the city by lease or sale with the proviso attached that service be furnished to those farmers who would choose to pay the cost of production of the necessary current to operate the pumping units needed for such purposes within the capacity of the plant. This plan will remove the present evils incident to mounting indebtedness of the project farmers, whose only hope for meeting them is by further appeals to Congress, and out of which usually develops a low regard for existing laws and obligations assumed thereunder, and a low estimate of, even a hostile attitude toward, the benefits so conferred."

ELWOOD MEAD, Commissioner.

DEPARTMENT OF THE INTERIOR,
BUREAU OF RECLAMATION,
Washington, December 4, 1924.

Hon. LOUIS C. CRAMTON,
House of Representatives, United States,
Washington, D. C.

MY DEAR MR. CRAMTON: In the financial statement on the Williston project sent you, we gave the expenses and income as shown by vouchers for a calendar year, which was different from the fiscal year. I am sending you three statements with this letter. One shows the operating expenses and income for three fiscal years, 1922, 1923, and 1924. You will note that for these three years the actual loss has varied from nothing in 1922 to nearly \$50,000 in 1924, in each case with no recognition of losses from depreciation. This also

shows the appropriation made and the unexpended balances for each of these three years.

This table, No. 1, shows nothing but operating expenses and income. I am sending another table, No. 2, giving the voucher transactions for four years, which shows the total expenditures and collections, and that includes expenditures on construction and betterments.

Table 3 is an explanation of the item shown as operation and maintenance deficit written off. We are unable to find any definite agreement as to the writing off, but in the agreement of 1919, the deficit stated is ignored in the new contract, no provision being made for its payment.

Sincerely yours,

ELWOOD MEAD, Commissioner.

Williston project—Operating expenses and income

Item No.	Explanation	Commercial power	Irrigation	Total
1922				
1	Operation and maintenance costs.....	\$41,317.26	\$31,026.41	\$72,343.67
2	Operating income ¹	82,100.33	20,243.34	72,343.67
3	Balance.....	\$10,783.07	10,783.07	
1923				
1	Operation and maintenance costs.....	40,852.85	37,713.66	78,566.51
2	Operating income ¹	49,570.46	10,687.83	60,258.29
3	Balance.....	\$8,717.61	27,025.83	18,308.22
1924				
1	Operation and maintenance costs ¹	46,897.73	23,477.01	70,374.74
2	Operating income ¹	45,127.61	279.73	45,407.34
3	Balance.....	1,770.12	23,197.28	24,967.40

¹ On accrual basis.

² In addition to the operating costs, fiscal year 1924, \$27,944.18 was expended for construction of a land pumping station replacing the pumping barge, to be repaid as supplemental construction.

³ Gain.

APPROPRIATIONS

Total.....	348,298.25	214,810.44	133,487.81
Average, 4 years.....	87,074.56	53,702.61	33,371.95

¹ As printed in the annual reports.

² This figure is the amount the expenditures are in excess of collections.

NOTE.—These figures include all transactions for the respective fiscal years for irrigation, commercial power, for both construction and operation and maintenance.

DEPARTMENT OF THE INTERIOR,
BUREAU OF RECLAMATION,
Washington, December 4, 1924.

MEMORANDUM

The item of \$178,667.20 shown as "Operation and maintenance deficit written off," Williston project, represents accumulated deficit to March 31, 1919, arrived at as follows:

Total operation and maintenance cost to Mar. 31, 1919.....	\$357,925.00
Less incidental operating revenues, such as rentals of buildings, temporary water rentals, etc.....	3,423.00
Net cost.....	354,502.00
Less:	
Operation and maintenance charges collected from water users to Mar. 31, 1919.....	\$10,965.00
Penalties on operation and maintenance charges collected to Mar. 31, 1919.....	46.00
Commercial power revenues to Mar. 31, 1919.....	164,823.80
Total income.....	175,834.80
Balance (deficit).....	178,667.20

By agreement of April 3, 1919, between the United States and the Williston irrigation district it was agreed that this district would pay to the United States the estimated construction cost of the project as announced by public notice of April 27, 1908, for the areas of irrigable lands shown upon farm-unit plats filed as part of such public notice and within the district boundaries, which amount was agreed to be \$290,803.74. The district also agreed to pay the full net cost of operating and maintaining the project from and after the date of execution of said contract of April 3, 1919. However, no provision is made for payment of the accumulated operation and maintenance deficit to that time. This deficit has therefore been considered a loss which eventually will have to be written off.

Mr. RAKER. Mr. Chairman, I move to strike out the last word. Mr. Chairman, this is one of the matters on which we spent some time before the Committee on Irrigation and Reclamation. The fact finding commission claimed there is some \$30,000,000 to be charged off, but it was only estimated. There was nothing concrete before the committee that the Government would lose a dollar. They told the committee that if the legislation were passed for which they asked there would not be a dollar lost to the Government and these people would get an opportunity to pay.

There has hardly been anybody in the West during this year or the last two years that has been able to pay. Practically every project named here is asking an opportunity to have a further extension of time, and the Congress passed a law extending the time of payment. Some of them have had an extension of two years and the balance three years, and most of them are going to get from 50 to 100 years in which to pay back the money they owe the Government. Yet they come in now for the purpose of ruining a reclamation project. I am not discussing the gentlemen on the committee, but I say there seems to be a deliberate purpose to do that, and without giving the committee having charge of this matter an opportunity to go into the facts and to show that the reclamation project is a success. They are coming here now and trying to abandon one project, to sell it or lease it, and make it appear that these reclamation projects are a failure. You have already legislated to give an extension of time on all the other projects, and every project for which you are appropriating money in this bill to-day will have time running from 20 years to 120 years.

You can not dispute the facts, and I think the committee ought not to permit it until we have a full and fair opportunity to investigate all of the facts relating to these projects. They ought not to be permitted to sell or lease one of these reclamation projects when a firm or corporation can come in and buy it for practically nothing and then turn around, improve it, and make half a million dollars out of it. It is not fair and it is not right.

The gentleman representing the district in which this project is located comes here and says these people want it, and it is simply a method by which the rest of the reclamation projects are to be squeezed out of existence, and to show you can not make a success of them. I hope the committee will not permit this to be sold and that it will permit an appropriation to be made so that it can be continued, and then this new legislation, which the fact finding commission says is so good, will go into operation.

Mr. SINCLAIR. Will the gentleman yield?

Mr. RAKER. Yes.

Mr. SINCLAIR. I will say to the gentleman that I am only asking for half as much as was expended on this project a year ago.

Mr. RAKER. Yes; and this would give your people a chance to live.

Mr. SINCLAIR. It would give them a chance to operate for a year, and perhaps find out what can be done.

The CHAIRMAN. The time of the gentleman from California has expired. The question is on the amendment offered by the gentleman from North Dakota [Mr. SINCLAIR].

The question was taken; and on a division (demanded by Mr. RAKER) there were—ayes 11, noes 17.

Mr. RAKER. Mr. Chairman, it is quite late, and I make a point of no quorum.

Mr. CRAMTON. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. SANDERS of Indiana, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having had under consideration the bill H. R. 10020 had come to no resolution thereon.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. SCHALL, indefinitely, on account of illness.

COMMITTEE VACANCY

Mr. LONGWORTH. Mr. Speaker, a vacancy exists on the Committee on the Merchant Marine and Fisheries due to the death of our former beloved colleague, Mr. Greene of Massachusetts. Mr. LEACH, of Massachusetts, has been elected to fill that vacancy in the House up to the 4th of March next, and I ask unanimous consent that he be assigned to fill the vacancy on the Committee on the Merchant Marine and Fisheries.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

ADJOURNMENT

Mr. CRAMTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 21 minutes p. m.) the House adjourned until to-morrow, Saturday, December 6, 1924, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

692. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Mulberry Creek, Lancaster County, Va. (H. Doc. No. 482); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

693. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation, "that the Secretary of War be, and he is hereby, authorized and directed to transfer to the Treasury Department for quarantine purposes that portion of La Costa, Fla., occupied by the Treasury Department as a quarantine station under revocable license from the War Department dated January 27, 1903"; to the Committee on Public Buildings and Grounds.

694. A letter from the Secretary of the Navy, transmitting statement of 36 claims paid during the fiscal year ended June 30, 1924, for damage to or loss of privately owned property, for which damage or loss men in the naval service or Marine Corps have been found to be responsible; to the Committee on Expenditures in the Navy Department.

695. A letter from the chairman of the Federal Trade Commission, transmitting the annual report of the Federal Trade Commission for the fiscal year ended June 30, 1924; to the Committee on Interstate and Foreign Commerce.

696. A letter from the Attorney General, transmitting the annual report of the Department of Justice for the fiscal year ended June 30, 1924; to the Committee on the Judiciary.

697. A letter from the Acting Secretary of Commerce, transmitting statement of disbursements, contingent expenses, Department of Commerce, and general expenses, Bureau of Standards, for the years 1922 to 1925, inclusive, also statement of expenditures under all appropriations for the support of the Bureau of Fisheries during the fiscal year ended June 30, 1924, statement showing typewriters, adding machines, and similar labor-saving devices exchanged by the Department of Commerce during the fiscal year ended June 30, 1924, in part payment for new machines used for the same purpose, and statement showing in detail travel performed by officers and employees of the department who traveled on official business from Washington to points outside of the District of Columbia (other than special agents and other employees who in the discharge of their regular duties are required to travel) during the fiscal year ended June 30, 1924; to the Committee on Expenditures in the Department of Commerce.

698. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of the Rio Grande at El Paso, Tex.; to the Committee on Rivers and Harbors.

699. A letter from the chairman of the Federal Power Commission, transmitting report giving the aggregate number of publications issued by the commission during the fiscal year ended June 30, 1924, also statement in detail of travel taken by officers of the commission to points outside the District of Columbia during the fiscal year ended June 30, 1924, and statement showing typewriters, adding machines, and other similar labor-saving devices purchased during the fiscal year 1924; to the Committee on Appropriations.

700. A letter from the Secretary of War, transmitting annual report of inspection of National Home for Disabled Volunteer

Soldiers for the fiscal year ended June 30, 1924; to the Committee on Military Affairs.

701. A letter from the Secretary of War, transmitting reports of the Chief of Engineers, the Quartermaster General, the Chief Signal Officer, the Superintendent of the United States Military Academy, and the War Department Supply Division of typewriters, adding machines, and similar labor-saving devices exchanged during the fiscal year 1924 as part payment for new labor-saving devices purchased; to the Committee on Appropriations.

702. A letter from the Secretary of War, transmitting report of expenditures on account of appropriations "Contingent expenses, War Department," during the fiscal year ended June 30, 1924; to the Committee on Expenditures in the War Department.

703. A letter from the Secretary of War, transmitting a letter from the Chief of Ordnance, United States Army, with statement of the cost of manufacture for the fiscal year ended June 30, 1924, at the several arsenals and at the Springfield Armory, Springfield, Mass.; to the Committee on Expenditures in the War Department.

704. A letter from the Secretary of War, transmitting a letter from the Chief of Engineers, United States Army, submitting abstracts of proposals received during the fiscal year ended June 30, 1924, for material and labor in connection with works under the Engineer Department; to the Committee on Expenditures in the War Department.

705. A letter from the Secretary of War, transmitting 481 reports of inspections of disbursements and transfers by officers of the Army, received in the office of the Inspector General during the fiscal year ended June 30, 1924; to the Committee on Expenditures in the War Department.

CHANGE OF REFERENCE

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 9715) granting an increase of pension to Louise W. Henderson; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 9867) granting an increase of pension to Blanche Bunker; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10047) granting an increase of pension to Mary E. Croshier; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 10049) granting an increase of pension to Emma L. Jesser; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 6845) granting an increase of pension to William Coleman; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. REED of West Virginia: A bill (H. R. 10348) authorizing the Chief of Engineers of the United States Army to accept a certain tract of land from Mrs. Anne Archbold donated to the United States for park purposes; to the Committee on the District of Columbia.

By Mr. KINDRED: A bill (H. R. 10349) to regulate the transmission in interstate commerce and through the mails of explosives of any description, or pistols, revolvers, or firearms of any description; to the Committee on Interstate and Foreign Commerce.

By Mr. REED of West Virginia: A bill (H. R. 10350) to provide for the completing, leasing, and operating the Muscle Shoals nitrate and power plant, and for the construction of such other power or coal reduction plants as may be required to supply the Army and Navy with explosives, to manufacture fertilizers for agricultural purposes, and to distribute electric power and fuel within a reasonable transmission radius of such plants, also to incorporate the Federal Power & Fuel Corporation, and for other purposes; to the Committee on Military Affairs.

By Mr. VESTAL: A bill (H. R. 10351) providing for copy-right registration of designs; to the Committee on Patents.

By Mr. WATSON: A bill (H. R. 10352) to extend the time for completing the construction of a bridge across the Delaware River; to the Committee on Interstate and Foreign Commerce.

By Mr. McDUFFIE: A bill (H. R. 10353) to amend section 200 of an act entitled "An act to consolidate, codify, revise, and reenact the laws affecting the establishment of the United States Veterans' Bureau and the administration of the war risk act, as amended, and the vocational rehabilitation act, as amended; to the Committee on World War Veterans' Legislation.

By Mr. LEA of California: A bill (H. R. 10354) placing first, second, and third class postmasters in the competitive classified service; to the Committee on the Civil Service.

By Mr. BRITTEN: A bill (H. R. 10355) amending the act of August 29, 1916, and repealing the third proviso of section 5 of the act approved June 4, 1920, for promoting efficiency in the line of the Navy; to the Committee on Naval Affairs.

By Mr. TAYLOR of West Virginia: A bill (H. R. 10356) granting the consent of Congress to the Huntington & Ohio Bridge Co. to construct, maintain, and operate a highway and street railway bridge across the Ohio River, between the city of Huntington, W. Va., and a point opposite in the State of Ohio; to the Committee on Interstate and Foreign Commerce.

By Mr. REECE: A bill (H. R. 10357) to provide for the national defense, for the production and manufacture of fixed nitrogen, commercial fertilizer, and other useful products, and for other purposes; to the Committee on Military Affairs.

By Mr. McLAUGHLIN of Nebraska: A bill (H. R. 10358) to establish an intelligent guidance of production, of marketing, of distributing, and of selling the basic commodities of American agriculture; to the Committee on Agriculture.

By Mr. NEWTON of Missouri: A bill (H. R. 10359) to release custodianized property; to the Committee on Interstate and Foreign Commerce.

By Mr. CABLE: Joint resolution (H. J. Res. 301) for the creation of a commission to prepare a constitutional amendment providing for the election and terms of President, Vice President, Senators, and Representatives; to the Committee on the Judiciary.

By Mr. WILLIAM E. HULL: Joint resolution (H. J. Res. 302) authorizing the Secretary of War to loan cots, bedding, and camp equipment, not including tentage, for the use of the Modern Woodmen of America Foresters at their national encampment, to be held at Milwaukee, Wis., in June, 1925; to the Committee on Military Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BLACK of New York: A bill (H. R. 10360) for the relief of William J. Finnerty; to the Committee on Claims.

Also, a bill (H. R. 10361) for the relief of the New York Canal & Great Lakes Corporation, owners of the steamer *Monroe* and barge 209; to the Committee on Claims.

By Mr. CLARKE of New York: A bill (H. R. 10362) granting permission to D. F. Wilber, a consul general of the United States of America, to accept a decoration from the Government of Italy; to the Committee on Foreign Affairs.

By Mr. COOPER of Wisconsin: A bill (H. R. 10363) granting an increase of pension to Katherine W. Hauns; to the Committee on Invalid Pensions.

By Mr. CRAMTON: A bill (H. R. 10364) granting a pension to Mary C. Simmons; to the Committee on Invalid Pensions. Also, a bill (H. R. 10365) granting a pension to Anne Donnelly; to the Committee on Pensions.

Also, a bill (H. R. 10366) granting an increase of pension to Harriet Vosburg; to the Committee on Invalid Pensions.

By Mr. CRISP: A bill (H. R. 10367) for the relief of John W. and Jesse L. Kennedy; to the Committee on Claims.

By Mr. CUMMINGS: A bill (H. R. 10368) granting a pension to Amy Creveling; to the Committee on Pensions.

By Mr. FOSTER: A bill (H. R. 10369) granting an increase of pension to Elizabeth Stedman; to the Committee on Invalid Pensions.

By Mr. FULMER: A bill (H. R. 10370) to authorize the Postmaster General to place on the retirement rolls of the Post Office Department, to receive the benefit of any laws heretofore enacted for the retirement of postal employees, the name of Warren C. Fairry, of Rowesville, Orangeburg County, S. C.; to the Committee on the Civil Service.

Also, a bill (H. R. 10371) to authorize the Postmaster General to place on the retirement rolls of the Post Office Department, to receive the benefit of any laws heretofore enacted for the retirement of postal employees, the name of Jeremiah W.

Wise, of Sandy Run, Calhoun County, S. C.; to the Committee on the Civil Service.

By Mr. HICKEY: A bill (H. R. 10372) granting an increase of pension to Mary E. Sherbondy; to the Committee on Invalid Pensions.

By Mr. HILL of Washington: A bill (H. R. 10373) to reimburse James Doherty; to the Committee on Claims.

By Mr. KEARNS: A bill (H. R. 10374) granting an increase of pension to Anne L. Fomolin; to the Committee on Invalid Pensions.

By Mr. KINDRED: A bill (H. R. 10375) to reimburse Henry Wolf, an inmate of the United States Veterans' Bureau Rehabilitation Center No. 2, Perry Point, Md., for losses sustained as a result of a fire in the barracks at that station on or about February 21, 1924; to the Committee on Claims.

By Mr. LEAVITT: A bill (H. R. 10376) for the relief of the heirs of Karl T. Larson, deceased; to the Committee on the Public Lands.

By Mr. LOZIER: A bill (H. R. 10377) granting a pension to Sarah E. McClaren; to the Committee on Invalid Pensions.

By Mr. McDUFFIE: A bill (H. R. 10378) for the relief of the owners of the tug *Bascobel*; to the Committee on Claims.

By Mr. McLAUGHLIN of Michigan: A bill (H. R. 10379) to provide for the retirement of Clarence W. Sessions, judge of the District Court for the Western District of Michigan; to the Committee on the Judiciary.

Also, a bill (H. R. 10380) granting an increase of pension to Lorinda R. Cooper; to the Committee on Invalid Pensions.

By Mr. MAGEE of New York: A bill (H. R. 10381) granting a pension to Mary E. Garrett; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10382) granting a pension to Mary C. Risley; to the Committee on Invalid Pensions.

By Mr. MILLIGAN: A bill (H. R. 10383) granting a pension to Elizabeth A. Norman; to the Committee on Invalid Pensions.

By Mr. NEWTON of Missouri: A bill (H. R. 10384) for the relief of Mary Guth; to the Committee on Invalid Pensions.

By Mr. RAGON: A bill (H. R. 10385) for the relief of Margaret Richards; to the Committee on Claims.

By Mr. RATHBONE: A bill (H. R. 10386) to provide for the military status of the world flyers; to the Committee on Military Affairs.

By Mr. SANDERS of Indiana: A bill (H. R. 10387) granting a pension to George W. Wolf; to the Committee on Pensions.

By Mr. SEARS of Florida: A bill (H. R. 10388) granting a pension to Rose Key; to the Committee on Invalid Pensions.

By Mr. STRONG of Kansas: A bill (H. R. 10389) for the relief of John H. Moore; to the Committee on the Civil Service.

By Mr. STRONG of Pennsylvania: A bill (H. R. 10390) granting an increase of pension to Clara R. Wilson; to the Committee on Pensions.

By Mr. SWOOPE: A bill (H. R. 10391) granting an increase of pension to Amanda Jane Chesnutt; to the Committee on Invalid Pensions.

By Mr. TREADWAY: A bill (H. R. 10392) granting an increase of pension to Jennie Miller; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10393) granting an increase of pension to Hortense F. Thayer; to the Committee on Invalid Pensions.

By Mr. VAILE: A bill (H. R. 10394) granting a pension to Josephine M. Buck; to the Committee on Pensions.

By Mr. VINCENT of Michigan: A bill (H. R. 10395) granting a pension to Amy Azelia Purdy; to the Committee on Invalid Pensions.

By Mr. WEAVER: A bill (H. R. 10396) granting an increase of pension to Frank Waters; to the Committee on Pensions.

By Mr. WHITE of Maine: A bill (H. R. 10397) granting a pension to Erwen C. Rose; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10398) granting a pension to Josephine E. Grant; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10399) granting a pension to Arria S. Sargent; to the Committee on Pensions.

By Mr. WILLIAMSON: A bill (H. R. 10400) for the relief of the Custer Electric Light, Heat & Power Co., of Custer, S. Dak.; to the Committee on Claims.

By Mr. ZIEHLMAN: A bill (H. R. 10401) granting a pension to Mary A. E. Howard; to the Committee on Pensions.

Also, a bill (H. R. 10402) granting a pension to Thomas Kirk; to the Committee on Pensions.

Also, a bill (H. R. 10403) granting a pension to James H. Osburn; to the Committee on Pensions.

By Mr. RATHBONE: Joint resolution (H. J. Res. 303) authorizing the award of a medal of honor and \$10,000 to each of the world flyers; to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

3094. By Mr. CLAGUE: Petition of residents of Sherburn, Minn., opposed to Senate bill 3218; to the Committee on the District of Columbia.

3095. Also, petition of rural mail carriers, Brown County, Minn., in favor of postal wage bill now pending in the Senate; to the Committee on the Post Office and Post Roads.

3096. By Mr. CULLEN: Petition of Board of Aldermen of the City of New York, urging favorable action on postal salary bill (S. 1898); to the Committee on the Post Office and Post Roads.

3097. By Mr. GOLDSBOROUGH: Papers to accompany House bill 10304, granting a pension to Lucy R. Robertson; to the Committee on Invalid Pensions.

3098. By Mr. KIESS: Evidence in support of House bill 3881, granting an honorable discharge to George P. Bailey; to the Committee on Military Affairs.

3099. By Mr. KINDRED: Petition of Board of Aldermen of the City of New York, favoring increase in the salary of postal employees (S. 1898); to the Committee on the Post Office and Post Roads.

3100. By Mr. O'CONNELL of New York: Petition of the Board of Aldermen of the City of New York, favoring the postal salary increase bill (S. 1898); to the Committee on the Post Office and Post Roads.

3101. By Mr. ROUSE: Petition of 300 citizens of Kenton County, Ky., against the passage of a compulsory Sunday observance bill (S. 3218) or the passage of any other religious legislation; to the Committee on the Judiciary.

3102. By Mr. TEMPLE: Testimony in support of House bill 10324, special bill in behalf of Mrs. Laura Crawford, widow of Samuel R. Crawford, Company D, Twenty-second Pennsylvania Cavalry; to the Committee on Invalid Pensions.

3103. By Mr. WEAVER: Petition of Asheville (N. C.) Chamber of Commerce, relating to appropriations for the Bureau of Fisheries; to the Committee on the Merchant Marine and Fisheries.

HOUSE OF REPRESENTATIVES

SATURDAY, December 6, 1924

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Almighty God, do Thou give us vision that we may arise to the high privileges of our daily tasks. Let each new day challenge us to nobler and better effort. Allow nothing to lessen the dignity and the value of our labors. May we understand that to give happiness and to do good are the chief anchors of the finest character. When perplexity arises, give us patience and help us to put aside all useless and hurtful things. Bless all institutions of our land that succor the unfortunate and that train the youth; and more and more may the dreams of freedom and fraternity be realized. Through Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

CHRISTMAS RECESS

Mr. LONGWORTH. Mr. Speaker, I offer the following concurrent resolution.

The Clerk read as follows:

House Concurrent Resolution 32

Resolved by the House of Representatives (the Senate concurring), That when the two Houses adjourn Saturday, December 20, 1924, they stand adjourned until 12 o'clock meridian, Monday, December 29, 1924.

Mr. LONGWORTH. Mr. Speaker, a few days ago I offered some observations on the adjournment which seemed to be advisable, and, if there is no objection, I move the adoption of the resolution.

The resolution was agreed to.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, one of its clerks, announced that the Senate had passed the following resolutions:

Senate Resolution 274

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. EDWARD CAMPBELL LITTLE, late a Representative from the State of Kansas.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Senate Resolution 275

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. SYDNEY E. MUDD, late a Representative from the State of Maryland.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Senate Resolution 276

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. WILLIAM STEEDMAN GREENE, late a Representative from the State of Massachusetts.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect to the memory of the deceased the Senate do now adjourn.

AGRICULTURAL APPROPRIATION BILL

Mr. MAGEE, from the Committee on Appropriations, by direction of that committee, reported the bill (H. R. 10404, Rept. No. 1034) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1926, and for other purposes, which was read a first and second time and, with accompanying papers, referred to the Committee of the Whole House on the state of the Union.

Mr. GARRETT of Tennessee. Mr. Speaker, I reserve all points of order, and I would like to ask if this will be the next bill to be called up?

Mr. MAGEE. I understand that it will follow the Interior Department appropriation bill, which is now being considered. Next Monday being District day, it will be called up on the next day on which appropriation bills may be considered.

INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. CRAMTON. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the Interior Department appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. SANDERS of Indiana in the chair.

The CHAIRMAN. The question recurs on the amendment, which the Clerk will again report.

The Clerk read as follows:

Page 73, line 2, after the words "North Dakota," strike out all the remainder of the paragraph and insert in lieu thereof the following: "For operation, maintenance, and incidental operations, \$50,000."

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota.

The question was taken; and on a division (demanded by Mr. SINCLAIR) there were—ayes 12, noes 26.

So the amendment was rejected.

Mr. RAKER. Mr. Chairman, I move to strike out the paragraph.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. RAKER: Page 73, beginning line 1, strike out the paragraph down to and including line 10.

Mr. RAKER. Mr. Chairman, may the Clerk read the paragraph?

The CHAIRMAN. Without objection, the Clerk will again read the paragraph.

The Clerk read as follows:

Williston project (formerly North Dakota pumping project), North Dakota: The Director of Reclamation is authorized, during the fiscal year 1926, or thereafter, to appraise the buildings, machinery, equipment, and all other property of whatever nature or kind appertaining to this project and to lease or to sell the same at public or private sale, on such terms and in such manner as he may deem for the best

interests of the Government, reserving the right to reject any and all bids. The proceeds from such lease or sale shall be paid into the reclamation fund.

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and amendments thereto close in 10 minutes.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent that all debate on this paragraph and amendments close in 10 minutes. Is there objection?

Mr. CLARKE of New York. Reserving the right to object, what is the necessity of taking up 10 minutes of the time of the House on this matter when it is so busy?

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. RAKER. Mr. Chairman and gentlemen of the committee, may I ask the gentleman from North Dakota a question? About what amount of money has been expended on this project?

Mr. SINCLAIR. In all about \$700,000.

Mr. RAKER. What would the gentleman estimate to be the value of the project?

Mr. SINCLAIR. Under normal conditions I think the project is really worth \$500,000 anyway.

Mr. RAKER. And there are about 200 farmers on the property.

Mr. SINCLAIR. One hundred and forty-four.

Mr. RAKER. I understand they can raise sugar beets there.

Mr. SINCLAIR. Yes.

Mr. RAKER. Now, this statement of the gentleman from North Dakota presents a case of exceptional importance.

Mr. SINCLAIR. Will the gentleman yield for me to read a telegram at this point?

Mr. RAKER. I will yield for the purpose, although my time is limited.

Mr. SINCLAIR. The project manager, I believe, is the best qualified man to determine the value of this project.

Mr. RAKER. I will ask the gentleman to put this in quickly, because I have so little time.

Mr. SINCLAIR. Then I shall put it into the Record.

Mr. RAKER. Oh, let the Clerk read it out of my time.

The CHAIRMAN. Without objection, the Clerk will read. The Clerk read as follows:

WILLISTON, N. DAK., December 5, 1924.

J. B. SINCLAIR,

House of Representatives, Washington, D. C.

Williston should be willing to pay cost of generating current plus 5 per cent for depreciation on portion of plant used and 6 per cent interest. This would mean rate of 5 to 5½ cents for energy delivered in Williston, or approximately actual generating cost for towns of similar size throughout North Dakota. State public utility commission could arbitrate rates. This would leave margin of eight to ten thousand dollars to apply on reduction to irrigation costs. If Washington overhead expenses were eliminated, per recommendations of fact finders, farmers must return about \$2.50 per year for every irrigable acre, which is not prohibitive on small intensively cultivated farms. Any plan for future should include immediate Government and railroad cooperation to place farmer settlers on excess lands; also on expenditure of about \$30,000 from appropriation in two years to reduce annual operation expenses about \$9,000. This is vitally essential, and if it can not be secured possibility of farmers paying out is very doubtful.

WM. S. ARTHUR.

Mr. RAKER. Mr. Chairman and gentlemen of the committee, this property can be handled at a profit, even for electric energy. Do not abandon it at this time. Give it a chance for one year without appropriation. Strike out this provision and it leaves this project to stand for a year on its own feet. Those people will come back next year and be in a position to make some showing. You ought not to abandon one of these reclamation projects without an opportunity on the part of the people who are interested to be heard. The people want the project to remain. There is a showing that you can get a profit from electric energy. Do not authorize it to be sold or dismantled. Do not authorize it to be sold to some large concern that will come in there and buy it for fifty or sixty thousand dollars and open up a plant worth a million for raising sugar beets, but give these farmers an opportunity and let them stay in the same position that they are in now for the next year. The Government will be at no expense, and then after a year of development, after a year of opportunity, after a year of presenting the matter they can then come here and Congress will be in a position to determine what to do. I think you ought not to abandon it, and I hope you will not.

Mr. CHINDBLOM. Mr. Chairman, will the gentleman yield?
Mr. RAKER. Yes.

Mr. CHINDBLOM. Has the project gone up in value a half million dollars? Did not the gentleman from North Dakota say a moment ago that it was worth a half million dollars?

Mr. RAKER. We have spent \$700,000 on it in money. There is the water right and the land, with the opportunity of a wonderful development. They have found out lately that they can successfully produce sugar beets there, when the land is properly irrigated, and now we are asked to dismantle this plant without an opportunity upon the part of the people interested to be heard. Do not permit this to be done.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. CRAMTON. Mr. Chairman, these are the facts. There are 1,160 acres being irrigated. If there are 150 farmers working the 1,160 acres, they ought to get out of it everything that there is in it. There has not been a year since the plant has been in operation that they have paid back the cost of operation and maintenance, to say nothing of construction charges.

Mr. SNELL. How many years has that been in operation?

Mr. CRAMTON. Ten years or more—15 years. The principal business there is furnishing electric light to the town of Williston. There has never been a year when there has not been a loss to the Treasury for furnishing water to those 1,160 acres. We come in here with this proposition, and they suddenly find, so the gentleman from California [Mr. RAKER] says, that they can run it next year without any help from the Treasury at all, and a telegram comes to the gentleman from North Dakota [Mr. SINCLAIR] from the farmers there saying that it is a good project and that it can be run successfully with no overhead in Washington. The town of Williston knows that it can be made a good project in furnishing electric power. The purpose of the paragraph is not to destroy it, it is not to let some great octopus get it but to let either those farmers have the plant who are sure that they can run it without any overhead charges in Washington, or to let the town of Williston have it, whichever thinks it is such a good thing, and to either sell or lease it to them on easy terms, and thus end this drain upon the Treasury of the United States.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

Belle Fourche project, South Dakota: For operation and maintenance, continuation of construction, and incidental operations, \$65,000: *Provided*, That the unexpended balance of \$100,000 allotted for drainage under this paragraph for the fiscal year 1923 is reappropriated and made available for such purpose for the fiscal year 1926.

PROOFS IN LAND MATTERS BEFORE UNITED STATES COMMISSIONERS

Mr. CRAMTON. Mr. Chairman, during the discussion on the land offices the other day some question was raised as to the jurisdiction of the commissioners to act in certain cases. I have here a brief memorandum from the General Land Office setting forth that matter very succinctly. I ask unanimous consent to extend my remarks in the Record by inserting it.

The CHAIRMAN. Is there objection?

There was no objection.

The memorandum referred to is as follows:

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, December 5, 1924.

Memorandum

Applications to enter public lands may be executed before any United States commissioner or the judge or clerk of any court of record, State or Federal. Final proofs and homestead and other land cases may be made before the same officials. As a matter of fact most of the applications are executed before United States commissioners and by them mailed to the land offices; likewise, most final proofs are made before United States commissioners. A large number of applications and final proofs are, however, made before clerks of courts of record. Applications and final proofs may not be executed before notaries public, but hearings in contest cases can be held before notaries public or any official authorized to administer oaths. It is estimated that from 70 to 75 per cent of the applications and final proofs are executed before officers other than the registers and receivers of district land offices. A large number of the United States commissioners have unofficial records, the data for which has been obtained by them or their agents, from the district land offices, and this is the reason that so large a number of public land claimants make their applications through these officers and depend upon them to attend to all details, including preparation of the application and transmittal of the appli-

cation and filing fees to the land office. Subject to the requirement that final proofs must be taken before the nearest accessible officer in the land district, if not submitted to the register and receiver personally, the official designated by the register to take homestead and other final proofs in any specific case is the person selected or suggested by the public land claimant. This matter is discussed very briefly on page 128 of the printed hearings.

The Clerk read as follows:

Salt Lake Basin project, Utah, first division: For construction of Echo Reservoir, and Weber-Provo Canal, and incidental operations, \$900,000: *Provided*, That any unexpended balance of any appropriation available for the Salt Lake Basin project for the fiscal year 1925 shall remain available during the fiscal year 1926: *Provided further*, That no part of this appropriation shall be used for construction purposes until a contract or contracts in form approved by the Secretary of the Interior shall have been made with an irrigation district or with irrigation districts organized under State law, providing for payment by the district or districts as hereinafter provided. The Secretary of the Interior shall by public notice announce the date when water is available under the project, and the amount of the construction costs charged against each district shall be payable in annual installments, the first installment to be 5 per cent of the total charge and be due and payable on the 1st day of December of the year following the date of said public notice, the remainder of the construction charge, with interest on deferred amounts from date of said public notice at 4 per cent per annum, to be amortized by payment on each December 1 thereafter of 5 per cent of said remainder for 40 years, or until the obligation is paid in full: *Provided further*, That the operation and maintenance charges on account of land in this project shall be paid annually in advance not later than March 1, no charge being made for operation and maintenance for the first year after said public notice. It shall be the duty of the Secretary of the Interior to give such public notice when water is actually available for such lands.

Mr. RAKER and Mr. LEATHERWOOD rose.

Mr. RAKER. Mr. Chairman, I make the point of order against the proviso commencing at the end of line 11 on page 74, down to and including line 10 on page 75. I yield to the gentleman from Utah.

Mr. CRAMTON. Oh, let us dispose of the point of order.

Mr. RAKER. Mr. Chairman, I call the attention of the Chair to section 825 of the Manual and the decisions there noted, one particularly rendered by the present occupant of the chair, that the limitation is not to be coupled with legislation not directly instrumental in effecting that reduction—which is not this provision.

The CHAIRMAN. The decision to which the gentleman from California has referred was by Chairman Saunders, of Virginia, and not the present occupant of the chair.

Mr. RAKER. That is quite true—I beg the Chair's pardon. Again, this not only provides for an appropriation in this bill but for an appropriation provided for in the bill that passed.

It not only provides for this year but it is general legislation to carry on this project that may run for 100 years, and it not only directs the discretion of the Secretary of the Interior but directs him what he is to do under this legislation. It is a code of laws governing the handling of reclamation projects that will run not only until this appropriation has been disposed of of \$900,000 but until the Government has been repaid for all money that may have been advanced heretofore or will be advanced before the completion of the contract.

The CHAIRMAN. Does the gentleman from Michigan desire to be heard on the point of order?

Mr. CRAMTON. Mr. Chairman, the proviso is simply a limitation on the expenditure of the money. The appropriation is for the construction of a reservoir and canals for irrigation purposes. Under the reclamation laws that money is to be returned to the Treasury. The proviso is in regard to the appropriation. It is not legislation of a general character. It has no application to any other project except the one mentioned in this item and applies to this particular appropriation of \$900,000. It provides that the money shall not be spent until a contract is made between the Government and an irrigation district. It is not general legislation, and has no effect upon any other project in existence or hereafter created. It has to do only with the appropriation which this paragraph proposes to make, and in order to safeguard the return of that money to the Treasury this limitation is necessary. For instance, to show the safeguarding of it to the Treasury, the proviso requires the creation of an irrigation district. The effect of that is that the charges due the Gov-

erment from year to year will be assessed as taxes and will be collected as taxes and turned back to the Government, so that without that proviso the very uncertain matter of the return of the money to the Treasury under the proviso becomes as certain as the collection of taxes. It has been said there are only two things that are sure in this world—death and taxes—and we have adopted one of those methods to insure the return of this money to the Treasury. Furthermore, the proviso carries the provision for collection of interest upon these deferred charges. That charge would not be collectible otherwise. If this proviso does not go into the item and the appropriation should be made without this proviso this money is used for 20 or 40 years without interest; but the proviso, which the gentleman from California has called attention to, provides for a charge of interest of 4 per cent upon the deferred payments. It is in the interest of protecting the Treasury and a necessary limitation upon this particular item.

The CHAIRMAN. Can the gentleman from Michigan cite the Chair to any authority covering this question of limitation?

Mr. CRAMTON. It has not occurred to the Chairman that any question would be raised about it, and I have not consulted the precedents.

The CHAIRMAN. The Chair is inclined to think it is not a proper limitation upon the bill, but the Chair would be glad to hear the gentleman.

Mr. CRAMTON. It is, I take it, within the general precedents in reference to limitations.

The CHAIRMAN. The gentleman from California [Mr. RAKER] makes the point of order against the proviso commencing in line 11, page 74, which is as follows:

Provided further, That no part of this appropriation shall be used for construction purposes until a contract or contracts in form approved by the Secretary of the Interior shall have been made with an irrigation district or with irrigation districts organized under State law, providing for payment by the district or districts as hereinafter provided. The Secretary of the Interior shall by public notice announce the date when water is available under the project, and the amount of the construction costs charged against each district shall be payable in annual installments, the first installment to be 5 per cent of the total charge and be due and payable on the 1st day of December of the year following the date of said public notice, the remainder of the construction charge, with interest on deferred amounts from date of said public notice at 4 per cent per annum, to be amortized by payment on each December 1 thereafter of 5 per cent of said remainder for 40 years, or until the obligation is paid in full: Provided further, That the operation and maintenance charges on account of land in this project shall be paid annually in advance not later than March 1, no charge being made for operation and maintenance for the first year after said public notice. It shall be the duty of the Secretary of the Interior to give such public notice when water is actually available for such lands.

It might be possible that that proviso might have been so worded as to make it a proper limitation, but it seems clear to the Chair the way it is drawn it is not a mere limitation upon this appropriation but it is a modification of existing law that goes on for many years, and the Chair will sustain the point of order against the proviso.

Mr. CRAMTON. Mr. Chairman, I move that the paragraph be stricken out.

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. CRAMTON: Page 74, line 6, strike out the paragraph.

Mr. LEATHERWOOD. Mr. Chairman—

The CHAIRMAN. Does the gentleman from Michigan yield?

Mr. CRAMTON. I will yield for the purpose of the gentleman offering an amendment.

Mr. LEATHERWOOD. Mr. Chairman, I desire to offer an amendment to the motion, or rather a substitute.

The CHAIRMAN. The gentleman from Utah offers an amendment as a substitute for the amendment of the gentleman from Michigan.

Mr. LEATHERWOOD. Beginning on page 74, line 6, I offer the following amendment as a substitute:

Salt Lake Basin project, Utah, first division: For construction of Echo Reservoir, Utah Lake Control, and Weber-Provo Canal, and incidental operations, \$900,000: *Provided*, That any unexpended balance of any appropriation available for the Salt Lake Basin project for the fiscal year 1925 shall remain available during the fiscal year 1926.

Mr. DENISON. Mr. Chairman, the amendment offered by the gentleman from Utah is the same as the language in the bill.

Mr. CRAMTON. Except three words are added.

The CHAIRMAN. The gentleman's amendment is not yet before the committee. The gentleman will send up his amendment and the Chair will then determine what sort of an amendment it is.

Mr. CRAMTON. Mr. Chairman, I shall be glad to proceed while the gentleman is preparing his amendment. I will speak on my amendment.

Mr. Chairman and gentlemen of the committee, the situation is this: The Salt Lake project relates entirely to land in private ownership. It relates entirely to land now in cultivation in areas of about 25 acres to a farm, as I understand. It is now under irrigation, but with insufficient water for its proper development. They have heretofore raised field crops, and they are desirous of turning to truck farming. They have water until early in July, and they can grow anything that can be grown up to that period. After that their water supply falls and they can not farm. So they desire a reservoir to be constructed, and a canal, to provide an additional water supply. With that additional water supply—and I am advised that as an engineering project it is feasible, and that the cost would be such as the project could bear—with that additional water supply they could work their crops through the whole season. It is therefore an additional facility for those farmers living in that region.

Mr. COLTON. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. COLTON. There will be a large acreage of new land brought under cultivation. It can be if this reservoir is constructed.

Mr. CRAMTON. Well, in the hearings the information given to me at that time was that there was no new area. But if so, it is land in private ownership, as I understand.

Mr. COLTON. Largely.

Mr. CRAMTON. This, then, is a proposition to eventually appropriate two or three million dollars to provide additional facilities for those farm lands in Utah. As I said the other day, if the farmers up in my district want to build a silo or provide permanent improvements on their farms they can go to the Government of the United States, its Farm Loan Board, and borrow money for that purpose. They borrow on terms amortized so that in 40 years the money borrowed is to be returned to the Government with interest at 4½ per cent.

Now, as this item now stands in the bill because of a point of order made by the gentleman from California [Mr. RAKER] it is proposed now, as the item stands, as a result of his action, to furnish these further facilities for those farmers in Utah, not as facilities would be furnished to farmers elsewhere throughout the country, through the Farm Loan Board, but to furnish them that money for a period that is uncertain, from 30 to 40 years, without interest.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. Not now; but I shall be glad to yield after I finish, if the gentleman from California will have enough regard for the Treasury to withdraw his point of order and let us put this bill through in a logical way.

Now, this paragraph as it now stands in the bill proposes that we loan two and one-half million dollars or more to certain farmers in Utah for 30 or 40 years, without interest. What logic is there in that? I protest against that. Whatever may have been the policy of reclamation, it never was intended to reach lands in private ownership and under private cultivation. There would be no logic in it.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. CRAMTON. Mr. Chairman, may I have five additional minutes?

The CHAIRMAN. The gentleman from Michigan asks unanimous consent for five additional minutes. Is there objection?

Mr. BLANTON. Reserving the right to object—which I shall not do—would it not save time and money to give to the gentleman from California [Mr. RAKER] and to the gentleman from Washington [Mr. SUMMERS] everything they want, and then proceed with the consideration of the bill?

Mr. CRAMTON. I do not know of anything that has been denied to the gentleman from California, and I do not know of anything we could do to make him happy. The gentlemen from Utah are not objecting to the terms of the bill. I want to do them that justice. But if this language had not gone

out on the objection of the gentleman from California the committee would not have offered that provision.

Now, the language having been taken out which safeguards the Treasury, I have moved to strike out the item. That language stricken out requires an irrigation district to be created. We can do best with one district, the charges being then collected as taxes, instead of dealing with several thousand farmers; and further, there is the provision for paying interest on the loan and the provision for the payment of operation and maintenance charges in advance, so that we will know that we will get them. Without those safeguards we would not have recommended the appropriation. Now that the appropriation has been stripped of all the safeguards we placed about it, and which ought to surround it, we are obliged to ask you to take the appropriation out of the bill.

What will happen then? I assume that the language of the appropriation is likely to be restored in another body, perhaps with the safeguards, and perhaps not. At all events, we shall have an opportunity in conference to safeguard the appropriation.

I hope the committee will accept my amendment and take the item out of the bill.

Mr. COLTON. There is an amendment to be acted on.

The CHAIRMAN. The gentleman from Utah [Mr. LEATHERWOOD] offers a preferential amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LEATHERWOOD: Page 74, line 6, insert: "Salt Lake Basin project, Utah, first division: For construction of Echo Reservoir, Utah Lake control, and Weber-Provo Canal, and incidental operations, \$900,000: *Provided*, That any unexpended balance of any appropriation available for the Salt Lake Basin project for the fiscal year 1925 shall remain available during the fiscal year 1926."

Mr. RAKER. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. The gentleman from Utah has the floor, if he wishes to proceed.

Mr. LEATHERWOOD. I do not care to. I reserve my right to be heard later.

Mr. RAKER. I ask unanimous consent that I may proceed for 10 minutes. Then I shall get through.

The CHAIRMAN. The gentleman from California asks unanimous consent to proceed for 10 minutes. Is there objection?

Mr. CRAMTON. Reserving the right to object, Mr. Chairman, is the gentleman going to be pretty good-natured during the remainder of the afternoon?

Mr. RAKER. I am always so.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. RAKER. This is not an intended effort on my part, even if I could, to in anywise delay or hamstring or affect the present appropriation bill. So far as votes are concerned, of course the committee will have the votes. There is no doubt about that. But in order that the committee may understand the matter, I wish to say that as a member of the Committee on Irrigation and Reclamation for some 14 years, lacking one short period, I have attempted to give the best attention I could to that legislation. Last session we had before the committee what is in that second deficiency bill, as amendment numbered 58, on irrigation and reclamation projects. That has passed the Senate and is before the President for signature. In that bill these people got about what they wanted, and it will provide for just what is in this bill now.

I did my best to get legislation that was workable. I think some of the features in the bill are the most vicious that could be placed in a piece of legislation which has for its purpose the government of reclamation projects. It was stricken out of the bill as it came to the House and to the Senate and was put in the second deficiency bill without any debate or consideration. There was no time for consideration. And before the committee, which was unusual, only three of the members of the fact finding commission appeared. They were unable to present the facts or were unable to get the facts upon which they presented these recommendations.

We think we have had some experience with and some knowledge of reclamation projects, and we wanted to assist in making them workable, so that the men on the projects might be able to make a living and pay out, and at the same time the Government receive repayment of every dollar it has invested in these reclamation projects.

Notwithstanding the statements of the chairman of the subcommittee having charge of this bill, I believe I stand for economy just as strongly as he does. Economy means one

thing applied to one territory, and another to another, according to the view of some people. Money properly expended for developing and building up homes is not extravagance.

The matter in this bill is not what the gentleman claims it is. There is no doubt on earth about it. The fact that it is not in my district or in my State should make no difference, and another one follows in relation to Oregon or Washington. I do not want to interfere with the people who have projects in other places, but there ought to be general legislation.

Mr. COLTON. Will the gentleman yield?

Mr. RAKER. Yes.

Mr. COLTON. Is it not a fact that general legislation has already been passed by the two Houses of Congress and is before the President for signature?

Mr. RAKER. Then, if that is true, and it is, why the statement of the gentleman from Michigan [Mr. CRAMTON], because that will be the law, and that will handle this \$900,000 if it is appropriated for this project. Is not that true?

Mr. COLTON. Yes. But if the gentleman will yield further—

Mr. RAKER. I yield for a question.

Mr. COLTON. This proviso is not inconsistent with that general legislation and, if the committee insists, will do no harm.
